On March 23, 2020 the Mayor and Council acted to declare that a state of local emergency exists. This action allows the council and staff to enter into agreements and contracts necessary to respond to in order to protect the health, safety and welfare of the City and the Community.

- As part of this, the Council will be meeting via phone or other electronic means.

It is important that you know our public water supply is safe and has been automated for over two decades. We have numerous individuals who are, or who can monitor the system at any time of day. There has never been a failure in our municipal water system. The City will continue to meet MN State Health Department standards on testing and reporting requirements. The water system has stand-by emergency power sources.

Similarly, our sanitary sewer system is also automated. The entire system works on gravity with the exception of our two lift stations. Both lift stations are continuously monitored like the water system. Both have dual fuel energy sources. The greatest risk to the sanitary sewer system is putting items down the drain/toilet that do not belong – NO wipes/fabric of any kind as they can, and have; damaged the grinders in the lift station. Only TP, human waste and gray water (showers, bathing, dishwashing and clothes washing).

Our Police Department is at full force and we have robust contingency plans to ensure full coverage if we experience staff shortages due to illness.

Our contract Fire Department – SBM Fire, is similarly prepared.

Per the Governor’s directive and Council support, our Community Center- YMCA will be open exclusively for K-12 child care per the Governors guidelines. Contact the YMCA directly for more details.

City Hall, Police Department, and Public Works are all operational with public access limited to the window/entryway area. We remain fully operational but are limiting direct contact with the public.

All Park Buildings are closed and secured until further notice.

Our primary focus remains the consistent and reliable delivery of local public services; Police, Fire, Water, Sanitary Sewer, Roads and Storm Water Management. We will continue all licensing and permitting operations and support to the degree statutes and resources allow, economic activity in the private sector to ensure economic hardship is minimized.

We will endeavor to help – within our parameters and mission as detailed above

Please do your part as well and lookout for your neighbors, do not hoard supplies, and stay informed.

All divisions are reachable via email or phone. If you are unable to reach the person you need – email City Administrator Nyle Zikmund at nyle.zikmund@moundsviewmn.org or call and leave a message at 763-717-4001.
