ACCESSIBILITY HARDSHIP EXEMPTION

The provisions of Section 11B-202.4 Exception 8 apply to existing buildings or facilities used as public buildings, public accommodations, commercial buildings or public housing. When these buildings or facilities undergo alterations, structural repairs, or additions, an accessible path of travel must be provided to the specific area of construction.

When the adjusted construction cost\(^1\) of **alterations, structural repairs, or additions to existing buildings and facilities** within three years of the original alteration does not exceed a valuation threshold of $170,466.00, (refer to: [https://www.dgs.ca.gov/DSA/Resources/Page-Content/Resources-List-Folder/Access-Compliance-Reference-Materials](https://www.dgs.ca.gov/DSA/Resources/Page-Content/Resources-List-Folder/Access-Compliance-Reference-Materials)), the cost of compliance with Section 11B-202.4 of the 2019 California Building Code shall be limited to 20% of the adjusted construction cost of alterations, structural repairs or additions.

In choosing which accessible elements to provide, priority should be given to those elements that will provide the greatest access in the following order:

1. An accessible entrance;
2. An accessible route to the area of alteration, structural repair, or addition (see definition of accessible route Section 202 & 11B-206.2.1 for more information on accessible routes and site arrival points);
3. At least one accessible restroom for each sex or one unisex (single-user or family) restroom;
4. Accessible telephones;
5. Accessible drinking fountains;
6. When possible, additional accessible elements such as additional parking, signs, storage and alarms.

If an area has been altered without providing an accessible path of travel to that area, and subsequent alterations of that area or a different area on the same path of travel are undertaken within three years of the original alteration, the total cost of alterations to the areas on that path of travel during the preceding three-year period shall be considered in determining whether making that path of travel is disproportionate.

\(^1\) Adjusted cost of construction does not include the cost of alterations to path of travel elements required to be upgraded outside the area of alteration, structural repair, or addition.
***If an area has been altered without providing a complete accessible path of travel to that area, and subsequent alterations of that area or a different area on the same path of travel are undertaken within three years of the original alteration, the total cost of alterations to the areas on that path of travel during the preceding three-year period shall be considered in determining whether the cost of making that path of travel accessible is disproportionate.***
