**FROM THE HUNTLEY POLICE DEPARTMENT****YOUR CAR IS HOTTER THAN YOU THINK**

The hot days of summer are here and we all must take care of ourselves and our friends during this heat - that includes our furry friends as well. Remember that on a warm day, leaving your pet in the car while you run errands can turn dangerous in a matter of minutes. When a dog is exposed to temperatures of 105 degrees, heat stroke can set in and the dog's organs can quickly begin to fail. When the temperature outside is 80 degrees, it takes just 20 minutes to reach over 105 degrees in the car. On a 90 degree day, it is less than 10 minutes.

People should also note that in the state of Illinois, it is a Class A misdemeanor to leave your pet in a life threatening situation for a prolonged period of time in extreme heat or cold conditions that results in injury to the animal. Any subsequent conviction is a Class 4 felony. If you see an animal in a car, we ask you to follow these steps:

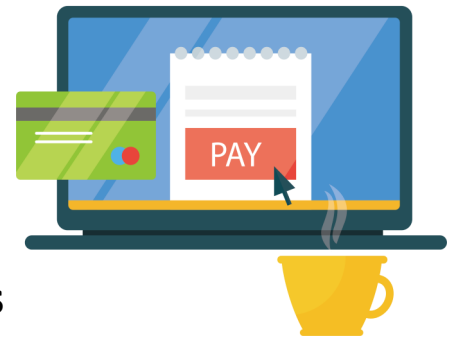

- 1) Record information about the vehicle - note the make, model, color, and license plate number
- 2) Alert management of the business - they may be able to find the owner and help the animal
- 3) Call the police or animal control
- 4) Stay with the animal until help arrives

People may be inclined to take action to free the animal themselves, but be aware that Illinois does not have a "Good Samaritan" law for pets. There is talk in Springfield for years to pass legislation that allows a citizen to break a car window to rescue a hot animal and avoid criminal liability. Currently, it is best to leave this to a first responder.
