The General Fund is a conglomerate that provides the core, tax-supported activities of the City. The General Fund includes the departments of Administrative Services, Development Services, Fire, Police, Parks/Recreation, Riverside Zoo, Scottsbluff Public Library, and non-departmental expenditures. These activities are grouped in the General Fund because, while they each do generate some revenue, they cannot support the full extent of their operations on the revenues they raise.

The General Fund of a City is often its budgetary focus and is the City fund able to be used for the most flexible and diverse purposes.

The General Fund is supported significantly by sales tax receipts and electric system lease payments (via transfer); other significant funding categories include state-shared, franchise payments, and user fees/charges.

Among other specific duties, department staff members assist citizens with necessary permits and development plans, review building plans and plats, keep planning and zoning ordinances current, work with the City prosecutor to enforce the Scottsbluff Municipal Code, and provide information and assistance to economic development prospects.

In this budget year the Development Services Department will continue to assist in the development or management of specific projects to include, but not limited to, the following items and/or issues: a) expansion of inter-local agreements; b) integrate GIS within department activities and use with issuing of building permits and tracking inspections; c) maintain and improve the City's compliance with the federal Flood Insurance Program; d) inventory of existing condition of infrastructure; e) impact development fees to pay for new infrastructure; f) policy for dedication for future infrastructure or land; g) working with the new storm water ordinance to make sure new construction will be in compliance with storm water guidelines. h) promotion of innovation to publications/cities/organizations; i) regionalism issues; j) participate in continued opportunities to integrate planning activities and infrastructure with Gering; k) participate in the strategic development of statewide, regional, and local water resource management and legislation; l) update development and zoning policies, procedures and codes; m) issues relative to community aesthetics.

Planning and organization efforts for these and other projects are contained within the proposed departmental budget.

**Mission Statement**

The Scottsbluff Police Department will maintain order, preserve and protect the life, peace and property of citizens of the City of Scottsbluff by enforcing the laws of Nebraska, without favor or prejudice, and working cooperatively with the public to provide a safe community, continuously striving to enhance the quality of life for all citizens.

The Scottsbluff Police Department strives to provide services for all individuals through aggressive enforcement efforts and community relations programs. In order to provide effective, courteous and professional services, the Department has prioritized various functions to include:

**Operations** – Officers respond to calls for service from the public, in addition to working cooperatively with other government agencies. Patrol Officers often encounter situations that require expertise and knowledge in recognizing and responding to social issues within the community. Societal standards present challenges that impact public safety and quality of life for all individuals living and visiting Scottsbluff. Training of personnel is paramount as it relates to addressing such issues as domestic violence, criminal investigations and increasing cyber-crime related activity.

**Training** – The Department strongly supports career development within all sections of the organization. Personnel frequently address complaints or questions from the public and personnel must be prepared to de-escalate tense and frustrated individuals, yet casually guide those seeking assistance. State law mandates sworn personnel receive annual training and certification in various disciplines, to include firearms and domestic violence training. Investigative and patrol personnel benefit from specialized training in areas such as drug recognition, crime scene processing and interview techniques.

**Specialized Services** – The Department supports and maintains a Specialized Weapons and Tactics Unit (SWAT) and a Bomb Disposal Unit. Current training and certification is a priority within those units. The Department also maintains a School Resource Officer position and a K-9 program. All of these units are critical to the law enforcement function.

**Emergency Management** – The Region 22 Emergency Management Director receives superintendence from the Police Chief. Region 22 encompasses Scotts Bluff and Banner Counties. Emergency preparedness and response to critical incidents is a priority for this position.

**Police Services** – Efforts continue to be made in evaluating the cost effectiveness, necessity and acceptability of the blending of the Scottsbluff and Gering Police Departments. The Department also moved into a new facility and now shares space with the Fire Department and Region 22 Emergency Management. Region 22 offices were re-located from the Scotts Bluff County Administration Building. Sharing of the same office workplace areas should greatly improve operations within the departments.

**Technology** – The Department has commenced transitioning to a management software program which greatly enhances interoperability with other local law enforcement agencies and the Scotts Bluff County Consolidated Communications Center. Connectivity in addition to information accessibility to data bases through Mobile Data Terminals for sworn personnel will be phased in dependent on funding sources.

**Community Policing** – The Department continues to develop Neighborhood Watch Groups and solicits volunteers into its Volunteers In Police Service program (VIPS).

The Regional Library Fund was established many years ago to handle state and federal funds reimbursing the library for contractual services provided to other libraries in the Panhandle area and as reimbursement for being net lenders in cooperative interlibrary loan activities. Grant funds and contractual funds are now included here. Any balances in this fund are carried over to the start of the next fiscal year and a small portion of the balance supplements the regular library budget in lean years.

**Mission Statement**

The Staff of the Transportation Department of the City of Scottsbluff are responsible for providing prompt, professional and efficient service to the citizens of Scottsbluff and strive to maintain the best street network possible with public safety being of the highest priority.

The Transportation Fund provides for the operations of the Transportation Department. The Transportation Department is comprised of a director, a foreman, five heavy equipment operators, three motor equipment operators, three maintenance workers, a maintenance mechanic, and a clerical technician.

The Transportation Department is responsible for street repairs from crack-sealing to snow removal to replacement. The department paints striping for streets and crosswalks, sweeps streets, installs signs, repairs signal lights, installs holiday decorations, barricades streets and alleys, blades unsurfaced streets and alleys, mows public rights-of-way, controls snow and ice on roadways, controls mosquitoes, repairs catch basins, gravels unsurfaced streets and alleys, and repairs curbs and gutters. The department also compiles various reports, such as lane-mile, inventory, one- and six-year street improvement plans, and handles citizen requests in a timely manner.

The Transportation Department will continue their inter-local agreements for painting and sweeping with the Village of Terrytown. We will also be converting our records and drawings to the GIS system which will allow us to track street maintenance on computer.

We will continue to chip seal residential streets and work on mill and overlay of mains throughout town.

The Special Projects Fund is a “catch-all” fund for projects which do not fit neatly into other funds. Typically, projects in this fund are the result of reimbursement grants, transfers from other funds, or other revenues which are specifically tied to a particular expenditure. A significant sum is usually included in the “Miscellaneous” expenditure and revenue accounts of the fund to allow any unanticipated activity to fit under the authorized budget.

The Economic Development receives revenues and funds projects as part of the City's LB840 economic development program. This program, authorized under the Local Option Municipal Economic Development Act, allows sales tax receipts to be specifically earmarked for economic development activities. The intent of the program is to create jobs in and around Scottsbluff. Eligible businesses include those in manufacturing, interstate commerce and telecommunications; moneys may be used to provide job credits, buy land, and retain technical expertise on behalf of an eligible business.

The LB840 program is administered by the City Manager, who receives guidance and oversight from two citizen committees. The City Council retains the final authority for disbursement of funds. The LB840 program sunsets in October, 2015.

The CDBG funds are administered through the Community Development Division of the Development Services Department. The division provides grant administration services for federal, state and local grant projects. Primarily, the division prepares applications for CDBG funds to be used in the comprehensive neighborhood revitalization of our blighted neighborhoods. The department conducts all phases of grant administration from approving applications to bidding projects, monitoring construction, completing financial records, and final inspections.

The CD Division will assist with community meetings and attitude surveys to determine the projects and areas that need assistance. These projects generally fall into the categories of housing rehabilitation, neighborhood revitalization and public works. The division also administers economic development and rental rehabilitation revolving loan funds. The Nebraska Department of Economic Development monitors all CDBG activities.

The Wastewater Fund supports the operation of the Wastewater Department which is responsible for the management and supervision of the City's waste flows, infrastructure and equipment. The Wastewater Department operates and maintains a 2.5 MGD activated sludge, aerated lagoon treatment system. Preventative equipment maintenance is performed by staff on more than 300 items to keep the equipment and treatment process at maximum efficiency.

In House Laboratory - Our employees perform sample analysis and process control in our in-house laboratory. An average of 600 samples are collected each month at various points in the treatment process to accurately examine the effectiveness of treatment and make necessary changes to the process as the analysis dictates. Our Plant staff handle analysis, reporting the other regulatory requirements associated with the City's National Pollutant Discharge Elimination System Permit.

Sludge and Biosolids Processing – Our treatment involves an extensive sludge process using a polymer feed system, activated sludge tanks, belt filter press and pumps. Sludge is separated from the treatment process, aerated, pressed, treated and dewatered to produce cake solids. Cake solids are transported to an asphalt pad for drying and curing. Solids are turned several times and mixed with amendments during the drying process. 200 Tons of compost are processed on an annual basis. This compost operation requires a separate permit based on EPA 503 regulations which is managed by our Wastewater Department.

Collection System – The Wastewater Department is responsible for approximately 90 miles of sanitary sewer lines and 1,815 manholes. An extensive sewer collection system cleaning and jetting maintenance program is being established for the FY2005/06 budget to begin jetting and cameraing the entire collection system. In addition, the Department will locate, uncover and raise manholes to be accessible at all times. In 2005, this Department established and is enforcing requirements of a Fats, Oils and Grease Program to assist in maintaining our collection system.

The Wastewater Fund supports the operations of the Stormwater Collection System by placing revenue in a special fund to support Stormwater. Additionally, the Wastewater staff are involved with cleaning stormwater lines and permit requirements.

The Wastewater Fund supports the City's Geographic Information Systems (GIS) Department which provides valuable mapping and data collection for the Wastewater facilities and collection system.

The Water Fund supports the operations of the Water Department which is responsible for the management and supervision of the City’s public water supply and infrastructure. The Water Department is charged with adhering to the Nebraska Department of Health and Human Services Regulations Governing Public Water Systems, Title 179. Water Wells and Storage Towers – The employees of the Water Department handle the control, maintenance, operation and daily monitoring of 12 public water wells equipped with chemical injection of Sodium Hypochlorite for system disinfection. The combined pumping capacity for the City’s system is 14,100 GPM. Five storage towers are also supported by this fund which are checked and maintained daily. The combined storage for the City is 2,750,000 gallons of water.

The City of Scottsbluff is under contract to provide the City of Minatare with water. They are connected to our system at Highway 26 and Rebecca Winters Road.

Infrastructure – Our employees maintain over 110 miles of water main, 923 fire hydrants, 1,300 main valves and 6,386 service lines with curb boxes (property shut-off valves) that make up the distribution system. Our maintenance crew repairs water mains, fire hydrants, valves, water service lines, curb boxes and installs new water service for customers.

Diggers Hotline (One-call) Locates – The Water Department handles responding to an average of 600 diggers hotline locates each month. State law requires that everyone call for locates before any digging takes place. Each utility is responsible for responding to these locates and marking where their lines are in the specific area. We locate water, sewer and stormwater utilities for the City.

Water Meters – The water fund supports the purchase of water meters used to chart water use for billing purposes. There are 6,386 meters in the system which we are responsible to maintain and repair. Our employees rebuild the water meters that are changed out to prepare for future use. This is done by sandblasting, painting, rebuilding and testing for accuracy. We have been upgrading meters to a radio read style that will allow readings to be gathered remotely by passing by locations rather than stopping at each of them.

Meter Reading – We currently walk the entire City gathering readings from all meters for utility customer billing. Our reader works hand-in-hand with MIS to provide the readings they need for each billing cycle.

The Water Fund pays for half of the wage for the Stormwater Specialist position. The Water Fund also supports the City’s Geographic Information System (GIS) Department which provides valuable mapping and data collection for the Water system.

The Stormwater Fund is operated and staffed by the Wastewater Department and receives budgetary transfers from the Wastewater and Water Funds. This fund was newly created in FY 96/97 to detail the City's financial commitment to maintaining and improving its stormwater collection system, including the Scottsbluff Drain. In June 2005, the City has received a permit for stormwater discharge. Over the next few years, we will determine through sampling and other requirements of this permit, if the potential exists that our stormwater discharge will require treatment in the future. This fund is established to fund those costs if necessary. We are working with other communities and leaders to allow communities to create a utility to begin charging directly for stormwater in the future. The restricted cash balance is money set aside for the Scottsbluff Drain improvements.

The GIS Services Division is responsible for the implementation of a Geographic Information System. Funding is provided by other city departments. These departments, primarily Water, Water Reclamation, Transportation, Development Services, and Environmental Services, benefit greatly from the services of the GIS Division when they integrate GIS information into their daily work flow and increase their efficiency in accomplishing departmental objectives.

The City GIS is an enterprise GIS, accessible and usable by many users simultaneously. This deployment allows the GIS to serve the City's aerial imagery and other GIS data efficiently across the computer network for departmental use. This data has been useful for a variety of purposes. It was utilized to generate a ground elevation surface for storm water and flood mapping. It also led to the recent development of an impervious surfaces data set, as well as the measurement of tree canopy coverage across the city. The City GIS utilizes the data integrity functions of the GIS to administer the City Zoning data and the City Corporate Limits, as well as to manage over 100 various datasets.

The primary goals for 2008-2009 consist mainly of data development. Building off the relatively recent aerial imagery and elevation data acquisition, a number of datasets are now able to be updated from the original 1998 data sets. In addition, new data sets are capable of being generated, increasing the value of GIS services. A new handheld GPS unit will be deployed and utilized by both the GIS division and other departments to collect data in the field as needed. This will facilitate the ongoing integrity and usefulness of the GIS data sets for the City.

## Replacement of a Class A Fire Engine

### PROJECT INFORMATION

**Department:** Fire  
**Project Type:** Equipment

**DESCRIPTION** This project is the replacement of a Class A Engine purchased in 1996. The purchase will include new ground ladders, Hoses and airpucks.

### SCHEDULE

This purchase will be made from MFO funds which will total over 500,000 in the FY 2014 - 2015. So purchase will not require any additional funding.

### ASSESSMENT AND JUSTIFICATION

The Fire Department must be able to respond quickly and safely to all calls for service. Engines in this area have a safe operational life span of 15 to 20 years. In the last few years we downsized our Engine inventory from four Engines to two for budget reasons and it has been a good cost saving move. Our two curent Engines are a 1996 and 1997 and are reaching the end of thier safe life span. In purchasing a new custom cab engine similar to our ladder truck we should see it reach or exceed the 20 year mark.

### ASSESSMENT AND JUSTIFICATION

SINCE PURCHASING SLEUTH Version 10 RMS IT HAS NEVER PERFORMED OR OPERATED AS PROMISED. SLEUTH HAS ACTUALLY CREATED WORK FOR THE POLICE DEPARTMENT COMPARED TO THE OLD SYSTEM. THE INFORMATION IN SLEUTH CANNOT ALWAYS BE TRUSTED AND IS SOMETIMES DIFFICULT TO FIND. THE POLICE DEPARTMENT AND THE SCOTTS BLUFF COUNTY COMMUNICATIONS CENTER HAS MADE THE DECISION NOT TO CONNECT THE RMS TO THE COUNTY'S CAD AS THE IT PROFESSIONALS BELIEVE THAT IT WILL NOT WORK. THE POLICE DEPARTMENT AND THE COUNTY ARE PLANNING TO WORK TOGETHER TO IDENTIFY A CAD/RMS SOFTWARE THAT WILL WORK FOR ALL AREA LAW ENFORCEMENT AGENCIES IF THEY SO DESIRE TO PURCHASE IT.

## INFRASTRUCTURE REPLACEMENT or INSTALLATION

### PROJECT INFORMATION

**Department:** Water  
**Project Type:** Water System

### DESCRIPTION

The Water System Master Plan identifies future system needs and improvements - replacing old deteriorated or undersized mains and the installation of new main where needed.

### SCHEDULE

FY14-15 Install water main from Highland Road along CR 24 to WWTP area \$809,000  
 FY14-15 Install a tie-in with Gering at Well Field for Emergency Use \$100,000  
 FY15-16 Replace old main on Broadway from 23rd to 27th Street \$539,000  
 FY15-16 Loop section at Airport so Terminal never without service \$100,000

### ASSESSMENT AND JUSTIFICATION

FY14-15 The installation of new main from Highland Road along CR 24 to the WWTP area will loop the system and provide a secondary route for water if something would happen to the main line currently serving users on the south east side of Scottsbluff including the Wastewater Treatment Plant, future development and service to Minatare.

FY14-15 For emergency use only, a tie-in will be installed at the City's well field where Gering's water main crosses to their well field northwest of ours. The cost will be equally shared between cities. Not completed in FY13-14, so funds have been rolled to FY14-15.

FY15-16 This project will replace the old main in Broadway between W 23rd and W 27th St. where main breaks have taken place due to age and ground shifting.

We're working with the City Planner to update the Water Master Plan that was completed in 2008. Future projects and scheduling will be based upon the outcome of this planning.

## RADIO READ METER READING EQUIPMENT

### PROJECT INFORMATION

**Department:** Water  
**Project Type:** Equipment

### DESCRIPTION

This project will allow the City to purchase the equipment necessary to obtain meter readings from the radio read meters we've been installing.

### SCHEDULE

FY14-15

### ASSESSMENT AND JUSTIFICATION

The City has been upgrading meters to a radio read style over the last few years. Out of 6,386 meters, we still have 913 manual meters to upgrade and 1,346 touch read meters to upgrade. We would like to budget enough money to be able to purchase all the registers, touch pads and radio read units necessary to complete the upgrade and be able to obtain readings from the radio read equipment. At present time, it takes staff 2 to 3 days to obtain meter readings. This upgrade will allow reading the entire city in approximately 5 hours. This would also provide a way to change to a monthly billing cycle if ever wanted.

Total cost of this project is \$389,210. \$34,000 as CIP covers the base station, computer, module and software. \$355,210 covers the cost of upgrading the remaining meters (registers/touch pads/radio read units) and is budgeted in O&M under meters.

## WATER WELLS

### PROJECT INFORMATION

**Department:** Water  
**Project Type:** Water System

### DESCRIPTION

This project allows for the City to maintain existing water wells as needed.

### SCHEDULE

FY14-15

### ASSESSMENT AND JUSTIFICATION

A large part of each well is located underground. This unseen area is important to inspect and repair as necessary to maintain equipment and keep these wells operating for years to come. This process requires pulling the well and viewing the underground casing, column pipe, bowls and other components to access their condition and determine what repairs may be necessary. The schedule is dependent on the performance of a well on an as needed basis.

## TRUCK REPLACEMENT

### PROJECT INFORMATION

**Department:** Water  
**Project Type:** Equipment

### DESCRIPTION

This project replaces existing trucks with new trucks as the fleet ages.

### SCHEDULE

FY14-15 Replace Unit 038, a 2008 Chevy Pickup (Service Truck) w/utility body and tool compartments. 110,979 Miles

### ASSESSMENT AND JUSTIFICATION

This project replaces aging vehicles that are reaching the end of their service life. Existing trucks will be traded in unless other departments can use them. The funding request includes sales tax which the Water Department is required to pay.

FY14-15 A 2001 Chevy Pickup (Mileage 137,500) will be used as a trade-in toward this purchase and the 2008 Chevy Pickup (Unit 038) will be transferred to the Wastewater Department.

## WATER TOWERS

### PROJECT INFORMATION

**Department:** Water  
**Project Type:** Water System

### DESCRIPTION

This project will provide funding to repaint the exterior and interior of the water towers, and repair damage from corrosion as needed.

### SCHEDULE

Beginning in FY16/17, one tower a year will be recoated and repaired where needed starting with the Hydropillar by SBCC.

### ASSESSMENT AND JUSTIFICATION

To help maintain the City's five water towers, cathodic protection equipment is installed on the inside of the tower bowls to help prevent corrosion and annual washout inspections are performed on a rotating basis. Recoating the tower structures inside and out will allow a greater level of protection from corrosion and keep them well into the future. Repairs will be made that are necessary to the structure and screens to prevent contamination from outside elements.

## SEWER MAIN IMPROVEMENTS / REPAIR PROJECTS

### PROJECT INFORMATION

**Department:** Wastewater  
**Project Type:** Sanitary Sewer System

### DESCRIPTION

The Collection System Master Plan identifies and prioritizes system improvements and repairs necessary to eliminate flow restrictions and/or accommodate future growth.

### SCHEDULE

FY14-15 Repair 3 trouble spots where sewer main runs under canal and  
 Reline a 2 block area found with cracks in sewer main from W 14th to W Overland  
 between Ave E and Ave F - \$75,000  
 FY14-15 Replace Infrastructure at ditch crossing N of E 27th - \$120,000  
 FY14-15 LB840 Sewer main interceptor projects to accommodate future growth \$4,185,436  
 FY15-16 South Interceptor Project - \$258,000

### ASSESSMENT AND JUSTIFICATION

1) FY14-15 There are 3 locations where the sewer main runs under the canal and they're prone to having excess buildup of grease because the main is so close to the ground surface. We have budgeted to replace the portion of main that runs under the canal and install manholes for more effective cleaning. We also have a 2 block area with several cracks in the sewer main that needs to be relined. The location is from W 14th to W Overland, between Ave E & Ave F.

2) FY14-15 We have an area of existing sewer main that crosses under the SB Drain near the intersection of Hwy 26 and 27th St. During the master plan study, sewer flows were beyond what should be normal for this area, so there is infiltration happening.

FY14-15 Replace portions of sewer main at 3 locations where the main runs under the canal making them prone to excessive grease buildup. Reline a 2 block area having several cracks in the sewer main between W 14th to W Overland and between Ave E & Ave F.

FY14-15 Replace an area of sewer main that crosses under the SB Drain near the intersection of Hwy 26 and 27th St. The collection system master plan in 2008 identified sewer flows beyond normal for this area, so there is infiltration happening. We have budgeted \$20,000 under contractual services in O&M for another flow study to help identify other areas that may have restricted or excessive flows.

FY14-15 LB840 The collection system master plan identified areas where sewer main interceptors would need constructed to accommodate future growth. We will seek use of LB840 funding to complete these projects in FY14-15. 1) Northeast Interceptor \$2,425,780, 2) Northeast Interceptor phase 2 from Highland Rd to WWTP \$979,056, 3) North Central Interceptor \$430,200 and 4) Northwest Interceptor \$350,400.

## COMPOST FACILITY EQUIPMENT BUILDING AND SCALE

### PROJECT INFORMATION

**Department:** Wastewater / Environmental Services  
**Project Type:** Site Improvements

### DESCRIPTION

This project will allow for the construction of a building to house the compost processing equipment (turner, grinder and screen) and a scale to measure weight of loads.

### SCHEDULE

FY14-15

### ASSESSMENT AND JUSTIFICATION

During FY13/14 Council approved the use of funds remaining from the compost equipment purchases for initial site improvements needed to obtain a solid waste operating permit. The permit is required due to the quantity of biosolids that will be produced.

This project will allow the City to complete the site improvements with the addition of an equipment storage building and scale. The building will help protect the investment in the compost equipment and the scale will be used to weight loads coming in and/or leaving the site.

The estimated cost of \$881,000 will be split between the Wastewater and Environmental Service funds. \$681,000 Wastewater Fund and \$200,000 Environmental Services Fund.
