

**Safety Guidance for Residents**

The City continues to follow certain safety protocols at the Recycling Center to keep residents and City employees safe.

- Residents are encouraged to remain in their vehicles. Please do not visit the Recycling Center if you have COVID symptoms or are under quarantine.
- Residents should maintain a six-foot social distance buffer and wear face coverings, when conversing with Recycle Workers.
- Please place materials to be recycled in the hatchback or trunk area of the vehicle.
- If possible, unlock/open the trunk from the interior of your vehicle.
- If you do not have remote access to open your vehicle's trunk, you may exit the vehicle, manually open the rear access, and then re-enter your vehicle.
- City staff will unload the materials and close the trunk.
- Place small, loose electronics or foam in a bag to make drop-off quicker and easier.
