

## City of Burlingame Variance Application

---

The Planning Commission is required by law to make findings as defined by the City's Ordinance (Code Section 25.84.030). Your answers to the following questions can assist the Planning Commission in making the decision as to whether the findings can be made for your request. Refer to the end of this form for assistance with these questions.

- A. Describe the exceptional or extraordinary circumstances or conditions applicable to your property which do not apply to other properties in this area.**
  
  
  
  
  
  
  
  
  
  
- B. Explain why the variance request is necessary for the preservation and enjoyment of a substantial property right and what unreasonable property loss or unnecessary hardship might result from the denial of the application.**
  
  
  
  
  
  
  
  
  
  
- C. Explain why the proposed use at the proposed location will not be detrimental or injurious to property or improvements in the vicinity or to public health, safety, general welfare or convenience.**
  
  
  
  
  
  
  
  
  
  
- D. How will the proposed project be compatible with the aesthetics, mass, bulk and character of the existing and potential uses on adjoining properties in the general vicinity?**

**A. Describe the exceptional or extraordinary circumstances or conditions applicable to your property which do not apply to other properties in this area.**

Do any conditions exist on the site which make other alternatives to the variance impracticable or impossible and are also not common to other properties in the area? For example, is there a creek cutting through the property, an exceptional tree specimen, steep terrain, odd lot shape or unusual placement of existing structures? How is this property different from others in the neighborhood?

**B. Explain why the variance request is necessary for the preservation and enjoyment of a substantial property right and what unreasonable property loss or unnecessary hardship might result from the denial of the application.**

Would you be unable to build a project similar to others in the area or neighborhood without the exception? (i.e., having as much on-site parking or bedrooms?) Would you be unable to develop the site for the uses allowed without the exception? Do the requirements of the law place an unreasonable limitation or hardship on the development of the property?

**C. Explain why the proposed use at the proposed location will not be detrimental or injurious to property or improvements in the vicinity or to public health, safety, general welfare or convenience.**

How will the proposed structure or use within the structure affect neighboring properties or structures on those properties? If neighboring properties will not be affected, state why. Think about traffic, noise, lighting, paving, landscaping sunlight/shade, views from neighboring properties, ease of maintenance, etc.

Public health includes such things as sanitation (garbage), air quality, discharges into sewer and stormwater systems, water supply safety, and things which have the potential to affect public health (i.e., underground storage tanks, storage of chemicals, situations which encourage the spread of rodents, insects or communicable diseases).

Public safety. How will the structure or use within the structure affect police or fire protection? Will alarm systems or sprinklers be installed? Could the structure or use within the structure create a nuisance or need for police services (i.e., noise, unruly gatherings, loitering, and traffic) or fire services (i.e., storage or use of flammable or hazardous materials, or potentially dangerous activities like welding, woodwork, engine removal).

General welfare is a catch-all phrase meaning community good. Is the proposal consistent with the city's policy and goals for conservation and development? Is there a social benefit?

Convenience. How would the proposed structure or use affect public convenience (such as access to or parking for this site or adjacent sites)? Is the proposal accessible to particular segments of the public such as the elderly or handicapped?

**D. How will the proposed project be compatible with the aesthetics, mass, bulk and character of the existing and potential uses on adjoining properties in the general vicinity.**

How will the proposed project be compatible with existing and potential uses in the general vicinity? Compare your project with existing uses. State why you feel your project is consistent with other uses in the vicinity, and/or state why your project would be consistent with potential uses in the vicinity.

How does the proposed structure or use compare aesthetically with existing neighborhood? If it does not affect aesthetics, state why. If changes to the structure are proposed, was the addition designed to match existing architecture, pattern of development on adjacent properties in the neighborhood? If a use will affect the way a neighborhood or area looks, such as a long term airport parking lot, compare your proposal to other uses in the area and explain why it fits.

How does the proposed structure compare to neighboring structures in terms of mass or bulk? If there is no change to the structure, say so. If a new structure is proposed, compare its size, appearance, orientation, etc. with other structures in the neighborhood or area.
