

# IN-HOME INSPECTION REQUIRED CONSENT AND RELEASE FORM

## 2022 Drinking Water Service Line Investigation

Your address was randomly selected per EGLE guidelines.

### PURPOSE

A reliable inventory of potable water service line materials is important for service line replacement planning, effective asset management, and notification of citizens served by lead service lines. Reliability and completeness of service line records can vary both across and within water supplies; therefore, it is important that supplies take steps to verify service line materials and records. Water supplies are not expected to physically verify every service line, but rather a statistically sound subset. To effectively evaluate the accuracy of service line records and/or predict service line materials, a representative, uniformly random number of service lines must be physically verified.

### What does this mean?

Three points of physical verification are required for each service line. Physical verification methods include potholing at locations 2 and 3 and an **IN-HOME INSPECTION AT LOCATION 1 IS REQUIRED, IT IS REQUIRED TO COORDINATE A DAY AND TIME FOR AN IN-HOME INSPECTION TO BE COMPLETED BY 2/15/2023 BETWEEN THE HOURS 10 AM AND 4PM MONDAY THRU FRIDAY.
