OR

HOMEOWNER APPLYING FOR PERMIT: (SINGLE FAMILY DWELLING ONLY)

The Jacksonville Electrical Code, Ordinance Chapter 6 Section 6-97 of this Code requires that when electrical work is performed in the City of Jacksonville, it must be performed by a contractor registered with the City of Jacksonville to perform electrical work. The only exception to this requirement is that homeowners may perform their own electrical work for a single family residence, provided they have the knowledge to perform the electrical work, and provided they will reside in that residence for at least one year after the completion of the electrical work. If the homeowner hires the electrical work out, it must be performed by an electrical contractor registered with the City of Jacksonville. This requirement can be beneficial to the homeowner because in order for an electrical contractor to become registered he must have 5 years experience, must pass an examination, and must be bonded.
