

Please complete the following form and return this standard form with your resubmittal documents:

ELECTRICAL FIXTURE COUNT

1. Will you need temporary power? Yes or No
2. Are you installing or changing the electrical service? If so, what is the service rating in amps? _____
3. How many meter panels or branch panels or sub panels will be installed? _____
4. How many receptacles, switches or lighting outlets will be installed? _____
5. How many appliances will be installed that are less than 1 HP or kW? _____
6. How many sign circuits will be installed? _____
7. List the number of power apparatus to be installed with a rating over 1HP or 1KW
 - (a) Number up to and including 1 _____
 - (b) Number over 1 and not over 10 _____
 - (c) Number over 10 and not over 50 _____
 - (d) Number over 50 and not over 100 _____
 - (e) Number over 100 _____
8. Will a generator be installed? Yes or No
9. What are the total linear feet of busways to be installed? _____
10. Are there any miscellaneous apparatus, conduits and conductors that have Not been listed above? If so, what type and how many? _____

PLUMBING FIXTURE COUNT

On this list, specify the number of the following units to be installed:

1. Fixtures or traps _____
2. Water heaters _____
3. Gas piping outlets _____
4. Water equipment or water-treating equipment _____
5. Non-atmospheric back flow devices (up to 2") _____
6. Non-atmospheric back flow devices (over to 2") _____
7. Interior roof drains and overflow drains _____
8. Industrial waste pretreatment interceptors _____
9. Will an outside sanitary sewer be installed? _____
10. Other plumbing systems not listed above. _____

MECHANICAL EQUIPMENT COUNT

On this list, specify the number of the following units to be installed:

1. Environmental vent fans connected to a single duct (bathrooms/kitchens) _____
2. Fireplaces _____
3. Other heating, cooling or refrigeration _____
4. Furnaces up to 100 kBTU _____
5. Furnaces over 100 kBTU _____
6. Floor, wall mounted, or suspended heating units being installed _____
7. Boilers less than 100 kBTU or 3 HP _____
8. Boilers 100 kBTU or greater but less than 500 kBTU or 3 HP to 15HP. _____
9. Boilers 1,000 kBTU or greater but less than 17,500 kBTU or 30 HP to 50HP _____
10. How many boilers greater than 17,500 kBTU or 50 HP are being installed?
11. Evaporative coolers _____
12. Air handling units (up to 10,000 CFM) _____
13. Air handling units (over 10,000 CFM) _____
14. Commercial exhaust hoods _____
15. Hazardous Process Piping (HPP) Outlets _____
16. Nonhazardous Process Piping (NPP) Outlets _____
17. Other mechanical equipment not listed above. _____
