

US Port of Entry Columbus, NM modified loading and unloading Bus Zone beginning September 7, 2017

=Foot Traffic/
 = Direction of Movement/
 = Bus/
 =Water Filled Barriers/
 =Chain link fence/

Be advised, starting **September 7, 2017**, the modified bus stop at the POE will change to the unmaintained road that is along the side of the commercial permit holding yard and Fiesta Warehouse. Buses will turn right at the apartment complex and go back to road that leads up to Contento RD. The corner of the U.S. Commercial Import/Export Service Office and Plata Ave will be closed off to through traffic since the contractor will be expanding construction in that area starting on September 11, 2017. This process gives student's time to get used to the change.

Buses will use the same pattern to pick up and drop off now. Changes will be relayed to bus drivers as needed. Follow NMAC 6.41.4.9 § E (P3) Modified for mass loading.

NMAC 6.41.4.9 § E (P3)-If Loading or unloading on the street, the bus shall be parked parallel to the curb, bumper to bumper or as close as possible to avoid pupils from going between buses and in a single file on the side of the road nearest to the school. Alternating flashers shall not be activated unless the bus is stopped on a traveled portion of the roadway.
