VILLAGE AND METRA PARTNER
TO REPLACE THE GLENCOE TRAIN DEPOT FLOOR

(Glenco, Illinois) — The Village of Glencoe and Metra are working in partnership to replace the maple hardwood flooring in the interior of the Glencoe train depot located at 724 Green Bay Road. The investment in the depot is being made possible by a $22,000 grant from Metra awarded to the Village in February 2017.

The Village has contracted with Lux Flooring, Inc. of Barrington, Illinois to conduct the installation, which will require the depot station to be closed during the week of Monday, October 16 through Friday, October 20. Metra will continue to provide train service to the Glencoe station during the depot closure, and will provide informational updates on their website (www.metrarail.com), social media and audio messages at the station.

The depot of the Glencoe Metra Station was originally constructed in 1891 and is used by over 600 commuters on the Union Pacific North line daily. Metra has partnered with the Village on similar maintenance efforts recently such as the exterior building repairs conducted in 2015, which involved extensive restoration of the stone base, and tuckpointing of the upper wall and chimney.
