RE: Traverse City - Alpena Reinforcement Project
Parcel No.:

Dear Landowner:

DTE is upgrading its natural gas infrastructure in your area. The Project will improve service reliability by reducing the risk of service interruptions during routine pipeline maintenance or in the unlikely event of an emergency. A project fact sheet is enclosed.

The first step in this process requires the project team to conduct field surveys. These surveys will include civil land survey, environmental, cultural or historical inspections, investigation of existing underground utilities, identification of existing buildings/infrastructure or other survey types. These investigations are required to help support design, state and local permitting requirements and ultimately safe and efficient construction of this pipeline.

This letter is to let you know that survey crews will begin working in your area starting in mid-April and extending into October.

DTE is committed to reliably and safely delivering natural gas to 1.3 million Michigan families and businesses in over 500 communities. This project is vital to this continuing mission. We look forward to working with you on this important reinforcement project.

Please do not hesitate, at any time during this project,, to contact us at 877-584-1332 or via email at [DTE TCARProject@contractlandstaff.com](mailto:DTE_TCARProject@contractlandstaff.com). We strive to return all communications within one business day.

Best Regards,

DTE Gas Company
