REPORT OF EXECUTIVE DIRECTOR:

Executive Director Adler reported:

We have a meeting later today with the Granite City Treatment plant Board. Commissioner Sawicki and I have worked very hard on getting a proposal we could live with this quarter.

The United States Army Corps of Engineers (USACE) is scheduled our levee inspections for August 15, 2018. We did not have an inspection last year, so we are working hard to have everything look good for this one.

President Brinza “How is it looking, do we feel good about inspection?”
Superintendent Fancher responded we are seventy five percent ready. Most of it now is getting everything cut. We have moved mowers from Madison County to St. Clair County to help get it done. Some minor things that we were written up for, two of them were taken care of yesterday by Superintendent Presswood. We will be ready for the inspection.

Executive Director Adler continued:

The arbitration is still in process with the employees that were laid off, but it seems to be going well.

We had some significant power problems from the last storm. A lot of our pump stations were out of power for twelve hours. It created a substantial amount of overtime for us. The only damages we had were at the CNV pump station. This shows us that keeping Horseshoe Lake low has saved us again.

The billing change we are trying to put together I would like to schedule that for some time around December.

Executive Director Adler asked that the Superintendents give their reports.

Superintendent Fancher reported:

The tuck pointing at Chouteau, Nameoki and Venice (CNV) station is half way done.

We are mowing everywhere now and grating roads. We are checking items off the list of deficiencies daily.

I spoke with a man named Tom who will be handling the USACE inspection and it will begin the week of August 13, 2018.

Foreman Hillman presented his report:
Superintendent Presswood reported:

We have moved the heavy equipment from the interior to the front levee. I have one guy out spraying and we are using one hundred gallons a day to make sure we keep the levee maintained for the inspection coming up.

REPORT OF LANSDOWNE OFFICE MANAGER:

Ms. Worthen reported:
REPORT OF ENGINEER:

We applied for the Illinois Environmental Protection Agency (IEPA) eleven million dollar facility plan project, hoping to get sixty percent loan forgiveness. It is making its way through the review process.

We had a meeting with Terminal Railroad regarding the deep cut off wall that did not get funded this cycle. They own most of the land and we need easements from them, the meeting went very well.

We met yesterday on changing the billing. I believe keeping the billing cycle pretty much the same but adding line items might work.

REPORT OF ATTORNEY:

Attorney Craney reported:

We have the ongoing litigation on the Greathouse lawsuit regarding the Open Meetings Act. The Judge agreed with her, but we are now in the stage of talking about the damages. We have an upcoming hearing.

The last meeting I was asked to look at the possibilities of surcharges or fees on the Lansdowne bills. It is my opinion at this time that it can be done. Some Ordinances would have to be passed. I wanted to take a look and make sure there was not a statue prohibiting this and I did not find one.

The CNV issue I have put on the agenda today, I do not think we need to vote on anything today. They will need to pass an Ordinance and file with the Circuit court that allows them to dissolve. The only catch is they will transfer their property over to us and we need to figure out how we will accept the property.

I will discuss more in closed session.
