Resistance to change
Vision Based on Identity

• Oceanfront
• Historic Main Street
• King’s Highway
• Arts District is the bridge that connects downtown
• Vision developed for each area
Vision Statements

Oceanfront Vision Statement
The Oceanfront is a vibrant, safe and accessible year-round destination for locals, metro residents and visitors. New family attractions, parks, an improving food scene and new/restored motels are drawing visitors in record numbers. The extended Boardwalk links up Withers Swash, the Oceanfront and 14th Avenue North to residential areas and close in neighborhoods east and west of King's Highway. The energy of the Oceanfront now spreads in three rows.

King's Highway Vision Statement
King's Highway corridor has been tamed, softened and shaded. New streetscapes and intersections calm traffic and improve safety. Improved landscaping requirements have greened the street. Changing public art at key intersections creates a cool vibe and provides visual landmarks for visitors. This corridor now has Myrtle Beach identity.

Historic Main Street Vision Statement
Broadway and Main Street, the historic heart of downtown, is flourishing. Empty nesters, young couples and families are living, working and playing along the street. Most neighbors in the revitalized residential areas surrounding downtown just walk or bike to Broadway on new greenways, trails and sidewalks. Small independent services, professional offices and retailers are taking hold. Locals have reclaimed "Main Street".

Arts District Vision Statement
The Arts District is the perfect weave of arts, culture, craft and creativity. It draws locals and visitors year-round with live performances, craft beers/spirits, a small food hall and market in unique and historic structures. Across King's Highway, the old pavilion is a lively new mixed-use destination that delivers thousands of daily visitors.
Major Opportunity Sites & Areas of Focus
Top Five in Five
Preliminary Recommendations
#1 – City Square, Broadway Street and the Arts District

Develop a capital improvement program, development strategy and overall plan of action for the City Square, Broadway Street and the Arts District to guide and ignite the development of a vibrant residential and cultural arts experience in Myrtle Beach.

- Concentrate civic and cultural activities to attract residents and visitors. Great destinations build the foot/visitor traffic to attract food, retail and service providers.
- New Rail to Trail link connects all the way across town to the Intracoastal Waterway. Creates a safe bike/ped route right into the heart of the Square.
- Realign the downtown grid to ease traffic flows, improve the ped experience and remove confusion. Close coordination on U.S. 501 alignment is critical.
- Develop a shared parking regulatory structure to limit parking investments.
- Prepare a detailed transportation and infrastructure evaluation for capital planning.
- Prepare a public and private investment strategy to provide the maximum return on investment.
- Explore the creation of a Business Improvement District.

Big unknown is what the redeveloped former Pavilion site may generate?
Create an urban design manual that establishes standards for public and private development in downtown by district. Establish your community’s vision and regulatory framework for future development.

- **Urban Design Standards** guide for the implementation of complete streets in downtown – especially along 2\textsuperscript{nd}, 5\textsuperscript{th}, 8\textsuperscript{th}, 9\textsuperscript{th} and 14\textsuperscript{th} Avenues North.
- Detailed landscape standards to guide the greening of the Oceanfront and King’s Highway.
- Identify potential National Historic Districts to leverage tax credits and preserve the built history of Myrtle Beach.
- Encourage ground level active uses to support lively sidewalk activity and great pedestrian experiences.
- Development concepts and options that illustrate ways to pull energy from the Ocean front inland.
Green Corridors and Complete Streets
Corridor Plans Overview – 2nd, 5th, 8th, 9th and 14th Avenues North

- Implement a Complete Streets Policy – on these streets peds and bikes have priority.
- Each street comes with a new public space/square along Ocean Blvd.
  - Adds value to neighboring sites. Focuses higher density development around them.
  - Provides relief from surface parking and narrow sidewalks along Ocean Blvd.
  - Can be acquired over time as sites become available.
  - Provides opportunity for each corridor to define an identity - arts, events, fountains, and landscaping.
- Use Setback Policy to create wider green spaces along the streets. A 20’ setback on both side creates a 120’ wide public space along each street.
- The concepts Illustrate various ways to pull energy from the Oceanfront inland. Uses strategically located parking structures to open existing surface parking for redevelopment.
- Any one of these development models could be exchanged with another corridor. They are NOT meant to illustrate actual development schemes.
- Each corridor connects a potential future Destination Development Site to the Oceanfront and Downtown.

Conduct a regulatory improvement process that removes barriers to desirable businesses, activities and uses that will help create an active and vibrant downtown. Make it easy to do what you want.

- Establish a committee made up of business owners, property owners, developers, preservation groups, event planners, and others to guide the discovery.
- Create a focused process to uncover the most impactful regulatory changes (zoning, codes, licensing, etc.) that can easily be implemented during the first year – look for those regulations that have a high private cost and low public benefit, are confusing or not easily enforceable.
- Make it a simple process for establishing things you want to encourage like outdoor cafes, small scale sign changes, secure event approvals, shared parking requirements.
- Bring forth a city-initiated improvement package in one action.
Develop a comprehensive strategy to improve the public perception of downtown through the enhancement of public safety, building conditions, community appearance and pedestrian, bicycle & traffic safety.

- Develop a communications plan/strategy to address misconceptions of reality.
- Consider a range of tools enabled by State statute to improve the basic indoor condition of rental units and hotel rooms. Enforce a set of minimum standards by use and in targeted areas.
- Develop a companion strategy to incentivize the rehabilitation/redevelopment of underperforming, neglected and abandoned properties in downtown.
- Continue working on CPTED initiatives and explore grant incentives for targeted improvements.
- Identify the worst performing vehicle intersections for significant safety improvements that reduce conflicts, accidents and injuries.
- Implement a coordinated Wayfinding strategy for all of downtown.
#5 - Leverage Public Assets in Downtown

Create a development strategy and financial model that seeks to maximize the return on investment for all city owned assets in downtown. Leverage public projects to attract people, private investment and value in downtown.

- Develop a full inventory of municipal real property assets within downtown. Have appraisals conducted on surplus property.
- Time any sale of public assets in such a way to add value to other properties in the portfolio.
- Establish a list of city priorities for evaluating potential private development proposals on city owned property.
- Develop an evaluation matrix to determine the financial strength of proposed private development on city owned property.
- Prepare the groundwork to take advantage of state and federal incentives (opportunity zone, historic tax credits, etc.) Create new federal Historic Districts in ocean front, downtown and adjacent neighborhoods.
City Owned Property Map
Around Superblock
Next Steps:

R2019-020 – Adoption of Downtown Masterplan &
Downtown Plan Implementation Action Plan - Phase 1
3-12-2019

• **Infrastructure:**
  - Develop a plan for the abandonment of the streets caused by the realignment of 501, the transfer of streets from the State system to the City system, and the disposition of surplus properties created by the realignment.
  - Develop standards for the streets named in the Master Plan by district.

• **Funding:**
  - Analyze creation of a Business Improvement District along the Oceanfront, to include, for the purposes of establishing a base-line, statistical data on last 3-5 year trends. This data should include the levels of sales tax, property tax, hospitality fees, business license fees, admissions tax, accommodation tax collections, and construction permits pulled and value, etc.
    - Analyze the funding potential of a Tax Increment Financing District.
    - Complete analysis of city owned properties eligible for historic tax credits and opportunity zone tax incentives.
    - Prepare a 5-year projected financial plan to describe impact of the proposed public projects vs. private reinvestment.

• **Incentivizing Development:**
  - Begin designating Historic Districts and structures that may qualify for historic tax credits.
  - Develop an incentive program to assist property-owners to meet new development standards.
  - Develop a matching grant program to incentivize property-owners to participate in the CPTED element of the Public Safety Improvement Plan.
Next Steps:

R2019-020 – Adoption of Downtown Masterplan &
Downtown Plan Implementation Action Plan - Phase 1
3-12-2019

• Property Inventory and Assessment:
  o Conduct an inventory of all City owned properties in the subject area.
  o Identify all ordinances, zoning, Comprehensive Plan elements, and other relevant plans that need amendment to conform to the Downtown Plan.
  o Develop a proposal to designate the various districts within the study area.

• Design Issues:
  o Select an architect to design the public buildings and spaces in the proposed Arts District including the City Square area.
  o Begin work on building design standards, with a companion program to assist the property owners in meeting these standards.

• Development Proposal Review:
  o Find a partner to help guide the City through Plan implementation (e.g. provide technical advice (including an opportunity zone resource), recommendations for other experts, write RFQ/RFP’s, etc.).
  o Develop a process for vetting developers.
  o Develop a process for vetting development proposals.
