

Land Use	Allocation in acres	Percent Required
Hazards	10	
Level 1 Resource	2	
Level 2 Resource		
Residential	26.6	0.7
Non Residential	3.8	0.1
Civic Space	3.8	0.1
Unallocated	3.8	0.1

Column1	Column2
Total Acres	50
Developable Area	38
Weighted Average Units per acre	4.0
Max Density	160.0
Minimum Density	106.4

Residential Allocations	
Single, Two-Family	0.4
Attached	0.1
Multi-Family	0.1
Unallocated	0.4

Non Residential Allocations	
Civic	0.5
Commercial	

Developable area= total land area less hazards and level 1 resource

Average density is weighted across multiple districts. 4 used here is just an example.

Maximum Density: multiplies total land area less hazards by average weighted density.

Minimum Density: multiplies developable area by residential allocation; It specifically does not include land which contains hazards or level 1 resources.

Land Use	Allocation in acres	Percent Required
Level 2 Resources	0.5
