

News delivery system now live at Village Hall

Issued: Jan. 24, 2020

The Village recently installed an electronic news delivery system inside both front lobbies at Village Hall.

The new system displays information such as upcoming events, Village news, photos of Tinley Park and the current weather. It even includes a news ticker at the bottom of the screen that features the latest national headlines.

The Village plans on installing more of these systems inside other Village buildings across Tinley Park in the coming months.
