

Lee County's Storm Water Program Update

Lee County has a National Pollutant Discharge Elimination Systems (NPDES) Permit for its storm water program. As required by the new NPDES Permit, the County has initiated an effort to update its Storm Water Management Program (SWMP) Plan. The SWMP Plan describes the activities performed by the County to help improve the quality of storm water discharged from the storm sewer system. The County will post a Draft SWMP Plan on the County's website for public review and comment for a 30-day period beginning on February 15, 2022.

If you would like to provide comments to the County, please send them to StormWaterPlan@leeco.us
