

# CITY OF HOLLISTER

## DEVELOPER'S CHECKLIST

### For Planned Developments & Subdivision Plats

One of the challenges that face builders and developers when they initiate a project, is the discovery process that is inevitably involved with finding and following the planning, permitting and inspecting process required by a political subdivision; cities, counties and states. Often times the tone of the relationship established during this process will set the tone for the remainder of the project. Therefore, it is important to everyone concerned to make this process as simple and user friendly as possible. The following is intended to serve as a “quick reference guide” to assist developers and builders through the sequencing of projects in the City of Hollister.

**Formalize a Plan:** Prior to contacting the City, a developer needs to have a set of professionally produced concept drawings and the necessary supporting materials to describe the general overall concept of the project.

Required     Completed    \_\_\_\_\_  
Date

**Give a Concept Presentation:** This presentation is generally given to the Planning Commission as a starting point for any significant development projects. By exception, a project may be first presented to City Council. *However, City Council cannot act on a Planned Development or Final Plat until it has been taken through the required process.* The City’s planning staff will make this determination and provide direction to the developer in a timely manner. Appropriate, professional renderings, plans and handouts are important to the success of the presentation.

Required     Completed    \_\_\_\_\_  
Date

**Apply for Voluntary Annexation:** The place to start, if you desire to bring a parcel into the City, is at the Planning & Building Department, located in City Hall. The Planning & Building Department will provide you with the required request form and review the process. City Code states that newly annexed property will be zoned either agricultural or single-family residential when it is annexed and may be re-zoned to a different zoning within 90-days after annexation. City Code Section Appendix 5 “R-1” J applies to voluntary annexation of property.

Required     Completed    \_\_\_\_\_  
Date

**Approval of Plan and Zoning:** Submit Plans and Plats early! The Planning & Building Department sets the schedule for the Planning Commission and the Board of Aldermen. Agendas are based on deadlines set forth in State Statutes and City Codes. There are application forms and a fee to be submitted to the Planning & Building Department. An applicant is usually placed on the first available agenda following the receipt of a completed application, *with any required submittals*.

Also, staff must have time to review Plans and Plats/Replats *before* they go to the Planning Commission. Staff will generate a “Staff Report” and/or Decision of Record if needed for the City Administrator and Commission. **Planned Developments:** The Planning & Building Department or City Clerk has an application with a checklist so we can coordinate the schedules and submittals.

Required     Completed    \_\_\_\_\_  
Date

**Plat Approval and Recording:** Preliminary Plans/Plats usually precedes Final Plats – *only* Final Plats are recorded at the County Recorder’s office. Six (6) sets of the survey for Plats and thirteen (13) sets are required for Planned Developments. Only six (6) sets of drawings are required for recording purposes. City Code Chapters 402 and 405 contains information on the platting process.

Required     Completed    \_\_\_\_\_  
Date

**Post Performance Deposit/Guarantee/Surety:** This deposit/guarantee/surety is to be an appropriate amount to cover the costs of any work done on streets, street lights, storm water controls, water lines, sanitary sewer systems, etc. This deposit/guarantee/surety is to be in the name of the City and is to be posted before the Plat or Planned Development can be recorded or any work will be permitted to commence. City Code Sections 405.100, 405.110, 405.200 & 520.020.4 pertain to the specifics.

Required     Completed    \_\_\_\_\_  
Date

**Secure any Developer’s Agreement:** On occasion, projects are of such a scope or offer such a benefit to the residents of the City that the City will choose to participate in some aspect. All agreements between the City and a Developer must be documented, in writing, and recorded on file with the City Clerk or other appropriate State and County agency. All legal and statutory requirements must be completed as attested by signatures of all parties to the agreement prior to any assumption that the benefits in the agreement will be in force.

Required     Completed    \_\_\_\_\_  
Date

**Plan Review:** Staff reviews building plans and infrastructure plans as well as Planned Development Plans and Plats. This is done prior to Planned Development Plans and Plats going to the Planning Commission or permits being issued.

Required     Completed    \_\_\_\_\_  
Date

**Secure Permits and Continuing Authorities:** It is helpful for Staff, the Design Professional of Record and the Contractor to have a “Pre-Permitting” meeting to discuss permit requirements. Water or sewer main extensions require a permit from the Missouri Department of Natural Resources (DNR). Part of the DNR process involves the jurisdiction having authority (City or County) to sign a Continuing Authority form stating they have existing capacity in transfer lines, lift stations and the central water/waste water facilities and will assume ownership and maintenance of main lines and central facilities once they are installed, inspected, and tested.

Required    Completed   \_\_\_\_\_  
Date

**Start Land Clearing:** The work must be permitted and covered by a Performance Guarantee. For any land disturbance over one acre in size you must obtain a DNR permit as well as a City land disturbance permit. There is a different DNR permit for projects of one to five acres in size versus projects over 5 acres. Tree removal involves an inventory and requirement to replace trees, over 6 inches, which are removed. There are also required permits for burning and blasting. Best Management Practices (BMPs) should be followed in all cases. City Code Chapter 401, Section 500.250 Landscaping, and DNR regulations apply.

Required    Completed   \_\_\_\_\_  
Date

**Construct Under Ground Utilities:** Engineered plans must be submitted, reviewed, and the work must be permitted and covered by a Performance Guarantee. This work must be inspected; waterlines, sewer lines, manholes, valves, etc must be tested and the test witnessed by City staff. City staff will make all utility connections to the City system.

Required    Completed   \_\_\_\_\_  
Date

**Construct Streets:** Engineered plans must be submitted and approved by the City. A Performance Guarantee must be posted to cover the work. The work must be inspected. See City Code Chapter 405 for detailed specifications.

Required    Completed   \_\_\_\_\_  
Date

**Initiate Vertical Construction:** Engineered plans must be submitted and approved by the City before a building permit is issued. It is helpful for Staff, the Design Professional of Record, and the Contractor to have a “Pre-Construction” meeting to discuss inspections and code requirements. See City Code Chapter 500.

Required    Completed   \_\_\_\_\_  
Date

**Construct Signage:** The City requires Sign Permits for the construction and installation of signs. Permits are available at the Planning & Building Department at City Hall. Larger signs and rooftop signs require engineer sealed plans. For details refer to Chapter 525 of City Code and State Statutes.

Required   
  Completed   
 \_\_\_\_\_ Date

**Landscape:** Landscaped buffers are required in some cases such as between parking lots and public right-of-way. Replacement of trees is required on a one-to-one basis for trees removed that are over 6-inches in diameter if they are removed for new construction. City Code Chapter 400, Appendix 6 & Figures 1 & 2, and City Code Section 500.250 apply.

Required   
  Completed   
 \_\_\_\_\_ Date

**Apply for Final Inspection and Certificate of Occupancy:**

Required   
  Completed   
 \_\_\_\_\_ Date

The following is a schedule of City meetings:

City Council: First and Third Thursdays Each Month 7:00 p.m. City Hall

Planning Commission: Second Tuesday Each Month 6:00 p.m. City Hall

Park Board: Third Tuesday Each Month 6:00 p.m. City Hall

Board of Adjustment: Third Wednesday Each Month as Needed 6:00 p.m. City Hall

Board of Appeals: As Required 6:00 p.m. City Hall

TIF Commission: As Required 7:00 p.m. City Hall

With the proper planning, coordination and sequencing, projects can avoid unnecessary delays, expense and frustration.

The City of Hollister is currently using the following statutes, ordinances and codes:

Missouri Revised Statutes

City of Hollister Ordinances - available via internet at [www.hollistermo.gov](http://www.hollistermo.gov)

The 2018 International Building Code (IBC) as amended by City

The 2018 International Mechanical Code (IMC) as amended by City

The 2018 International Plumbing Code (IPC) as amended by City

The 2023 National Electrical Code (NEC) as amended by City

The 2018 International Fire Code (IFC) as amended by City

The 2018 International Residential Code (IRC) as amended by City

The 2018 International Fuel Gas Code (IFGC) as amended by City

The 2018 International Swimming Pool and Spa Code (ISPC) as amended by City

The 2018 International Private Sewage Disposal Code (IPSC) as amended by City

Missouri and FDA Health Codes
