City of Burlingame
Districting
Overview

This presentation will cover a range of topics to facilitate a process of public education and involvement in a transparent and fair districting process.

- The California Voting Rights Act
- Districting vs. Redistricting vs. Gerrymandering
- Traditional Districting/Redistricting Principles
- Population and Composition
- Mapping of the City of Burlingame
The California Voting Rights Act is a state law that prohibits the use of At Large Election Systems in local government if there is Racially Polarized Voting.

“At Large” is defined as anything other than a system in which an elected official lives in a district, and is only elected by members of that district.

“Racially Polarized Voting” is defined as differences in voting patterns which can be shown to be correlated to race, religion, national origin, or membership in any other protected class.
The California Voting Rights Act takes the principles of the Federal Voting Rights Act and expands it regarding districted elections in two key ways:

While Federal law uses “majority minority” districts as a standard for vulnerability, the CVRA only requires “ability to influence.”

The CVRA requires that plaintiffs get full reimbursement for legal fees associated with any successful challenge.
What is the CVRA?

The California Voting Rights Act takes the principles of the Federal Voting Rights Act and expands it regarding districted elections in two key ways:

While Federal law uses “majority minority” districts as a standard for vulnerability, the CVRA only requires “ability to influence.”

The CVRA requires that plaintiffs get full reimbursement for legal fees associated with any successful challenge. *These can be lessened or eliminated if the district follows a strict and prompt process for districting.*
What is Districting

definition

Districting is the initial process of creating election district boundaries.

These boundaries determine:

• Eligibility to run for office – must live within boundaries to qualify for election.

• Who votes in the election – only voters within the district vote for their councilmember.
What is Districting

definition

Districting is the initial process of creating election district boundaries.

These boundaries do not determine:

• How the city decides to govern. The city can still work to achieve goals that benefit the city as a whole rather than the interests of any single district.

• How services or relationships between the city and the public are managed.
Redistricting is the process of adjusting district lines every 10 years after the release of the U.S. Census. The well-known examples are Congress and the legislature.

Within the U.S., redistricting has become an extremely politicized process and been the subject of more high-profile Supreme Court decisions than any other part of our elections system.
What is Gerrymandering

The term Gerrymander came from a cartoon depicting a rather serpentine looking district created by Governor Elbridge Gerry in Massachusetts.
What is Gerrymandering

There are more recent examples of gerrymandering, even in California.

This 2001 Senate District is a great example.
What is Gerrymandering

How does gerrymandering work?

Traditional Redistricting Principles

Preventing a Districting from becoming a Gerrymander

There are a number of criteria that have been used nationally and upheld by courts.

- Relatively equal size - people, not citizens
- Contiguous – districts should not hop/jump
- Maintain “communities of interest”
- Follow city/county/local government lines
- Keep districts compact – appearance/function
Traditional Redistricting Principles

- Relatively equal size - people, not citizens
- Contiguous – districts should not hop/jump
- Maintain “communities of interest”
- Follow city/county/local government lines
- Keep districts compact – appearance/function
Equal Population
Utilizing the U.S. Census Decennial File

What is “equal” population has been a key subject in redistricting litigation.

- Population Equality is based on “People” not citizens or voters or other metrics.
- 10% or smaller deviation.
Traditional Redistricting Principles

Preventing a Districting from becoming a Gerrymander

There are a number of criteria that have been used nationally and upheld by courts.

• Relatively equal size - people, not citizens
• **Contiguous** – districts should not hop/jump
• Maintain “communities of interest”
• Follow city/county/local government lines
• Keep districts compact – appearance/function
Contiguity

Two definitions for what is contiguous

Contiguity should be thought of as “literal” and “functional.”

- An area that is one whole piece is “literally contiguous.”
- An area that represents how the population functions or how people are connected is “functionally contiguous.”
Traditional Redistricting Principles

There are a number of criteria that have been used nationally and upheld by courts.

- Relatively equal size - people, not citizens
- Contiguous – districts should not hop/jump
- Maintain “communities of interest”
- Follow city/county/local government lines
- Keep districts compact – appearance/function
Communities of Interest

Bringing like people together for representation

What is a community of interest includes ethnic and language minorities and other groups.

• Communities covered by the Voting Rights Act
  • Latinos
  • Asians
  • African Americans

While race is a community of interest, it cannot be the predominant factor in drawing districts.
Communities of Interest

Bringing like people together for representation

What is a community of interest includes ethnic and language minorities and other groups.

• Other Communities, example are:
  • People living near an industry (farming, higher education, manufacturing)
  • Senior Citizens or Students
  • Downtown / Urban
  • Rural or Agricultural
  • Homeowners or Renters

• Keep districts compact – appearance/function
Compactness

Determining what is “compact”

The measure of compactness can get complicated.

- Ratio of the circumference of a district and the area of a district.
- Measuring the number of distinct straight lines and the number of kinks and bends.
- Simply outlawing funny shapes.
Compactness

Determining what is “compact”

California has a rather elegant/simple definition.

- Not bypassing nearby populated areas in favor of more distant populated areas

Determining what is “compact”
Compactness
Determining what is “compact”
Starting in 2020, cities and counties doing redistricting have additional criteria they must follow under the California Fair Maps Act.

- Process/transparency when conducting redistricting
- Not using incumbent or candidate residence as a Community of Interest
- Not drawing districts to advantage a political party
City of Burlingame
Preliminary Findings

Census population is 28,806 based on the 2010 Census.

- This population is used for the determination of the target size of a district, and the “equal population” calculations that cannot exceed 10% from the largest to smallest District. Based on 2010 Census data the following would be targets:
  - 5-District Plan: 5,761 residents
  - 4-District Plan: 7,201 residents
City of Burlingame

Preliminary Findings

For determining ethnicity of a district we use the American Community Survey calculations of Citizen Voting Age Population or “CVAP” which is also sometimes called “eligible voter population”

- Total CVAP: 20,275
- Asian CVAP: 4,513 (22%)
- Latino CVAP: 2,268 (11%)
- Black CVAP: 290 (1%)
- All Other: 13,204 (65%)
City Boundaries and Streets
Public hearings will be held to obtain input on communities of interest and receive feedback on potential districting plans prior to board adoption.

Input can be provided in public hearings or using our “Community of Interest Worksheet.”
City of Burlingame

What’s Next

Online Mapping tools will be available for the community to draw their community of interest or potential maps for the city to consider.

Future presentation will show tools in action and allow for broad community input.
City of Burlingame

What’s Next

Public hearings will be held to obtain input on communities of interest and receive feedback on potential districting plans prior to board adoption

- Feb 1: 1st Public Hearing
- Mar 1: 2nd Public Hearing
- TBD: Online Outreach / Mapping Tool Demonstration
- TBD: 3rd Public Hearing. Draft Map Review
- TBD: 4th Public Hearing
- TBD: Adoption
