TO: VILLAGE OF TINLEY PARK PRESIDENT AND BOARD OF TRUSTEES

FROM: VILLAGE OF TINLEY PARK PLAN COMMISSION

SUBJECT: MINUTES OF THE NOVEMBER 21, 2019 REGULAR MEETING

Item #1 PUBLIC HEARING: LENNY'S FOOD N FUEL 183RD STREET, LLC, 7451 183rd Street

Consider a request to recommend that the Village Board grant Leonard McEnery on behalf of Lenny's Food N Fuel 183rd Street, LLC (Contract Purchaser) an amendment to the North Creek Business Park Planned Unit Development Ordinance (Ord. 91-O-083) to permit an automobile service (gas) station with a convenience store to be a permitted use on the subject property. Additionally, to grant a Special Use Permit for a Substantial Deviation with exceptions from the Zoning Ordnance for the property located at 7401 - 7451 183rd Street in the ORI PUD (Office and Restricted Industrial, North Creek Business Park PUD) zoning district. Site Plan and Final Plat approval will also be considered as well.

Present were the following:

Plan Commissioners:	Garrett Gray, Chairman Curt Fielder James Gaskill MaryAnn Aitchison Stephen Vick Tim Stanton
Absent Plan Commissioner(s):	Eduardo Mani Lucas Engel Angela Gatto
Guests:	Leonard McEnery, Petitioner Lyman Tieman, Attorney Michael Werthmann, Traffic Consultant, KLOA

A Motion was made by COMMISSIONER STANTON, seconded by COMMISSIONER VICK, to open the Public Hearing for Lenny's Food N Fuel 183rd Street, LLC. The Motion was approved by voice call. CHAIRMAN GRAY declared the Motion approved.

CHAIRMAN GRAY noted that Village Staff provided confirmation that appropriate notice regarding the Public Hearing was published in the local newspaper in accordance with State law and Village requirements.

CHAIRMAN GRAY requested anyone present in the audience, who wished to give testimony, comment, engage in cross-examination or ask questions during the Hearing stand and be sworn in.

Dan Ritter, Senior Planner gave a presentation as noted in the Staff Report. The Petitioner, Leonard McEnery on behalf of Lenny's Food N Fuel, 183rd Street, LLC is seeking an amendment to the existing North Creek Business Park Planned Unit Development, Special Use Permit for a Substantial Deviation from the PUD, Site Plan Approval and Final Plat of Consolidation Approval. The requests would allow for the construction of a new Food N Fuel gas station and convenience store on the property at 7451 183rd Street.

The property is zoned ORI (Office and Restricted Industrial) as part of the North Creek Business Park PUD. The PUD was originally approved and subdivided in 1991 with the ORI base zoning covering the full area with some commercial-oriented

use like hotels, restaurants, and daycares. In 1995, the PUD came back and a portion of the area included in the PUD that was most adjacent to Harlem Avenue was rezoned from the ORI base zoning to a B-3 (General Business) base zoning. Most of the PUD has been developed and includes a mixture of office, light industrial, educational, and commercial uses. This area has the area near I-80, Hollywood Casino Amphitheater Tinley Park Convention Center and a variety of shopping/service establishments. There is one existing gas station on the corner of Harlem and 183rd. All properties surrounding the subject site are in the same North Creek PUD.

This site is also located in the Urban Design Overlay District (UDOD), which promotes walkability, lesser front yard setbacks with parking in the back, and a more urbanized look. The PUD does not specifically mention automobile or gas stations as permitted uses. They are prohibited under the ORI zoning district, however, with this being in a PUD an amendment is possible to add in automobile/service stations as permitted. There is also Speedway in this area on the southwest corner of 183rd and Harlem in the area zoned B-3.

This is a 3-acre site. The property consists of two vacant parcels and a sliver of a third parcel on the southeast corner of West Creek Drive and 183rd Street. This site was chosen in Will County due to the high traffic counts, I-80 access, and it is one of the last sites available for a gas station. The property located to the east is Hamada of Japan Restaurant and north of the subdivision's retention pond. To the southeast is the site where the new Holiday Inn will be built. The property is zoned Office and Restricted Industrial (ORI) and is part of the North Creek Business Park PUD.

There will be a 9,100 sq. ft. convenience store building that sells vehicle fuel and typical retail items. There will also be a Dunkin Donuts with a drive-thru, a second food service vendor, and a separate area intended for video gaming. On the exterior, the site includes fueling stations for 18 vehicles and three large trucks. This will be similar to other Gas N Wash stations in the area. Recently there was a station annexed on Harlem Avenue that is a Food N Fuel with a car wash. There is also a Gas N Wash on 191st in Mokena. This proposed station will function similarly without a car wash.

The overall site will include the convenience store building, vehicle fueling area/canopy, truck fueling area/canopy, vehicle parking, a drive-thru lane, walkways, landscaping, a storage shed, and a dumpster enclosure. Additionally, new utilities will be provided to the building, such as water main, sewer lines, and lighting.

Access to the site will be right-in/right-out along 183rd Street. The access will have a raised median and signage as required by Cook County IDOT to ensure the right-in/right-out requirement is being followed. Full-access will still be available through West Creek Drive and North Creek Drive. The subdivision code requires that sidewalks are installed into any new developments that are proposed. The Petitioner will install sidewalks along both 183rd Street and West Creek Drive frontages.

A parking and traffic study was done by KLOA and is included in the packet. There are 68 parking stalls proposed on the site. This site is unique due to the mix of different uses proposed to be incorporated in the convenience store. Some of the demand may include overlapping customers. Someone getting gas may also purchase retail items and/or go to Dunkin Donuts. The proposed plan anticipates a need for 68 parking stalls following typical Zoning code parking requirements based on individual use.

- 34 parking stalls for retail use (1 space per 150 sq. ft.; 5,100 sq. ft. retail space/150 = 34).
- 17 parking stalls for dining/restaurant uses (1 space per 3 seats; 51 seats/3 = 17)
- 5 parking stalls for gaming machines (1 parking space per seat)
- 12 parking spaces for employees (1 parking space per maximum number of employees)

With 68 spaces (65 standard, 3 accessible) supplied based on the proposed plans, the parking requirements would meet the Zoning Code's minimum. Staff believes 68 spaces will be sufficient due to the unique mix of uses on the site.
The drive-thru has availability for ten vehicles. This exceeds the stacking at the majority of other Gas N Wash and Food N Fuel locations that have Dunkin Donuts which typically have eight. The menu board location will be determined.

The east bufferyard was revised to be in full compliance with the landscape code requirements. The north bufferyard shortage was revised to add approximately 14 shrubs and an understory planting. Staff believes the bufferyard and parkway landscaping combination will create an attractive front landscape buffer that exceeds the neighboring property's landscaping.

BUFFERYARD REQUIREMENTS						
Bufferyard Location	**Required Width**	**Proposed Width**	**Length**	**Required Plantings**	**Proposed Plantings**	**Deficit**
North ("C" Bufferyard)	10'	10'	462' (excluding entry aisle)	23 CT 10 US 93 SH	11 CT 10 US 64 SH	**-12 CT** **- US** **-29 SH**

The interior landscaping shortage is a result of the gas station fueling area being counted as a parking lot. The Plan Commission agreed there was limited ability to expand this landscaping without creating vehicle safety or maintenance issues.

PARKING LOT LANDSCAPING STANDARDS			
Requirement	**Provided**	**Deficit**	**Comments**
15% of parking lot area to be landscaped or 13,390 square feet	3,040 square feet	**10,350 square feet**	89,289 s.f. of parking lot shown on landscape plan and includes fueling area. Add shrubs to large island in the middle of the site that wraps drive thru / parking.

Mr. Ritter displayed renderings of the structures. The architecture is fairly simple on the building. It will be similar to the other Gas N Fuel stations. The front facade of the convenience store building was revised to include face brick (78.6% of exterior, excluding glazing) along the top of the building where there was previously EIFS with stone around the base (14.2% excluding glazing). The new revision exceeds the Comprehensive Building code's requirement for 75% face brick. This brick will be lighter in tone/color to give some contrast to the front façade. The building will have a red metal coping/cornice around the top of the structure. The two fueling canopies are also proposed to be red in color. All mechanical equipment will be screened by the rooftop parapet. There will be matching enclosures and maintenance shed on site.

There will be shingled canopies on the front facades. These canopies were previously placed over manual changeable copy signs on previous versions of the plan. The manual changeable copy wall signs were removed as they are a prohibited sign type. The signage areas were revised to include additional front façade windows.

All proposed signs meet the code requirements for size, number, and location.

The petitioner has proposed the following signs:

- Four wall signs (including one 15 sq. ft. interior tenant sign)
- Three gas station canopy signs
- Two directional "Trucks" canopy signs
- One Dunkin Donuts drive-thru menu board and clearance bar
- Four drive-thru directional signs (no logos)
- One monument sign 10' ft. tall

The lighting plan for the proposed development complies with the new lighting standards for fixture type, illumination intensity, and light intensity at the property lines.

The Petitioner has provided a Photometric Plan that indicates light spillage of less than one foot candle at the roadway and property lines. All light fixtures are full cut-off and downcast to prevent glare on adjacent properties and roadways.

Special approvals needed are:

PUD Ordinance Amendment

As noted in the Staff Report this will amend the 1991 Ordinance. The proposed amendment adds an "automobile service station with a convenience store to the list of permitted uses but only on the subject property.

Special Use Permit for a Substantial Deviation

As noted in the Staff Report deviations from the Village Zoning Ordinance are considered Exceptions rather than Variations when located within a PUD an do not require the standard Findings of Fact as required with a Variation. Alternatively Exceptions are looked at in terms of their conformance to their overall PUD's design and goals.

Below are the specific Exceptions and Deviations being requested as part of the Special Use:

1. Exceptions from the Urban Design Overlay District (Section V)
    a. Increased front yard setback (140.5' proposed)
    b. Allow parking in the front yard
    c. Maximum of one curb cut per site (two proposed)
    d. Required cross-access to adjacent properties (no cross-access to the south)

2. Deviations from the PUD Requirements and Sign Regulations (Section IX)
    a. Allow parking in the front and side yards
    b. Changes to the approved lots as indicated in the Final Plat of Subdivision

Additional cross-access was added to the Plat of Subdivision for a potential future department to the south. Whether this cross-access connection is utilized can be determined through site plan review when that development is proposed.

Final Plat of Resubdivision

The proposed Plat of Subdivision will consolidate two existing lots along 183rd Street. The proposed consolidated lot will also include a small portion (178.27 sq. ft.) of the lot to the south that will make the resulting lot a total of 3 acres in size. Existing drainage and utility easements will remain on the property. Easements for the public sidewalk and cross/access to east and south have been included in the Final Plat.

The last thing that was discussed at the Workshop was the addition of a traffic light on the corner of 183rd St. and either West Creek Drive or North Creek Drive. Staff has talked with the County and the State and it has not been considered due to the traffic count. With the addition of the hotels and the gas station, the Engineer will speak with them again to try and get the traffic light at this location. A study will be done to see if it meets the standards.

CHAIRMAN GRAY asked the Commissioners if they had comments or questions.

COMMISSIONER STANTON noted this a great thing for Tinley Park. All other Commissioners agreed.

CHAIRMAN GRAY inquired about the traffic within the gas station. He noted that it could be difficult with the flow in the interior of the station. There is a busy traffic issue at the Speedway on the corner of 183rd Street and Harlem Avenue. Also, there is an issue with the sidewalk crossing the access.

Michael Werthmann, KLOA Traffic Coordinator replied this area is a lot like the station at Rt.6 and Cedar and there is no problem there. Most people will be entering in the full-access rather than the right-in access. The crosswalk is common to cross the access. Most drivers are aware of the crosswalk. The site lines are clear.

Mr. Ritter noted there will be raised medians in this area and the sites islands and curbing will help the direct traffic flow and slow people down.

CHAIRMAN GRAY asked the Petitioner if he would like to speak.

Lyman Tieman, Attorney noted he believes they have covered everything that was brought up at the Workshop.

CHAIRMAN GRAY asked for comments from the public.

A Motion was made by COMMISSIONER STANTON, seconded by COMMISSIONER GASKILL, to close the Public Hearing for Lenny's Food N Fuel 183rd Street, LLC. The Motion was approved by voice call. CHAIRMAN GRAY declared the Motion approved.

Mr. Ritter went through the Standards for Special Use:

a. That the establishment, maintenance, or operation of the Special Use will not be detrimental to or endanger the public health, safety, morals, comfort, or general welfare;
   - *The Special Use will not be detrimental to or endanger the public health, safety, morals, comfort, or general welfare because the proposed project will encompass the development of an automobile service (gas) station and convenience store that will service for visitors and residents of the community. The project will be constructed meeting current Village building codes and compliment surrounding businesses and properties.*

b. That the Special Use will not be injurious to the use and enjoyment of other property in the immediate vicinity for the purposes already permitted, nor substantially diminish and impair property values within the neighborhood;
   - *The Special Use will not be injurious to the use and enjoyment of other property in the immediate vicinity for the purposes already permitted, nor substantially diminish and impair property values within the neighborhood because the proposed project will develop land that is currently vacant and provide services for visitors and residents of the community. The site will be well-landscaped and the building will be constructed with quality materials. This proposed use is similar and compatible with existing nearby uses.*

c. That the establishment of the Special Use will not impede the normal and orderly development and improvement of surrounding property for uses permitted in the district;
   - *The Special Use will not impede the normal and orderly development and improvement of surrounding property for uses permitted in the district because the majority of the property within this area has already been developed. Landscape buffers and cross-access has been supplied for the vacant property to the south.*

d. That adequate utilities, access roads, drainage, and/or other necessary facilities have been or are being provided;

- *The proposed plans provide evidence of existing utilities, access roads, and drainage and show proposed plans for necessary modifications to existing utilities, access roads, and drainage to be accommodated on the Food N Fuel site. Drainage has been accounted for within the existing subdivision pond to the southwest of the proposed site.*

e. That adequate measures have been or will be taken to provide ingress and egress so designed as to minimize traffic congestion in the public streets; and
   - *The proposed plans include site access by utilizing two curb cuts on 183rd Street and West Creek Drive that allow for ingress/egress to the site and efficient site circulation. Cross-access for passenger vehicles is also provided by a cross-access easement to the east through the neighboring property that connects to North Creek Drive. Cross-access is also supplied to the vacant lot to the south for possible future cross-access as well. The site incorporates proposed public and private walkways for safe pedestrian travel to and from the site.*

f. That the Special Use shall, in all other respects, conform to the applicable regulations of the district in which it is located, except as such regulations may in each instance be modified by the Village Board pursuant to the recommendation of the Plan Commission. The Village Board shall impose such conditions and restrictions upon the premises benefited by a Special Use Permit as may be necessary to ensure compliance with the above standards, to reduce or minimize the effect of such permit upon other properties in the neighborhood, and to better carry out the general intent of this Ordinance. Failure to comply with such conditions or restrictions shall constitute a violation of this Ordinance.
   - *The Special Use conforms to all other applicable regulations of the Planned Unit Development and the Village's ordinances and codes. This Special Use Permit is necessary to allow the deviation from the North Creek Business Park Planned Unit Development and allowing for exceptions from the Urban Design Overlay District to the front yard setback, location of parking, and the maximum of one curb cut. These exceptions are consistent with other properties within the North Creek Business Park and the intent of the regulations are met where possible.*

g. The extent to which the Special Use contributes directly or indirectly to the economic development of the community as a whole.
   - *The proposed Food N Fuel project will contribute directly to the economic development of the community by providing fuel, retail, and food services to visitors, providing additional jobs, and providing additional property and sales tax revenue where the existing vacant property is generating minimal tax revenue.*

Standards for Site Plan Approval:

a. That the proposed Use is a Permitted Use in the district in which the property is located.

b. That the proposed arrangement of buildings, off-street parking, access, lighting, landscaping, and drainage is compatible with adjacent land uses.

c. That the vehicular ingress and egress to and from the site and circulation within the site provides for safe, efficient, and convenient movement of traffic, not only within the site but on adjacent roadways as well.

d. That the Site Plan provides for the safe movement of pedestrians within the site.

e. That there is a sufficient mixture of grass, trees, and shrubs within the interior and perimeter (including public right-of-way) of the site so that the proposed development will be in harmony with adjacent land uses and will

provide a pleasing appearance to the public; any part of the Site Plan area not used for buildings, structures, parking, or access-ways shall be landscaped with a mixture of grass, trees, and shrubs.

f. That all outdoor trash storage areas are adequately screened.

CHAIRMAN GRAY asked for Motions.

Item #2 **PUBLIC HEARING - MASONRY TEXT AMENDMENTS**
Consider recommending that the Village Board approve Text Amendments to Section II.B. (Definitions), Section III.U. (Site Plan Review), Section V.C.4. (Elevations and Facades), Section V.C.7 (General Requirements/All Business & Commercial Districts) and Section V.C.10 (Site Development Standards for Industrial Uses) of the Zoning Ordinance to incorporate masonry requirements for residential, commercial and industrial uses.

Present were the following:

Plan Commissioners:	Garrett Gray, Chairman Curt Fielder James Gaskill MaryAnn Aitchison Stephen Vick Tim Stanton
Absent Plan Commissioner(s):	Eduardo Mani Lucas Engel Angela Gatto
Guests:	None

A Motion was made by COMMISSIONER VICK, seconded by COMMISSIONER AITCHISON, to open the Public Hearing for Masonry Text Amendments. The Motion was approved by voice call. CHAIRMAN GRAY declared the Motion approved.

CHAIRMAN GRAY noted that Village Staff provided confirmation that appropriate notice regarding the Public Hearing was published in the local newspaper in accordance with State law and Village requirements.

CHAIRMAN GRAY requested anyone present in the audience, who wished to give testimony, comment, engage in cross-examination or ask questions during the Hearing stand and be sworn in.

Paula Wallrich, Planning Manager gave a presentation as noted in the Staff Report. Staff is currently working with a consultant to update the Tinley Park Comprehensive Building Code. As part of the process, certain sections of the Village's Code have been identified that are not typically addressed in a building code. Staff will be updating the building code and will be taking it out of the Building Code and entering it into the Zoning Code.

Staff is supporting the current brick masonry requirements for residential and commercial districts with some minor changes. Staff is recommending a change in the industrial districts that would continue to require masonry construction but not require the use of face brick on buildings larger than 80,000 sq. ft. In addition staff is recommending a change in the protocol for site plan review and is recommending architectural and site design standards to assist in the review of architectural and site plans proposed for non-residential structures.

These amendments will streamline the review process and result in regulations that support economic development rather than function as an encumbrance to industrial growth.

Staff has created standards for site and architectural reviewto provide for a more consistent review. Along with that staff has addressed some actual percentages of masonry and brick on commercial and industrial districts.

Ms. Wallrich displayed examples of several buildings in the Village that have met the brick requirements noting that commercial development has benefited from the brick requirements.

In reviewing the current masonry or brick requirements for commercial and industrial buildings staff reviewed the construction requirements of neighboring communities. Many of these communities are providing waivers of their brick requirements.

Community	Exterior Building Material Requirements by Building Type	
	Commercial	**Industrial**
Tinley Park	• 1-3,000 SF: 100% face brick • 3,001-40,000 SF: 75% face brick, 25% other masonry • 40,001-80,000 SF: 60% face brick, 40% other masonry • 80,001+ SF: 25% face brick, 75% other masonry	
Mokena	• 100% masonry and glass	• 100% of front elevation must be masonry and glass • 75% of all other elevations must be masonry and glass
New Lenox	• Architectural precast concrete (exposed aggregate, acid etched, polished, honed, thin brick, stone veneer); or • Solid masonry (face brick, stone, exposed aggregate) on front and sides. Rear elevations can be common brick.	• The total surface area of the front elevation shall be constructed of solid finish veneer, masonry or glass.
Orland Park	• Design Guidelines, does require brick from ground level to tops of windows	• Design Guidelines, does require brick from ground level to tops of windows
Lockport	• Design Guidelines with levels of classes of materials which require % of brick	• Design Guidelines with levels of classes of materials.
Plainfield	• Design guidelines encourage utility brick, sandstone, native stone or glass; concrete block, split face block, pre-cast	• Design guidelines require masonry materials including pre-cast concrete panels, split face block. No brick required.

	panels or EFIS are discouraged.	

Ms. Wallrich proceeded to outline the proposed text amendments:

1. Delete Section 305 Masonry from the Comprehensive Building Code;
2. Amend Section II.B. (Definitions) to include a definition for "*Masonry"*;
3. Amend Section III.U.(Site Plan Review) to include architectural review; provide architectural and site design standards;
4. Amend Section V. C. 4. (Elevations and Facades) to include masonry requirements for single-family detached, single-family attached, townhomes and all single-family semi-detached dwellings;
5. Amend Section V.C.7. (General Requirements/All Business & Commercial Districts) to include masonry requirements for all commercial districts including the Office and Restricted Industrial District and multi-family dwellings; and
6. Amend Section V.C.10. (Site Development Standards for Industrial Uses) to include masonry requirements for all industrial districts.

Ms. Wallrich provided an explanation of each amendment as outlined in the staff report and summarized as follows:

1. Delete Section 305 Masonry from the Comprehensive Building Code which will improve efficiencies and provide for a more comprehensive and consistent review of development.

2. Ms. Wallrich provided a recommended no definition for "Masonry". The proposed amendment explicitly defines what can be included under this definition which includes brick, stone and pre-cast masonry walls.

3. Amend Section III.U. (Site Plan Review) to include architectural review utilizing architectural and site design standards. Reviews will be completed by staff unless it includes a zoning request which will then trigger a Plan Commission review. The architectural and site design standards will help guide the review and allow for more consistent enforcement of the masonry requirements and provide assurances of quality architecture as outlined in the architectural standards.

4. The proposed amendment for Section V. C. 4. (Elevations and Facades) will remain substantially the same except for the addition of "townhomes" that are not addressed in the current code. Multi-family structures of 3 or more units are regulated as a non-residential structure and will be included in Section V.C.7. for purposes of regulating masonry requirements.

5. The proposed amendment for Section V.C.7. (General Requirements/All Business & Commercial Districts) will include masonry requirements for all commercial districts including Office and Restricted Industrial District and multi-family dwellings.

   Ms. Wallrich noted that the majority of the hotels in the village are located in the ORI districts and have been required to be constructed with brick since 2007 (with the exception of WoodSpring as discussed above). Areas such as the North Creek (south of 183rd at West Creek Drive) and Hickory Creek (south of 183rd at 76th Ave.) Planned Unit Developments are zoned ORI with few vacant lots left for construction. She noted that the largest area available for development that is zoned ORI is along 191st street at 80th Avenue, Rte. 45 north of I-80 and the Tinley Park Mental Health Center. Since these areas will most likely develop with professional offices or hotels, staff is recommending they be regulated similarly to commercial districts which require the majority of these structures to be constructed of brick. The size of the building impacts the amount of brick required and provides for the use of alternate masonry materials to comprise portions of the building not required to be constructed of brick. It also

provides for the use of alternate building materials to be used as accents. She noted that the use of design standards will assist in ensuring quality construction.

Ms. Wallrich went on to explain that the current Section V.C.7. (*General Regulations/All Business/Commercial Districts*) will remain generally intact with some minor changes for structures greater than 80,000 sq. ft.; instead of requiring 25% brick the amendment allows a choice of brick or decorative stone. Staff is recommending the current regulations for structures less than 40,000 remain as currently written with the addition of allowing the use of stone as a percentage of brick required.

She presented the following table which provides a comparison between existing and proposed masonry requirements.

B-1,B-2, B-3, B-4, B-5 & ORI ZONING DISTRICTS			
SIZE	EXISTING	PROPOSED*	Impact
≤ 3,000 SF	100 % Face Brick	100% Face Brick (Decorative stone allowed for 30% of the brick requirement)	None- but provides flexibility with brick
3,001 – 40,000 SF	75% Face Brick,25% other masonry (not defined)	75% Face Brick (Decorative stone allowed for 25% of the brick requirement), 25% other masonry as defined	None- but provides flexibility with brick with the use of stone and defines "other masonry"
40,001 – 80,000 SF	60% face brick, 40% other masonry (not defined)	60% face brick, (Decorative stone allowed for 20% of the brick requirement), 40% other masonry as defined.	None- but provides flexibility with brick with the use of stone and defines "other masonry"
≥ 80,000 SF	25% Face Brick, 75% other masonry (not defined)	25% Face Brick or decorative stone, 75% other masonry (not defined)	Less restrictive .No longer requires brick but does require 25% decorative stone in lieu of brick, defines "other masonry"

**15% of any one façade may use alternate building materials as defined in Section V.C.7.G. as architectural treatments, decorations or architectural accents*

Ms. Wallrich outlined the proposed text amendments which were included in the staff report. She also noted that these regulations will pertain to multi-family structures as well. She added that certain alternate building materials may be used for architectural treatments, decorations or architectural accents provided they do not constitute more than 15% of any façade. A list of the approved materials were included in the staff report. She noted a list of prohibited materials and the need for any additions to conform to the building materials used for the existing structure. If there is difficulty in matching the existing material, then the architectural design of the addition must provide an attractive transition to a new material that is consistent with current building material requirements.

6. Ms. Wallrich proceeded to discuss the recommended amendments to Section V.C.10. (Site Development Standards for Industrial Uses). She reviewed the current regulations and recommended the masonry requirements be incorporated into Section V. *(Supplementary District Regulations*) which provide General Regulations for Industrial Uses (Section V.C.10.). She noted that the current section references the "Industrial and Commercial

Commission" which no longer exists and therefore all references to this Commission has been deleted; sections duplicating Subdivision Regulations have also been deleted.

Ms. Wallrich discussed that the M-1 (General Manufacturing) districts are primarily located south of 183rd Street west of 80th Avenue (Tinley Crossings PUD, Mercury Business Center and Northstar Business Center) and south of I-80 east of Oak Park Avenue and north of Prosperi Drive and the Hollywood Casino Music Center (First Industrial Realty PUD). She noted that the MU-1 (Mixed–Use Duvan Drive Overlay) district is located east of Harlem Avenue north of the Metra tracks. There are a few in-fill developments or redevelopment opportunities but there are limited large scale development opportunities in these districts. Despite the limited development opportunities, the industry standard for these types of uses, especially with structures greater than 40,000 sq. ft. does not require brick as currently required by the Building Code. The proposed amendments lessen the brick requirement for buildings greater than 10,000 sq. ft. but less than 40,000 sq. ft. by only requiring 50% of each façade as face brick or decorative stone. For structures greater than 40,001 sq. ft. but less than 80,000 sq. ft. the proposed amendment reduces the requirement from a 60% brick requirement to 25% brick or decorative stone but on the front façade only. The remaining facades are required to be masonry as defined but not brick. The masonry definition includes pre-cast concrete tilt up construction which represents the majority of the village's current industrial building inventory as well as what our neighboring communities require. Structures greater than 80,001 sq. ft. in size are no longer required to have brick but are still required to be masonry as defined.

Ms. Wallrich then presented the following table which provides a comparison between existing and proposed masonry requirements. The breakdown of building sizes has been revised to add masonry requirements for structures of "3,001– 10,000 sq. ft. "and "10,001– 40,000 SF".

M-1 & MU-1 Districts			
SIZE	EXISTING	PROPOSED*	Impact
≤ 3,000 SF	100 % Face Brick	100% Face Brick (Decorative stone allowed for 30%)	None- but provides flexibility with brick
3,001 – 10,000 SF	75% Face Brick, 25% other masonry (not defined)	75% Face Brick (Decorative stone allowed for 25% of the required brick area) , 25% other masonry as defined	None- but provides flexibility with brick with the use of stone and defines "other masonry"
10,001 – 40,000 SF	75% Face Brick, 25% other masonry (not defined)	50% Face Brick or decorative stone- Balance of 50% masonry as defined	Less restrictive –No longer requires 50% brick; allows choice of 50% brick or decorative stone, defines "other masonry"
40,001 -80,000 SF	60% face brick, 40% other masonry(not defined)	25% Face Brick or decorative stone on front façade only. Remaining facades masonry as defined.	Less restrictive - No longer requires brick; allows choice of 25% brick or decorative stone on front façade , defines "other masonry"

≤ 80,001 SF	25% Face Brick, 75% other masonry (not defined)	No brick required, 100% approved masonry (defined)	Less restrictive- no brick required.

**15% of any one façade may use alternate building materials as defined in Section V.C.7.G. as architectural treatments, decorations or architectural accents*

The proposed text amendments and additions are identified in the staff report. In addition to the new regulations related to the amount of brick required the proposed amendments provide for alternate building materials that may be used for architectural treatments, decorations or architectural accents on the structure provided they do not constitute more than 15% of any façade; a list of prohibited materials was also presented and outlined in the staff report. Consistent with the amendments for commercial districts, Ms. Wallrich discussed how additions must conform to the building materials used for the existing structure. If there is difficulty in matching the existing material, then the architectural design of the addition must provide an attractive transition to a new material that is consistent with current building material requirements.

EXECUTIVE SUMMARY

The Petitioner, Vequity LLC (Contract Purchaser), is seeking approval to construct a 7-Eleven gas station and convenience store on the southwest corner of 171st Street and Harlem Avenue (17100 and 17110 Harlem Avenue). The proposal includes a 3,511 sq. ft. convenience store and canopy area with ten vehicle fueling stations. The project includes installation of a dumpster enclosure, fencing, landscaping, and a public sidewalk. The project requires Rezoning of the properties to the B-1 (Neighborhood Shopping) zoning district, Special Use Approval for an automobile service (gas) station with a convenience store, Site Plan Approval, Final Plat of Consolidation Approval and Variations for min. lot width, min. lot size and min. lot depth, ground sign setback, and min. drive aisle width.

The subject site area on the west side of Harlem Ave was originally developed in the county with single-family homes for the full block. Starting in the 1980s the area began to transition from residential to commercial uses; the Comprehensive Plan designates the area as a "commercial/office" use. As the homes have been demolished and new commercial buildings constructed, the properties have been rezoned to either B-1 (Neighborhood Shopping) or B-4 (Office and Service) due to their proximity to single-family residential homes. The petitioner revised a previous plan for a car wash to be constructed on the site due to staff review comments and a desire to minimize potential negative effects on the abutting residential properties. The petitioner has also added fencing, additional landscaping, and amended the lighting plan to avoid any off-site glare or light pollution.

EXISTING SITE & ZONING

The subject property consists of two lots on the southwest corner of Harlem Avenue and 171st Street. The lot furthest north is vacant and currently zoned B-4 (Office and Service Business). This site was previously home to an office building that was demolished in 2016. The south portion of the lot is zoned R-1 (Single-Family Residential) with a vacant single-family home and detached garage located on the property that are slated for demolition. There are two vacant single-family home lots zoned R-1 to the south of the subject properties as well, and while these are not part of the development, the homes are in deteriorating condition. The developer has agreed with the property owner (who is the current owner of all four lots) and staff to demolish those two homes as well as part of the 7-Eleven project and restore the lots (top soil, seed and blanket). Staff recommends this be a condition of the approval for the rezoning and special use requests. This would remove two vacant and deteriorating homes and would leave only one home occupied residentially on the block.

Open Item #1: Discuss recommended condition requiring the demolition and lot restoration of the two deteriorating vacant single-family homes south of the subject site (currently the same property owners).

The block where the gas station is proposed on the west side of Harlem Ave was originally developed with single-family homes in the 1950s-1960s. Starting in the 1980s this area began to transition from residential to commercial uses due to their frontage along a heavily traveled commercial corridor. The area is shown as a commercial/office use in the Village's Comprehensive Plan (2000). Due to the multiple curb cuts and difficulty of access, residential uses are not considered the highest and best use for this area. As the lots have been redeveloped with commercial buildings, the properties have been rezoned to either B-1 (Neighborhood Shopping) or B-4 (Office and Service) due to their proximity to the single-family residential to the west.

To the north of the subject property is the Tinley Park Post Office and to the west is bank, both zoned B-4 (Office and Service). To the northeast is a multi-tenant office building and car wash zoned B-3 (General Business). Directly to the east of the property is a Shell gas station/car wash and the Jewel-Osco and Tinley Park Commons Shopping Center zoned B-3 (General Business).

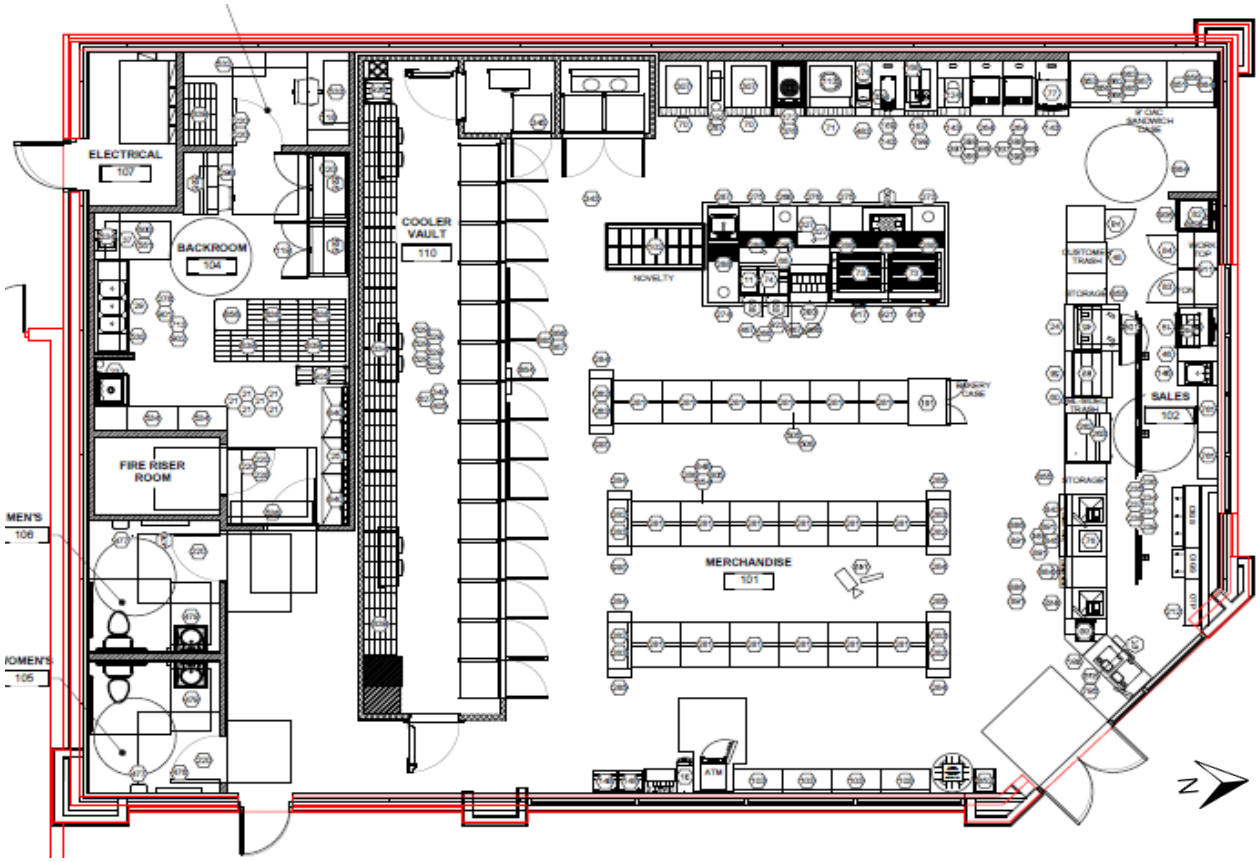
PROPOSED USE

The proposed gas station site includes fueling stations for ten vehicles. There will be a 3,511 sq. ft. convenience store building that sells vehicle fuel and typical retail items (food, drinks, snacks, tobacco, etc.) There will not be any truck fueling available at this location.

NEW CORPORATE 7ELEVEN PROTOTYPE (INTERIOR)

Vehicle service (gas) stations are a special use in all commercial zoning districts with the exception of B-5 (Automotive Service). One typical concern with gas stations is that they require a unique site design that accounts for safe/efficient access, proper circulation, sufficient parking and adequate lighting levels, among other things.

The Petitioner originally proposed an attached car wash as part of the proposal requiring B-3 (General Business and Commercial) zoning. Due to staff's concerns related to the more intense uses permitted in the B-3 zoning district and the possible noise from traffic and car wash equipment, the Petitioner agreed to remove the car wash from their proposal and revise their request to a B-1 zoning district.

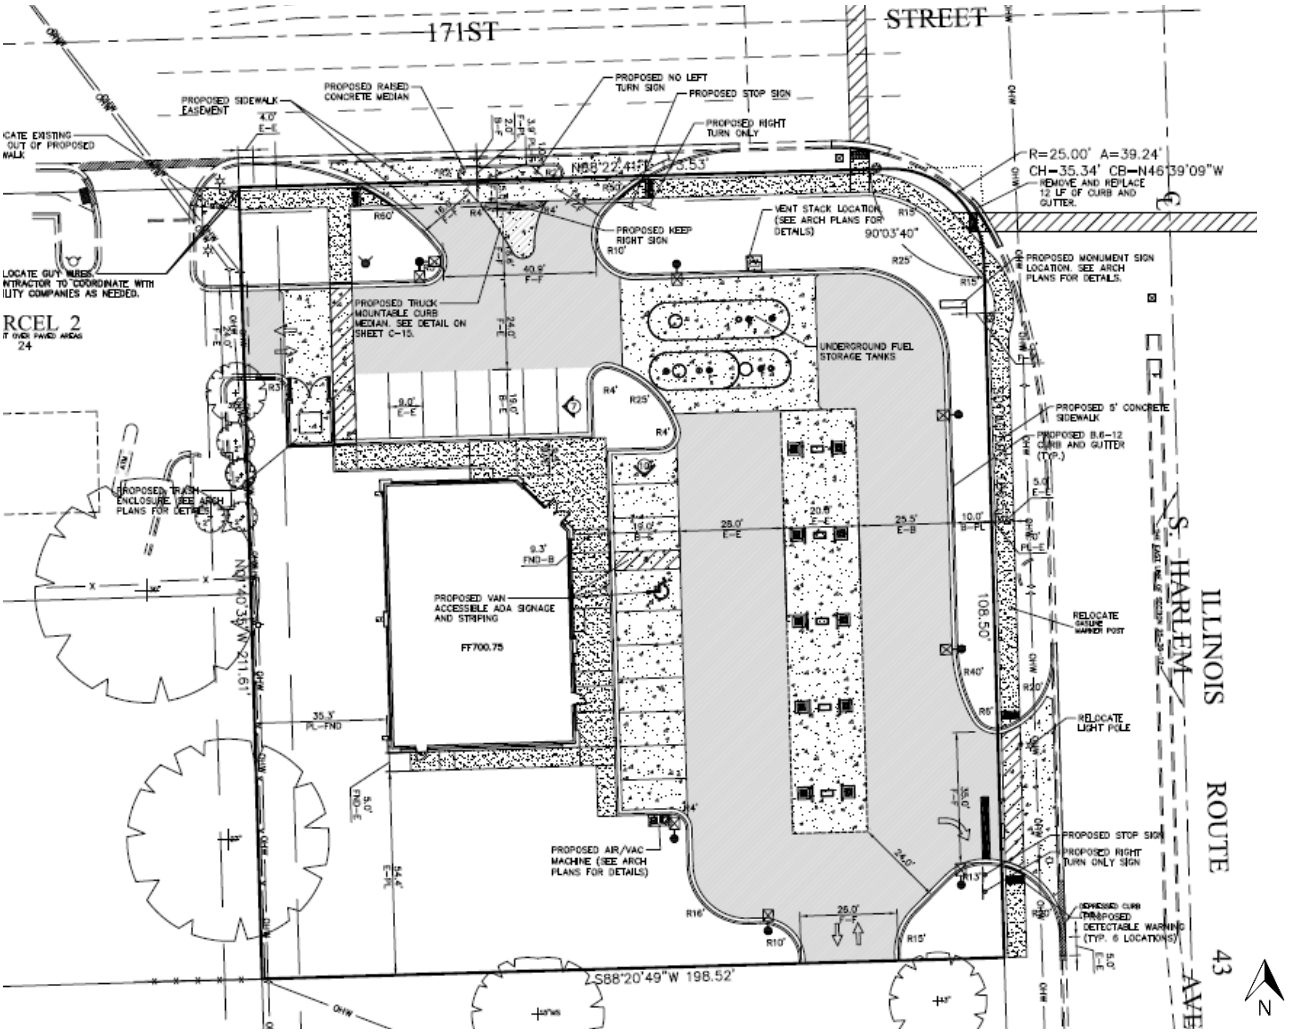


SITE PLAN

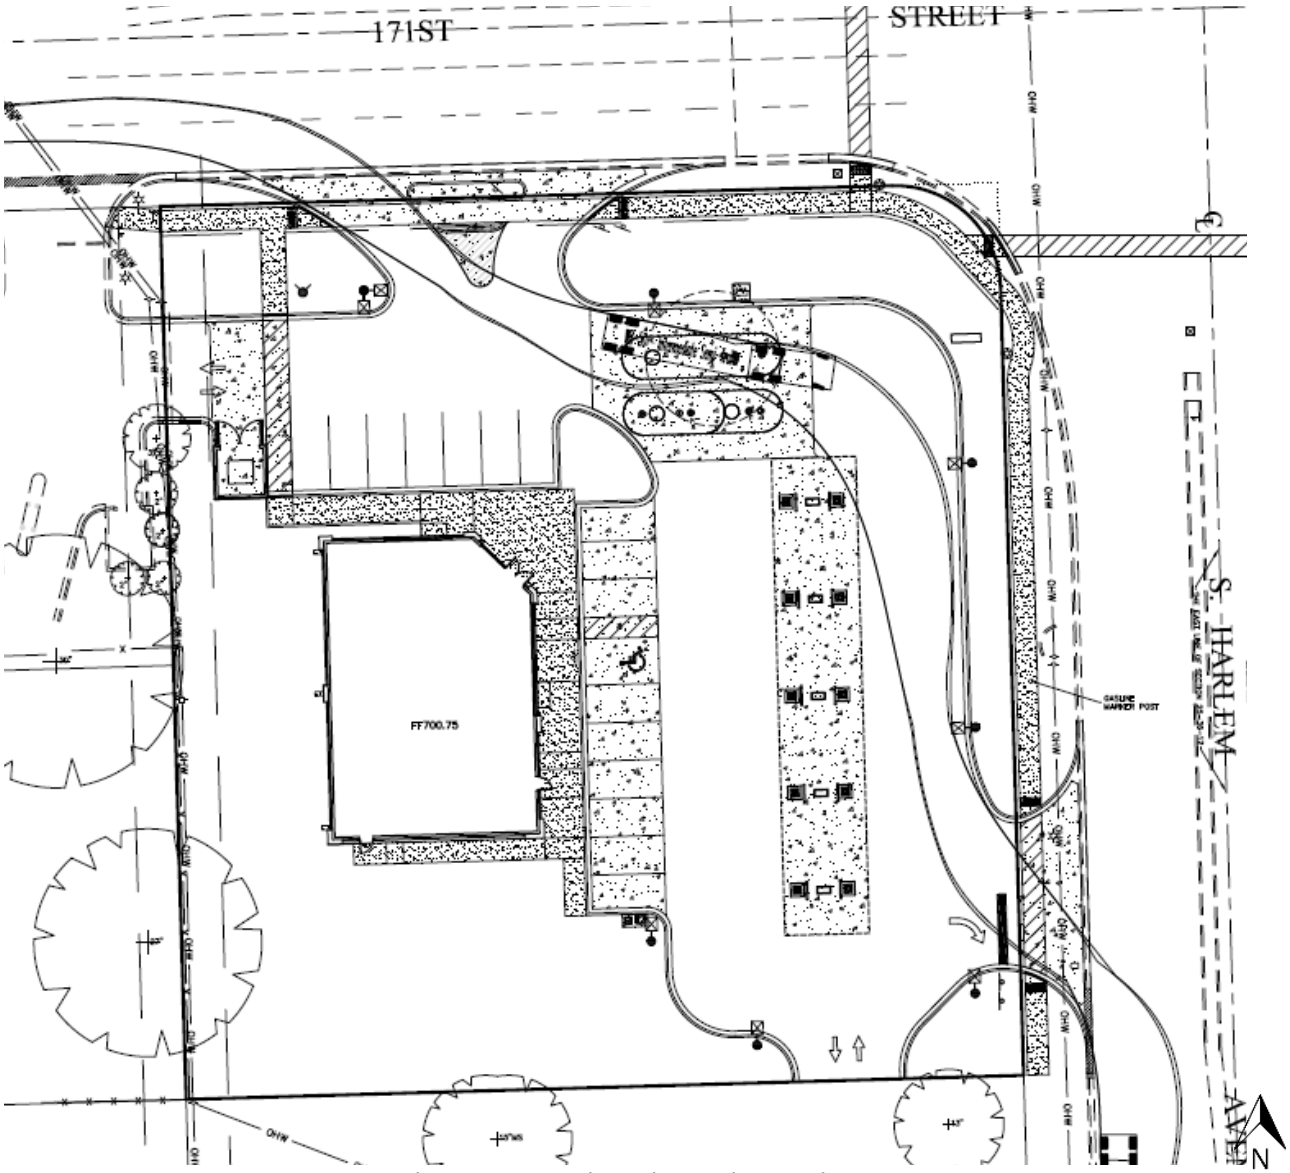
The site plan includes the convenience store building, vehicle fueling area/canopy, vehicle parking, walkways, exterior storage areas, landscaping, and a dumpster enclosure. Access to the site will primarily be through two curb cuts, one on Harlem Avenue and one on 171st Street. Additionally, there will be cross-access for vehicles to the west through the existing First Merchants Bank (7231 171st Street) and a future cross-access to the south. The cross-access through the bank will only be used for personal vehicles; truck access will be prohibited. Fueling trucks will primarily access the site from 171st Street and exit southbound onto Harlem Avenue.

The access points on both Harlem Avenue and 171st Street will be limited to right-in/right-out turns. The median at Harlem Avenue is likely to make any illegal turn unlikely at that location. The 171st Street access includes limited access and a raised island to discourage illegal or dangerous turning movements. The geometrics of the access have been altered slightly to allow for fuel truck and fire engine access. The access is still subject to Cook County Department of Transportation approval bur Village Staff believes the raised median and limited-access will help avoid causing any traffic issues at the intersection. Drive aisles all meet 26 foot width minimum with the exception of the one on the north of the property that connects to the existing bank cross-access. 24 feet is standard in many situations and staff has no concerns with matching the existing bank aisle width.

Open Item #2: Discuss Variation to reduce the minimum drive aisle width from 26 feet to 24 feet.



Above: Propose Site/Geometric Plan



Above: Proposed Truck Circulation Plan

The Subdivision Code requires that any new development or redevelopment install a public sidewalk on all public frontages. The other three corners of intersection have sidewalks and crossings installed. The six foot wide sidewalk is the standard width in commercial areas and runs along both the Harlem Avenue and 171st Street frontages. Due to the small parkway area along 171st Street and at the intersection, the sidewalk will encroach onto the development site and that portion of the sidewalk will need to be placed in a public sidewalk easement. IDOT is reviewing the plans currently and may require crosswalk upgrades to be completed with sidewalk installation.

Engineering has a number of outstanding comments and revisions on the preliminary/final engineering plans that will be addressed prior to permit submittal. Staff is recommending that the site plan approval be conditioned upon final engineering review and approval.

Open Item #3: Staff is recommending a condition that site plan approval be conditioned upon final engineering review and approval.

LANDSCAPE

The proposed Landscape Plan has been reviewed by the Village's Landscape Architect and finds it to be in general conformance with the Village's Landscape Ordinance with a few exceptions due to the site's constraints. The proposal requests a waiver from a few of the bufferyard requirements, parkway tree requirements, and interior landscaping requirements. The Petitioner has indicated that they have worked to meet the landscape requirements to the greatest extent possible and focused their available bufferyard width and landscaping to adequately buffer views from the residential properties to the west. Deficiencies are outlined in the table below.

Table A

Please note the following abbreviations: CT = Canopy Tree, US = Understory Tree, SH = Shrub, T = Tree.

BUFFERYARD REQUIREMENTS

PARKWAY STANDARDS					
Location	**Requirement**	**Required Trees**	**Proposed Trees**	**Deficit**	**Comments**
Parkway	1 tree per 25 lineal ft	9	0	**-9**	Adequate room does not exist. CT in bufferyards could be further upsized to compensate for this deficiency.

PARKING LOT LANDSCAPING STANDARDS				
Location	**Requirement**	**Provided**	**Deficit**	**Comments**
Parking Lot	15% of parking lot area to be landscaped or 3,130 sq. ft.	1,425 sq. ft.	**-1,705 sq. ft.**	20,870 sq. ft. of parking lot shown on landscape plan
Parking Lot	Screening of adjacent properties and streets.	Continuous screening not provided.	**~40 lineal ft**	Parking in northwest corner of site not screened along drive aisle – this could also help with Parking Lot deficit outlined above.

Staff has recognized the difficulty in meeting the Landscape Ordinance requirements for gas stations in recent reviews, especially on smaller sites. As an auto-oriented use, the fueling area needs to remain free from obstructions and allow room for vehicle movement throughout the site. Landscaping pots can be added but these are often hard to maintain throughout the year. The Petitioner has met the majority of the Landscape Ordinance, yet these few deficiencies remain due to site constraints. The proposed landscaping is similar in style and design with surrounding area properties and along Harlem Avenue. Below is a list of the landscaping deficiencies in the proposed plan. The species and variety of plantings are expected to increase the appeal of the property and overall area. The proposed plan shows a plethora of screening along the west property line to help buffer any views form the residential homes the property adjoins.

The Village's consultant supports the bufferyard and parkway requests with a couple of recommendations/changes listed below. Staff recommends these few revisions be made to reduce the landscape waivers were possible.

1. They have only upsized shade trees to a combination of 3" and 4" cal. It is recommended that all CT trees be increased to a minimum of 4.5" cal.

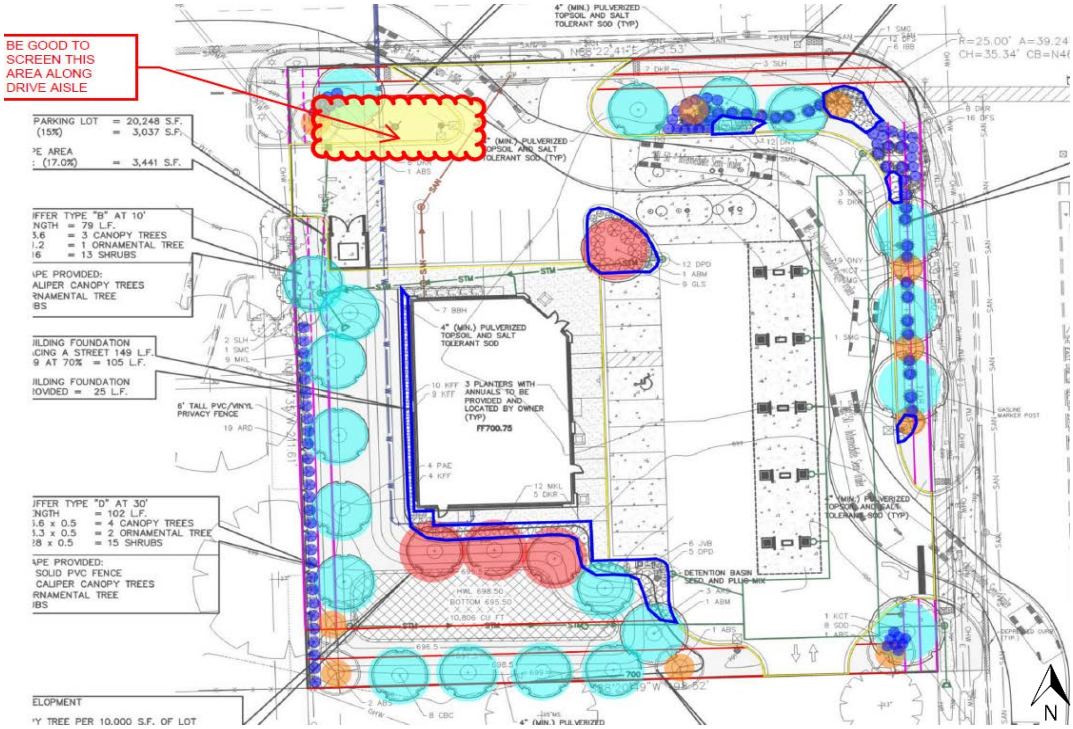
2. Add some shrubs along the north drive aisle in the NW corner of the site to help offset the deficiencies.

3. Revise the west bufferyard design to add two additional shrubs.

Open Item #4: Discuss the proposed landscape plan and requested Landscape Ordinance waivers. Discuss staff's recommendations to best offset deficiencies.

A fence is proposed running between the subject property and the parcels to the west. The fence is proposed to match the adjacent bank's fence (beige PVC fence). Plans currently show a six foot high fence proposed. However, the bank's existing fence is eight foot high. Eight foot high fences are recommended for separation of commercial and residential uses. It is believed this was indicated as six feet high in error. The petitioner will need to confirm this and revise the plans to indicate an eight foot fence matching the existing bank fence in color, height, and style.

Open Item #5: Revise plans to indicate that the fence between the subject site and residential properties to the west matches the existing bank's fence in height (eight feet), color (taupe/beige) and style (PVC privacy).

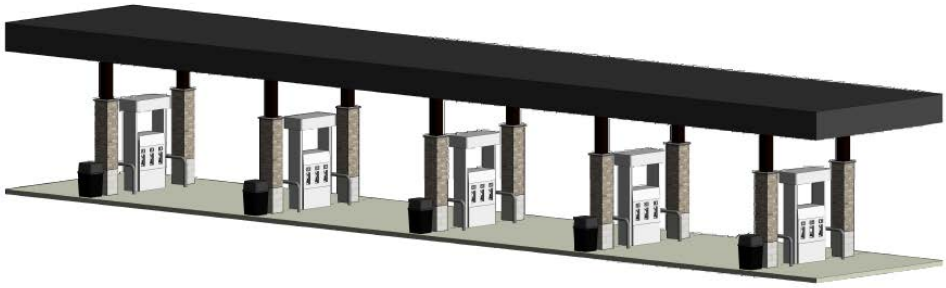


ARCHITECTURE

The design of the convenience store building and gas station canopy utilizes high-quality materials, including face brick (76% of exterior, excluding glazing) with fiber cement and metal cornice architectural treatments. All mechanical equipment will be screened by the rooftop parapet. The face brick will be a beige/grey color and the fiber cement accents will be dark brown/espresso in color (appears black in some renderings). The proposed structure will have metal architectural canopies on the front façade over windows and doors. The fueling canopy and dumpster enclosure are also proposed to match the building's materials, colors, and style.

Staff originally recommended a more residential roof for the convenience store building, utilizing more residential elements such as shingles and peaks. However, the architectural design is prototypical of 7-Eleven's new branding initiative. A peak was added to the front entrance and caps to the architectural treatments to give a more traditional look to the building.

Open Item #6: Review the proposed architectural design and materials used throughout the site.

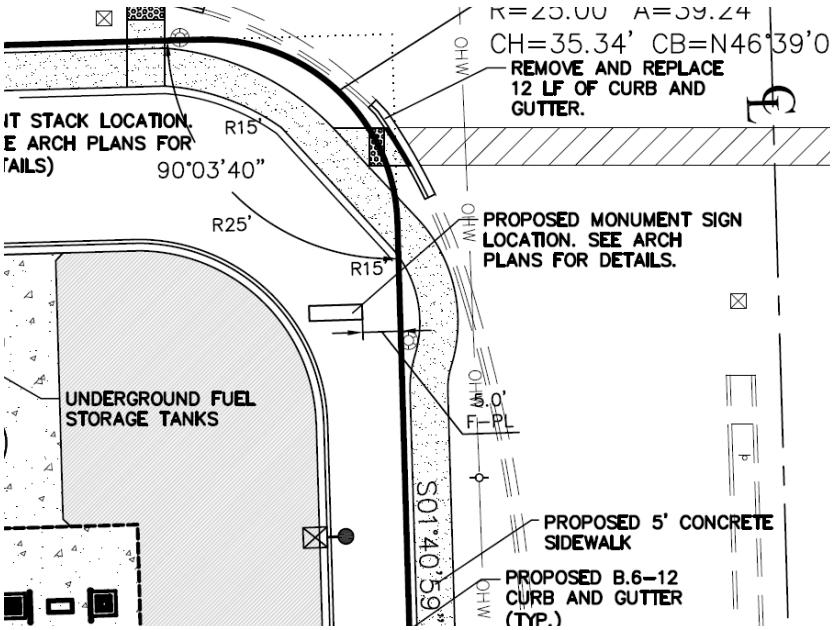


SIGNAGE

Specific wall, canopy, and ground signs are not proposed for the site at this time. The Petitioner has reviewed the Zoning Code's sign requirements and believes that they can comply with them. Wall signs will not be proposed on the south and west facades due to their proximity to residentially zoned property.

Due to the tight space, a ground sign size and location were proposed. The proposed location will require a five foot setback variation to allow the sign to be setback five feet from the property line instead of ten feet. The ground sign is required to have a base that matches the principal building and not exceed ten feet in height. Sign setback Variations are typically accompanied by a specific sign design. However, the petitioner has decided to leave the final proposal up to the operator. Staff is comfortable with the proposed variation request because of the tight site constraints. The request will be limited to the proposed location, but will avoid the need to request a separate Variation in the future.

Open Item #7: Discuss proposed ground sign setback Variation to permit a five foot setback.



Above: Not the actual ground sign proposal. For discussion purposes only. Example of a typical 7-Eleven gas station sign with a solid base.

PARKING

The Village Zoning ordinance provides some guidance for required parking for various uses; however, there is no specific reference for a convenience store associated with a gas station. In these situations where a specific use is not listed, the Plan Commission has authority to approve the parking based on the Petitioner's proposal and similar uses noted in the ordinance. A professional parking study is typically required to be supplied to assist the Plan Commission in their review.

Convenience stores are most commonly considered a "retail use" which requires one parking stall for every 150 sq. ft. With a total of 3,511 sq. ft. proposed, this results in a requirement of 23 parking spaces per the Zoning Ordinance requirements. The proposed site plan provides 17 total spaces total (deficient six parking spaces) based on the similar retail requirement. However, due to the unique nature of a gas station where some of the retail users may be stationed at the pumps (which is not included in the parking count) yields the potential for ten additional parking spaces. In addition, customers are usually on the site for short periods, resulting in high turnover and thereby lowering the demand for parking. The gas station exceeds the parking supply compared to other gas stations in Tinley Park that are similar in size. For example, the Shell gas station across the street (17101 Harlem Avenue) has 6 parking spaces and Mobil/7-Eleven (7601 159th Street) has 14 parking spaces. The existing 7-Eleven convenience store at 17055 Oak Park Avenue does not have fueling, but is comparable in size, and has 14 parking spaces.

The petitioner did supply a traffic analysis from their consultant (KLOA) but that analysis did not address the proposed parking. Staff believes that the parking supply is adequate on the proposed site, but if the Commission have any parking concerns, parking counts of comparable locations can be requested.

Open Item #8: Discussed proposed parking supply of 17 parking spaces and need for the traffic analysis to include parking information for similar locations.

LIGHTING

A new lighting ordinance was recently adopted in September 2019. The lighting plan for the proposed development complies with the new lighting standards in respect to fixture type, illumination intensity, and light intensity at the property lines.

The Petitioner has provided a Photometric Plan that provides lighting via 8 LED light poles, 12 LED canopy fixtures, and 6 LED wall mount fixtures throughout the site. The Photometric Plan indicates light spillage of less than one foot candle at the roadway and zero at the south and western property lines, which are adjacent to residential uses. All light fixtures are full cut-off and downcast to prevent glare on adjacent properties and roadways. Particular thought was put into the light placement and height (20' pole height) to avoid their visibility from the residential properties to the west. Between the thoughtful placement of lights, fence and landscape screening, no light or glare will be visible to the neighboring properties.

Above: Proposed wal-pac lighting will be attached to the building and downcast at a 90 degree angle.

Open Item #9: Discuss overall light plan and light fixture placement.

ABOUT THE SPECIAL APPROVALS NEEDED

Rezoning

The two existing properties are zoned B-4 (Office and Service Business) and R-1 (Single-Family Residential) and proposed to be rezoned to B-1 (Neighborhood Shopping). The Zoning Code's describes the zoning district as follows:

"The B-1 Neighborhood Shopping District is intended to provide areas for retail and service establishments to supply convenience goods or personal services for the daily needs of the residents living in adjacent residential neighborhoods. The district is designed to encourage shopping centers with planned off-street parking and loading and to provide for existing individual or small groups of local stores."

The Petitioner originally proposed an attached car wash as part of the proposal requiring B-3 (General Business and Commercial) zoning. Due to staff's concerns related to the more intense uses permitted in the B-3 zoning district and the possible noise from traffic and car wash equipment, the Petitioner agreed to remove the car wash from their proposal and revise their request to a B-1 zoning district.

The B-1 zoning district was chosen due to the cohesiveness with adjacent residential uses. The B-1 zoning district also allows for the petitioner to request a special use to permit an automobile service (gas) station to be constructed on the site. The other commercial zoning district traditionally used adjacent to residential properties is the B-4. However, the B-4 zoning district does not permit a gas station special use permit to be requested.

Open Item #10: Discuss the requested rezoning of the subject property to the B-1 (Neighborhood Shopping) zoning district.

Lot Variations

Due to the rezoning of the lots to a B-1 zoning district, three lot bulk variations are required for the following:

1. Lot size of .961 acres instead of the required min. of 4 acres.
2. Lot width of 186.53 feet instead of the required min. of 600 feet.
3. Lot depth of 198.52 feet instead of the required min. 250 feet.

These Variations are the result of their prior use and subdivision as residential lots. The area is shown as a commercial/office use in the Village's Comprehensive Plan (2000). Due to the multiple curb cuts and difficulty of access, residential uses are not considered the highest and best use for this area. Since the 1980s, the lots have been redeveloped in the area with commercial buildings and have been rezoned to either B-1 (Neighborhood Shopping) or B-4 (Office and Service) due to their proximity to the single-family residential to the west. The properties to the south of the subject property have similar lot dimensions as the proposed lot.

Open Item #11: Discuss the requested Variations associated with the lot dimensions and size.

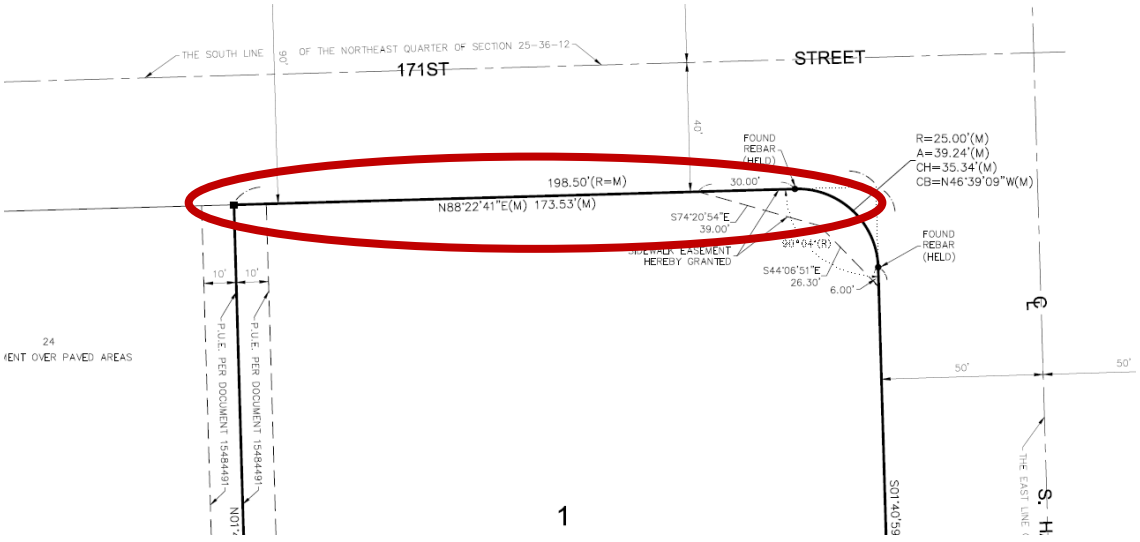
Special Use

An automobile service (gas) station is a special use in B-1 (Neighborhood Shopping), B-2 (Community Shopping), and B-3 (General Business) commercial zoning districts. Gas stations are only a permitted use in the B-5 (Automotive Service) zoning district. Gas stations are a special use in all commercial zoning districts with the exception of B-5 (Automotive Service). One typical concern with gas stations is that due to high traffic volumes, the sites require a unique site design that accounts for safe/efficient access, proper circulation, sufficient parking and adequate lighting levels. Gas stations

Open Item #12: Discuss the proposed special use for an Automobile Service (Gas) Station.

Final Plat of Subdivision Approval

The proposed Plat of Subdivision will consolidate two existing lots (17100 and 17110 Harlem Avenue) resulting in a single lot that is .961 acres in size. Existing drainage and utility easements will remain on the property. Easements for the public sidewalk and cross-access to east and south have been included in the Final Plat of Subdivision. However, the public sidewalk easement need to be extended across the north property line. The Plat of Subdivision will need to be revised to add a sidewalk easement covering the full length of the sidewalk along the northern property line (see image below).



Open Item #13: Revise the Plat of Subdivision so that the public sidewalk easement encompasses the entire length of the sidewalk that runs on private property.

SUMMARY OF OPEN ITEMS

Staff identified the following open items for discussion at the workshop:

1. Discuss recommended condition requiring the demolition and lot restoration of the two deteriorating vacant single-family homes south of the subject site (currently the same property owners).

2. Discuss Variation to reduce the minimum drive aisle width from 26 feet to 24 feet.

3. Staff is recommending a condition that site plan approval be conditioned upon final engineering review and approval.

4. Discuss the proposed landscape plan and requested Landscape Ordinance waivers. Discuss staff's recommendations to best offset deficiencies.

5. Revise plans to indicate that the fence between the subject site and residential properties to the west matches the existing bank's fence in height (eight feet), color (taupe/beige) and style (PVC privacy).

6. Review the proposed architectural design and materials used throughout the site.

7. Discuss proposed ground sign setback Variation to permit a five foot setback.

8. Discussed proposed parking supply of 17 parking spaces and need for the traffic analysis to include parking information for similar locations.

9. Discuss overall light plan and light fixture placement.

10. Discuss the requested rezoning of the subject property to the B-1 (Neighborhood Shopping) zoning district.

11. Discuss the requested Variations associated with the lot dimensions and size.

12. Discuss the proposed special use for an Automobile Service (Gas) Station.

13. Revise the Plat of Subdivision so that the public sidewalk easement encompasses the entire length of the sidewalk that runs on private property.

STANDARDS FOR SITE PLAN APPROVAL

Section III.T.2. of the Zoning Ordinance requires that Planning Staff must find that the conditions listed below must be met. Staff will prepare draft responses for these conditions within the next Staff Report.

a. That the proposed Use is a Permitted Use in the district in which the property is located.

b. That the proposed arrangement of buildings, off-street parking, access, lighting, landscaping, and drainage is compatible with adjacent land uses.

c. That the vehicular ingress and egress to and from the site and circulation within the site provides for safe, efficient, and convenient movement of traffic, not only within the site but on adjacent roadways as well.

d. That the Site Plan provides for the safe movement of pedestrians within the site.

e. That there is a sufficient mixture of grass, trees, and shrubs within the interior and perimeter (including public right-of-way) of the site so that the proposed development will be in harmony with adjacent land uses and will provide a pleasing appearance to the public; any part of the Site Plan area not used for buildings, structures, parking, or access-ways shall be landscaped with a mixture of grass, trees, and shrubs.

f. That all outdoor trash storage areas are adequately screened.

STANDARDS FOR REZONING APPROVAL

The Zoning Code does not establish any specific criteria that must be met in order for the Village Board to approve a rezoning request. Likewise, Illinois Statutes does not provide any specific criteria. Historically, Illinois courts have used eight factors enunciated in two court cases. The following "LaSalle Standards" have been supplied for the Commission to consider. Staff will prepare draft responses for these conditions within the next Staff Report.

a. The existing uses and zoning of nearby property;

b. The extent to which property values are diminished by the particular zoning;

c. The extent to which the destruction of property values of the complaining party benefits the health, safety, or general welfare of the public;

d. The relative gain to the public as compared to the hardship imposed on the individual property owner;

e. The suitability of the property for the zoned purpose;

f. The length of time the property has been vacant as zoned, compared to development in the vicinity of the property;

g. The public need for the proposed use; and

h. The thoroughness with which the municipality has planned and zoned its land use.

STANDARDS FOR A SPECIAL USE

Section X.J.5. of the Zoning Ordinance lists standards that need to be considered by the Plan Commission. The Plan Commission is encouraged to consider these standards (listed below) when analyzing a Special Use request. Staff will provide draft Findings in the Staff Report for the Public Hearing.

X.J.5. Standards: No Special Use shall be recommended by the Plan Commission unless said Commission shall find:

a. That the establishment, maintenance, or operation of the Special Use will not be detrimental to or endanger the public health, safety, morals, comfort, or general welfare;

b. That the Special Use will not be injurious to the use and enjoyment of other property in the immediate vicinity for the purposes already permitted, nor substantially diminish and impair property values within the neighborhood;

c. That the establishment of the Special Use will not impede the normal and orderly development and improvement of surrounding property for uses permitted in the district;

d. That adequate utilities, access roads, drainage, and/or other necessary facilities have been or are being provided;

e. That adequate measures have been or will be taken to provide ingress and egress so designed as to minimize traffic congestion in the public streets; and

f. That the Special Use shall, in all other respects, conform to the applicable regulations of the district in which it is located, except as such regulations may in each instance be modified by the Village Board pursuant to the recommendation of the Plan Commission. The Village Board shall impose such conditions and restrictions upon the premises benefited by a Special Use Permit as may be necessary to ensure compliance with the above standards, to reduce or minimize the effect of such permit upon other properties in the neighborhood, and to better carry out the general intent of this Ordinance. Failure to comply with such conditions or restrictions shall constitute a violation of this Ordinance.

g. The extent to which the Special Use contributes directly or indirectly to the economic development of the community as a whole.

It is also important to recognize that a Special Use Permit does not run with the land and instead the Special Use Permit is tied to the Petitioner. This is different from a process such as a variance, since a variance will forever apply to the property to which it is granted. Staff encourages the Plan Commission to refer to Section X.J.6. to examine the conditions where a Special Use Permit will expire.

STANDARDS FOR A VARIATION

Section X.G.4. of the Zoning Ordinance states the Plan Commission shall not recommend a Variation of the regulations of the Zoning Ordinance unless it shall have made Findings of Fact, based upon the evidence presented for each of the Standards for Variations listed below. The Plan Commission must provide findings for the first three standards; the remaining standards are provided to help the Plan Commission further analyze the request. Staff will prepare draft responses for the Findings of Fact within the next Staff Report.

1. The property in question cannot yield a reasonable return if permitted to be used only under the conditions allowed by the regulations in the district in which it is located.

2. The plight of the owner is due to unique circumstances.

3. The Variation, if granted, will not alter the essential character of the locality.

4. Additionally, the Plan Commission shall also, in making its determination whether there are practical difficulties or particular hardships, take into consideration the extent to which the following facts favorable to the Petitioner have been established by the evidence:

    a. The particular physical surroundings, shape, or topographical condition of the specific property involved would result in a particular hardship upon the owner, as distinguished from a mere inconvenience, if the strict letter of the regulations were carried out;

    b. The conditions upon which the petition for a Variation is based would not be applicable, generally, to other property within the same zoning classification;

    c. The purpose of the Variation is not based exclusively upon a desire to make more money out of the property;

    d. The alleged difficulty or hardship has not been created by the owner of the property, or by a previous owner;

    e. The granting of the Variation will not be detrimental to the public welfare or injurious to other property or improvements in the neighborhood in which the property is located; and

    f. The proposed Variation will not impair an adequate supply of light and air to an adjacent property, or substantially increase the congestion in the public streets, or increase the danger of fire, or endanger the public safety, or substantially diminish or impair property values within the neighborhood.

RECOMMENDATION

Following a successful workshop, proceed to a Public Hearing at the **January 2, 2020 Plan Commission meeting**.

RE: 17100 S Harlem Avenue, Tinley Park IL, Project Narrative

Vequity is proposing the development of a new 3,500 SF 7Eleven Gas + Convenience store with a car wash located at the intersection of Harlem and 171st Street in Tinley Park, IL. The building will be comprised of masonry face brick with a Cordova limestone wall base and Nichiha, fiber cement paneling as accents. The site will have 12 regular parking spaces and one additional handicap parking space per code. Vequity has added heavy landscaping and a 6' fence along the western portion of the site to act as a buffer between the proposed development and the residential neighborhood. The carwash will be a one-car, carwash bay attached to the building.

As the developer, we don't have access to operations of the future store but based on our conversations with the Tenant we are happy to share the details we have available.

7Eleven, the proposed Tenant, is the world's largest operator, franchisor, and licensor of convenience stores. The company operates, franchises and licenses close to 8,700 convenience stores in the US and Canada alone. Outside of the U.S. and Canada, there are some 45,600 7-Eleven stores in Japan, Taiwan, Thailand, South Korea, China, Malaysia, Mexico, Singapore, Australia, Philippines, Indonesia, Norway, Sweden, and Denmark. 7Eleven is listed as S&P AA (Investment Grade) Outlook Stable.

The proposed hours of operation are 24 hours a day and 7 days a week with approximately three to four employees in the store at any given peak period. The franchisee is given all rights to determine how many full-time and part-time employees are employed at each store but based off our real estate representatives experience it is somewhere between seven and ten people.

As for delivery schedules, this is something the store is unable to predict prior to opening. All delivery and vendor schedules are created closer to store opening. On average, stores have two main deliveries per vendor per week during business hours.

Vequity will be requesting a Special Use for this property for the gas/convenience store use. We will also be engaging a zoning attorney to rezone the property as B-3 from the current zoning of B-4/R-1.

LaSalle Standards – 7/11 Gas Station (171st Street & Harlem Ave.)

A.US Post Office to the north on 171st St., zoned B-4.
SFH to the south abutting property line, zoned R-1.
Shell gas station to the east on S. Harlem Ave, zoned B-3.
First Merchant Bank to the west, zoned B-4

B. Automobile service stations with attached carwashes are not permitted in B-4 or R-1 zoned districts. B-3 Districts are the only zoning districts in which automobile service stations are permitted. The current zoning classification diminishes the property value by restricting the permissible uses.

C. To no extent does the destruction of the complaining party's property value benefit the health, safety and welfare of the general public.

D. The public gains tax revenue contribution and job creation for the local economy. The hardship imposed on the property owner is that the current zoning is incompatible with the functional roadway classifications abutting the property. This parcel does not serve as a buffer or transition between residential and commercial uses as intended in the B-4 district.

E. A B-3 zoning designation is suitable to accommodate a wide range of specialized commercial uses, including highway-oriented services and commercial types of establishments to serve the needs of motorists. He parcel is bordered by southbound IL-43 S. Harlem Ave, Illinois Dept of Transportation (IDOT) ROW, to the east and 171st St., Cook County Department of Transportation and Highways (CCDOTH), to the north. The parcel is not compatible with the current B-4 and R-1 zoning.

F. The commercial property on the north parcel has been vacant since 2015. Between August and September of 2016, the building and parking lot were demolished. The residential building on the south parcel has been present on the property since at least 1962 and remains intact.

G. The proposed automobile service station development will serve motorists along southbound IL-43 S. Harlem Ave which is a Principal Arterial Roadway and eastbound along 171st St which is a Major Collector roadway, as designed in B-3 districts. Furthermore, the proposed development will meet modern requirements set by IDOT and CCDOTH in highway safety, the Metropolitan Water Reclamation District (MWRD) in stormwater management, site development and optimized energy performance referenced by current building and energy code.

H. Comprehensively, the municipality has addressed changes in population growth and density, commercial/residential use and urban planning by modernizing the zoning map with overlay districts. IL-43 S. Harlem Ave, a Principal Arterial roadway, which has 31,000+ vehicles per day and 171st St, a Major Collector roadway, which has 12,000+ vehicles per day, has a high number of SFH's in both R-1 and R-4 districts. It is appropriate to re-zone areas in and around this intersection to B-3 in order to accommodate motorists given the high volume of daily traffic.

LASALLE FACTORS/CRITERIA FOR REZONING (MAP AMENDMENT)

The Zoning Code does not establish any specific criteria that must be met in order for the Village Board to approve a rezoning request. Likewise, Illinois Statutes does not provide any specific criteria. Historically, Illinois courts have used eight factors enunciated in two court cases, LaSalle Bank of Chicago v. Count of Cook (1957) and Sinclair Pipeline v. Village of Richton Park (1960), when evaluating the validity of zoning changes. The so-called "LaSalle factors" are listed below. Village staff and officials will take these factors into consideration when evaluating and deciding rezoning requests. The petitioner should prepare their own responses to the "LaSalle Factors" with factual evidence to defend the requested rezoning. If additional space is required, you may provide the responses on a separate document or page.

A. The existing uses and zoning of nearby property;

B. The extent to which property values are diminished by the particular zoning;

C. The extent to which the destruction of property values of the complaining party benefits the health, safety, or general welfare of the public;

D. The relative gain to the public as compared to the hardship imposed on the individual property owner;

E. The suitability of the property for the zoned purpose;

F. The length of time the property has been vacant as zoned, compared to development in the vicinity of the property;

G. The public need for the proposed use; and

H. The thoroughness with which the municipality has planned and zoned its land use.

Standards for a Special Use – 7/11 Gas Station (171st & Harlem)

1. ***That the establishment, maintenance, or operation of the Special Use will not be detrimental to or endanger the public health, safety, morals, comfort, or general welfare.***

   The proposed plan will allow the petitioner to redevelop a vacant piece of land which will in turn enhance the corner property at 171st St & Harlem Avenue. The proposed development will provide fueling services to residents, businesses, and visitors. The proposed use is in the interest of the public convenience and will contribute to the general welfare of the area as the petitioner will further invest in this property. Our tenant upholds the highest safety standards regarding truck refueling, the tenant only allows trucks refuel from one side of the tank, they do not allow extenders to reach the tanks and bollards are always used to protect the MEPs themselves.

2. ***That the Special Use will not be injurious to the use and enjoyment of other property in the immediate vicinity for the purposes already permitted, nor substantially diminish and impair property values with the neighborhood.***

   The proposed plan will not be injurious to the use and enjoyment of other property in the immediate vicinity. The petitioner has ensured that there will be a 6' privacy fence between the development and the residential area to the West. The petitioner has also added ample landscaping to the western portion of the building as an even larger buffer. The petitioner has also added several shrubs and trees through the site to enhance the corner visually.

3. ***That the establishment of the Special Use will not impede the normal and orderly development and improvement of surrounding property for uses permitted in the district***

   The petitioner will not impede the normal and orderly development and improvement of the surrounding property as it fits in nicely with the surrounding uses. To the North of the building is a United States Postal Office, to the East is a Shell Gas Station, a Jewel Grocery as well as several other commercial uses, and to the South of the petitioner's building will be a new commercial development. We feel like the addition of a new gas + convenience store will only enhance this commercial corridor.

4. ***That adequate utilities, access roads, drainage, and/or necessary facilities have been or are being provided***

   The petitioner will be providing all new utilities to this site. They will also may every attempt to work with the building owner's to the West and South to ensure the properties have cross-access for ease of entrance. The new development has also been working with MWRD to make sure all storm detention and volume control measures have been addressed properly.

5. ***That adequate measures have been or will be taken to provide ingress and egress to designed as to minimize traffic congestion in the public streets.***

The petitioner has reached out and received feedback from IDOT and CCDOT which the petitioner has already built into the site plan that has been submitted for Special Use approval to ensure that the site plan meets or exceeds all ingress and egress requirements to minimize traffic and congestion to the corner of 171st and Harlem.

6. ***That the Special Use shall in all other respects confirm to the applicable regulations of the district in which it is located except as such regulations may in each instance be modified by the Village Board to the recommendation of the Plan Commission.***

   The proposed plan will confirm to the applicable regulations of the district in which it resides.

7. ***The extent to which the Special Use contributes directly or indirectly to the economic development of the community as a whole.***

   The proposed plan will allow the petitioner to redevelop a piece of land that has been vacant. Once the development has been built and is open it will add not only a new attractive store to the corner of 171st and Harlem but it will also affect the economic development by adding tax revenues from both the gas and convenience store sales.

PER MWRD REGULATIONS, STORMWATER DETENTION IS NOT REQUIRED FOR THIS SITE AS THE TOTAL CONTIGUOUS OWNERSHIP IS LESS THAN 3 ACRES. THE DEVELOPMENT INCLUDES A DISTURBED AREA OF GREATER THAN 0.5 ACRES. THEREFORE, VOLUME CONTROL IS REQUIRED. THE PROPOSED USE IS A FUEL CENTER. PER MWRD CRITERIA, THE AREAS THAT COULD RECEIVE FUEL SPILLS ARE TO BE CONTROLLED WITH A FLOW THROUGH DEVICE. A SNOUT WITH SKIRT ARE PROVIDED FOR THIS PURPOSE. VOLUME CONTROL FOR THE AREAS THAT WOULD NOT SEE FUEL SPILLS (ROOF, CANOPY, PAVEMENT NORTH OF THE RIDGELINE) IS PROVIDED IN THE BIOSWALE LOCATED EAST OF THE BUILDING.

13. ALL FLOOD PROTECTION AREAS AND VOLUME CONTROL FACILITIES SHALL, AT A MINIMUM, BE PROTECTED WITH A DOUBLE-ROW OF SILT FENCE (OR EQUIVALENT).

14. VOLUME CONTROL FACILITIES SHALL NOT BE CONSTRUCTED UNTIL ALL OF THE CONTRIBUTING DRAINAGE AREA HAS BEEN STABILIZED.

15. SOIL STOCKPILES SHALL, AT A MINIMUM, BE PROTECTED WITH PERIMETER SEDIMENT CONTROLS. SOIL STOCKPILES SHALL NOT BE PLACED IN FLOOD PROTECTION AREAS OR THEIR BUFFERS.

16. EARTHEN EMBANKMENT SIDE SLOPES SHALL BE STABILIZED WITH APPROPRIATE EROSION CONTROL BLANKET.

17. STORM SEWERS THAT ARE OR WILL BE FUNCTIONING DURING CONSTRUCTION SHALL BE PROTECTED BY APPROPRIATE SEDIMENT CONTROL MEASURES.

18. THE CONTRACTOR SHALL EITHER REMOVE OR REPLACE ANY EXISTING DRAIN TILES AND INCORPORATE THEM INTO THE DRAINAGE PLAN FOR THE DEVELOPMENT. DRAIN TILES CANNOT BE TRIBUTARY TO A SANITARY OR COMBINED SEWER. DRAIN TILES ALLOWED IN COMBINED SEWER AREA FOR GREEN INFRASTRUCTURE PRACTICES.

19. IF DEWATERING SERVICES ARE USED, ADJOINING PROPERTIES AND DISCHARGE LOCATIONS SHALL BE PROTECTED FROM EROSION AND SEDIMENTATION. DEWATERING SYSTEMS SHOULD BE INSPECTED DAILY DURING OPERATIONAL PERIODS. THE SITE INSPECTOR MUST BE PRESENT AT THE COMMENCEMENT OF DEWATERING ACTIVITIES.

20. THE CONTRCTOR SHALL BE RESPONSIBLE FOR TRENCH DEWATERING AND EXCAVATION FOR THE INSTALLATION OF SANITARY SEWERS, STORM SEWERS, WATERMAINS AS WELL AS THEIR SERVICES AND OTHER APPURTENANCES. ANY TRENCH DEWATERING, WHICH CONTAINS SEDIMENT SHALL PASS THROUGH A SEDIMENT SETTLING POND OR EQUALLY EFFECTIVE SEDIMENT CONTROL DEVICE. ALTERNATIVES MAY INCLUDE DEWATERING INTO A SUMP PIT, FILTER BAG OR EXISTING VEGETATED UPSLOPE AREA. SEDIMENT LADEN WATERS SHALL NOT BE DISCHARGE TO WATERWAYS, FLOOD PROTECTION AREAS OR THE COMBINED SEWER SYSTEM.

21. ALL PERMANENT EROSION CONTROL PRACTICES SHALL BE INITIATED WITHIN SEVEN (7) DAYS FOLLOWING THE COMPLETION OF SOIL DISTURBING ACTIVITIES.

22. ALL EROSION AND SEDIMENT CONTROL MEASURES SHALL BE MAINTAINED AND REPAIRED AS NEEDED ON A YEAR-ROUND BASIS DURING CONSTRUCTION AND ANY PERIODS OF CONSTRUCTION SHUTDOWN UNTIL PERMANENT STABILIZATION IS ACHIEVED.

23. ALL TEMPORARY EROSION AND SEDIMENT CONTROL MEASURES SHALL BE REMOVED WITHIN THIRTY (30) DAYS AFTER PERMANENT SITE STABILIZATION.

24. THE EROSION AND SEDIMENT CONTROL MEASURES SHOWN ON THE PLANS ARE THE MINIMUM REQUIREMENTS. ADDITIONAL MEASURES MAY BE REQUIRED, AS DIRECTED BY THE ENGINEER, SITE INSPECTOR, OR MWRD.

Mix Description: Pizzo's Dry Bottom Detention Basin Mix is designed for sunny areas that flood periodically for short periods of time, ranging from 24-48 hours, but remain mesic-dry for most of the growing season. It is composed of species that tolerate fluctuating water levels & poor water quality, and is ideal for planting in the bottom of dry-bottom detention basins, within the "Bounce Zone" on detention basin slopes, dry-bottom bioswales, large rain gardens, and within open floodplains. This is a medium height prairie with over 56% of seeds typically averaging 3.0' high or less at maturity and about 18% of seeds typically averaging 5.0' high or more. While this mix does provide flowering species from April-October, it is designed to be a bit grass heavy (particularly long-term) with nearly 60% of seeds being grass & sedge species. Pizzo designed the mix in this fashion to ensure excellent erosion control when used in stromwater applications. This mix can be supplemented with the recommended plug list provided below to add diversity, color, and resilience to the long-term health of your naturalized basin.

SUPPLEMENTED MIX STATISTICS	
Base Seed Mix Including Supplemental Plugs	
Number of Native Species in Mix	50
Native FQI	37.5
Native Mean C Value	5.3
Native Mean W Value	-0.7
National Wetland Category	Facultative Wetland / Facultative - Usually occur in wetlands (estimated probability 67 - 99%), but occasionally found in non-wetlands (estimated probability 34 - 66%)

Some species are not appropriate for inclusion into a seed mix, however they may be very desirable to have as part of the permanent plant matrix because of their ecological, habitat, and/or aesthetic value. The plug species listed above are appropriate for supplementing this seed mix. Following are the common reasons for not including these species within the seed mix: 1-Does not germinate well from seed in the field, 2-Seed is very expensive, 3-Low number of seeds per ounce, 4-Requires specialized microclimate, 5-Seed is not commercially available or is only available in small quantities

Notes:

1.) Pizzo recommends installing a Mycorrhizal Inoculant with the above seed mix at 40 lbs/acre

2.) For spring planting, Pizzo recommends installing a cover crop of Seed Oats (Avena sativa) with the above seed mix at 40 lbs/acre

3.) For fall planting, Pizzo recommends installing a cover crop of ReGreen (a Winter Wheat x Wheatgrass Sterile Hybrid) with the above mix at 50 lbs/acre

4.) **At no time should Annual nor Perennial Rye (Lolium multiflorum or perenne) be utilized as a cover crop**

August 23, 2019

1. Introduction

This report summarizes the methodologies, results, and findings of a traffic impact study conducted by Kenig, Lindgren, O'Hara, Aboona, Inc. (KLOA, Inc.) for a proposed 7-Eleven gas station to be located in Tinley Park, Illinois. The site, which is currently occupied by a single-family home, is located in the southwest quadrant of the intersection of Harlem Avenue (IL Route 43) with 171st Street. As proposed, the site will be developed with a 7-Eleven convenience store with 20 fueling positions and an automated car wash. Access to the gas station will be provided via a proposed right-in/right-out access drive off Harlem Avenue, a right-in/right-out access drive off 171st Street, and a cross connection to the existing First Merchants Bank.

The purpose of this study was to examine background traffic conditions, assess the impact that the proposed gas station will have on traffic conditions in the area, and determine if any roadway or access improvements are necessary to accommodate the traffic generated by the proposed gas station.

Figure 1 shows the location of the site in relation to the area roadway system. **Figure 2** shows an aerial view of the site.

The sections of this report present the following:

- Existing roadway conditions
- A description of the proposed gas station
- Directional distribution of the gas station traffic
- Vehicle trip generation for the gas station
- Future traffic conditions including access to the gas station
- Traffic analyses for the weekday morning and weekday evening peak hours
- Recommendations with respect to adequacy of the site access and adjacent roadway system

Traffic capacity analyses were conducted for the weekday morning and evening peak hours for the following conditions:

1. Existing Conditions – Analyze the capacity of the existing roadway system using existing peak hour traffic volumes in the surrounding area.

2. No-Build Conditions – Analyze the capacity of the future roadway system using background traffic volumes that include the existing traffic volumes increased by an ambient growth factor.

3. Projected Conditions – Analyze the capacity of the future roadway system using the projected traffic volumes that include the existing traffic volumes, ambient traffic growth, and the traffic estimated to be generated by the full buildout of the proposed gas station.

Site Location **Figure 1**

Aerial View of Site **Figure 2**

2. Existing Conditions

Existing transportation conditions in the vicinity of the site were documented based on field visits conducted by KLOA, Inc. in order to obtain a database for projecting future conditions. The following provides a description of the geographical location of the site, physical characteristics of the area roadway system including lane usage and traffic control devices, and existing peak hour traffic volumes.

Site Location

The site, which is currently occupied by a single-family home, is located in the southwest quadrant of the intersection of Harlem Avenue with 171st Street and is bounded by First Merchants Bank to the west and a single-family home to the south. Land uses in the area include single family homes to the west, the United States Postal Service (USPS) to the north, Creekview Offices, Montego Bay Car Wash, and Tinley Park Commons to the west and DuPage Medical Group and single-family homes to the south.

Existing Roadway System Characteristics

The characteristics of the existing roadways near the gas station are described below and illustrated in **Figure 3**.

Harlem Avenue (IL Route 43) is a north-south arterial roadway that in the vicinity of the site provides two through lanes in each direction separated by a raised barrier median. At its signalized intersection with 171st Street, Harlem avenue provides an exclusive left-turn lane, a through lane and a shared through/right-turn lane on the northbound and southbound approaches. The north leg of the intersection provides a standard style crosswalk and pedestrian countdown signals. Harlem Avenue is under the jurisdiction of the Illinois Department of Transportation (IDOT), is classified as a Strategic Regional Arterial (SRA) route, carries an annual average daily traffic (AADT) volume of 32,500 vehicles north of 171st Street and an AADT volume of 35,300 vehicles south of 171st Street (IDOT AADT 2017) and has a posted speed limit of 40 miles per hour.

171st Street is an east-west collector roadway that in the vicinity of the site provides two through lanes in each direction separated by a mountable/striped median. At its signalized intersection with Harlem Avenue, 171st Street provides an exclusive left-turn lane, a through lane and a shared through/right-turn lane on the eastbound and westbound approaches. The east leg provides a standard style crosswalks and pedestrian countdown signals. At its unsignalized intersection with Oconto Avenue, 171st Street provides a through lane and a shared through/right-turn lane on the eastbound approach and an exclusive left-turn lane, a through lane and a shared through/right-turn lane on the westbound approach. West of Harlem Avenue, 171st Street is under the jurisdiction of the Cook County Department of Transportation and Highways, carries an AADT volume of 16,00 vehicles (IDOT AADT 2018) and has a posted speed limit of 40 miles per hour. East of Harlem Avenue, 171st Street is under the jurisdiction of the Village of Tinley Park, carries an AADT volume of 11,800 vehicles (IDOT AADT 2018) and has a posted speed limit of 35 miles per hour.

Oconto Avenue is a north-south local roadway that provides one through lane in each direction and extends from 171st Street to its terminus at 173rd Street approximately 1,300 feet to the south. At its unsignalized intersection with 171st Street, Oconto Avenue provides a shared left/right-turn lane under stop-sign control. Oconto Avenue is under the jurisdiction of the Village of Tinley Park and has a posted speed limit of 20 miles per hour.

Traffic Signal Interconnect

The intersection of Harlem Avenue with 171st Street is part of a 16-signal interconnect system that extends along Harlem Avenue from 175th Street (located one-half mile to the south) to 151st Street (approximately 2.5 miles to the north) and also includes the traffic signals along US Route 6 (159th Street) between the Park Center/Home Depot Signalized Access Drives and Laramie Avenue. These traffic signals are maintained by IDOT.

Existing Traffic Volumes

In order to determine current traffic conditions in the vicinity of the site, KLOA, Inc. conducted peak period traffic counts utilizing Miovision Scout Collection Units during the weekday morning (7:00 to 9:00 A.M.) and evening (4:00 to 6:00 P.M.) peak periods on Tuesday, August 6, 2019 at the following intersections:

- Harlem Avenue with 171st Street
- 171st Street with the First Merchants Bank Access Drive
- 171st Street with Oconto Avenue/USPS Westerly Access Drive
- 171st Street with USPS Easterly Access Drive

The results of the traffic counts indicated that the weekday morning peak hour of traffic occurs from 7:45 A.M. to 8:45 A.M. and the weekday evening peak hour of traffic occurs from 5:00 P.M. to 6:00 P.M. **Figure 4** illustrates the existing peak hour traffic volumes. Copies of the traffic count summary sheets are included in the Appendix.

Crash Analysis

KLOA, Inc. obtained crash data[1] for the most recent available past five years (2013 to 2017) for the intersection of Harlem Avenue with 171st Street as summarized in **Table 1.** A review of the crash data indicated that no fatalities were reported.

[1] IDOT DISCLAIMER: The motor vehicle crash data referenced herein was provided by the Illinois Department of Transportation. Any conclusions drawn from analysis of the aforementioned data are the sole responsibility of the data recipient(s). Additionally, for coding years 2015 to present, the Bureau of Data Collection uses the exact latitude/longitude supplied by the investigating law enforcement agency to locate crashes. Therefore, location data may vary in previous years since data prior to 2015 was physically located by bureau personnel.

3. Traffic Characteristics of the Proposed Gas Station

In order to properly evaluate future traffic conditions in the surrounding area, it was necessary to determine the traffic characteristics of the proposed gas station, including the directional distribution and volumes of traffic that it will generate.

Proposed Site and Development Plan

As proposed, the site will be developed with a 7-Eleven gas station with an approximately 3,500 square-foot convenience store with 20 fueling positions and an automated car wash. Access to the gas station will be provided via the following:

- A right-in/right-out access drive off Harlem Avenue located approximately 200 feet south of 171st Street. This access drive will provide one inbound lane and one outbound lane with outbound movements under stop-sign control. Turning movements at this access drive will be restricted to right-turns only via the existing raised median along Harlem Avenue and will be supplemented with appropriate striping and signage.

- A right-in/right-out access drive off 171st Street located approximately 225 feet west of Harlem Avenue. This access drive will provide one inbound lane and one outbound lane with outbound movements under stop-sign control. Turning movements at this access drive will be physically restricted to right-turns only via a raised triangular median, striping and signage.

- A cross access to the existing First Merchants Bank site that borders the west side of the site. This cross access will allow traffic generated by the subject site to access the existing full movement access drive serving the bank that is located approximately 275 feet west of Harlem Avenue and the existing three-quarter (rights in, rights out, lefts in) access drive off Oconto Avenue that is located approximately 110 feet south of 171st Street.

It should be noted that the site will be developed with an additional cross access curb cut along the southern frontage to provide additional site connectivity to the future development of the two residential homes located south of the site. A site plan depicting the proposed gas station layout and access is included in the Appendix.

Directional Distribution

The directions from which patrons and employees will approach and depart the site were estimated based on existing travel patterns, as determined from the traffic counts. **Figure 5** illustrates the directional distribution of the gas station-generated traffic.

Peak Hour Traffic Volumes

The number of peak hour trips estimated to be generated by the proposed gas station was based on vehicle trip generation rates contained in *Trip Generation Manual*, 10th Edition, published by the Institute of Transportation Engineers (ITE). The "Convenience Market/Gas Station" (Land-Use Code 960) rate was utilized. In addition, it is important to note that surveys conducted by ITE have shown that approximately 60 percent of trips made to gas stations are diverted from the existing traffic on the roadway system. This is particularly true during the weekday morning and evening peak hours when traffic is diverted from the home-to-work and work-to-home trips. Such diverted trips are referred to as pass-by traffic. **Table 2** summarizes the trips projected to be generated by the proposed gas station.

Table 2

	Total New Trips	**49**	**50**	**99**	**42**	**42**	**84**

4. Projected Traffic Conditions

The total projected traffic volumes include the existing traffic volumes, increase in background traffic due to growth, and the traffic estimated to be generated by the proposed subject gas station.

Gas Station Traffic Assignment

The estimated weekday morning and evening peak hour traffic volumes that will be generated by the proposed gas station were assigned to the roadway system in accordance with the previously described directional distribution (Figure 5). **Figure 6** illustrates the traffic assignment of the new passenger vehicle trips. As previously indicated, a 60 percent pass-by reduction was applied, and **Figure 7** illustrates the traffic assignment of the pass-by trips.

Background Traffic Conditions

The existing traffic volumes (Figure 4) were increased by a regional growth factor to account for the increase in existing traffic related to regional growth in the area (i.e., not attributable to any particular planned development). Based on Average Daily Traffic (ADT) projections provided by the Chicago Metropolitan Agency for Planning (CMAP), the existing traffic volumes are projected to increase by a total of 4.3 percent (0.7 percent compounded annually) to represent Year 2025 total projected conditions (one-year buildout plus five years). **Figure 8** illustrates the Year 2025 no-build traffic volumes. A copy of the CMAP projections letter is included in the Appendix.

Total Projected Traffic Volumes

The gas station-generated traffic (Figures 6 and 7) was added to the existing traffic volumes increased by the regional growth factor (Figure 8) to determine the Year 2025 total projected traffic volumes, shown in **Figure 9**.

5. Traffic Analysis and Recommendations

The following provides an evaluation conducted for the weekday morning and weekday evening peak hours. The analysis includes conducting capacity analyses to determine how well the roadway system and access drives are projected to operate and whether any roadway improvements or modifications are required.

Traffic Analyses

Roadway and adjacent or nearby intersection analyses were performed for the weekday morning and evening peak hours for the existing (Year 2019) and Year 2025 total projected traffic volumes.

The traffic analyses were performed using the methodologies outlined in the Transportation Research Board's *Highway Capacity Manual (HCM), 6th Edition* and analyzed using the Synchro/SimTraffic 10 software. The analysis for the traffic-signal controlled intersections were accomplished using actual cycle lengths and phasings to determine the average overall vehicle delay and levels of service.

The analyses for the unsignalized intersections determine the average control delay to vehicles at an intersection. Control delay is the elapsed time from a vehicle joining the queue at a stop sign (includes the time required to decelerate to a stop) until its departure from the stop sign and resumption of free flow speed. The methodology analyzes each intersection approach controlled by a stop sign and considers traffic volumes on all approaches and lane characteristics.

The ability of an intersection to accommodate traffic flow is expressed in terms of level of service, which is assigned a letter from A to F based on the average control delay experienced by vehicles passing through the intersection. The *Highway Capacity Manual* definitions for levels of service and the corresponding control delay for signalized intersections and unsignalized intersections are included in the Appendix of this report.

Summaries of the traffic analysis results showing the level of service and overall intersection delay (measured in seconds) for the existing and total projected conditions are presented in **Tables 3** through **6**. A discussion of each intersection follows. Summary sheets for the capacity analyses are included in the Appendix.

Discussion and Recommendations

The following summarizes how the intersections are projected to operate and identifies any roadway and traffic control improvements necessary to accommodate the gas station-generated traffic.

Harlem Avenue with 171st Street

The results of the capacity analysis indicate that overall this intersection currently operates at Level of Service (LOS) LOS C during the weekday morning peak hour and at LOS E during the weekday evening peak hour. The level of service during the weekday evening peak hours is a result of the eastbound approach which operates at LOS F and the westbound and southbound approaches which operate at LOS E during the peak hour.

Under Year 2025 no-build conditions, this intersection overall is projected to operate at LOS C during the weekday morning peak hour and at LOS F during the weekday evening peak hour with increases in delay of less than one second and approximately 10 seconds, respectively. The eastbound and westbound approaches are projected to continue operating at LOS F and the southbound approach is projected to continue operating at LOS E during the weekday evening peak hour.

Under Year 2025 total projected conditions, the intersection overall is projected to continue operating at LOS C during the weekday morning peak hour and at LOS F during th weekday evening peak hour with increases in delay of approximately one second and four seconds over no build conditions.

Overall, the proposed development is only projected to increase the traffic traversing this intersection by approximately two percent during the weekday morning peak hour and approximately one percent during the weekday evening peak hour. As such, the proposed development traffic will have a limited impact on the operations of this intersection.

171st Street with Oconto Avenue/USPS Westerly Access Drive

The results of the capacity analysis indicate that the northbound approach currently operates at LOS B during the weekday morning peak hour and at LOS C during the weekday evening peak hour. Outbound movements from the westerly USPS access drive onto 171st Street currently operate at LOS C during the weekday morning peak hour and at LOS E during the weekday evening peak hour.

Under Year 2025 no-build conditions, the northbound approach is projected to continue operating at LOS B during the weekday morning peak hour and at LOS C during the weekday evening peak hour with increases in delay of less than one second. Outbound movements from the westerly USPS access drive onto 171st Street are projected to operate at LOS C during the weekday morning peak hour and at LOS F during the weekday evening peak hour with increases in delay of approximately one and eight seconds, respectively. This level of service is expected for an access driveway that has an intersection with a major roadway such as 171st Street and the increases in delay are attributed to the background traffic growth.

Under Year 2025 total projected conditions, the northbound approach is projected to continue operating at LOS B during the weekday morning peak hour and at LOS C during the weekday evening peak hour with increases in delay of less than one second over no build conditions. Outbound movements from the westerly USPS access drive onto 171st Street are projected to operate at LOS C during the weekday morning peak hour and at LOS F during the weekday evening peak hour with increases in delay of less than one and approximately two seconds, respectively. As previously indicated, this level of service is expected for an access driveway that has an intersection with a major roadway such as 171st Street and the increases in delay are attributed to the background traffic growth. Eastbound and westbound left-turns onto the access drive/Oconto Avenue are projected to continue operating at LOS B or better during the peak hours with 95th percentile queues of one to two vehicles. As such, the traffic projected to be generated by the proposed gas station will have a limited impact on the operations of this intersection an no roadway or traffic control improvements will be required.

171st Street with First Merchants Bank

The results of the capacity analysis indicate that outbound movements from the First Merchants Bank access drive onto 171st Street currently operate at LOS B during the weekday morning peak hour. Under Year 2025 no-build conditions, outbound movements from the access drive onto 171st Street are projected to continue operate at LOS B during the weekday morning peak hour with increases in delay of less than one second.

Under Year 2025 total projected conditions outbound movements from the access drive onto 171st Street are projected to operate at LOS C to the weekday morning peak hour and at LOS E during the weekday evening peak hour. However, this level of service is expected for an access driveway that has an unsignalized intersection with a major roadway such as 171st Street. Furthermore, it should be noted that this access drive will primarily accommodate left-turning movements to/from 171st Street given the proposed right-in/right-out access drive that serves the site directly. Westbound left-turning movements from 171st Street onto the access drive are projected to operate at LOS B or better during the peak hours with 95th percentile queues of one to two vehicles.

Overall, the traffic estimated to be generated by the proposed gas station will have a limited impact on the operations of First Merchants Bank, as the bank will generate a minimal volume of traffic during the peak hours. As such, this access drive will be adequate in accommodating the traffic estimated to be generated by the proposed development and will ensure efficient and flexible access is provided.

171st Street with USPS Easterly Access Drive/Proposed Right-In/Right-Out Access Drive

The results of the capacity analysis indicate that outbound movements from the easterly USPS access drive currently operate at LOS B during the weekday morning peak hour and at LOS C during the weekday evening peak hour. Under Year 2025 no-build conditions, outbound movements from the easterly USPS access drive are projected to continue operating at LOS B during the weekday morning peak hour and at LOS C during the weekday evening peak hour with increases in delay of less than one second.

Under Year 2025 total projected conditions, outbound movements from the easterly USPS access drive are projected to continue operating at LOS C during the weekday morning peak hour weekday evening peak hours with increases in delay of approximately two seconds or less. Eastbound left-turning movements onto the access drive are projected to continue operating at LOS B or better during the peak hours with 95th percentile queues of one to two vehicles.

Outbound movements from the proposed right-in/right-out access drive onto 171st Street are projected to operate at LOS B during the peak hours with 95th percentile queues of one to two vehicles. As such, the proposed right-in/right-out access drive will be adequate in accommodating the traffic estimated to be generated by the proposed development and will have a limited impact n the operations of the USPS easterly access drive.

Harlem Avenue with Proposed Right-In/Right-Out Access Drive

The results of the capacity analysis indicate that outbound movements from the proposed access drive onto Harlem Avenue are projected to operate at LOS B during the weekday morning peak hour and at LOS C during the weekday evening peak hour with 95th percentile queues of one to two vehicles. As such, this access drive will be adequate in accommodating the traffic estimated to be generated by the proposed development and will ensure efficient and flexible access is provided.

6. Conclusion

Based on the preceding analyses and recommendations, the following conclusions have been made:

- The traffic projected to be generated by the proposed gas station will be reduced due to the volume of pass-by traffic generated by the gas station.

- The proposed access system, including cross access to the First Merchants Bank, will be adequate in accommodating the traffic projected to be generated by the proposed gas station with limited impact on the external roadway system.

- The proposed gas station is only projected to increase the traffic traversing the intersection of Harlem Avenue with 171st Street by approximately two percent during the weekday morning peak hour and approximately one percent during the weekday evening peak hour and as such will have a limited impact on the operations of the intersection.

Subject: Harlem Avenue (IL 43) @ 171st Street
IDOT

Dear Mr. May:

In response to a request made on your behalf and dated August 20, 2019, we have developed year 2050 average daily traffic (ADT) projections for the subject location.

ROAD SEGMENT	Current Volumes	Year 2050 ADT
Harlem Avenue North of 171st St	32,500	42,800
Harlem Avenue South of 171st St	35,300	43,200
171st Street West of Harlem Avenue	16,000	20,700
171st Street East of Harlem Avenue	11,800	14,100

Traffic projections are developed using existing ADT data provided in the request letter and the results from the March 2019 CMAP Travel Demand Analysis. The regional travel model uses CMAP 2050 socioeconomic projections and assumes the implementation of the ON TO 2050 Comprehensive Regional Plan for the Northeastern Illinois area. The provision of this data in support of your request does not constitute a CMAP endorsement of the proposed development or any subsequent developments.

If you have any questions, please call me at (312) 386-8806.

Sincerely,

Jose Rodriguez, PTP, AICP

Level of Service Criteria

LEVEL OF SERVICE CRITERIA

Signalized Intersections		
Level of Service	Interpretation	Average Control Delay (seconds per vehicle)
A	Favorable progression. Most vehicles arrive during the green indication and travel through the intersection without stopping.	≤10
B	Good progression, with more vehicles stopping than for Level of Service A.	>10 - 20
C	Individual cycle failures (i.e., one or more queued vehicles are not able to depart as a result of insufficient capacity during the cycle) may begin to appear. Number of vehicles stopping is significant, although many vehicles still pass through the intersection without stopping.	>20 - 35
D	The volume-to-capacity ratio is high and either progression is ineffective or the cycle length is too long. Many vehicles stop and individual cycle failures are noticeable.	>35 - 55
E	Progression is unfavorable. The volume-to-capacity ratio is high and the cycle length is long. Individual cycle failures are frequent.	>55 - 80
F	The volume-to-capacity ratio is very high, progression is very poor, and the cycle length is long. Most cycles fail to clear the queue.	>80.0

Unsignalized Intersections	
Level of Service	Average Total Delay (SEC/VEH)
A	0 - 10
B	> 10 - 15
C	> 15 - 25
D	> 25 - 35
E	> 35 - 50
F	> 50
