How do we do this??

Community Risk Reduction

Simply stated, the goal of our Community Risk Reduction unit is that all of our citizens, from preschoolers to senior citizens, learn the proper actions to take in a sudden fire or life-threatening emergency.

The Fire Department intentionally focus knowledge and activities to lower the all-hazards risks within your area of operation.

HOW?

Hollister Fire Department

Est. 1875

Community Risk Reduction

Fire departments are uniquely positioned to know their communities better than most other organizations. Firefighters see firsthand, whether through medical emergencies, inspections or simply driving through the community, how people live and the needs they have.

Community Risk Reduction

The 5 E's

1. **Education**-Teach residents about risks in their homes and in the community through classes, home visits, presentations, handouts, articles and social media.
2. **Engineering**-Inform your community about risk-reducing products and technologies like heat-regulating stove elements, improved smoke and carbon monoxide alarms, fire sprinklers and how to create defensible space.
3. **Enforcement**-Enforcement identifies potential risks and non-compliance in your local properties and teaches your community how fire and building codes protect them.
4. **Economic Incentives**-Incentives can come in the form of benefits like tax credits that make installation of fire sprinklers more affordable or code exceptions that allow businesses to provide safe, altered services during COVID-19. Penalties and fines for non-compliance are also incentives that encourage behavior change.
5. **Emergency Response**-Making sure your fire and EMS department's response is efficient and effective is key to reducing the impact of incidents in your community.

Why we are here?

- Every year, fires threaten homes and properties.
 - Build up of unnecessary combustible debris and vegetation.
 - Property owner's responsibility to eliminate these fire hazards.
 - Their property that may endanger their neighbors and the community at large.
-
- Every property owner, regardless of type – including residential, commercial, and parcels of land -- is ultimately responsible for managing their vegetation to meet Fire Department requirements.

Part of the Solution

- Working together
- Grants
- Fire Safe Council
- Firewise Community-Break on CA Fair plan 12%
- Establish CRR
- Update and adopt fire codes
- Education

CALIFORNIA DEPARTMENT OF INSURANCE

HOME/RESIDENTIAL INSURANCE AND WILDFIRE

FAQ

Can an insurance co. cancel, non renew or decline due to wildfire risk?

After 60 days the insurer is restricted unless physical changes to property.

10-20 Days to cancel or 45 days prior to non-renewal.

What should I do if an insurer cancels, non-renews or declines to issue my policy?

You may contact to see if that are actions that can be taken to avoid cancellation.

What if I'm still unable to obtain residential property insurance?

You may apply to the FAIR PLAN-only last resort through brokers or directly

Only covers fire, no perils or other coverages and usually not enough!

EVERY COMPANY IS DIFFERENT!
