Earthquake Warnings are a Game Changer

The Governor's Office of Emergency Services (Cal OES) encourages residents to have plans for how to protect themselves in the event of an earthquake. If you receive a warning or feel shaking, there are only moments to act. There may be circumstances where a warning is issued, but no shaking occurs. It is always better to be on the side of caution when it comes to earthquakes. Cal OES encourages you to share this information with friends and family in California, to help spread the word about the technology available to help keep them safe.

Californians can now get earthquake warnings from [Earthquake Warning California](#). You can get a jump start before shaking can be felt, to take protective actions: DROP, COVER, and HOLD ON (or LOCK, COVER, and HOLD ON if using a wheelchair).
