Public Hearing:

Case # 640
DiResta, Peter J., 7 Candleview Drive, Sherman, CT (a.k.a. Map 69, Lot 75) requesting a variance of Section 332.5 "Minimum Setback Requirements" from a 50' 0" required front yard setback to a 34' 0" setback and variance from Section 384 "Non-Conformity, Other that Use" to construct a roof over an existing deck and stair providing access to the front door entry to the pre-existing non-conforming structure in accordance to the A-2 Survey plan submitted and entitled “Property Survey prepared for Peter J. & Sandra DiResta, 7 Candle View Drive, Town of Sherman, Fairfield County, CT, Dated October 26, 2013.” Prepared by PAH, Inc. Land Surveyors. Zone B

For the record, Chairman Baird stated the applicant is her neighbor, but feels no conflict in relation to this application. Also for the record, K. Fazzone stated she was the listing agent for the sale of this property to the Applicant, but feels no conflict acting upon this application. Joseph Rynn, acting on behalf of the applicant stated he was comfortable with the composition of the Board and wished to proceed. The intent of the application is to request variance for a roof over the existing front deck, which would provide safe passage to the dwelling. The front door is the only access to and from the dwelling. The Board discussed the hardship stemming from the revision of the Zoning Regulations. In the 1970’s when the dwelling was constructed, the front yard setbacks were 35' 0", the Regulations were revised in 2006 and now require a minimum front yard setback of 50' 0". There was discussion in reference to the plans showing a 3' bump out at the front door. The Board suggested eliminating to the bump-out, which would decrease the percentage of non-conformity. The agent indicated this bump out is an architectural embellishment, intended to mimic of the existing roof line of the house and would not affect the integrity of the roof over the deck. The applicant agreed to modify the plans to eliminate the bump out. When the DiResta’s purchased this property, they also purchased the lot next to it to combine the two making the whole property slightly under an acre. This lot line revision did not affect the front yard setback.

Business:

Case # 640
DiResta, Peter J., 7 Candleview Drive, Sherman, CT (a.k.a. Map 69, Lot 75) the Board discussed the application at length. The consensus was to allow the roof to provide shelter and safe passage to and from the only entrance to the dwelling without the 3 ft bump-out which would decrease the percentage of non-conformity. The Board also recognized the change in regulations has created the hardship.
Commissioner J. Chiaramonte Moved to Approve Case # 640 to grant variance of Section 332.5 "Minimum Setback Requirements" from 50' 0" to allow 37' 0" front yard set-back to construct a roof over an existing front deck and stair which will provide shelter and safe passage to the only access to the dwelling, modified without the 3' 0" bump-out in accordance to the A-2 Survey plan submitted and entitled "Property Survey prepared for Peter J. & Sandra DiResta, 7 Candle View Drive, Town of Sherman, Fairfield County, CT, Dated: October 26, 2013."
