Re: Brick Paver Sidewalk Restoration Project

Dear Business Owner,

The Village’s Public Works Department has contracted with A-1 Contractors, Inc. of Wheeling to perform restoration work on the downtown brick paver sidewalk system. The downtown brick paver sidewalks were installed in 2001-2002 and have provided a sturdy and attractive pedestrian walkway system since that time. Over the years portions of the walkways have required releveling due to winter frost/thaw cycles but now it is time for a full restoration.

Over the last 2 years, the Village has been conducting a 5-year systematic restoration plan of the entire downtown brick paver walk system. The restoration plan is basically the removal, sub-base regrading and relaying of the entire brick paver sidewalk. The first year included the north side Park Avenue from Vernon Avenue to Green Bay Road and the east side of Vernon Avenue from Park Avenue to Tudor Court. The second year included the west side of Vernon Avenue from Park Avenue to Hazel Avenue, the north and south sides of Hazel Avenue west of Vernon Avenue, and the south side of Park Avenue west of Vernon Avenue.

This year the plan will include the south side of Park Avenue from Village Court to Vernon Avenue, the east side of Vernon Avenue from Park Avenue to Hazel Avenue, and the North side of Hazel Avenue from Park Avenue to Village Court. Work is scheduled to begin on May 4th and is estimated to take 25 - 30 days to complete.

The project work plan allows the contractor to only remove and replace as many bricks that can be completed in an 8-hour workday. In addition, the contractor is responsible for maintaining safe passage for pedestrians and has been instructed to maintain access to all businesses during project work hours (7:00 am to 3:00 pm), this effort will help minimize disruptions to your daily business activities.

If you have any questions, please contact Public Works General Superintendent Donald Kirk at the phone number or email below. Thank you for your patience and cooperation during this project.

Sincerely,

Donald Kirk
