

How to Use South Berwick's GIS Map

- Hover over any widget to learn its function.
- Click anywhere on the map for pop-up with parcel data
- Search for Address, Map/Lot or Owner by typing in field then clicking the magnifying glass.
 - When choosing from a list of search results, refer to the gray heading for the source data. Click on the result under **All_Parcel_Data** or **Condo_Data** to get assessing information.

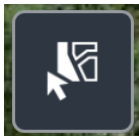

Zoom in or out

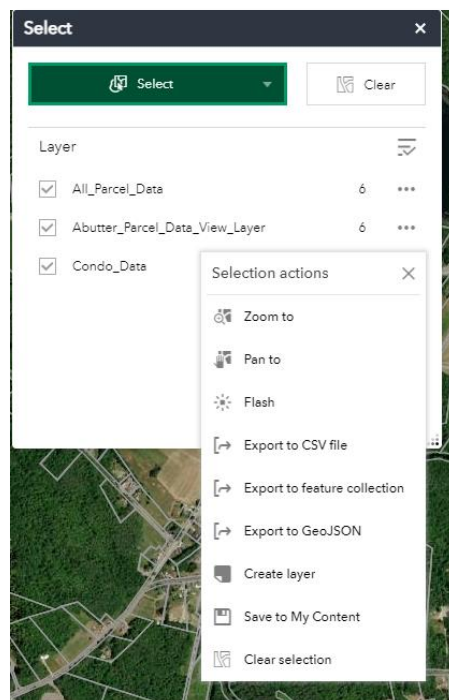

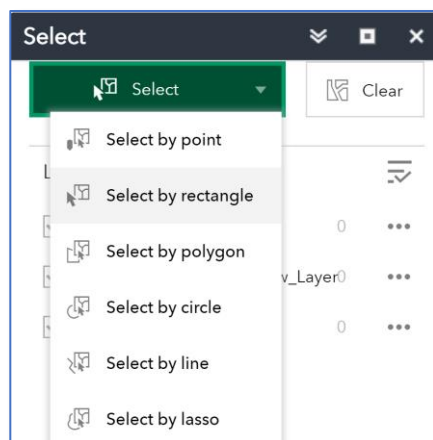

This returns the map view to the default view

Shows your location

Choose how you want to select parcels

After you have selected parcels, Click on the 3 dots ... to expand menu on the layer with the information you are interested in.

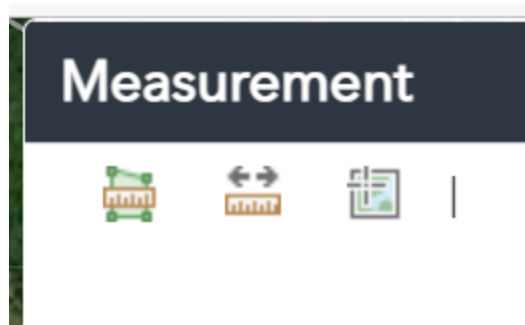

TIP: Export to CSV file will give you a mailing list.

Print your map

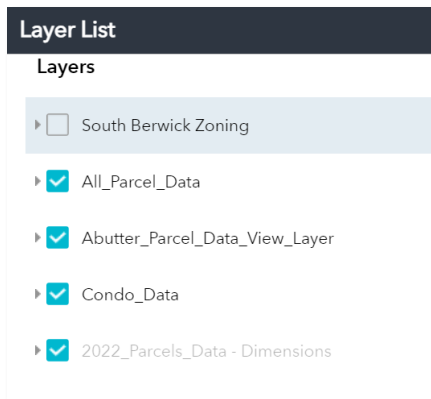

Measure tools

- The first tool measures area in acres.
- The second tool measures distance in feet
- The third tool measures the latitude and longitude of a point.

Layers, you can turn them off or on and view the symbology
