

PROTECTING OUR GREATEST RESOURCE

Over the last three years, **Kentwood** has been participating in a program that will protect Michigan's greatest resource, our water. **Kentwood** wants to keep providing the best water quality for our residents, tourists, and wildlife.

Kentwood is working with our neighbors to preserve areas for wildlife and public recreation. This year we will be creating a new ordinance that will help us keep our lakes and streams clean and inviting. Right now, interns are working on

analyzing storm water to make sure that it meets our standards for clean water. Our employees are also being trained to do their jobs in environmentally friendly ways.

A public education program will be beginning this year. This program will provide opportunities for all of us to help preserve our water resources for wildlife and water sports. Many activities are being planned, so keep an eye out for more news about preserving our greatest resource.
