

# Statewide Health Improvement Partnership

Since 2009, SHIP has worked to create healthier communities, reduce healthcare costs, and prevent chronic disease by expanding opportunities for physical activity, healthy eating and tobacco-free living. SHIP also funds communities to serve the elderly by helping delay the onset or slow the progression of dementia.

SHIP supports local projects in all **87 counties** and **10 tribal nations**. More than **5,200 partner sites** are engaged in helping people make healthy choices across the state.

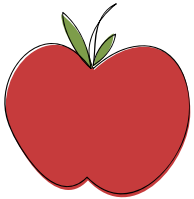

## Between 2016 and 2018, SHIP:

Helped to establish fall prevention programs in **76 communities**, reaching more than **270,000 elderly Minnesotans**.<sup>1</sup>

Supported smoke-free policies in **1,000 multi-unit properties**, reducing exposure to secondhand smoke for nearly **84,000 Minnesotans**.<sup>1</sup>

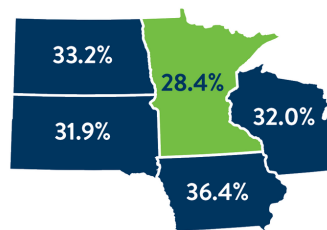

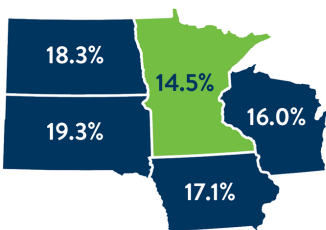

Helped to expand or establish new farmers' markets, increasing access to healthy, local foods for nearly **680,000 Minnesotans**.<sup>1</sup>

Influenced community planning efforts to create safer, more accessible places and spaces for more than **4.4 million Minnesotans** to walk and bike.<sup>1</sup>

**SHIP is contributing to lower rates of obesity and commercial tobacco use and saving Minnesota health care costs.**

Minnesota's adult smoking rate is at a record low.<sup>2</sup> Minnesota's adult obesity rate is firmly below our neighbors.<sup>2</sup>

**\$365 million**

in spending was averted since 2011 by putting the brakes on rising adult obesity rates.<sup>3</sup>

**\$252 million**

in spending was averted since 2011 by accelerating the drop in adult smoking rates.<sup>3</sup>

1. Reach Data: Minnesota Department of Health, Office of Statewide Health Improvement Initiatives (OSHI), 2019

2. Map source: CDC, BRFSS, 2017

3. Spending averted: National cost studies adapted for Minnesota by the Minnesota Department of Health and were used to generate estimates. For additional information visit [www.health.mn.gov/ship](http://www.health.mn.gov/ship).
