

Identifying ComEd Utility Wires

ComEd is responsible for the High Voltage and Secondary Voltage lines on the utility poles throughout northern Illinois.

Never approach a downed line. Always assume a line is extremely dangerous and energized.

If you see a downed line, immediately call
1-800-EDISON1 (1-800-334-7661).

Spanish-speaking customers should call
1-800-95 LUCES (1-800-955-8237).

If you have concerns about your phone or cable wires, please contact your local telecommunications provider.

Telecommunication wires (phone and cable) are always lower on the pole than ComEd wires. Not all poles have telecommunication wires, so always assume visible wires are energized.

ComEd High Voltage Power Lines

ComEd Secondary Voltage Power Lines

These lines connect your home to the ComEd power grid.

Phone Wires

Cable Wires
