RE: Urban Growth Boundary Expansion

King City 6D Urban Reserve Area

Dear Michael,

As a regional water resources management agency, Clean Water Services (District) is committed to improving water quality in the Tualatin River Watershed in collaboration with partners who share our mission.

The District appreciated the opportunity to have served on the Technical Advisory Committee for the development of the King City 6D Urban Reserve Area Concept Plan. We support the City's vision of an area that has the Tualatin River as a centerpiece and development that maintains a sensitivity to the health and vitality of the River.

The District is the anticipated sanitary sewer and storm and surface water management service provider for the 6D Urban Reserve Area, and we continue our commitment to working with the City to protect and enhance natural resources and effectively deliver vital infrastructure. Thanks to the forward thinking of our Board and ratepayers, our budget is balanced in a way that allows us capacity to issue debt and maintain healthy fiscal reserves to meet the demands of current and future customers.

We look forward to working closely with the City to ensure adequate facilities are available to support the area should it be brought into the Urban Growth Boundary in the 2018 or future Urban Growth Boundary expansion process.

Sincerely,

Nora Curtis
Conveyance Systems Department Director
Clean Water Services
