The ***Crime In Washington 2018*** annual report was compiled from data submitted to the Washington State Uniform Crime Reporting Program of the Washington Association of Sheriffs and Police Chiefs by Washington State law enforcement agencies.

This report would not be possible without the voluntary cooperation of Washington State's law enforcement agencies and the commitment to submit timely, complete, and accurate crime statistics.

## **Introduction**

This is the thirty-ninth (39<sup>th</sup>) annual publication of the Washington Uniform Crime Reporting (UCR) Program report of criminal offenses, arrests, law enforcement officers killed or assaulted, and full-time law enforcement employees. Funding for the Washington State UCR Program is provided through contract with the Washington State Criminal Justice Training Commission (CJTC) and administration of the program is the responsibility of the Washington Association of Sheriffs and Police Chiefs (WASPC) Criminal Justice Information Support (CJIS) Department. The Washington State UCR Program is unique in that it is sponsored, administered, and supported by an organization of contributing agency administrators rather than a bureau or department of state government.

## **How to Use This Report**

The ***Crime in Washington 2018*** is our seventh crime statistics publication with the majority of data submitted from Washington law enforcement agencies using the National Incident-Based Reporting System (NIBRS). There are important factors the reader must consider when reading or using this report as well as crime statistic reports available from the FBI or other sources:

1. The data used to compile this report are based on a “snapshot” of our repository database as of April 25, 2019. In NIBRS, there are no “fixed” statistics because law enforcement agencies update their incidents as new information becomes available.
2. The data used in this report are based on the NIBRS method of submitting crime statistics. It is more comprehensive and detailed than the Summary Reporting System (SRS) in the past so the statistics in NIBRS and SRS should not be compared.
3. The data displayed in this report should not be compared to the FBI ***Crime in The United States 2018*** report which will be published later this year. Even though Washington State forwards the crime data submitted via NIBRS to the FBI in the NIBRS format, the FBI converts the data to the SRS format and the offenses are counted differently.
4. The data displayed per agency in this report should not be used to compare to other agencies or compile “rankings” of cities and counties. There are several variables which contribute to crime in a particular jurisdiction, including the demographics, economic, and cultural make-up of the population, the local industrial and economic base, its dependence upon neighboring jurisdictions, the transportation system, its economic dependence on non-residents (such as tourists, shoppers, or other day-time visitors), and its proximity to military installations, correctional facilities, universities/colleges, or state hospitals.

## Background

Although the collection of nationwide crime information dates back to the 1890s, no ongoing program was initiated until the International Association of Chiefs of Police (IACP) established a committee on uniform crime records in 1917. The committee's responsibility to provide management information to law enforcement agencies eventually was turned over to the Federal Bureau of Investigation (FBI) in 1930 when the FBI received a congressional mandate to collect and disseminate national crime information. The IACP has continued to serve the UCR Program in an advisory capacity and has been joined in this responsibility by the National Sheriffs Association.

The FBI UCR Program started with the Summary Reporting System (SRS) method of submitting crime statistic data; the SRS method has remained virtually unchanged, other than adding the Arson offense in 1979 and Human Trafficking Offenses in 2013. The National Incident-Based Reporting System (NIBRS) was a result of a 1970s law enforcement study to improve crime statistics with the guidelines and specifications developed and based on recommendations and collaboration during the 1980s. A pilot was conducted during 1987 in South Carolina and at a national UCR conference in early 1988; the consensus of attendees was that the FBI should continue its efforts to implement NIBRS nationally. In February 2016, the FBI Director announced that the FBI UCR Program will transition to a NIBRS-only data collection by January 1, 2021; the FBI anticipates evaluating the probability of achieving that goal on an annual basis.

The Washington State UCR Program was activated in October 1979 and collection of the monthly SRS data from contributing agencies began in January 1980. In December 2006, Washington State was certified by the FBI to officially collect and submit NIBRS data. In January 2008, based on a 2007 advisory committee recommendation, the WASPC Executive Board made the decision to set the goal date for Washington State law enforcement agencies to convert from the SRS method to NIBRS by January 1, 2012. Due to a number of agencies involved in records management system (RMS) upgrades and replacements during 2011, the Executive Board agreed to grant extensions to agencies that could not meet January 2012 deadline.

Today, the Washington State UCR Program offers on-line data entry or batch file upload and provides various reports necessary for statistical purposes in the criminal justice system. Data for ***Crime in Washington 2018*** were compiled from monthly NIBRS submissions by individual law enforcement agencies throughout the State of Washington. In September 2018, we achieved our goal of 100% NIBRS participation by non-tribal law enforcement agencies.

As mentioned, the data included in this report are comprised of NIBRS data; the “Individual Agency NIBRS” pages display a comparison between 2017 and 2018 for only the agencies that submitted NIBRS for both years. Due to the disparate reporting methods, data cannot be compared between NIBRS and SRS submitting agencies.

### **Crime Index**

In the past, the Crime Index was used as a basic measure for comparing the extent of crime among cities, counties, and states of similar size. The index was simply the total number of certain offenses that occurred in a given area in a given calendar period. The offenses used in the Crime Index were the SRS offenses of Murder, Rape, Robbery, Aggravated Assault, Burglary, Larceny-Theft, Motor Vehicle Theft, and Arson.

In June 2004, the FBI Criminal Justice Information Services Division Advisory Policy Board approved discontinuing the use of the Crime Index in the FBI UCR Program and its publications. Because Washington State is no longer converting NIBRS data into SRS data for the purposes of statewide statistical comparison, we discontinued using the “term” Crime Index as a measure to depict incidence of crime beginning with the 2012 annual report.

### **Crime Rate**

A crime rate is based on a specific crime category, such as Crime Against Persons, Crime Against Property, or Crime Against Society, or specific crime grouping, such as violent crimes. The category or grouping is adjusted for variances in population by indicating the number of offenses for each 1,000 persons (other base population increments may be used such as the number of offenses per 100,000).

To calculate the crime rate, first divide the population of the area by 1,000, then divide the crime category or grouping by that answer. For example, if a city has a population of 273,000 and a crime category of 21,257, the calculations would be:

1.  $273,000 \text{ divided by } 1,000 = 273.0$
2.  $21,257 \text{ divided by } 273.0 = 77.86$

Thus, although a city's crime category is 21,257, its crime rate (the number of crimes for each 1,000 people) is 77.86.

### **Classification of Offenses**

All offenses are classified on the basis of law enforcement investigation in accordance with national UCR offense definitions and are not necessarily identical to the Revised Code of Washington (RCW) or local ordinance definitions. Because UCR identifies and tallies *law enforcement* contact, offense classifications are not based on filings of the prosecutor, court, medical examiner, jury, or other judicial or subsequent findings.

NIBRS divides offenses into two (2) categories of offenses designated as Group A - Incident and Group B - Arrest Only. The Group A offenses collected in the NIBRS program are: Animal Cruelty, Arson, Assault Offenses, Bribery, Burglary, Counterfeiting/Forgery, Destruction/Damage/Vandalism of Property, Drug/Narcotic Offenses, Embezzlement, Extortion/Blackmail, Fraud Offenses, Gambling Offenses, Homicide Offenses, Human Trafficking Offenses, Kidnapping/Abduction, Larceny/Theft Offenses, Motor Vehicle Theft, Pornography/Obscene Material Offenses, Prostitution Offenses, Robbery, Sex Offenses, Non-Forcible Sex Offenses, Stolen Property Offenses, and Weapon Law Violations; in Washington State, an additional Group A offense is collected: Violation of No Contact/Protection/Anti-Harassment Order. Group A offenses include statistical data on the incident, all offenses committed, property involved, weapons involved, victim and offender demographics, arrest information, and clearance status.

Group B offenses, for which only arrest data are collected, include: Bad Checks; Curfew/Loitering/Vagrancy Violations; Disorderly Conduct; Driving Under the Influence; Drunkenness; Non-Violent Family Offenses; Liquor Law Violations; Peeping Tom; Trespass of Real Property; and All Other Non-Traffic Offenses.

### **Counting Offenses**

All crimes committed within the same incident by the same person or group of persons, without a significant time or space interval separating them, are reported in NIBRS - a hierarchy rule does not exist in NIBRS as it does in SRS. For example, if a Rape case involves crimes of Motor Vehicle Theft and Kidnapping, all crimes are reported. However, if a crime is an inherent part of another crime, only one crime may be appropriately reported. For example, Larceny is inherent in the crime of Burglary and would not be reported as a separate crime in the incident; however, if the suspect, upon leaving the residence, takes items outside the structure, Larceny would be reported as a second crime. As another example, Assault is an element in Robbery and

would not be reported as a crime separately from the Robbery; however, if the suspect forces the victim to engage in a sexual act, both a Robbery and a Sex Offense would be reported because a forced sexual act is not an element of Robbery.

### **Arrests**

In NIBRS, the law enforcement agencies collect detailed data elements related to incidents and arrests. The Group A - Incident Reports are comprised of segments (Administrative, Offense, Property, Victim, Offender, and Arrestee) and within the segments are multiple data elements identifying the incident, such as originating agency identifier (ORI), incident number, date, location, offense, demographics, and other relevant segment categories. Therefore, unlike SRS, the NIBRS arrests and clearances can be submitted as updates to the Group A - Incidents reported.

### **Clearances**

In NIBRS, clearances are on the incident-level rather than the offense-level. If one offense within an incident is cleared, all offenses in that incident are cleared. Likewise, the arrest of one offender in an incident will clear it even if other offenders have not been arrested yet. Clearances by arrest are automatically created when an Arrest Segment is submitted with a Group A - Incident. An incident cannot be cleared exceptionally if there has been an arrest.

Clearances by Exceptional Means allow an agency to clear an incident without an arrest. The four elements that must exist for an exceptional clearance include:

- 1) the identity of at least one offender must be known;
- 2) sufficient probable cause must have been developed to support the arrest and prosecution of the offender;
- 3) the offender's exact location must be known, and;
- 4) there must be a reason, outside of law enforcement's control, which prevents the arrest (for example, the death of the offender or the offender is in the custody of another jurisdiction).

When reviewing the number of clearances, it is important to remember that a clearance can be by "arrest" or by "exceptional means" and could possibly be for an offense in a prior year. The number does not reflect the number of persons arrested in an offense. Also, in UCR terminology, a clearance does not include a case for which the law enforcement agency could not proceed with an investigation due to an uncooperative or unavailable witness or victim.

### **Objectives of the Washington State UCR Program**

The primary objective of the ***Crime in Washington 2018*** is to implement and administer a uniform system of collecting crime and arrest statistical data from contributing law enforcement agencies in the State of Washington and present the information in complete, accurate, and timely method for the contributors and users of the data. Whether it's a citizen interested in the probability of crime in a neighborhood, a forecaster tracking trends for budget recommendations, or a criminal justice practitioner scheduling personnel deployment in the interest of public safety, data-driven evidence is the foundation for each decision-maker.

Individuals using the tabulations in the ***Crime in Washington 2018*** are cautioned against drawing conclusions by making direct comparisons between cities and/or counties due to the existence of numerous factors which affect the amount and type of crime from place to place. It's important to remember crime is a social problem and therefore, a concern of the entire community. The efforts of law enforcement are limited to factors within its control.

When compiled and evaluated, the data available in the ***Crime in Washington 2018*** can be utilized to:

1. Identify the number of crimes reported by contributing agencies.
2. Identify the geographical distribution of reported offenses.
3. Determine whether or not reported crimes have increased or decreased.

Although, generally, crime reporting is voluntary, there are Washington State statutes requiring submission to the WASPC CJIS Department, such as domestic violence crime reporting pursuant to RCW 10.99.030 and malicious harassment (hate bias) crime reporting pursuant to RCW 36.28A.030. In addition, there are state funding opportunities and programs tied to crime statistic reporting. For example, RCW 82.14.310 for counties and RCW 82.14.320 for

municipalities define the criminal justice assistance accounts and the use of crime statistics for calculation in funding.

Timely UCR submission to the WASPC CJIS Department is a requirement for the agency accreditation program in Washington State - Chapter 5, Standard 5.12. Some grant opportunities from federal agencies depend on crime statistics as well. For example, the federal legislation authorizing the Edward Byrne Memorial Justice Assistance Grant (JAG) Program awards is 42 United States Code (U.S.C.) § 3751(a). To be eligible, the JAG statute requires local governments report UCR data on violent crimes for at least three (3) of the last ten (10) years. (Reference: [www.bja.gov/Funding/JAGFAQ.pdf](http://www.bja.gov/Funding/JAGFAQ.pdf))

### **Domestic Violence**

Domestic violence offense crime statistics are collected as mandated by the Washington State statute (RCW 10.99.030). These are not separate offenses from those collected in the State UCR Program but because of the nature of the relationship between the victim(s) and offender(s) involved, an offense may include a domestic violence indicator. For agencies submitting NIBRS data, the domestic violence data element is collected on Crime Against Persons and Crimes Against Property. The domestic violence indicator is not forwarded to the FBI.

### **Malicious Harassment (Hate Crime)**

Washington State statute (RCW 36.28A.030) mandates the collection of information related to violations of Malicious Harassment or other crimes of bigotry or bias apparently directed against victims perceived to be of a particular race, religion, ancestry, ethnicity, national origin, gender, sexual orientation, or mental, physical, or sensory disability. Like domestic violence offenses, “hate crimes” are not distinct, separate offenses but are traditional offenses motivated in whole, or in part, by the offender's bias.

The data element must be used to indicate whether or not any Group A - Incident offense was motivated by bias and, if so, what kind. For SRS submission, the “hate crime” qualifier is included on offenses limited to Murder, Rape, Robbery, Aggravated Assault, Burglary, Larceny-Theft, Motor Vehicle Theft, Arson, Simple Assault, Intimidation, and Destruction/Damage/Vandalism. Data collected in the Hate Crime Program are forwarded to the FBI.

---

Data in this section represent the number of persons arrested, not the number of arrest offenses or charges filed. The following tables depict counts for offenses in which an individual has been taken into custody, cited, or summoned to appear in court. In some instances, an arrest may be counted when a juvenile is taken into custody but released without being charged. These numbers are derived from monthly National Incident-Based Reporting System (NIBRS) submissions by Washington State law enforcement agencies.

## Statewide Arrests

### Total Arrests

Reported Arrests **182,715**  
Rate per 1,000 **24.6**

The term "arrest" is defined as a physical arrest, citation, or served summons. This data represents the number of persons arrested, not on charges filed; therefore, each reporting jurisdiction submits one set of arrest data for each person per single apprehension. One set of arrest data will clear a single or multiple offenses in the same incident and/or multiple incidents.

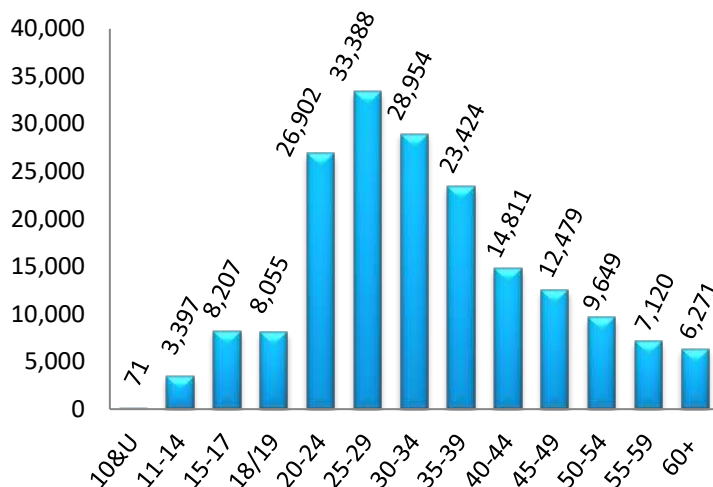

Arrests on warrants issued by another jurisdiction are reported by the originating agency, not the arresting agency.

All persons arrested for the commission of a Group "A" or Group "B" crime are included in this count. A Group "B" crime, which is only reported on the arrest level, encompasses offenses which are not under the Group "A" category. Excluded from this count are any traffic-related arrests, with the exception of DUI, Hit and Run (of a person), and Vehicular Manslaughter.

**15.6%** of arrests were DUI.

**19.1%** of total arrestees were between 18 and 24 years of age.

### Total Number of Arrests by Age in 2018

**95.4%** of all arrestees were unarmed.

When apprehended, **30.8%** of the weapons in arrestees' possession were firearms; **6.8%** were reported as automatic.

# Hate Crime

---

Collection of Hate Crime (Malicious Harassment) is mandated by State of Washington statute, RCW 36.28A.030. Hate crimes are not separate, distinct offenses, but rather traditional crimes motivated by the offender's bias. The data are derived from quarterly Summary Reporting submissions or monthly National Incident-Based Reporting System (NIBRS) submissions by Washington State law enforcement agencies.

## 2018 Washington Hate Crime

*Definition: A criminal offense committed against a person or property which is motivated in whole or in part, by the offender's bias against a race/national origin, religion, sexual-orientation, mental/physical/sensory disability, gender or ethnicity.*

### Hate Crime

Bias Motivated Incidents Reported\* **534**  
Bias Motivated Offenses Reported **765**  
Number of Known Offenders **558**

\* There can be up to three motivations per incident

Hate crime incidents are identified on the subjective motivation of the offender(s). Law enforcement investigations solely determine the sufficient objective facts to lead to a reasonable and prudent conclusion that the offender's actions were motivated by bias against a racial, religious, ethnical/national origin, mental/physical/sensory disability, gender or sexual-orientation group.

Accurate data collection for hate crime depends on proper training of law enforcement to recognize such incidents and the cooperation and desire of law enforcement communities to report these offenses without the influence of special interest groups, media, or politics.

Information derived from the following indicators can establish supportive facts to correctly identify hate bias motivation:

- Bias-related drawings, markings, symbols or graffiti were left at the crime scene.
- Bias-related oral comments, written statements or gestures made by the offender which indicate his/her bias.
- The incident coincided with a holiday relating to or a date of particular significance to, a race, religion, disability, ethnicity, gender or sexual-orientation.
- The offender and the victim were of different race, religion, ethnicity or sexual-orientation.
- Certain objects, items or things which indicate bias were used in the commission of the crime.
- The victim is a member and/or engaged in activities promoting a racial, religious, disability, ethnic or sexual-orientation group.
- Several incidents occurred in the same locality, at or about the same time, and the victims were all the same race, religion, disability, ethnicity or sexual-orientation.

# **Individual Agency National Incident-Based Reporting System (NIBRS)**

---

The following section provides individual law enforcement agencies' offense counts for Crimes Against Persons, Crimes Against Property, and Crimes Against Society.

Populations are based on the Washington State Office of Financial Management "Official November 30, 2018, Population Estimates", except for university, port, tribal, or state law enforcement agencies and non-reporting agencies which show zero populations.

The population data reflect permanent residents only. It does not include transient and visitor populations or residents of the military bases and state or federal hospitals.

Individuals using these tabulations are cautioned against drawing conclusions by making direct comparisons between cities and/or counties due to the existence of numerous factors which affect the amount and type of crime from place to place. It is important to remember that crime is a social problem and, therefore, a concern of the entire community. The efforts of law enforcement are limited to factors within its control.

### Comparison of Two-Years of NIBRS Data Submissions

*Note: If no NIBRS data was submitted in the prior year, the column will display all zeroes.*

1. Contributing agency's name.
2. The county in which contributing agency is located.
3. The estimated population based on the state Office of Financial Management (OFM) annual November forecast.
4. How many months NIBRS data was reported in the current year.  
*Note: agencies with both NIBRS and Summary submissions have separate tables.*
5. An overview of total offenses and clearances\* in a current year.
6. An overview of total arrests with sub-totals for adult and juvenile arrests.
7. The list of reportable Group A offenses.
8. The total number of each offense reported in the previous year.
9. The total number of each offense reported in the current year.
10. Percentage of change between current and previous years' offenses. *Note: If last year's total value is zero, then the calculation cannot be done because a number can never be divided by zero. Further, if less than a full year's data is provided in the previous or current year, there will be no percent of change shown.*
11. Crime rate per 1,000 population for each offense category.
12. Total arrests for the current year; includes adult and juveniles arrested.
13. Total offenses classified with Domestic Violence involvement for the current year.

*\*Note: A clearance can be by "arrest" or "exceptional means" and could possibly be for an offense in a prior year. The number does not reflect the number of persons arrested in an offense. A clearance does not include a case for which a law enforcement agency could not proceed with an investigation due to an uncooperative or unavailable witness or victim.*
