Notice to Residents

8/7/2018

The City of Lincoln Park Department of Public Services has contracted with Ace Pipe Cleaning to perform a Leak Detection Survey and Water Audit Report. They will be in the area for the next 2 weeks working on this project. In order to do the Leak Detection Survey, they will be using a device to listen to the water mains to locate any leaks within the system. The device Ace Pipe Cleaning will use to detect leaks is very sensitive to noise and this may result in work being completed in the very early morning hours when there is less traffic. If you have any questions regarding this project, please contact the Department of Public Services at 313-386-9000.
