RE: AD-2001 County Zoning Code Parking Requirements – Extension Request

Dear Mr. Myer: Thank you for your prompt reply and request for an extension to address compliance with the County Zoning Code Parking Requirements. Your request to address and adhere to the County's parking standards at a later date is appropriate during this time of crisis with the coronavirus. Palm Industries is to be commended for the work you continue to do sanitizing existing business and keeping the few open businesses and employees in the community safe.

Under the circumstances it seems appropriate for you to have a six (6) month extension. This should allow time for the coronavirus to subside (prayerfully) in the community and for Palm Industries to be able to re-focus towards a more normalized business.

I do need to proceed forward with a decision on your land use application (AD-2001) as required pursuant to Oregon's land use statutes. The Governor has multiple requests from City, County and State agencies on her desk to relax the land use laws during this time of crisis but unfortunately she has not done so. Under these circumstances, I will proceed in approving your application with the parking requirements to be met within six (6) months of the approval date.

Please let me know if you have any questions regarding these land use matters.

Sincerely,

Becky Crockett
Curry County Planning Director
