Re: Solar statement

Dear Emily Dodson and Philip Haddix:

The Village of Glencoe is committing to earn Sol Smart designation and will work to improve solar market conditions, making it faster, easier, and more affordable for our residents and businesses to install solar energy systems.

We will dedicate staff and efforts to work with the SolSmart team, the Metropolitan Mayors Caucus (MMC), and a solar advisor to achieve Sol Smart designation by January 2018.

As a signatory to MMC's Greenest Region Compact 2 (GRC2), we formally support the following solar goals and will to work to achieve them both in our own communities and collaboration throughout the region. These high-level goals are to: Advance renewable energy, enact policies that support clean energy, and to engage the community in clean energy practices

The GRC2 Framework, a companion tool to the Greenest Region Compact 2 pledge, aligns with Sol Smart program guidelines. We will focus on the following objectives and strategies common to both the GRC2 Framework with Sol Smart objectives. With the help of Sol Smart and an Advisor, which may become available through the MMC, we will work towards removing barriers to solar development.

We will work towards educating the community about solar energy (*E33) through our website, community events and our sustainability commission. In order to measure progress along the way, we will track key metrics related to solar energy deployment, such as the number and location of solar installations and their capacity. We are anxious to begin on the path towards Sol Smart designation and look forward to working with the Sol Smart team and the Metropolitan Mayors Caucus.

Sincerely,

Phillip A. Kiraly
Village Manager
