

Memorandum

08316-01

To: Denise Clavette, Town of South Berwick
Tim Pellerin, Town of South Berwick
Jennifer Janelle, Town of South Berwick

Date: May 17, 2023

Subject: Addendum #1, Route 236 Planning Study, South Berwick

This memorandum serves as Addendum #1 to the Route 236 Planning Study, dated April 2023. The addendum provides additional information, as requested by the Maine Department of Transportation (MaineDOT) on May 3, 2023, specifically regarding the intersection option analysis at the intersection of Route 236 (Main Street) and Route 4 (Portland Street).

The Study reviewed opportunities to improve operations and safety at the intersection of Main Street and Portland Street through the use of signalized intersection control or a roundabout. Under 2022 traffic volumes, both the traffic signal and the roundabout had acceptable levels of service. For that reason, both options were reviewed from a feasibility standpoint, including conceptual plan development. Upon review of the concept plan for the roundabout, the following observations were discussed:

- A “compact” single-lane roundabout, with a dual northbound approach appeared to “fit” planimetrically. It was noted that the northbound approach angle did not have enough deflection which resulted in a substandard design. Properly designing approach angles to roundabouts is an important traffic-calming aspect as this slows incoming traffic as it enters the roundabout.
- Two of the three crosswalk locations were able to be provided close to the entry and exit lanes with refuge islands. The third crosswalk on the southbound approach was required to be pushed away approximately 130 feet from the intersection, with the splitter island being entirely mountable for trucks. The 2022 queue analysis demonstrated a 95th percentile southbound queue at the roundabout of 267 feet and 106 feet during the AM and PM peak hours, respectively. This analysis demonstrated that there may be times a pedestrian would have to walk between queued vehicles at this location. Providing improved pedestrian accommodations and safety was a priority for the Study.

- To layout the roundabout while minimizing impacts, the sidewalk width needed to be narrowed, resulting in vehicular traffic being closer to the building faces on both the westerly side and the easterly corner. On the easterly corner, the distance from the edge of the travel way to the building face is roughly 7 feet, much closer than what exists today. Additionally, the layout does not provide for much separation between vehicles and pedestrians.
- There are approximately 16 existing parking spaces along the businesses on the westerly side of Main Street. The roundabout option resulted in a complete loss of all 16 parking spaces, while the signalized option was able to retain 9 (eliminating 7 parking spaces). Additionally, more parking was able to be retained on the Portland Street approach with the signalized option. In the 2010 study by Sebago Technics, a signal was also recommended at this location. However, at the time, the removal of parking was enough for the Town to reconsider implementation. Parking continued to be a large topic of conversation during the most recent public outreach efforts. Retaining as much parking as possible was a priority as a part of the Study as it aids in retaining a downtown village feel through the Main Street corridor.

Considering the above, the signalized option also provided the following added benefits:

- Retaining wide sidewalks with possible green space along the business frontages. The Town expressed interest in not only improving delays to vehicles on the corridor but also having the ability to implement strategies to allow for “beautification” of the corridor allowing for this section of Main Street to serve as more of a destination than a bypass through Town. This additional green space afforded by the traffic signal option allows for planters, benches, banners, and other elements to help serve the Town’s long-term interests.
- While both options have potential right-of-way impacts (based on the GIS parcel lines) to the Sarah Orne Jewett House parcel, the signalized option appears to have less impacts to this property. It will be essential to eliminate or minimize the impacts here as this is designated as a historic property.
- Signalization provides improved response time for emergency vehicles through traffic signal emergency preemption technology. This is especially important as emergency vehicles commonly enter this intersection by heading southbound on Main Street as the Fire Station is 1,200 feet from the subject intersection at 71 Norton Street.
- With signalization there is the benefit of retiming the corridor and providing coordination between the signals. As we heard from the Public, and as was reflected in the traffic volumes, cut-through traffic through the local neighborhoods commonly occurs. With these improvements, it is anticipated that traffic will be added and rebalanced to both major intersections. Signalization allows for this rebalancing to be monitored and timings adjusted accordingly.

Based on the above, there were several determining factors outside of the vehicular capacity analysis that drove the recommendation for signalization. It was then determined that the recommended signalized alternative be reviewed for long-term considerations, which was reflected in the 2042 traffic analysis.

The roundabouts were also reviewed from a planning level perspective for 2042 volumes, however, given the discussion items above, and the 2042 operations showing favorable results for the signals, a more in-depth traffic analysis was not considered. The result of the planning level volume review was utilized as the basis for the qualifying statement that *“a single lane roundabout does not provide significant reserve capacity to accommodate future growth in traffic volumes”*.

As requested, additional capacity analysis was completed for discussion purposes between the roundabout and signalized option for Main Street and Portland Street. Table 1 outlines the level of service (LOS) results for the AM and PM periods under future 2042 conditions, based on the methodologies outlined in the Study.

**Table 1 – Level of Service from Control Delay
2042 Future Volumes**

Movement	Addendum 1		Recommended Alternative	
	AM Peak Hour	PM Peak Hour	AM Peak Hour	PM Peak Hour
<i>Main Street and Dow Highway</i>	<i>Signalized</i>		<i>Signalized</i>	
Main Street NB Thru	27.4 (C)	34.3 (C)	30.2 (C)	46.0 (D)
Main Street NB Right	9.4 (A)	13.9 (B)	9.3 (A)	26.4 (C)
Main Street SB Left	15.4 (B)	32.7 (D)	29.7 (C)	31.0 (C)
Main Street SB Thru	18.4 (B)	40.6 (D)	34.9 (C)	42.7 (D)
Dow Highway NW Left	32.9 (C)	41.3 (D)	30.0 (C)	37.9 (D)
Dow Highway NW Right	11.3 (B)	29.0 (C)	15.3 (B)	30.1 (C)
Overall Intersection	17.2 (B)	32.0 (C)	25.8 (C)	36.4 (D)
<i>Main Street and Portland Street</i>	<i>Roundabout (Unsignalized)</i>		<i>Signalized</i>	
Main Street NB Thru	2.1 (A)	3.2 (A)	15.6 (B)	13.3 (B)
Main St NB Right	1.5 (A)	1.7 (A)	2.2 (A)	4.0 (A)
Main Street SB Left	29.4 (D)	6.4 (A)	34.5 (C)	35.9 (D)
Main Street SB Thru	25.9 (D)	6.5 (A)	33.1 (C)	11.1 (B)
Portland Street SW Left	17.7 (C)	13.3 (B)	40.1 (D)	31.3 (C)
Portland Street SW Right	17.0 (C)	13.3 (B)	15.3 (B)	10.5 (B)
Overall Intersection	13.9 (B)	5.5 (A)	24.3 (C)	13.9 (B)

As outlined above, the assumption from MaineDOT was confirmed in that the roundabout alternative retains capacity with 2042 traffic volumes. All movements are anticipated to operate at LOS “D” or better during the AM peak hour and LOS “B” or better during the PM peak hour.

Given the information above, the recommendation of signalization was driven more so on the overall impacts to abutters and alternative modes of travel and less by the vehicular capacity results alone. We agree that the high-level volume review was overly conservative and that the Synchro / SimTraffic review provides a more appropriate representation of true long-term capacity. However, we hope the above supplemental information provides an improved understanding of the ultimate recommendations.

Please let us know if you have any additional questions.
