The Unfunded Accrued Liability is the excess of the Accrued Liability over the value of the Tinley Park Police Pension Fund assets.

The Accrued Liability represents the present value of projected future plan benefits that are to be provided.

The Actuarial Value of Assets for funding purposes are developed by recognizing the total actuarial investment gain or loss for each Plan Year over a five year period. In the first year, 20% of the gain or loss is recognized. In the second year 40%, in the third year 60%, in the fourth year 80%, and in the fifth year 100% of the gain or loss is recognized. The actuarial gain or loss is defined as the actual return on investments minus the actuarial assumed investment return. Actuarial Assets shall not be less than 80% nor greater than 120% of the Market Value of Assets.

Entry Age Normal Cost is an actuarial methodology whereby the Normal Cost for each participant is computed as the level percentage of pay which, if paid from the earliest age the participant is eligible to enter the plan until retirement or termination, will accumulate with interest to an amount sufficient to fund the participant's benefits under the plan. The Normal Cost for the plan (the Tinley Park Police Pension Fund) is determined as the sum of the Normal Costs for all active participants. A change was made in the current valuation to update the mortality rates to reflect the PubS-2010 tables.

9. Investment Policy

Illinois State Statutes restrict the types of investments that can be held by a police pension fund. The Tinley Park Police Pension Fund has adopted its own investment policy that takes into account the statutory restrictions and provides further guidance.
