

15300 SW 116th Ave King City, OR 97224

Help King City shape its first Transportation Plan. www.kingcitytsp.org

## We want to hear from you!

This is our first formal Transportation System Plan (TSP). Until now, most streets in town have been managed by other jurisdictions, such as ODOT, but that's about to change.

To plan for additional future growth, the City is being proactive in planning for land use and for how everyone will get around.

The TSP will include a *whole* framework for all ages. The plan will include policies, standards, network maps, funding strategies, and more.

Help us plan for King City's growing transportation needs-for now and the future.

## Tell us what you think!

1. Label the map with your top three important destinations (A, B, C).

Notes on your selections:

### 2. Mark with an X your top three challenging or dangerous locations (X, Y, Z).

Mail this survey to us or complete online:

www.kingcitytsp.org			
SW Bull Mountain Rd Wing City Bissa Wing City Bissa Wing City Bissa Wing City Bissa Wing City Bissa Wing City Bissa Community Sholl Mountain Rd Community Bissa Community Co			
<b>3. Check all the ways you typically get around</b> (check all that apply):			
Car Bike Walking Transit Golf cart	Other		
4. What are your main concerns with getting around in King City? (check all that apply):			
Congestion on major streets 🔲 Unsafe travel speeds	Traffic in neighborhoods		
Sidewalk network gaps Bicycling infrastructure gaps	Walking or biking conflicts		
Transit stop locations Transit service timing	I have no concerns		
Street surface condition			
5. What else should we consider as we develop this plan?			

## What area will the plan consider?

This project is for all of King City, including the developing western expansion area. We will consider how people get to our commercial core and underdeveloped areas, and plan for "Complete Streets" that include safe walking and biking options everywhere in town.

It's important that we look closely at the streets people use most, including SW Beef Bend Road, SW Roy Rogers Road, and Pacific Highway West (99W). We'll assess how to make their key intersections safer and more reliable.

## We need your help!

We need your feedback to shape this plan.

- What it's like for you to get around King City today?
- Which places do you wish you could travel to?
- Are there ways you would like to get around but currently can't?

#### We invite all big ideas and input for the future of King City's transportation system.

To draft a plan for everyone, we need feedback from everyone. We are committed to engaging community members of all incomes and backgrounds, including those who use assistance to get around or who speak other languages.

Even amid COVID-19, the project will offer healthy, yet engaging opportunities for community input. The latest public engagement opportunities can be found at: www.kingcitytsp.org

## King City Beef Bend South Master Plan Project

A separate but related project is just getting started—the King City **Beef Bend South Master** Plan Project. Instead of working separately, the city and consultants will work closely to build one consistent vision for a healthy, thriving community. More on that project: www.ci.king-city.or.us
