

Curry County Alcohol and other Drug Prevention Education Program

ADPEP Quarterly Newsletter

Curry County Juvenile Department is working with Public Health to provide Oregon's Alcohol and Other drug Prevention Education Program (ADPEP) Plan in Curry County.

The county's goal this year will be to decrease binge drinking throughout the life span of those living in Curry County by 5%. Our objectives are to increase community awareness of the alcohol related harms to individuals, families, and communities associated with binge drinking and reducing the availability of alcohol to minors in Curry County.

The action tasks ahead will include gathering data on DUII and MIP citations in Curry County. We will review OLCC and local guidelines for community events. There will be an in-depth effort into gathering resources for preventive

efforts throughout the life span. Our focus will also be on educating the effects of alcohol use related to chronic diseases, and their related harms.

During the planning and implementation phase we will create a Resource Team that provides data, input, leverage and coordinates policy. There will be collaboration with stakeholders to maintain and promote prevention efforts in the community.

By April of 2021 a Prevention Resource Guide will be available on line and hard copy and a recommendation to the Board of Commissioners on community event policy adoptions where

alcohol is serviced in the presence of minors.

The Curry County Juvenile Department in partnership with Curry County Public Health will train, collaborate and work within the guidelines of Public Health Division of Oregon Health Authority.

Volunteers needed to serve on a Resource Team

Looking for individuals with an interest and or background in Alcohol and other drug prevention. Must be willing to meet via emails, virtual meetings and correspondence to provide data, input and assist in coordinating prevention resources and policy. Please contact us if you are interested. See contact information below.

Tobacco Prevention and Education Program (TPEP) offers materials to community

OREGON INDOOR CLEAN AIR ACT (ICAA)

The Indoor Clean Air Act (ICAA) protect nearly all people in Oregon from the harms of second hand smoke. The ICAA creates smoke, vapor

and aerosol-free public places and places of employment with the intent of protecting the health of employees and the public. Tobacco remains the main cause of preventable death and disease in the United States, including Oregon. Alisha Wibking-

Krohn, the coordinator for TPEP has developed several tools for the Oregon Clean Air Act for businesses and members of the community. These tools are free and can be ordered by contacting Coordinator Krohn. See back for samples.

Clean Air Act Flyer

**Indoor Clean Air Act
And
How To Report A Violation**

About the law The Indoor Clean Air Act bans smoking or vaping indoors where people work, public places and within 10 feet of all entrances, exits, ramps to exits or entrances, windows that open and air-intake vents.

How to report a violation The Oregon Health Authority (OHA) is responsible for enforcing the ICAA. On behalf of OHA, Local Public Health Authorities conduct educational and remediation activities with businesses.

The ICAA is a complaint-driven law. That means that enforcement activities only take place as a result of a complaint from a member of the public, including employees of the business.

Employees and the public may report violations of the law by completing a complaint by calling
