City of Mounds View Investment Policy

The purpose of this investment policy is to guide the City Council and officials of the City in the conduct of the investment program so as to obtain a reasonable rate of return on the investments while minimizing risk and maintaining the public’s trust. The Treasurer shall seek to act responsibly as a custodian of the public trust and shall avoid any transaction that might impair public confidence in the City, the City Council, or the Administration.

I. Governing Authority

Legality
The investment program shall be operated in conformance with federal, state, and other legal requirements, including Minnesota Statutes Chapter 118A.

II. Scope

This policy applies to the investment of all funds.

1. Pooling of Funds

Except for cash in certain restricted and special funds, the City will consolidate cash and reserve balances from all funds to maximize investment earnings and to increase efficiencies with regard to investment pricing, safekeeping and administration. Investment income will be allocated to the various funds based on their respective participation and in accordance with generally accepted accounting principles.

2. Personnel

The personnel authorized to conduct banking and investment transactions on behalf of the City shall be named in the Annual Resolution Appointing Official Newspaper, Acting Mayor, Official Depository, and Treasurer. Within this policy, use of the title Finance Director shall mean the person appointed to that position by the City Council. The use of the title Treasurer shall mean any of the persons named in the Annual Resolution Appointing Official Newspaper, Acting Mayor, Official Depository, and Treasurer as being authorized to conduct banking and investment transactions on behalf of the City. Duties of the Treasurer will predominantly be carried out by the Finance Director, but may be carried out by any of the other named persons in the Finance Director’s absence. Treasurer shall mean any person carrying out the duties of the Treasurer.

III. General Objectives

The primary objectives, in priority order, of investment activities shall be safety, liquidity, and yield:

1. Safety
Safety of principal is the foremost objective of the investment program. Investments shall be undertaken in a manner that seeks to ensure the preservation of capital in the overall portfolio. The objective will be to mitigate credit risk and interest rate risk.

a. Credit Risk
The City will minimize credit risk, which is the risk of loss due to the failure of the security issuer or backer, by:
- Limiting investments to the types of securities listed in Section VII of this Investment Policy
- Pre-qualifying the financial institutions, broker/dealers, intermediaries, and advisers with which the City will do business in accordance with Section V
- Diversifying the investment portfolio so that the impact of potential losses from any one type of security or from any one individual issuer will be minimized.

b. Interest Rate Risk
The City will minimize interest rate risk, which is the risk that the market value of securities in the portfolio will fall due to changes in market interest rates, by:
- Structuring the investment portfolio so that securities mature to meet cash requirements for ongoing operations, thereby avoiding the need to sell securities on the open market prior to maturity
- Investing operating funds primarily in shorter-term securities, money market mutual funds, or similar investment pools and limiting the average maturity of the portfolio in accordance with this policy (see section VIII).

2. Liquidity
The investment portfolio shall remain sufficiently liquid to meet all operating requirements that may be reasonably anticipated. This is accomplished by structuring the portfolio so that securities mature concurrent with cash needs to meet anticipated demands (static liquidity). Furthermore, since all possible cash demands cannot be anticipated, the portfolio should consist largely of securities with active secondary or resale markets (dynamic liquidity). Alternatively, a portion of the portfolio may be placed in money market mutual funds or local government investment pools, which offer same-day liquidity for short-term funds.

3. Yield
The investment portfolio shall be designed with the objective of attaining a market rate of return throughout budgetary and economic cycles, taking into account the investment risk constraints and liquidity needs. Return on investment is of secondary importance compared to the safety and liquidity objectives described above. The core of investments are limited to relatively low risk securities in anticipation of earning a fair return relative to the risk being assumed. Securities shall generally be held until maturity with the following exceptions:
- A security with declining credit may be sold early to minimize loss of principal.
- A security swap would improve the quality, yield, or target duration in the portfolio.
- Liquidity needs of the portfolio require that the security be sold.
IV. Standards of Care

1. Prudence
The standard of prudence to be used by the Treasurer shall be the "prudent person" standard and shall be applied in the context of managing an overall portfolio. The Treasurer acting in accordance with written procedures and this investment policy and exercising due diligence shall be relieved of personal responsibility for an individual security's credit risk or market price changes, provided deviations from expectations are reported in a timely fashion and the liquidity and the sale of securities are carried out in accordance with the terms of this policy.

The "prudent person" standard states that, "Investments shall be made with judgment and care, under circumstances then prevailing, which persons of prudence, discretion and intelligence exercise in the management of their own affairs, not for speculation, but for investment, considering the probable safety of their capital as well as the probable income to be derived."

2. Ethics and Conflicts of Interest
The Treasurer shall refrain from personal business activity that could conflict with the proper execution and management of the investment program, or that could impair their ability to make impartial decisions. The Treasurer shall disclose any material interests in financial institutions with which they conduct business. They shall further disclose any personal financial/investment positions that could be related to the performance of the investment portfolio. The Treasurer shall refrain from undertaking personal investment transactions with the same individual with whom business is conducted on behalf of the City.

3. Delegation of Authority
Authority to manage the investment program is granted to the Treasurer and derived from the following: Annual Resolution Appointing Official Newspaper, Acting Mayor, Official Depository, and Treasurer. Responsibility for the operation of the investment program is hereby delegated to the Treasurer, who shall act in accordance with established written procedures and internal controls for the operation of the investment program consistent with this investment policy. Procedures should include references to: safekeeping, delivery vs. payment, investment accounting, repurchase agreements, wire transfer agreements, and collateral/depository agreements. [Please refer to GFOA’s Investment Procedures Manual, 2003.] No person may engage in an investment transaction except as provided under the terms of this policy and the procedures established by the Treasurer. The Treasurer shall be responsible for all transactions undertaken and shall establish a system of controls to regulate the activities of subordinate officials.

V. Authorized Financial Institutions, Depositories, and Broker/Dealers

1. Authorized Financial Institutions, Depositories, and Broker/Dealers
A list will be maintained of financial institutions and depositories authorized to provide
investment services. In addition, a list will be maintained of approved security broker/dealers selected by creditworthiness (e.g., a minimum capital requirement of $10,000,000 and at least five years of operation). These may include "primary" dealers or regional dealers that qualify under Securities and Exchange Commission (SEC) Rule 15C3-1 (uniform net capital rule).

All financial institutions and broker/dealers who desire to become qualified for investment transactions must supply the following as appropriate:

- Audited financial statements demonstrating compliance with state and federal capital adequacy guidelines
- Proof of National Association of Securities Dealers (NASD) certification (not applicable to Certificate of Deposit counterparties)
- Proof of state registration
- Completed broker/dealer questionnaire (not applicable to Certificate of Deposit counterparties)
- Certification of having read and understood and agreeing to comply with the [entity's] investment policy.
- Evidence of adequate insurance coverage.

An annual review of the financial condition and registration of all qualified financial institutions and broker/dealers will be conducted by the Treasurer. (See Appendix for the GFOA Recommended Practice on “Governmental Relationships with Securities Dealers.”)

VI. Internal Controls

1. Internal Controls

The Finance Director is responsible for establishing and maintaining an internal control structure designed to ensure that the assets of the City are protected from loss, theft or misuse. Details of the internal controls system shall be documented in an investment procedures manual and shall be reviewed and updated annually. The internal control structure shall be designed to provide reasonable assurance that these objectives are met. The concept of reasonable assurance recognizes that (1) the cost of a control should not exceed the benefits likely to be derived and (2) the valuation of costs and benefits requires estimates and judgments by management.

The internal controls structure shall address the following points:

- Avoidance of physical delivery securities
- Written confirmation of transactions for investments and wire transfers
- Password protected authorizations of wire transfers
- Development of a wire transfer agreement with the lead bank

Accordingly, the investment officer shall establish a process for an annual independent review by an external auditor to assure compliance with policies and procedures or alternatively, compliance should be assured through the City’s annual independent audit.
VII. Suitable and Authorized Investments

1. **Investment Types**
   Consistent with the GFOA Policy Statement on State and Local Laws Concerning Investment Practices, the following investments will be permitted by this policy and are those defined by state and local law where applicable:
   - U.S. Treasury obligations which carry the full faith and credit guarantee of the United States government and are considered to be the most secure instruments available;
   - U.S. government agency and instrumentality obligations that have a liquid market with a readily determinable market value;
   - Certificates of deposit and other evidences of deposit at financial institutions,
   - Bankers' acceptances;
   - Commercial paper, rated in the highest tier (e.g., A-1, P-1, F-1, or D-1 or higher) by a nationally recognized rating agency;
   - Money market mutual funds regulated by the Securities and Exchange Commission and whose portfolios consist only of dollar-denominated securities; and
   - Local government investment pools either state-administered or developed through joint powers statutes and other intergovernmental agreement legislation.

   Investment in derivatives of the above instruments shall not be allowed.

2. **Collateralization**
   Where allowed by state law and in accordance with the GFOA Recommended Practices on the Collateralization of Public Deposits, full collateralization will be required on all demand deposit accounts, including checking accounts and non-negotiable certificates of deposit. (See GFOA Recommended Practices.)

VIII. Investment Parameters

1. **Diversification**
   The investments shall be diversified by:
   - limiting investments to avoid overconcentration in securities from a specific issuer or business sector (excluding U.S. Treasury securities),
   - limiting investment in securities that have higher credit risks,
   - investing in securities with varying maturities, and
   - continuously investing at least 10 percent of the portfolio in readily available funds such as local government investment pools (LGIPs), money market funds to ensure that appropriate liquidity is maintained in order to meet ongoing obligations. (See the GFOA Recommended Practice on "Diversification of Investments in a Portfolio".)
   - never investing more than 20 percent of the portfolio in securities with final maturities greater than five years.

2. **Maximum Maturities**
   To the extent possible, the City shall attempt to match its investments with anticipated
cash flow requirements. Unless matched to a specific cash flow, the City will not directly invest in securities maturing more than ten (10) years from the date of purchase or in accordance with state and local statutes and ordinances. The City shall adopt weighted average maturity limitations (which often range from 90 days to 3 years), consistent with the investment objectives.

Because of inherent difficulties in accurately forecasting cash flow requirements, a portion of the portfolio should be continuously invested in readily available funds such as local government investment pools or money market funds to ensure that appropriate liquidity is maintained to meet ongoing obligations.

3. Competitive Bids
The Treasurer shall obtain competitive bids from at least two brokers or financial institutions on all purchases of investment instruments purchased on the secondary market.

IX. Reporting

1. Reporting
The Finance Director shall submit quarterly an investment report that summarizes recent market conditions, economic developments and anticipated investment conditions. The report shall summarize the investment strategies employed in the most recent quarter, and describe the portfolio in terms of investment securities, maturities, risk characteristics and other features. The report shall explain the quarter’s total investment return and compare the return with budgetary expectations. The report shall include an appendix that discloses all transactions during the past quarter. The report shall be in compliance with state law and shall be distributed to the investment committee and others as required by law.

Each quarterly report shall indicate any areas of policy concern and suggested or planned revision of investment strategies.

2. Performance Standards
The City’s cash management portfolio shall be designed with the objective of regularly meeting or exceeding a selected performance benchmark, which shall be the average return on three-month U.S. Treasury bills.

3. Marking to Market
The market value of the portfolio shall be calculated at least quarterly and a statement of the market value of the portfolio shall be issued at least quarterly. This will ensure that review of the investment portfolio, in terms of value and price volatility, has been performed consistent with the GFOA Recommended Practice on "Mark-to-Market Practices for State and Local Government Investment Portfolios and Investment Pools." (See GFOA Recommended Practices.) In defining market value, considerations should be given to the GASB Statement 31 pronouncement.
X. Policy Considerations

1. Exemption
   Any investment currently held that does not meet the guidelines of this policy shall be
   exempted from the requirements of this policy. At maturity or liquidation, such monies
   shall be reinvested only as provided by this policy.

2. Amendments
   This policy shall be reviewed on an annual basis. Any changes must be approved by
   the investment officer and any other appropriate authority, as well as the individuals
   charged with maintaining internal controls.

XI. Approval of Investment Policy
The investment policy shall be formally approved and adopted by the governing body of
the City and reviewed annually.

XII. List of Attachments
   The following documents, as applicable, are attached to this policy:
   • Listing of authorized personnel, see Annual Appointing Resolution
   • Relevant investment statutes and ordinances, see MN Statutes, Chapter 118A
   • Listing of authorized broker/dealers and financial institutions, see Annual
     Appointing Resolution
   • Internal Controls see Section VI of the draft investment policy
