NOTICE OF THE MEETING OF THE PLAN COMMISSION

The meeting of the Plan Commission is scheduled for
May 6, 2021 beginning at 7:00 p.m.

A copy of the agenda for this meeting is attached hereto and
can be found at www.tinleypark.org.

NOTICE - MEETING MODIFICATION DUE TO COVID-19

Pursuant to Governor Pritzker's Executive Order 2020-07, Executive Order 2020-10, Executive Order 2020-18, Executive Order 2020-32, Executive Order 2020-33, Executive Order 2020-39, and Executive Order 2020-44, which collectively suspends the Illinois Open Meetings Act requirements regarding in-person attendance by members of a public body during the duration of the Gubernatorial Disaster Proclamation, issued on June 26, 2020, the Commission members may be participating in the meeting through teleconference.

Pursuant to Governor's Executive Order No. 2020-63 and CDC guidelines, no more than 50 people or 50% of the maximum capacity will be allowed in the Council Chambers at any one time, so long as attendees comply with social distancing guidelines. Anyone in excess of maximum limit will be asked to wait in another room with live audio feed to the meeting until the agenda item for which the person or persons would like to speak on is being discussed or until the open floor for public comments.

Meetings are open to the public, but members of the public may continue to submit their public comments or requests to speak telephonically in advance of the meeting to clerksoffice@tinleypark.org or place requests in the Drop Box at the Village Hall by noon on May 6, 2021. Please note, written comments will not be read aloud during the meeting. A copy of the Village's Temporary Public Participation Rules & Procedures is attached to this Notice.

Kristin A. Thirion
Clerk
Village of Tinley Park

VILLAGE OF TINLEY PARK
TEMPORARY PUBLIC PARTICIPATION RULES & PROCEDURES

As stated in Gubernatorial Executive Order 2020-07 issued on March 16, 2020 and Gubernatorial Executive Order 2020-10 issued on March 20, 2020, both extended by Gubernatorial Executive Order 2020-18 issued on April 1, 2020, all public gatherings of more than ten people are prohibited. In-person public participation is not defined as an essential activity.

The Mayor of Tinley Park is issuing the following rules for all Village Board and other public meetings in order to promote social distancing as required by the aforementioned Executive Orders and the requirements of the Open Meetings Act:

Written Comments

After publication of the agenda, email comments to clerksoffice@tinleypark.org. When providing written comments to be included as public participation at a public meeting, clearly identify the following in the subject line:

- The date of the meeting;
- The type of meeting for the written comments (e.g. Village Board meeting, Zoning Board of Appeals meeting, Plan Commission meeting, etc.);
- Name and any other identifying information the participant wishes to convey to the public body;
- The category of public participation (e.g., Receive Comments from the Public, Agenda Items, etc.);
- For specific Agenda Items, identify and include the specific agenda item number;
- The entire content of the comments will be subject to public release. The Village of Tinley Park is under no obligation to redact any information.

The contents of all comments will be provided to the relevant public body for their review. **Written comments will not be read aloud during the meeting. If you wish to publicly address the public body, you may request to participate via teleconference as described below.**

Comments must be submitted by 12:00 pm on the day of the meeting. However, it is strongly recommended that comments be emailed not less than twenty-four (24) hours prior to the meeting so the appropriate Board members, Commissioners, Board members, and Committee members have sufficient time to review the comments prior to the meeting.

Live Public Participation During Meeting

After publication of the agenda, those wishing to participate in a live telephone call option at a public meeting must register by 12:00 pm on the day of the meeting. A Village representative will call the participant at the relevant portion of the meeting and the participant will be allowed to participate telephonically at the meeting. To participate in a live telephone call during the meeting, a request shall be submitted by email to clerksoffice@tinleypark.org. The following information must be included the subject line:

- The date of the meeting;
- The type of meeting for the written comments (e.g. Village Board meeting, Zoning Board of Appeals meeting, Plan Commission meeting, etc.);
- Name and any other identifying information the participant wishes to convey to the public body;
- The category of public participation (e.g., Receive Comments from the Public, Agenda Items, etc.); and
- For specific Agenda Items, identify and include the specific agenda item number.

If the participant provides an email address, they will receive a confirmation email that their request has been logged. If the participant provides an email address and does not receive a confirmation email, they may call (708) 444-5000 during regular business hours to confirm the application was received.

Upon successful registration, the participant's name will be placed on an internal Village list. On the date and during relevant portion of the meeting, the participant will be called by a Village representative. The Village representative will call the provided telephone number and allow the phone to ring not more than four (4) times. If the call is not answered within those four (4) rings, the call will be terminated and the Village representative will call the next participant on the list.

The public comment should be presented in a manner as if the participant is in attendance at the meeting. At the start of the call, the participant should provide their name and any other information the participant wishes to convey. For comments regarding Agenda Items, identify and include the specific agenda item number. The participant should try to address all comments to the public body as a whole and not to any member thereof. Repetitive comments are discouraged. The total comment time for any single participant is three (3) minutes. Further time up to an additional three (3) minutes may be granted by motion. A participant may not give his or her allotted minutes to another participant to increase that person's allotted time.

AGENDA FOR REGULAR MEETING
VILLAGE OF TINLEY PARK
PLAN COMMISSION

May 6, 2021 – 7:00 P.M.
Council Chambers
Village Hall – 16250 S. Oak Park Avenue

Regular Meeting Called to Order
Roll Call Taken
Communications
Approval of Minutes: Minutes of the April 15, 2021 Regular Meeting

ITEM #1 WORKSHOP/PUBLIC HEARING – BREMEN ANIMAL HOSPITAL ADDITION, 7613 159TH STREET – ARCHITECTURE/SITE PLAN APPROVAL, VARIATION

Consider recommending the Village Board grant Brittany Maddox (Genelin) on behalf of National Veterinary Associates (Petitioner), a Variation of 5.5 feet from the required aisle width of 26 feet to allow for an aisle width of 20.5 feet for a portion of the parking lot drive aisle and a Variation of .19 feet from the required ten foot side yard setback to allow for a setback of 9.81feet on the east side of the property. The approval of these variations will allow for the construction of a 400 square foot addition on the north side of the existing building located at 7613 159th Street. There is also a request for Site Plan and Architecture approval.

ITEM #2 WORKSHOP - VEQUITY MULTI-TENANT REMODEL, 17111-17119 LAGRANGE ROAD – SITE PLAN/ARCHITECTUAL APPROVAL

Consider recommending approval of the Site Plan and Architecture for an existing building at 17111-17119 LaGrange Road (formally 9561 171st St) in the B3 PD (General Business and Commercial, Park Hills Towne Centre PUD) Zoning District. The proposed project allows for the former MD Financial/Fifth-Third Bank building to be converted to a multi-tenant commercial building that includes a Starbucks Coffee drive-thru.

ITEM #3 WORKSHOP - VEQUITY MULTI-TENANT CONSTRUCTOIN, 17118-30 HARLEM AVENUE – SITE PLAN/ARCHITECTUAL APPROVAL, REZONING (MAP AMENDMENT), SPECIAL USE FOR A PLANNED UNIT DEVELOPMENT, PLAT OF SUBDIVISION APPROVAL

Consider recommending that the Village Board grant Vequity, LLC (Contract Purchaser/Owner) a map amendment to rezone the subject properties from R-1 (Single-Family Residential) to a B-1 (Neighborhood Shopping) zoning district. Additionally, the Petitioner is requesting a Special Use for a Planned Unit Development (PUD) with Exceptions from the Zoning Ordinance on both the subject site and the neighboring 7-Eleven site currently under construction. The requests will permit a multi-tenant building with a Starbuck's drive-thru to be constructed at the properties located at 17120 - 17126

Harlem Avenue. Architecture/Site Plan and Final Plat Approval will also be considered at the meeting.

MINUTES OF THE REGULAR MEETING OF THE PLAN COMMISSION, VILLAGE OF TINLEY PARK, COOK AND WILL COUNTIES, ILLINOIS

April 15, 2021

The meeting of the Plan Commission, Village of Tinley Park, Illinois, was held in the Council Chambers located in the Village Hall of Tinley Park, 16250 Oak Park Avenue, Tinley Park, IL on April 15, 2021.

CALL TO ORDER – PLAN COMMISSION CHAIRMAN GRAY called to order the Regular Meeting of the Plan Commission for April 15, 2021 at 7:00 p.m.

CHAIRMAN GRAY stated the meeting was being held remotely consistent with Governor Pritzker's Executive Order 2020-07 issued on March 16, 2020, which suspends the Open Meetings Act provisions relating to in-person attendance by members of a public body. The Open Meetings Act (OMA) requires public bodies to allow for public comment, therefore, this meeting will include public comment via the established protocol. Even if members of the public do not provide comment, participants are advised that people may be listening who do not provide comment, and those persons are not required to identify themselves. He noted that the meeting is being recorded and that some attendees are participating by web/audio conference.

Kathy Congreve called the roll.

Present and responding to roll call were the following:

	Chairman Garrett Gray (Participated electronically) Eduardo Mani (Participated electronically) Angela Gatto (Participated electronically) Frank Loscuito (Participated electronically) Mary Aitchison (Participated electronically) Steven Vick (Participated electronically) James Gaskill
Absent Plan Commissioners:	Lucas Engel Kehla West
Village Officials and Staff:	Dan Ritter, Senior Planner Paula Wallrich, Planning Manager (Participated electronically) Kathy Congreve, Commission Secretary
Petitioners:	Tom Panos, on behalf of MAKP Properties, Inc.
Members of the Public:	Frank Zator Anthony Sullivan Zachary Pivit

COMMUNICATIONS
None

APPROVAL OF MINUTES
Minutes of the April 1, 2021 Regular Meeting of the Plan Commission were presented for approval. A motion was made by COMMISSIONER VICK, seconded by COMMISSIONER MANI to approve the minutes as presented.

COMMISSIONER GRAY requested a voice vote asking if any were opposed to the motion; hearing none, he declared the motion carried.

TO: **VILLAGE OF TINLEY PARK PRESIDENT AND BOARD OF TRUSTEES**

FROM: **VILLAGE OF TINLEY PARK PLAN COMMISSION**

SUBJECT: **MINUTES OF THE APRIL 15, 2021 REGULAR MEETING**

ITEM #1 **PUBLIC HEARING – SUNSET ESTATES TOWNHOME DEVELOPMENT, 6964 & 6900 179TH STREET – ARCHITECTURE/SITE PLAN APPROVAL, ANNEXATION/FINAL PLAT APPROVAL, REZONING, VARIATION**

Consider approving a rezoning, upon annexation, of property located at 6864 179th Street to R-6 (Medium Density Residential District), and a rezoning of property located at 6900 179th Street from R-1 (Single Family Residential District) to the R-6 Zoning District. Approval of the Architecture/Site Plan and Annexation/Final Plat of Subdivision along with a Variation to allow rear yard setbacks from the north property line ranging from 13.59 feet to 15.12 feet when the required setback is 30 feet will also be considered.

Present Plan Commissioners:	Chairman Garrett Gray (Participated electronically) Eduardo Mani (Participated electronically) Angela Gatto (Participated electronically) Frank Loscuito (Participated electronically) Mary Aitchison (Participated electronically) Steven Vick (Participated electronically) James Gaskill
Absent Plan Commissioners:	Lucas Engel Kehla West
Village Officials and Staff:	Dan Ritter, Senior Planner Paula Wallrich, Planning Manager (Participated electronically) Kathy Congreve, Commission Secretary
Petitioner:	Tom Panos, on behalf of MAKP Properties, Inc.
Members of the Public:	Frank Zator Anthony Sullivan Zachary Pivit

CHAIRMAN GRAY asked for a motion to open the Public Hearing. Motion made by COMMISSIONER GATTO, seconded by COMMISSIONER LOSCUITO. CHAIRMAN GRAY requested a voice vote asking if any were opposed to the motion; hearing none, he declared the motion carried.

CHAIRMAN GRAY stated that he received proof of the Notice of Publication for this Public Hearing. He then invited staff to start with the presentation of this item.

PAULA WALLRICH, Planning Manager, noted that the Staff Report has been distributed to the Commission and posted on the Village website and will be attached to the minutes as part of the meeting record. The workshop for this item was two weeks ago; she reviewed some of the open issues, including rezoning, site plan and architecture review, a variation, and a subdivision review.

CHAIRMAN GRAY asked for comments from each Commissioner.

COMMISSIONER VICK stated that the staff did a really good job on the staff report and review.
COMMISSIONER AITCHISON agrees that the staff did a good job. She stated that she likes the architecture; the porch along 179th Street is a great addition. She thinks it will be a beautiful development.

COMMISSIONER LOSCUITO echoed what the other commissioners said, that the staff did a really good job and this project looks good.
COMMISSIONER GASKILL had no comment.
COMMISSIONER GATTO agreed with other commissioners, staff did a great job on the design, landscaping and fences; it looks fantastic and will be a great addition to the area.
COMMISSIONER MANI agreed and said it looks nice.

CHAIRMAN GRAY echoed what the commissioners said. In reference to Item #2, he stated that it is a unique property and the variation is totally reasonable. The architecture is tasteful, he likes the porch improvements, and that the side yards were beefed up.

CHAIRMAN GRAY invited the Petitioner to speak. Tom Panos, on behalf of MAKP Properties, Inc. was present and thanked Dan and Paula for their hard work and cooperation. They worked together and made the improvements that they had suggested; it will be a nice addition to the area. He thanked the commissioners as well.

CHAIRMAN GRAY invited the public to comment.

FRANK ZATOR, 17861 Sayre Avenue, a resident in the area spoke, stating that he felt there needs to be some consideration being made for the neighborhood. 179th Street is a dangerous road with more residences being built, cars now parking on the street, and cars driving through very fast. He noticed in the plan that the sidewalk stops at the property line; he feels it should at least go down to Sayre Avenue. It is hazardous for pedestrians when cars are parked on the street and cars are speeding. And there needs to be a 4-way stop sign at that intersection. Regarding the variance and the setback, he doesn't have any specific concerns with those requests but just feels there's not enough room for traffic on 179th Street. Otherwise, he thought the plan looks fine. But he would like some kind of traffic study; he has requested it from Cook County and Tinley Park Police Departments multiple times. People use it as a pass-through from Harlem to Oak Park Avenue and go at least 40-45 MPH.

CHAIRMAN GRAY concurred that people should not be speeding down 179th Street, although he hasn't experienced it himself when walking in that area.

ANTHONY SULLIVAN, 6910 179th Street, a neighboring resident spoke. He lives to the west of the property and said that the backs of the townhomes will face his home. He asked if the decks or balconies will be at ground level or second level; Paula replied stating that they are at grade-level. Mr. Sullivan was glad to hear they wouldn't be elevated looking into his property. He completely agrees with Mr. Zator. He has a Ring doorbell and sees people driving down the road drunk at 2:00am in the morning and driving into the ditch. And it's a busy road and high traffic area throughout the day.

There were no other public comments.

CHAIRMAN GRAY asked commissioners if they had any further discussion on this matter.

COMISSIONER GATTO agreed with the residents, stating that the road has gotten very busy over the past 5 years and there's a lot of people who cut through from Harlem Avenue to Oak Park Avenue and don't obey the speed limit. She asked if it was possible to do a traffic study in that area and possibly put in a stop sign. She asked Paula if there was an option to extend the sidewalk. PAULA WALLRICH replied, stating that the neighborhood benefits as development occurs; a lot of the area is unincorporated and therefore is out of their control. There's always the option of special assessments being imposed; Public Works has a master plan for extending sidewalks where there's a gap in the sidewalks. She will make sure the police are aware of the testimonies given today regarding the traffic. There's a controversy about whether stop signs resolve the issue of speeding vehicles; it may be better to place a police car there. She will inquire as to whether there's ever been a traffic study there. FRANK ZATOR addressed Paula's comments stating that the two properties on 179th Street on the north side are incorporated and the properties on the south side are unincorporated, so he doesn't expect much more development. DAN RITTER gave some history on the roadway, stating that it used to be under County jurisdiction. Within the last 20 or so years, the Village took it over and assumed some responsibility, mainly due to the County's lack of maintenance of the road. They can bring the sidewalk issue up with Public Works and see where it's at on the list to take care of the sidewalk gaps there. Stop signs placed on through streets don't always work and can make for an even more dangerous intersection. FRANK ZATOR

stated that at one time there were going to put in street lights and that there's foundations there for them. ANTHONY SULLIVAN commented, stating that the police do make their presence known through the neighborhood, but they're never at that intersection. They tend to do radar by the church down the street on the south side of 179th closer to Harlem, but he nor Frank has ever seen them pull someone over. DAN RITTER agreed there is some parking on the street that maybe hasn't been reviewed by police or Public Works, we can ask to see if there should be No Parking signs on at least one side of the roadway and near intersections.

COMMISSIONER GASKILL asked how much of 179th Street currently has sidewalks. PAULA WALLRICH said that there are sidewalks that come from Oak Park Avenue along the front of the new townhomes. DAN RITTER added that there are sidewalks along the area of the new memory care facility near Harlem Ave. There is a gap on the north side of 179th Street between those two developments. The petitioner is installing their sidewalk and roadway improvements adjacent to their development, as required by the Village Subdivision Code.

There were no other comments from commissioners.

A Motion was made by COMMISSIONER GASKILL, seconded by COMMISSIONER LOSCUITO to close the Public Hearing. CHAIRMAN GRAY asked for a voice vote asking if any were opposed to the motion; hearing none, he declared the motion carried.

PAULA WALLRICH reviewed the Standards of Approval with commissioners, as was summarized in the meeting packet.

The first motion was made by COMMISSIONER AITCHISON, seconded by COMMISSIONER VICK, to recommend that the Village Board grant the Petitioner, Maria Poulos, on behalf of MAKP Properties, Inc., the rezoning (Map Amendment) of Parcels 1 & 2 (28-31-105-015-0000, 28-31-105-018-0000) to R-6 (Medium Density Residential) upon annexation and the rezoning of Parcel 3 (28-31-105-07-0000) from R-1 (Single Family Residential) to R-6 (Medium Density Residential) and adopt the Findings of Fact submitted by the Petitioner and as proposed by the Village Staff in the Staff Report.
Roll Call:
AYE: COMMISSIONERS VICK, MANI, GATTO, GASKILL, AITCHISON and LOSCUITO, CHAIRMAN GRAY
NAY: None
CHAIRMAN GRAY declared the Motion approved by roll call.

The second motion was made by COMMISSIONER GATTO, seconded by COMMISSIONER LOSCUITO, to recommend that the Village Board grant the Petitioner, Maria Poulos, on behalf of MAKP Properties, Inc., a Variation to the rear yard setback of 14.88 to 16.41 feet along the north property line, where the required minimum setback is 30 feet, to allow rear yard setbacks ranging from 13.59 feet to 15.12 feet in accordance with the plans submitted and listed herein and adopt Findings of Fact as proposed by Village Staff in the Staff Report.
Roll Call:
AYE: COMMISSIONERS VICK, MANI, GATTO, GASKILL, AITCHISON and LOSCUITO, CHAIRMAN GRAY
NAY: None
CHAIRMAN GRAY declared the Motion approved by roll call.

The third motion was made by COMMISSIONER GASKILL, seconded by COMMISSIONER LOSCUITO, to grant the Petitioner, Maria Poulos, on behalf of MAKP Properties, Inc., Site and Architectural Plan Approval to construct two structures comprising twelve townhomes in accordance with the plans submitted and listed herein subject to final engineering approval.
Roll Call:
AYE: COMMISSIONERS VICK, MANI, GATTO, GASKILL, AITCHISON and LOSCUITO, CHAIRMAN GRAY
NAY: None
CHAIRMAN GRAY declared the Motion approved by roll call.

The fourth motion was made by COMMISSIONER AITCHISON, seconded by COMMISSIONER MANI, to recommend that the Village Board grant Final Plat approval to the Petitioner, Maria Poulos, on behalf of MAKP

Properties, Inc., in accordance with the Final Plate of “Sunset Estates Subdivision” March 24, 2021, subject to final engineering approval.
Roll Call:
AYE: COMMISSIONERS VICK, MANI, GATTO, GASKILL, AITCHISON and LOSCUITO, CHAIRMAN GRAY
NAY: None
CHAIRMAN GRAY declared the Motion approved by roll call.

This item is scheduled for the May 18, 2021 Village Board Meeting.

GOOD OF THE ORDER –

PAULA WALLRICH reminded everyone to turn in their Statement of Economic Interest with the County. She updated Commissioners on the following: The locks on the building of the property discussed at the last meeting did get fixed. The Board approved an incentive for a restaurant going in at The Boulevard. The Holiday Inn on North Creek Drive has picked up their permit. The Planning Department has been having interviews and has made an offer to hire an Associate Planner who will hopefully start in June. Paula stated that she will retire and her last day will be May 27th; it's been a wonderful pleasure working with everyone.

CHAIRMAN GRAY spoke for the Commission saying that Paula will be missed; he appreciated her thoroughness.

COMMENTS FROM THE PUBLIC – There were none.

A Motion was made by COMMISSIONER GASKILL, seconded by COMMISSIONER LOSCUITO to adjourn the April 15, 2021 Plan Commission meeting.

COMMISSIONER GRAY asked for a voice vote asking if any were opposed to the motion; hearing none, he declared the motion carried and adjourned the meeting at 8:10 P.M.

PLAN COMMISSION STAFF REPORT

May 6, 2021 – WORKSHOP/PUBLIC HEARING

Bremen Animal Hospital

7613 159th Street

Petitioner
Brittany Maddox (Genelin), on behalf of National Veterinary Associates

Property Location
7613 159th Street

PIN
27-24-101-010-000

Zoning
B-3 (General Business and Commercial)

Approvals Sought
Variation, Site and Architecture Approval

Project Planner
Paula J. Wallrich, AICP
Planning Manager

The Petitioner, Brittany Maddox (Genelin), on behalf of National Veterinary Associates, is requesting approval of two Variations along with Site and Architectural Plan approval. The Variations, if granted, will allow for the continuation and expansion of existing conditions. The first request is for a 5.55 foot Variation from the required 26 foot drive aisle width to allow a drive aisle width of 20.5 feet for a small portion of the driveway. The second request is for a .19 foot (less than 2 inches) Variation of the required 10 foot side yard setback to allow for a side yard setback of 9.81 foot on the east side of the property. These approvals will allow the Petitioner to construct a 400 Sq. Ft. addition on the north side of the building located at 7613 159th Street in the B-3 Zoning District (General Business and Commercial).

BACKGROUND

In 2015, National Veterinary Associates (NVA) purchased Bremen Animal Hospital that had been operating in this location since 1969. A Special Use was granted in 2015 to allow for the continuation of the clinic that has no outside dog runs nor kenneling for animals.

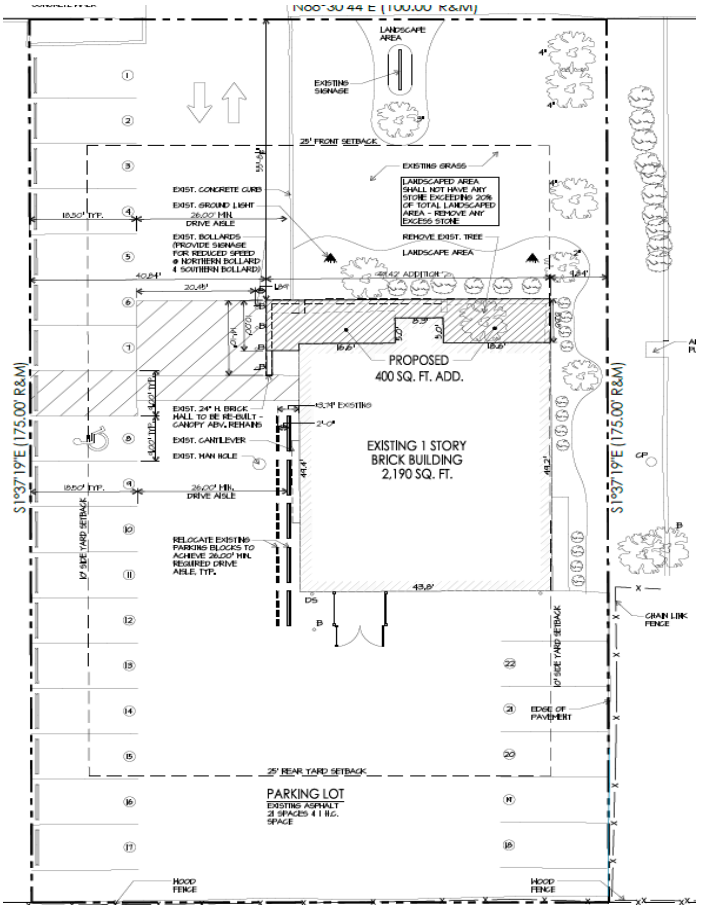
The Petitioner is proposing a 400 Sq. Ft. addition on the north side of the existing 2,190 Sq. Ft. building. The proposed remodel will include the reconfiguration of exam and treatment areas to modernize the clinic to current standards of the industry. A portion of the addition will be built under the existing roof canopy and will extend to the east corner of the existing building in line with the current east setback line.

The subject property is zoned B-3 (General Business and Commercial). The properties to the east and west are also zoned for commercial use in the B-3 District. The property to the south is zoned R-5 with multi-family residential uses. The properties to the north across 159th Street are in the Village of Orland Park. The Applicant has provided Findings of Fact (attached) which will be submitted as part of the public record during the Public Hearing.

SITE/ARCHITECTURAL PLAN APPROVAL

SITE PLAN

The proposed site plan provides for a 400 Sq. Ft. addition on the north side of the existing building. Currently there is a roof overhang in this area that functions as a covered entryway into the clinic. The expansion will enclose this area and utilize the existing footings. It will also expand the area to the east at the same 8.8' depth and will align with the existing east building façade. The parking lot will remain intact with 22 parking spaces, inclusive of one accessible space.



Parking requirements for Veterinary Clinics are not specifically defined in the Zoning Ordinance, however medical or dental offices are required to provide "two spaces for each office, examination room, or treatment room, plus one space for each employee." There are five (5) examination rooms, one (1) office, and one (1) surgery room in the clinic; there will be a maximum of eight (8) employees at any given time. Using the medical office requirement as a guide, the parking requirement is 22 spaces; the proposed parking therefore meets code. The Applicant states that the current

parking supply meets the demand for the clinic. Employees are instructed to park at the rear of the property.

The drive aisle meets ordinance requirements of 26 feet except for a small area near the entrance to the clinic (14' x 20.45'). This is an existing condition resulting from the 24" high brick wall that encloses the entryway. The entryway has brick columns that support the mansard roof. The addition will maintain the same configuration as the existing entryway.

The trash enclosure and wood fencing along the rear property line will remain in their current location/condition; no new lighting is proposed.

As part of the Special Use approved in 2015 a new landscape plan was improved and installed. There are several existing trees and shrubs on the property; credit toward landscape requirements has been provided for these. Due to existing property constraints, a bufferyard along the west and south property line is not possible. The bufferyards planted in 2015 for the north and east property lines meet Ordinance requirements. There is a stone area in the landscaped area that exceeds ordinance limitations; the Applicant has agreed to reduce the stone area and bring it into compliance (no greater than 20% of the landscaped area can be stone). There may be a loss of vegetation as part of the construction process therefore, Staff recommends Site Plan approval be conditioned upon final landscape approval consistent with the landscape plan that was approved in 2015. .

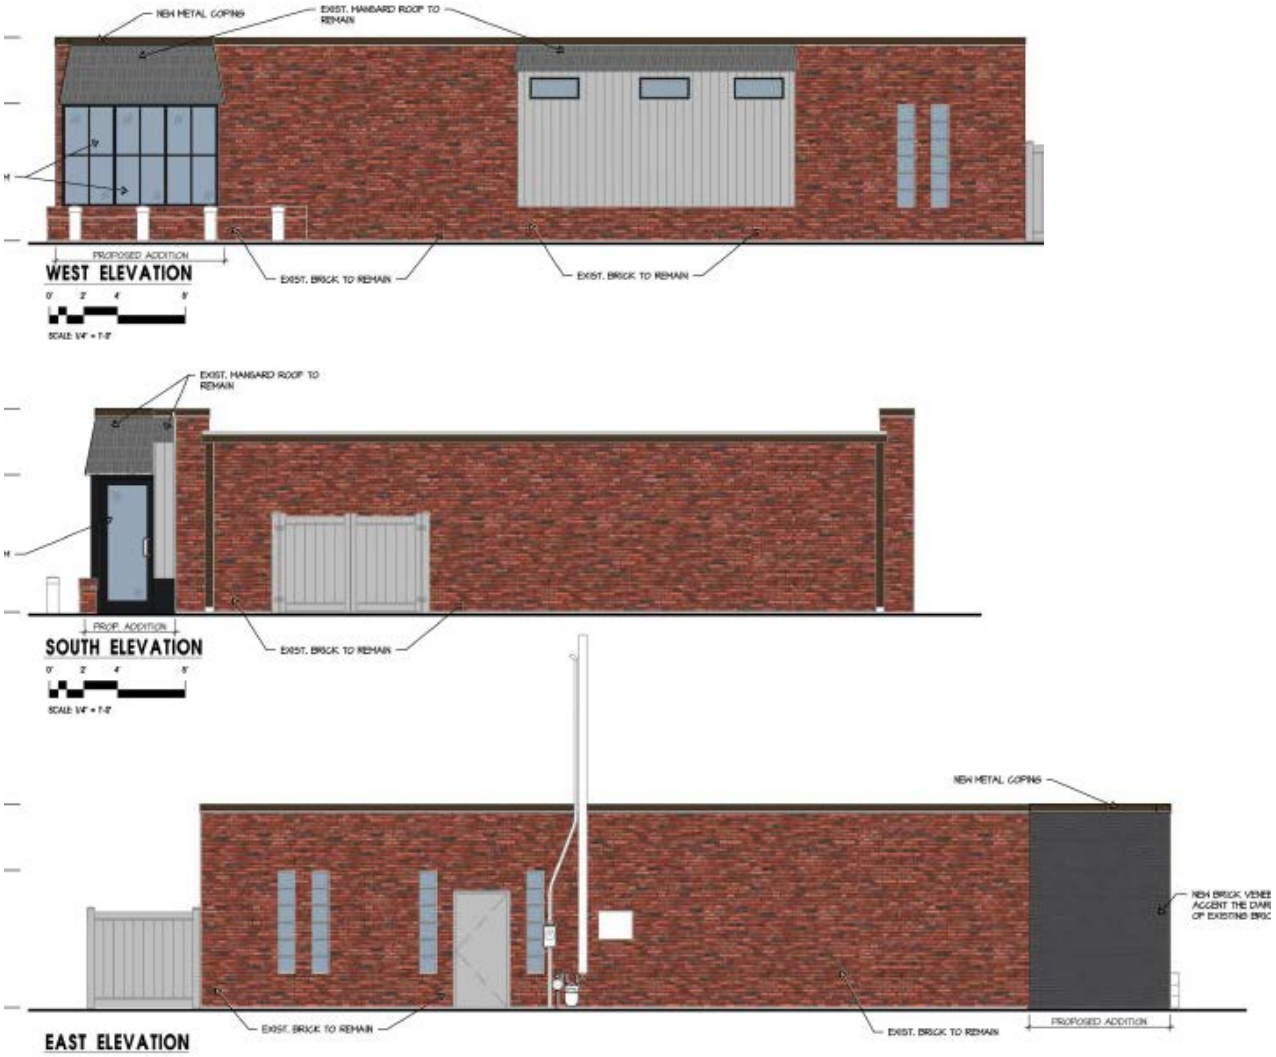
As part of the site plan review, Staff reviewed the plan against the Site Design Standards outlined in Section III.U.3., and found the following issues to be satisfactorily reviewed considering the site reflects existing conditions. Standards for approval are addressed at the end of the report:

Site Plan

a. Use is permitted in District;
b. Arrangement of building, parking, access, lighting, landscaping and drainage is compatible with adjacent landuses;
c. Safe and efficient ingress/egress;
d. Safe movement of pedestrians;
e. Sufficient landscaping;
f. Trash adequately screened; and
g. Review of architectural and site plan standards.
h. Arrangement of buildings, parking, access, lighting, landscaping and drainage is compatible with adjacent land uses;
i. Vehicular ingress and egress provide safe, efficient and convenient movement to traffic;
j. Safe movement of pedestrians: and
k. Sufficient mixture of grass, trees and shrubs within the interior and perimeter of the site .

Open Item #1: Discuss conditioning site plan approval on final landscape approval.

ARCHITECTURE



The 400' addition will utilize the existing brick that encloses the front entryway and the area to the east will include a new brick that will accent the dark tone of the existing brick. In addition to the Architectural standards listed below, additions "*must conform to the building materials used for the existing structure. If there is difficulty in matching the existing material, then the architectural design of the addition must provide an attractive transition to a new material that is consistent with current building material requirements*." The transition to this new brick color works well along the front façade where the brick column provides a break between the two areas. (see graphic to the right). It will provide a nice contrast for the new wall sign. The east façade does not provide as smooth of a transition, however the view to this façade is mitigated by vegetation and the proximity of adjacent building the east. See below.

The shake shingles on the existing roof are in poor condition and the applicant has agreed to replace them. Staff recommends placing this as a condition of approval.

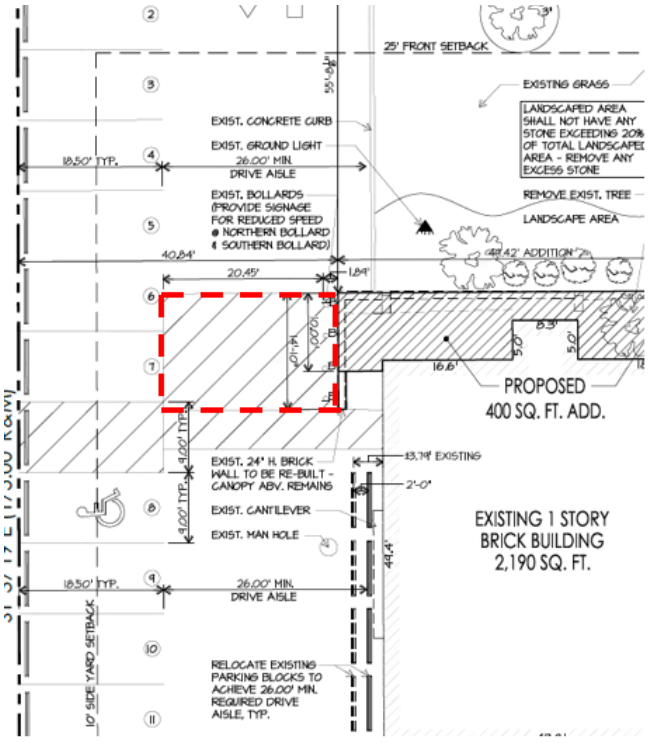
As part of the architectural review the following guidelines have been satisfactorily reviewed:

a. Building materials -conformance with Section V.C.4.B;
b. Cohesive building design;
c. Compatible Architecture;
d. Color;
e. Sustainable architecture;
f. Defined entry;
g. Roof;
h. Building articulation;
i. Screen mechanicals; and
j. Trash Enclosures.

Open Item #2: Discuss the new brick color for the addition and roof replacement as a condition of approval.

ZONING REQUEST

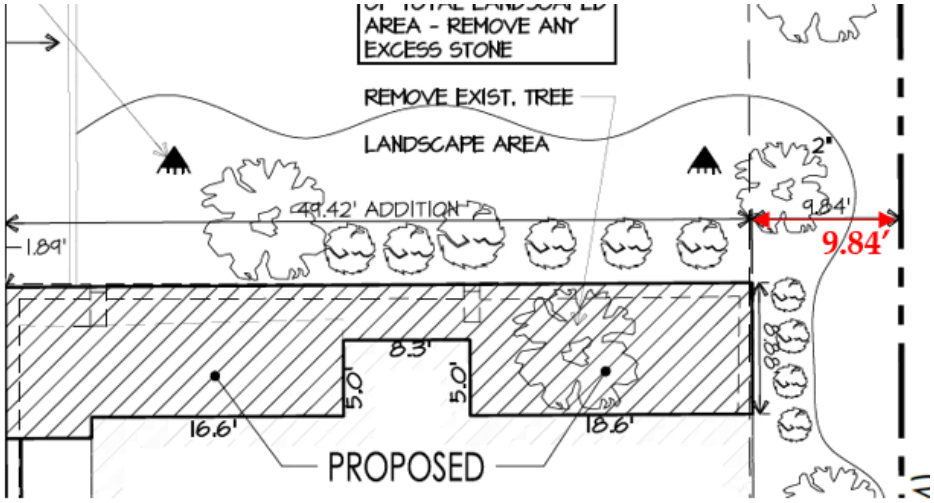
VARIATION #1 There are two Variation requests with this proposal. The first is for a Variation of the required aisle width of 24 feet. A portion of the drive aisle (enclosed in the red dashed line) is reduced to 20.45 feet for a distance of 14 feet as a result of the current roof canopy. As this area will now be enclosed, a Variation is required to bring the property into legal non-conforming status. There is an existing foundation that will be used as part of the new project, therefore the Petitioner is requesting to reuse the foundation to help with the cost effectiveness of the project. There will be new 4' tall bollards erected along this west side of the addition (bollards currently existing but are shorter) that will be painted yellow to caution drivers of the reduced aisle width. The pavement will also be striped and new signage erected in this area as additional notes of caution. The aisle width meets ordinance requirements (26') on both the north and souths sides of this area.



Open Item #3: Discuss the merits of a drive aisle width variation.

VARIATION #2

The existing building is non-conforming with respect to its east side yard. The ordinance requires a 10 foot side yard setback and the existing side yard is only 9.84 feet. Despite this fairly minor difference, Village ordinance does not allow for an expansion of nonconforming setbacks. Therefore, the second variation request is for a .16 feet (less than 2 inches) Variation of the required sideyard setback for the east side of the building to allow for the building addition. Approval of this variation of approximately two inches will bring the existing structure and addition into legal non-conformance.



Open Item #4: Discuss the merits of a sideyard setback variation of less than 2 inches.

SUMMARY OF OPEN ITEMS

The following open items are recommended for discussion:

Open Item	Recommended Action
#1	***Discuss conditioning site plan approval on final landscape approval.***
#2	***Discuss the new brick color for the addition and roof replacement as a condition of approval.***
#3	***Discuss the merits of a drive aisle width variation.***
# 4	***Discuss the merits of a sideyard setback variation of less than 2 inches.***

STANDARDS FOR SITE PLAN APPROVAL

Section III.T.2. of the Zoning Ordinance requires that Planning Staff must find that the conditions listed below must be met. Staff will prepare draft responses for these conditions within the next Staff Report.

a. That the proposed Use is a Permitted Use in the district in which the property is located.
   The use was approved as a Special Use in 2015.
b. That the proposed arrangement of buildings, off-street parking, access, lighting, landscaping, and drainage is compatible with adjacent land uses.
   The proposed addition meets setback requirements and does not impact parking. There is a small area of diminished drive aisle width that currently exists; a Variation is requested to bring the existing condition into legal non-conformance status.
c. That the vehicular ingress and egress to and from the site and circulation within the site provides for safe, efficient, and convenient movement of traffic, not only within the site but on adjacent roadways as well.
   There is a small area of diminished drive aisle width that currently exists; a Variation is requested to bring the existing condition into legal non-conformance status.
d. That the Site Plan provides for the safe movement of pedestrians within the site.
   A striped crosswalk provides save access across the parking lot.

e. That there is a sufficient mixture of grass, trees, and shrubs within the interior and perimeter (including public right-of-way) of the site so that the proposed development will be in harmony with adjacent land uses and will provide a pleasing appearance to the public; any part of the Site Plan area not used for buildings, structures, parking, or access-ways shall be landscaped with a mixture of grass, trees, and shrubs.

After construction the existing landscape will be assessed to determine if additional landscaping will be required.

f. That all outdoor trash storage areas are adequately screened.

Existing Dumpster is enclosed by a vinyl fence.

ARCHITECTURAL STANDARDS

Section III.U.6. provides the following architectural design standards to assist in the review of the proposed development:

a. Building Materials: The size of the structure will dictate the required building materials (Section V.C. Supplementary District Regulations).

The proposed development meets the masonry requirements of the Zoning Ordinance (Section V.4.B.).

b. Cohesive Building Design: Buildings must be built with approved materials and provide architectural interest on all sides of the structure. Whatever an architectural style is chosen, a consistent style of architectural composition and building materials are to be applied on all building facades.

The proposed addition is a small portion of the building and the front façade provides architectural interest. The new brick color complements the existing brick color.

c. Compatible Architecture: Avoid architecture or building materials that significantly diverge from adjacent architecture. Maintain the rhythm of the block in terms of scale, massing and setback. Site lighting, landscaping and architecture shall reflect a consistent design statement throughout the development.

The proposed addition is consistent with the existing architecture

d. Color: Color choices shall consider the context of the surrounding area and shall not be used for purposes of "attention getting" or branding of the proposed use. Color choices shall be harmonious with the surrounding buildings; excessively bright or brilliant colors are to be avoided except to be used on a minor scale for accents.

The new brick color complements the existing brick color.

e. Sustainable architectural design: The overall design must meet the needs of the current use without compromising the ability of future uses.

The design is typical of commercial uses and will meet the needs of future users.

f. Defined Entry: Entrance shall be readily identifiable from public right-of-way or parking fields. The entry can be clearly defined by using unique architecture, a canopy, overhang or some other type of weather protection, some form of roof element or enhanced landscaping.

A new entry has been designed the is readily identifiable.

g. Roof: For buildings 10,000 sf or less a pitched roof is required or a parapet that extends the full exterior of the building.

The existing roof line will remain. The new roof line of the eastern end of the front façade is consistent with the remainder of the roof.

h. Building Articulation: Large expanses of walls void of color, material or texture variation are to be avoided.

The addition of a new brick color offers visual interest and helps to break up the expanse of the east wall.

i. Screen Mechanicals: All mechanical devices shall be screened from all public views.

No new mechanical units are proposed.

STANDARDS FOR A VARIATION

Section X.G.4. of the Zoning Ordinance states the Plan Commission shall not recommend a Variation of the regulations of the Zoning Ordinance unless it shall have made Findings of Fact, based upon the evidence presented for each of the Standards for Variations listed below. The Plan Commission must provide findings for the first three standards; the remaining standards are provided to help the Plan Commission further analyze the request. Drafts responses are provided below for your consideration.

1. The property in question cannot yield a reasonable return if permitted to be used only under the conditions allowed by the regulations in the district in which it is located.
   The Variation requests are to bring existing conditions into legal non-conformance. The addition requires a variation of less than 2". The impact of the narrow drive aisle is mitigated with the striping on the asphalt and signage which alerts the driver to the narrow (20.5') drive aisle.
2. The plight of the owner is due to unique circumstances.
   The plight of the owner is unique in that these are existing conditions. The addition will maintain the same non-conforming setback, which provides a consistent and more aesthetically pleasing east façade.
3. The Variation, if granted, will not alter the essential character of the locality.
   The drive aisle variation will not alter the essential character of the locality since it is an existing condition. The side yard setback is less than 2 inches and therefore will not alter the essential character of the locality.
4. Additionally, the Plan Commission shall also, in making its determination whether there are practical difficulties or particular hardships, take into consideration the extent to which the following facts favorable to the Petitioner have been established by the evidence:

    a. The particular physical surroundings, shape, or topographical condition of the specific property involved would result in a particular hardship upon the owner, as distinguished from a mere inconvenience, if the strict letter of the regulations were carried out;
    b. The conditions upon which the petition for a Variation is based would not be applicable, generally, to other property within the same zoning classification;
    c. The purpose of the Variation is not based exclusively upon a desire to make more money out of the property;
    d. The alleged difficulty or hardship has not been created by the owner of the property, or by a previous owner;
    e. The granting of the Variation will not be detrimental to the public welfare or injurious to other property or improvements in the neighborhood in which the property is located; and
    f. The proposed Variation will not impair an adequate supply of light and air to an adjacent property, or substantially increase the congestion in the public streets, or increase the danger of fire, or endanger the public safety, or substantially diminish or impair property values within the neighborhood.

MOTION TO CONSIDER

If the Plan Commission wishes to act on the Petitioner's request, the appropriate wording of the motion is listed below. The protocol for the writing of a motion is to write it in the affirmative so that a positive or negative recommendation correlates to the Petitioner's proposal. By making a motion, it does not indicate a specific recommendation in support or against the plan.

Motion 1 (Site Plan):
"...make a motion to grant the Petitioner, Brittany Maddox (Genelin), on behalf of National Veterinary Associates, Site Plan and Architectural Approval in accordance with the plans submitted and listed in the Staff Report conditioned upon final landscape approval and replacement of the roof shakes.

[any conditions that the Commission would like to add]

Motion 2 (Variation #1):
"…make a motion to grant the Petitioner, Brittany Maddox (Genelin), on behalf of National Veterinary Associates, a 5.55 foot Variation from the required 26 foot drive aisle width to allow a drive aisle width of 20.5 feet for a small portion of the driveway in accordance with the plans submitted and listed herein and adopt Findings of Fact as proposed by Village Staff in the Staff Report.

[any conditions that the Commission would like to add]

Motion 3 (Variation #2)
"…make a motion to recommend that the Village Board grant a the Petitioner, Brittany Maddox (Genelin), on behalf of National Veterinary Associates, a .19 foot (less than 2 inches) Variation of the required 10 foot side yard setback to allow for a side yard setback of 9.81 foot on the east side of the property in accordance with the plans submitted and listed herein and adopt Findings of Fact as proposed by Village Staff in the Staff Report..
[any conditions that the Commission would like to add]

VILLAGE OF TINLEY PARK, ILLINOIS

PLANNING AND ZONING GENERAL APPLICATION

Authorized Representative Consent

It is required that the property owner or his designated representative be present at all requests made to the Plan Commission and Zoning Board of Appeals. During the course of a meeting, questions may arise regarding the overall project, the property, property improvements, special conditions attached to recommendations among other aspects of any formal request. The representative present must have knowledge of the property and all aspects of the project. They must have the authority to make commitments related to the project and property. Failure to have the property owner or designated representative present at the public meeting can lead to substantial delays to the project approval. If the owner cannot be present or does not wish to speak at the public meeting, the following statement must be signed by the owner for an authorized repetitive.

I hereby authorize RWE Design & Build *(print clearly) to act on my behalf and advise that they have full authority to act as my/our representative in regards to the subject property and project, including modifying any project or request. I agree to be bound by all terms and agreements made by the designated representative.*

Property Owner Signature: [redacted]

Property Owner Name (Print): Brittany Maddox (Genelin)

Acknowledgements

- Applicant acknowledges, understands and agrees that under Illinois law, the Village President (Mayor), Village Trustees, Village Manager, Corporation Counsel and/or any employee or agent of the Village or any Planning and Zoning Commission member or Chair, does not have the authority to bind or obligate the Village in any way and therefore cannot bind or obligate the Village. Further, Applicant acknowledges, understands and agrees that only formal action (including, but not limited to, motions, resolutions, and ordinances) by the Board of Trustees, properly voting in an open meeting, can obligate the Village or confer any rights or entitlement on the applicant, legal, equitable, or otherwise.
- Members of the Plan Commission, Zoning Board of Appeals, Village Board as well as Village Staff may conduct inspections of subject site(s) as part of the pre-hearing and fact finding review of requests. These individuals are given permission to inspect the property in regards to the request being made.
- Required public notice signs will be obtained and installed by the Petitioner on their property for a minimum of 10 days prior to the public hearing. These may be provided by the Village or may need to be produced by the petitioner.
- The request is accompanied by all addendums and required additional information and all applicable fees are paid before scheduling any public meetings or hearings.
- Applicant verifies that all outstanding fees and monies owed to the Village of Tinley Park have been paid.
- Any applicable recapture, impact, engineering, contracted review or other required fees and donations shall be paid prior to issuance of any building permits, occupancy permits, or business licenses.
- The Owner and Applicant by signing this application certify that the above information and all supporting addendums and documentation is true and correct to the best of their knowledge.

RE: Staff Review: Bremen Animal Hospital
7613 159th street

Dear Paula,

This letter is in response to the *preliminary review* for Site & Architectural Plan Approval submitted on April 12th, 2021 for the above-mentioned project. The following responses correspond to the requested staff review & code items.

PLANNING

The Community Development Department reviewed the plans and offers the following comments:

1. There are dimension differences between the plans. Unless directed otherwise we will use the engineer's drawing (Base C1) as having the most accurate dimensions. Updated architectural site plan to show same dimensions.
2. On Base C.1- There is a note to remove and replace bollards. Please explain why; are you moving them closer to the building? The existing bollards are low in height and may not be visible to some drivers, new bollards will be 4'-0" high and painted traffic yellow for high visibility.
3. On Base C.1-The east setback is noted as 9.84'- for the addition. This will be noted as a variation, but we will not be charging an additional fee (less than 2"). Okay.
4. What is the distance in a north-south direction of the aisle that is reduced to 20.45'? I want to make the point that this is only a small portion of the drive aisle. Therefore I want to know the area that is 20.45' x ? The north-south dimension and area has been provided – see site plan.
5. I am confused about your landscape plan proposals. A landscape plan was originally submitted with the March 23, 2021 submittal. Now you are submitting a plan that was submitted in 2015. Please note that when that plan was reviewed the applicant was instructed to remove the stone area. Here is an excerpt from the staff report:

   ## LANDSCAPE ARCHITECTURE

   There are several existing trees and shrubs on the property; credit toward landscape requirements has been provided for these. Due to property constraints a bufferyard along the west and south property line is not possible. The bufferyards proposed for the north and east property lines meet Ordinance requirements. Currently there is a significant amount of stone in the foundation landscape; this will be removed to meet the ordinance limits of 20%. Due to inadequate parkway width, street trees will not be required on the property.

   Per the **LANDSCAPE ORDINANCE (**Section 158.14):
   Decorative stone, brick, or pavement may be used for edging planting beds but may not cover more than twenty (20) percent of the landscaped area.

   Please revise the landscape plan to reflect the removal of the stone. Added note to site plan for the existing stone to be removed and not to exceed 20% of total landscaped area.

6. A current inventory of existing plants is required. Refer to 2015 landscape plan for plant inventory. Final landscape installation will replace and/or add material to match this submitted plan.

ARCHITECTURE – LAND PLANNING – INTERIOR DESIGN – LANDSCAPE ARCHITECTURE
10100 ORLAND PARKWAY, SUITE 110, ORLAND PARK, IL 60467 – P: 708.799.4400 - www.lindengroupinc.com

LINDENGROUP

7. During construction there will most likely be a loss of plant material. A final landscape plan must be submitted that reflects what vegetation will be saved and what will be planted after construction so that we can assess whether they meet ordinance requirements. Refer to 2015 landscape plan for final landscape plan. Landscape installation will replace and/or add material based on loss of plant material during construction to match the submitted plan.
8. The plans note the wheel guards will be moved. What is the distance between the wheel guards and the west façade of the building? See site plan for added dimension.
9. The Base C.1 Plan indicates a striped path from the accessible parking space to the front door. This is not shown on the site plan. Please add this to the site plan. Staff recommends striping the area of diminished aisle width thereby bringing notice to this area that is less than ordinance required and help to reduce speed. This will also provide notice the patrons exiting the building. Architectural site plan modified to show stripped path.
10. It appears that the addition is not matching the current brick color, but a brick veneer will be used to accent the dark tone of existing brick. A sample of this must be submitted to the Village Hall by April 19th. Per Section V.C.7.I. of the Zoning Ordinance "*Additions must conform to the building materials used for the existing structure. If there is difficulty in matching the existing material, then the architectural design of the addition must provide an attractive transition to a new material that is consistent with current building material requirements."* Constructing a brick column like the one that extends to the top of the metal coping at the east end of the porch may help with this transition. Do you have any of the existing brick resulting from some of the demo to construct a second column at the very east end of the front façade (see graphic below). The east façade also has an awkward transition, but a column would not provide any transition here. Staff recommends investigating the use of plant material to soften the hard transition of one brick color to the next (see below). Design proposes a distinctive change in material between existing structure and addition. The proposed new brick will be a dark brick complimentary to the existing brick blend by matching the darkest existing brick color from blend. Change in brick will happen at control joint in wall. Revised colored elevation provided with resubmittal.

11. There is no signage submitted with this application. Please note that if you are looking to go beyond code requirements, we recommend you include it in this application. Otherwise, you will need to apply for a variation and go through the public hearing process again. For commercial buildings in the B-3 district the requirements are:

Area: One (1) SF per one (1) LF of building/tenant frontage not to exceed 120 SF per sign	30" Letter Ht. (2.5')	78" Sign Ht. (6.5')

Area is determined by drawing a line completely around the entire sign (logo included). All signage will comply.
12. Plan A.4 was not included in your latest submittal. Is this an oversight or are you preparing different color renderings? Will provide – See sheet A.4
13. Lighting – Please include any new wall or parking lot lighting in your submittal - along with photometrics. No new lighting is proposed. Site lighting is existing with no changes.

ARCHITECTURE – LAND PLANNING – INTERIOR DESIGN – LANDSCAPE ARCHITECTURE

ENGINEERING & PUBLIC WORKS DEPARTMENT

The Village Engineer and the Public Works Department have not yet provided comments. As soon as they do, I will forward them to you.

FIRE DEPARTMENT

The Fire Department reviewed the plans and offer the following comments.

1. An approved fire alarm and detection system monitored by the Village of Tinley Park will have to be installed throughout the building. Okay – will provide in construction documents submission.
2. Note: Any physical alteration requires the fire protection system to be evaluated by a qualified professional. Proposed alterations to the fire protection system must be submitted to the Fire Prevention Bureau for approval. A minimum of three sets of fire protection plans with a completed permit application is required. A licensed design professional (licensed engineer or a valid NICET level 3 or 4 certification in fire protection technology) must submit all documents. Okay - Provided by others.
3. Note: All fire alarm signals must be required to transmit to the Tinley Park Communication Center. (2016 Village of Tinley Park Amended Codes, Section 707.6). Okay
4. Note: The Village of Tinley Park has implemented a radio transmission-based fire alarm system for all required fire alarms. If not already done, the alarm holder should contact Fire Prevention for the necessary documentation for the wireless radio alarm contract. Fire Prevention can be reached at 708-444-5200. Okay

The revisions were made to the previously submitted drawings and were bubbled and dated revised for permit.

If you have questions or comments regarding this response, please feel free to contact me – (708) 799-4400.

Sincerely,
LINDEN**GROUP** Inc.

GENERAL NOTES

PLANT MATERIAL SHALL BE NURSERY GROWN AND BE EITHER BALLED AND BURLAPPED OR CONTAINER GROWN. SIZES AND SPREADS IN PLANT LIST REPRESENT MINIMUM REQUIREMENTS.

SIZE AND GRADING STANDARDS OF PLANT MATERIAL SHALL CONFORM TO THE LATEST ADDITION OF ANSI Z60.1 AMERICAN STANDARD IF NURSERY STOCK, BY THE AMERICAN NURSERY AND LANDSCAPE ASSOCIATION.

ANY MATERIAL WITH DAMAGED OF CROOKED/ DISFIGURED LEADERS, BARK ABRASION, SUNSCALD, INSECT DAMAGE, ETC. ARE NOT ACCEPTABLE AND WILL BE REJECTED. TREES WITH MULTIPLE LEADERS WILL BE REJECTED UNLESS CALLED FOR IN THE PLANT LIST AS MULTI-STEM OR CLUMP.

GRADING SHALL PROVIDE SLOPE WHICH ARE SMOOTH AND CONTINUOUS. POSITIVE DRAINAGE SHALL BE PROVIDED IN ALL AREAS.

QUANTITY LISTS ARE SUPPLIED AS A CONVENIENCE. HOWEVER, THE CONTRACTOR SHOULD VERIFY ALL QUANTITIES. THE DRAWINGS SHALL TAKE PRECEDENCE OVER THE LISTS.

ALL PLANT SPECIES SPECIFIED ARE SUBJECT TO AVAILABILITY MATERIAL SHORTAGES IN THE LANDSCAPE INDUSTRY MAY REQUIRE SUBSTITUTIONS. ALL SUBSTITUTIONS MUST BE APPROVED BY THE LANDSCAPE ARCHITECT AND/OR OWNER.

CONTRACTOR SHALL VERIFY LOCATION OF ALL UNDERGROUND UTILITIES PRIOR TO DIGGING. CALL "J.U.L.I.E." (JOINT UTILITY LOCATION FOR EXCAVATORS) 1-800-892-0123.

CONTRACTOR SHALL REPORT ANY DISCREPANCIES IN THE FIELD TO THE LANDSCAPE ARCHITECT AND/OR OWNER.

PLANT SYMBOLS ILLUSTRATED ON THIS PLAN ARE A GRAPHIC REPRESENTATION OF PROPOSED PLANT MATERIAL TYPES AND ARE INTENDED TO PROVIDE FOR VISUAL CLARITY. HOWEVER, THE SYMBOLS DO NOT NECESSARILY REPRESENT ACTUAL PLANT SPREAD AT THE TIME OF INSTALLATION.

ALL PERENNIAL, ORNAMENTAL GRASS, GROUNDCOVER AND ANNUAL BEDS SHALL BE TOPDRESSED WITH A MINIMUM OF THREE INCHES (3") OF MUSHROOM COMPOST. THE TOPDRESSING SHALL BE WORKED INTO THE SOIL TO A MINIMUM DEPTH OF NINE INCHES (9") BY THE USE OF A CULTIVATING MECHANISM. UPON COMPLETION, PERENNIALS AND ORNAMENTAL GRASSES SHALL BE MULCHED WITH AN ADDITIONAL TWO INCH (2") LAYER OF SHREDDED WOOD MULCH; ANNUALS AND GROUNDCOVER SHALL BE COVERED WITH AN ADDITIONAL TWO INCH (2") LAYER OF MUSHROOM COMPOST.

ALL OTHER PLANTING BEDS AND TREE SAUCERS SHALL BE MULCHED WITH A MINIMUM OF THREE INCHES (3") OF SHREDDED WOOD MULCH.

ALL BED LINES AND TREE SAUCERS SHALL REQUIRE A HAND SPADE EDGE BETWEEN LAWN AND MULCHED AREAS.

PLANTING BEDS ADJACENT TO BUILDING SHALL BE MULCHED IN THEIR ENTIRETY TO THE BUILDING FOUNDATION.

ALL SOD SHALL BE OF SALT TOLERANT SPECIES WITH A MINERAL BASE.

ALL PLANT MATERIAL SHALL BE GUARANTEED FOR ONE (1) YEAR FROM THE DATE OF ACCEPTANCE.

VARIATION ADDENDUM

APPLICATION & SUBMITTAL REQUIREMENTS

A complete application consists of the following items submitted in a comprehensive package. If materials are submitted separately or are incomplete they will not be accepted and may delay the review and hearing dates until a complete application package is received. The following information is being provided in order to assist applicants with the process of requesting a **Variation** from the terms of the Zoning Ordinance. This information is a summary of the application submittal requirements and may be modified based upon the particular nature and scope of the specific request.

Depending upon meeting schedules, legal notification requirements, and the specific type and scope of the request, this process generally takes between 45 to 60 days from the date of submission of a complete application package. Please schedule a pre-application meeting with Planning Department staff to review the feasibility of the proposal, discuss applicable Ordinance requirements, discuss submittal requirements and receive preliminary feedback on any concept ideas or plans prior to making a submittal.

☑ General Application form is complete and is signed by the property owner(s) and applicant (if applicable).

☑ Ownership documentation is submitted indicating proper ownership through a title report or title policy. If a corporation or partnership, documentation of the authorized agent must be supplied as well. All beneficiaries of a property must be disclosed.

☑ A written project narrative detailing the specific variation(s) from code requirements that are being requested, the reasoning for requiring the variation, the general nature and specific aspects of the proposal being requested. Any additional requests such as a Special Use or Site Plan approval should be indicated in the narrative as well.

☑ A Plat of Survey of the property that is prepared by a register land surveyor and has all up-to-date structures and property improvements indicated. All proposed improvements shall be indicated on the survey and be appropriately scaled with all setbacks and dimensions clearly indicated.

☑ Any applicable site plan, engineering/grading plans, exterior elevations or interior layout plans that indicate the full scope of the project and the Standards for a Variation.

☑ Responses to all Standards for a Variation on the following page (can be submitted separately along with the narrative, but all standards must be covered).

☐ Residential Variation Hearing Fee - $250 + $75 per additional Variation
Commercial Variation Hearing Fee - $500 + $75 per additional Variation

STANDARDS AND CRITERIA FOR A VARIATION

Section X.G.1 of the Village of Tinley Park Zoning Ordinance requires that the Zoning Board of Appeals determine compliance with the following standards and criteria. In order for a variance to be approved, the Petitioner must respond to all the following statements and questions related to the Standards with factual evidence and information to support the requested Variation. If additional space is required, you may provide the responses on a separate document or page.

A. Describe the difficulty that you have in conforming with the current regulations and restrictions relating to your property, and describe how this hardship is not caused by any persons presently having an interest in the property. (Please note that a mere inconvenience is insufficient to grant a Variation). For example, does the shape or size of the lot, slope, or the neighboring surroundings cause a severe problem in completing the project in conformance with the applicable Ordinance requirement?

Variation #1, Two-Way Parking Aisle; variation is an existing condition. conforming would require demolition of existing foundation and roof structure. Variation #2, Side Yard Set Back variation; proposed addition aligns with existing east wall of building at 9'-6" from property line.

B. Describe any difficulties or hardships that current zoning regulations and restrictions would have in decreasing your property value compared to neighboring properties.

Variation #1, Two-Way Parking Aisle; variation is an existing condition. conforming would require demolition of existing foundation and roof structure. Variation #2, Side Yard Set Back variation; proposed addition aligns with existing east wall of building at 9'-6" from property line.

C. Describe how the above difficulty or hardship was created.

Variation #1, Two-Way Parking Aisle; hardship was created by and existing condition. Variation #2, Side Yard Set Back variation; hardship was created by an existing non-conforming setback.

D. Describe the reasons this Variance request is unique to this property only and is not applicable, in general, to other properties within the same Zoning District.

Variation #1, Two-Way Parking Aisle; variation is an existing condition and is unique to this property. Variation #2, Side Yard Set Back variation; proposed addition aligns with existing east wall of building at 9'-6" from property line which is a unique existing condition.

E. Explain how this Variance would not be regarded as an attempt at financial gain, but only because of personal necessity. For example, the intent of the Variance is to accommodate related living for an elderly relative as opposed to adding an additional income source.

Variation #1, Two-Way Parking Aisle; variation is an existing condition and is not an attempt at financial gain. Variation #2, Side Yard Set Back variation; proposed addition aligns with existing east wall of building at 9'-6" from property line and is not an attempt at financial gain.

F. Describe how granting this Variance request will not be detrimental to the public welfare or injurious to other properties or improvements in the neighborhood in which the property is located.

Variation #1, Two-Way Parking Aisle; variation is an existing condition and will not be detrimental to public welfare. Variation #2, Side Yard Set Back variation; proposed addition aligns with existing east wall of building at 9'-6" from property line and will not be detrimental to public welfare

G. Explain how granting this Variance will not alter the essential charter of the neighborhood or locality.

Variation #1, Two-Way Parking Aisle; variation is an existing condition. Variation #2, Side Yard Set Back variation; proposed addition aligns with existing east wall of building at 9'-6" from property line.

H. Describe how the requested Variance will not:

1. Impair an adequate supply of light and air to adjacent properties.

There is no impact on lair and light to adjacent properties.

2. Substantially increase the congestion of the public streets.

There is no proposed additional parking for the development and 400s.f. addition will have minimal impact on facility traffic.

3. Increase the danger of fire.

There is no reason to assume increase danger of fire.

4. Impair natural drainage or create drainage problems on adjacent property.

There is no proposed changed to the overall drainage of the site.

5. Endanger the public safety.

There is no impact on public safety. Variations being requested are existing conditions

6. Substantially diminish or impair property values within the neighborhood.

There is no impact on adjacent properties.

Senior Planner

EXECUTIVE SUMMARY

The Petitioner, Christopher Ilekis, on behalf of 9561 W 171st Tinley Park LLC (Contract Purchaser), is seeking Site Plan and Architectural Approval to make site and façade changes on an existing building at 17111-17119 LaGrange Road (formally 9561 171st St) in the B3 PD (General Business and Commercial, Park Hills Towne Centre PUD) Zoning District.

The proposed Site Plan Amendment allows for the former MD Financial/Fifth-Third Bank building to be converted to a multi-tenant commercial building that includes a Starbucks Coffee drive-thru. The changes include removal of the rear canopy area, installation of a drive-thru lane, changes to the parking lot, an outdoor patio addition, and minor changes to the façade that allow for additional doorways and tenants. The Petitioner has supplied a professional traffic and parking analysis with a focus on the drive-thru lane stacking and design. The report concludes that drive-thru design and parking is acceptable for the expected demand. Any additional stacking beyond the lane will be rare, but happens within the site and not on any public roadways or main drive aisles.

The adaptive reuse of a vacant bank building is likely to create a more economically productive site than a bank, which has experienced decreased market demand for physical locations. Beyond Starbucks, the remaining tenant space will be used by one or two additional tenants depending on their space needs. The proposed site changes upgrade the property by allowing for successful and safe site circulation and drive-thru operations. The landscaping, pedestrian connectivity, and the exterior appearance of the site are also improved with the redevelopment.

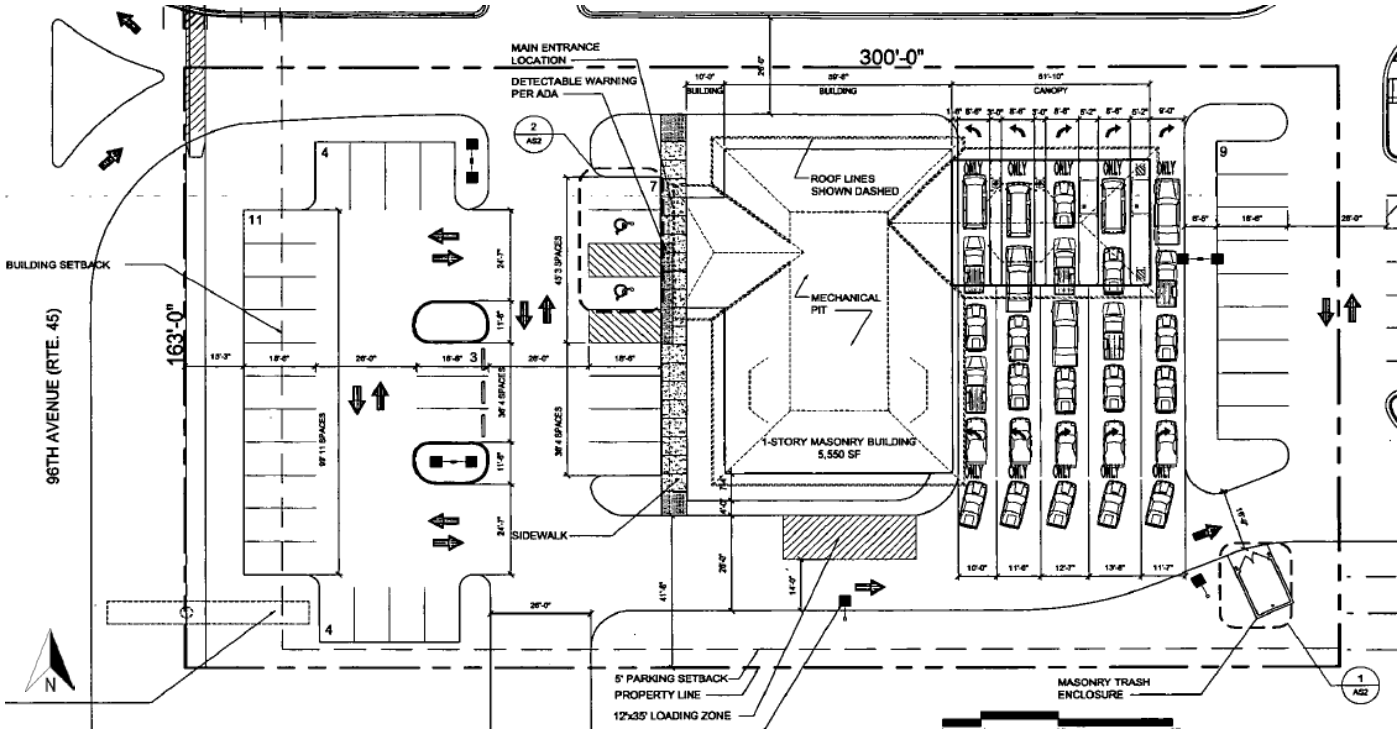
EXISTING SITE & HISTORY

The subject property is located in an outlot of the Park Hills Towne Centre, which is anchored by Lou Malnati's, Frankie's Ristorante, CVS Pharmacy, and previously Tribes Alehouse. The majority of the shopping center and outlots were approved and constructed in 2006 and 2007. The subject property was originally designed for American Chartered Bank, which occupied the building from 2006 until 2016. It was converted to MB Financial in 2016 following a bank acquisition and then briefly Fifth Third Bank in 2019 after another acquisition. Fifth Third Bank closed the branch to the public in July 2019 and has used it as bank office space through the pandemic. Based on the original meeting minutes, it was noted that the building was designed in a way it can be easily repurposed for commercial uses beyond a bank in the future by removing the canopy area.

In 2015 the site was required to shrink its front parking field along LaGrange Road and alter landscaping based on IDOT plans for the road expansion and reconstruction. The result was a reduction in 4 parking stalls and a designated loading area on the site (six angled stalls along the south drive aisle were added) and a reduction in the front bufferyard landscaping area.

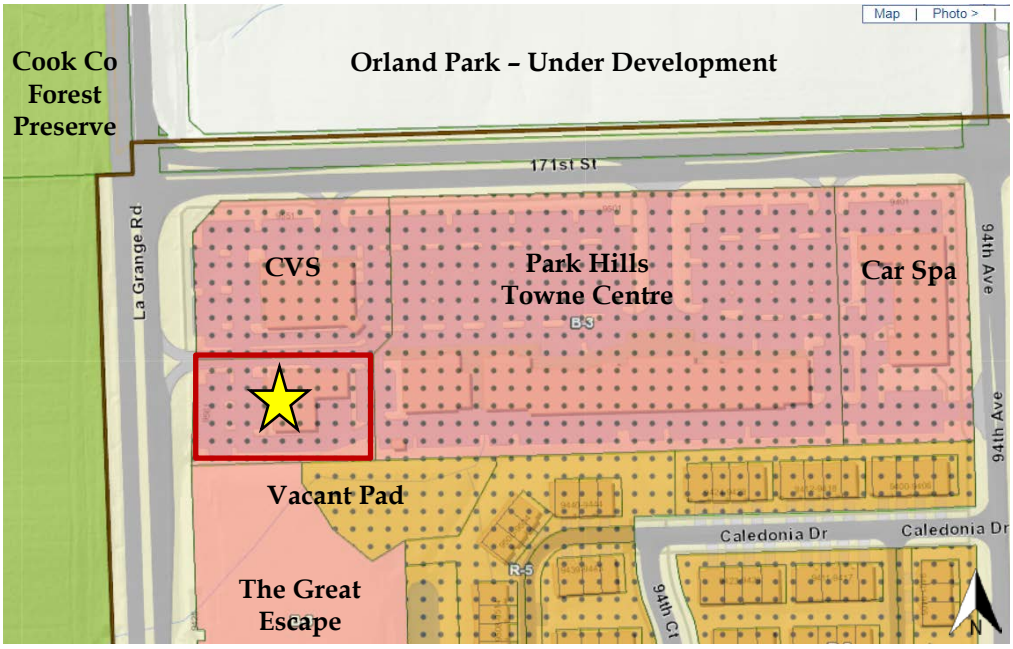
Above: Existing Site Bird's Eye View (Bing Maps).

Above: Pictures of existing building west/front façade (left) and east/rear (right) façade.



Above: Originally Approved Site Plan for American Chartered Bank (2006).

ZONING & NEARBY LAND USES



The subject property (see the yellow star on the graphic to the right) is zoned B-3 PD (General Business and Commercial, Park Hills Towne Centre Planned Unit Development). The Park Hills Towne Centre located to the north and east of the subject site was designed with a cohesive master plan and building design standards. The center includes such businesses such as: Frankie's Ristorante, Lou Malnati's, CVS, The Car Spa, Subway, Trouvaille Med Spa, among many others. To the south of the subject site is The Great Escape along with a vacant pad, also zoned B-3. To the west is the Orland Grassland, which is unincorporated land owned and operated by the Cook County Forest Preserve District.

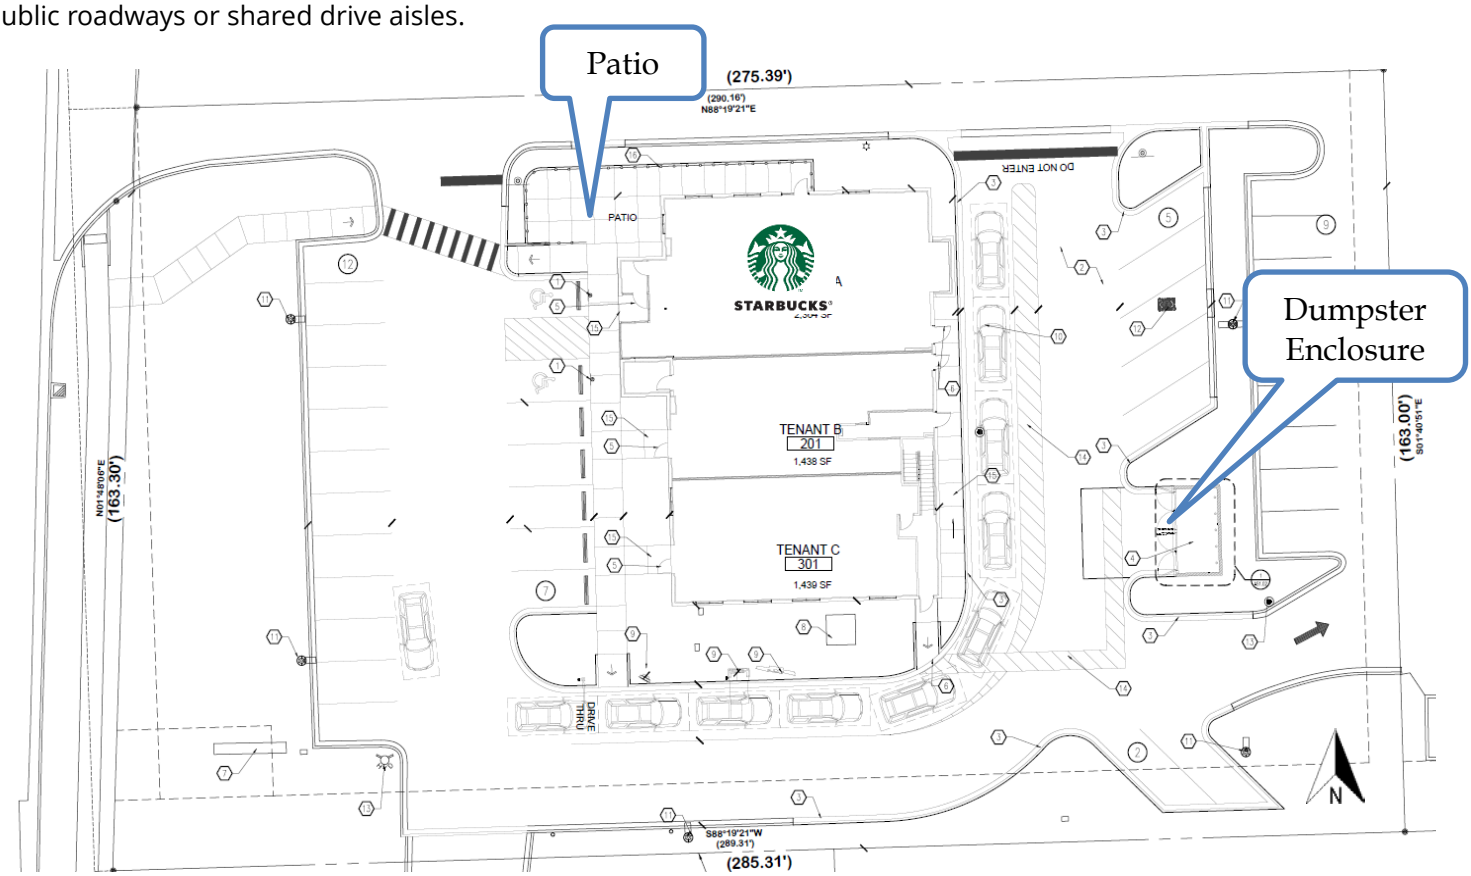
PROPOSED USE

The proposed building will include a Starbucks Coffee with a drive-thru lane and window. The building is 5,593 sq. ft. in total size, with 5,241 sq. ft. leasable space (excluding mechanical and sprinkler rooms). The Starbucks will use approximately 2,364 sq. ft. of the leasable floor space (Tenant Space "A"). They have a high reliance on drive-thru business, particularly during the pandemic. However, they will also offer dine-in and patio seating, which they expect to return to pre-pandemic levels. The remaining 2,877 sq. ft. of commercial floor space has been designed to accommodate up to two additional tenants depending on the space needs by the future tenant(s). There is not a contract on the other tenant space but it will be marketed upon site approval.

SITE PLAN & CIRCULATION

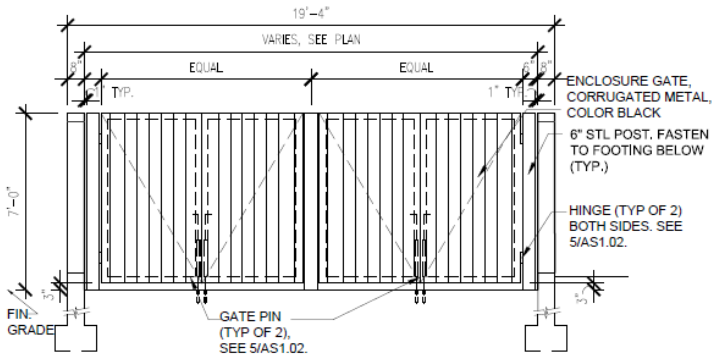
The proposed site plan includes several site plan changes. The most significant is the removal of the drive-up bank canopy and the installation of a drive-thru lane. Overall site circulation will remain similar to the bank with one-way counter-clockwise circulation around the south and east side of the building where the drive-thru lane is being added. The west side main aisle will remain two-way, along with the north drive aisle that connects to the larger Park Hills Towne Centre development. Parking stalls have been removed from the south side of the site to allow for space for the drive-thru lane. However, parking has been added to the east side of the building where the bank canopy existed and an additional two stalls have also been added where the dumpster enclosure existed.

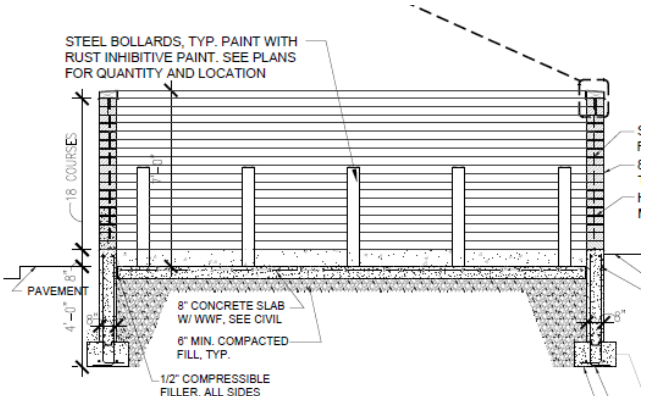
Drive-thru ordering will happen at the south end of the site with vehicles then pulling around the rear of the building where a window will be installed for order pick-up on the east façade at the northeast corner of the building. A total of 9-10 vehicles will be able to stack within the lane. A Parking and Traffic Analysis from their traffic consultant, KLOA, has been submitted outlining the expected demand and concluding adequate parking and drive-thru stacking is present in the proposed plan. Any drive-thru stacking beyond the drive-thru lane will happen on-site and not in any public roadways or shared drive aisles.



The property did not have a public sidewalk along LaGrange Road when it was originally developed However, now with a public sidewalk is constructed along LaGrange Avenue, a pedestrian connection to the site is being proposed. The walkway allows for better pedestrian connectivity and accessibility to the site.

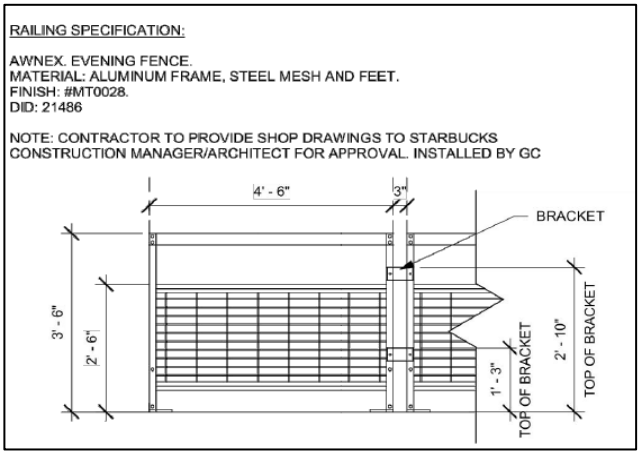
A new trash enclosure has been proposed and sized proportionately for Starbucks and up to two other commercial tenants. The enclosure will be constructed with exterior brick that matches the existing building façade. The old dumpster smaller enclosure will be removed and replaced with parking stalls.





An outdoor patio is being installed near the Starbucks entrance to allow for outdoor seating for their customers. The patio will be surrounded by a 3-4 ft. tall open-design aluminum fence. The patio has been set back from the drive aisle and parking areas to ensure vehicles won't conflict with the new patio or fencing. There are some shrubs and landscaping surrounding the patio to soften its appearance and make it a more pleasant place to sit.

Open Item #1: Review overall proposed Site Plan changes, layout, site circulation, and drive-thru stacking.



LANDSCAPE

The proposed Landscape Plan has been reviewed by the Village's Landscape Architect and finds it to be in general conformance with the Village's Landscape Ordinance with a few exceptions due to the site's constraints. The proposal requests a waiver from a few of the bufferyard requirements, parkway tree requirements, and interior landscaping requirements. The Petitioner has indicated that they have worked to meet the landscape requirements to the greatest extent possible and focused their available bufferyard width and landscaping to adequately buffer views from the residential properties to the west. Deficiencies are outlined in the table below.

Table A

Please review the landscape requirements within the following tables on the next page. Deficiencies must be addressed in a revised Landscape Plan. Please note the following abbreviations: CT = Canopy Tree, US = Understory Tree, SH = Shrub, T = Tree.

BUFFERYARD REQUIREMENTS							
Bufferyard Location	**Required Width**	**Proposed Width**	**Length**	**Required Plantings**	**Proposed Plantings**	**Deficit**	**Comments**

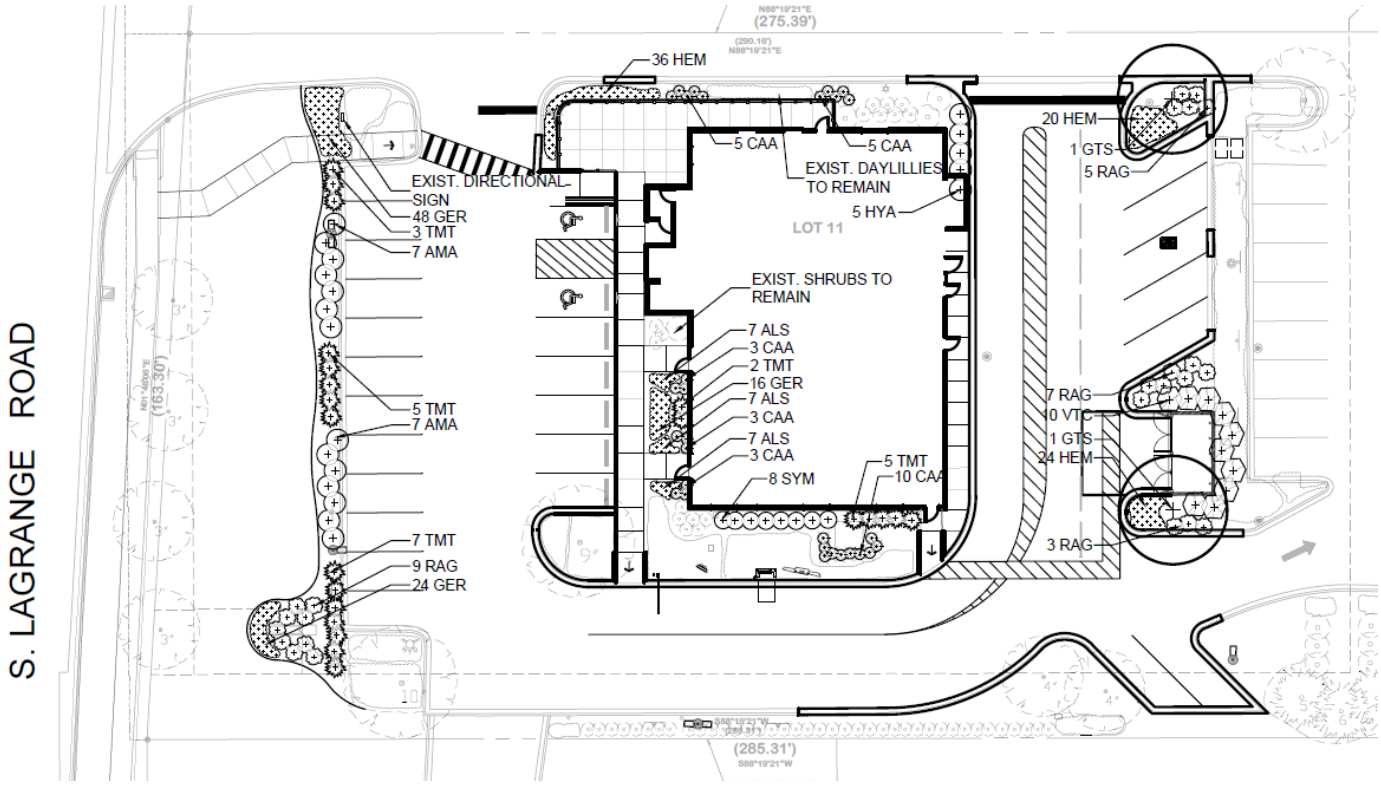
North ("B" Bufferyard)	5'	5'	179'	8 CT 3 US 36 SH	0 CT 0 US 36 SH	**-8 CT** **-3 US** -	Overlap of east and west proposed bufferyards excluded.
East ("C" Bufferyard)	10'	10'	206'	11 CT 5 US 42 SH	3 CT 0 US 39 SH	**-8 CT** **-5 US** **-3 SH**	
South ("B" Bufferyard)	5'	5'	179"	8 CT 3 US 36 SH	0 CT 0 US 36 SH	**-8 CT** **-3 US** -	Overlap of east and west proposed bufferyards excluded.
West ("D" Bufferyard)	30'	10'	206'	7 CT 4 US 29 SH	7 CT 0 US 67 SH	- **-4 US** **+38 SH**	Required plantings reduced by 50% due to proposed fencing. Bufferyard calculations utilize 30' wide requirements. Evergeen trees shall be considered instead of traditional Canopy trees to buffer noise/visual effects.

INTERIOR LOT LANDSCAPING REQUIREMENTS				
Location	**Requirement**	**Proposed**	**Deficit**	**Comments**
Foundation	Landscape coverage along 70% of building foundation that faces public right-of-way; 10' wide landscaped area	0% (lineal feet)	**100% (67 lineal feet)**	Total lineal feet of foundation fronting Harlem Ave. = 95'
Interior	4 canopy trees	2	**-2 CT**	40,873 s.f. of lot area (Audit includes 1 existing tree to remain)

PARKWAY STANDARDS					
Location	**Requirement**	**Required Trees**	**Proposed Trees**	**Deficit**	**Comments**
Parkway	1 Tree per 25 Lineal Feet	7	6	**-1**	Final plans to ensure low mature height trees to not conflict with existing power lines.

PARKING LOT LANDSCAPING STANDARDS				
Location	**Requirement**	**Provided**	**Deficit**	**Comments**
Parking Lot	15% of parking lot area to be landscaped or 3,291 square feet	1,680 square feet	**-1,611 square feet**	21,945 s.f. of parking lot shown on landscape plan
Parking Lot	Screening of adjacent properties and streets.	Continuous screening not provided.	-	Bufferyard plantings counted towards continuous screening requirements.

Parking Lot Islands	1 CT and 1 SH per 200 square feet (2 CT and 2 SH required)	1 CT 7 SH	**-1 CT** **+5 SH**	NE island = 169 s.f.



ARCHITECTURE

The building's architecture will largely remain the same and meets the intent of the architectural guidelines in the PUD documents. The majority of the structure's exterior utilizes face brick, but there is limestone uses along the base, window headers, and as a design element along the top of the structure. Changes include a new storefront system with doors to allow for one or two tenants to occupy the site. A metal canopy has been added over the Starbucks entrance.

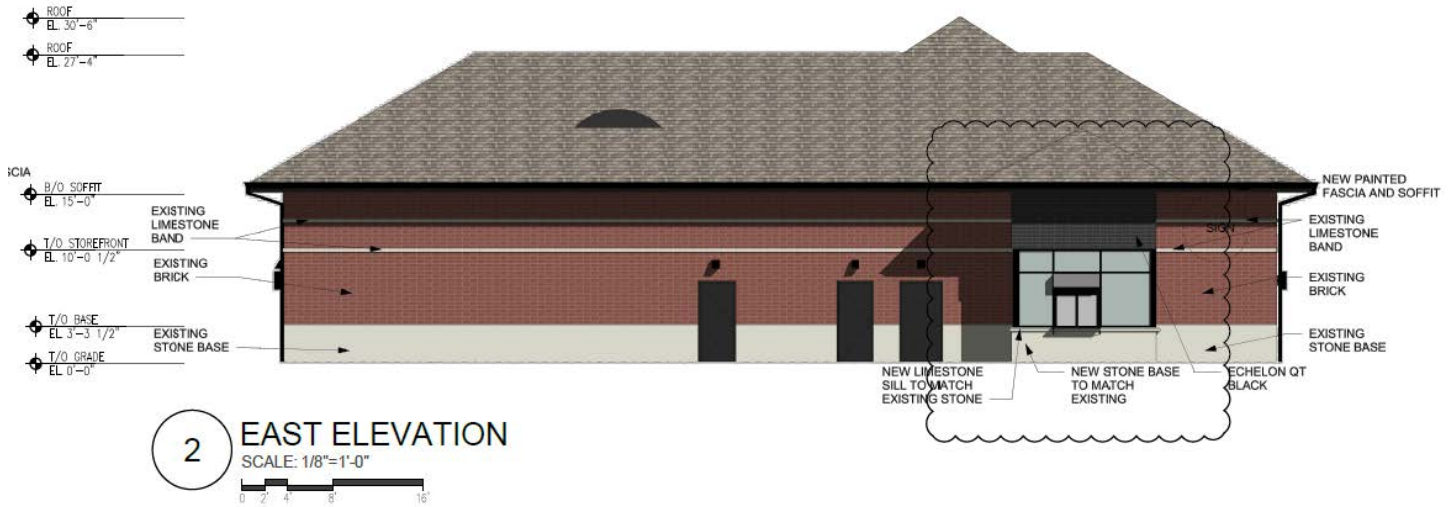
EIFS is proposed to be installed around the top band of the building on the west/front and south/side of the building to help divide the spaces and allow for signage. Staff is recommending that the EIFS band not be installed along the east side of the building as it makes for an awkward transition along the façade when the band stops and removes details that make the building more attractive (shown with a red circle on the south elevation below). A wall sign can still be permitted at that location but may require a different style to run electric through the brick area. For example, a wall sign with a backing plate or a raceway may be required here. By keeping the façade as it is, the quality building appearance is maintained, while also saving money on the renovations.

Staff also has concerns with the EIFS addition on the front/west façade as it creates a portion of the façade that looks less appealing than the rest of the building. Staff has recommended that the Petitioner look at alternative options to reduce the EIFS area that includes more brick or the ability to mount signage on the brick on a raceway or backer plate.

Open Item #2: Review façade changes and discuss staff's recommendation that the south façade does not include an EIFS band at the top of the building and there be changes to make the west EIFS band area more appealing.

1 WEST ELEVATION
SCALE: 1/8"=1'-0"

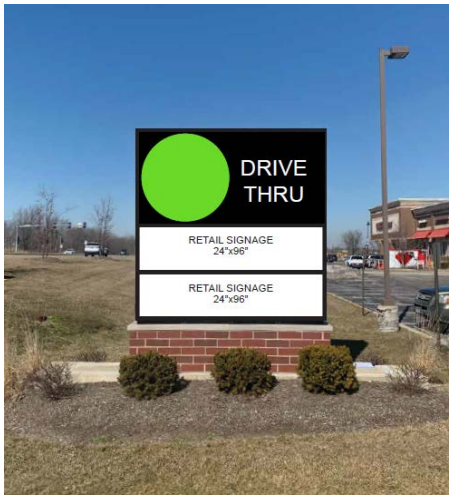
3 SOUTH ELEVATION
SCALE: 1/8"=1'-0"



2 EAST ELEVATION
SCALE: 1/8"=1'-0"

SIGNAGE

The existing foundation and sign base will be utilized with a new ground sign box proposed that will have space for the building's two or three tenants. The proposed ground sign complies with the size, height, and design requirements of the zoning code and PUD sign regulations.



No wall, directional, or drive-thru signage has been proposed at this time. Typically, staff likes to see these signs for any known tenants with new development proposals to avoid any future delays or additional meetings. Specifically, staff notes that a preview menu board, which is typical of Starbucks locations and shown on the site plan, is not permitted (only one sign accessory to a drive-thru is permitted). The Petitioner has noted that all signage beyond the ground sign (wall, directional and drive-thru signage) is the responsibility of the tenants. They have noted it is understood by both them and Starbucks that any signage that isn't in compliance with the existing codes may require a separate review and public hearing process to receive approval.

PARKING

There is 5,241 sq. ft. of leasable commercial floor space in the building. With the requirement of 6.5 spaces per 1,000 sq. ft. for planned commercial centers, this requires a total of 34 stalls on the site. 35 parking stalls have been provided on the site and cross-parking is recorded within the overall Park Hills Towne Centre development. Ideally most parking spaces are located near the business entrances for easy customer access; however, there is no space for expansion due to the IDOT takings related to LaGrange Road. The Petitioner has noted, that as the building owner, they plan to instruct all tenants to have employees park at the farthest spots in the rear for customer convenience. A Parking and Traffic Analysis from their traffic consultant KLOA has been supplied outlining the expected traffic demand and concluding that adequate parking supply and drive-thru stacking is present in the proposed plan.

The ADA stalls have been redesigned according to current Illinois Accessibility Code standards that allow for sharing of an access aisle. The previously existing aisle space will be added to the patio area to ensure there is adequate space around the patio to avoid vehicle conflicts and for space to place a walkway connecting the storefront and public sidewalk. The one-way spaces on the south side of the site have been removed to allow for space for the drive-thru lane. New angled one-way spaces were added on the east side of the building where the existing dumpster enclosure is located. Truck loading will happen at the rear of the property during non-peak hours to avoid blocking any parked vehicles.

LIGHTING

The shopping center (and CVS and carwash outlots) utilizes a unique decorative light pole fixture. However, the bank development was approved without the use of those decorative fixtures, likely since it was not as interconnected to the larger shopping center development. The existing light poles will remain at their existing locations with new LED fixtures installed. All light fixtures will be downcast and full-cutoff (no visible light source) to avoid any off-site glare.

SUMMARY OF OPEN ITEMS

Staff identified the following open items for discussion at the workshop:

1. Review overall proposed Site Plan changes, layout, site circulation, and drive-thru stacking.
2. Review façade changes and discuss staff's recommendation that the south façade does not include an EIFS band at the top of the building and there be changes to make the west EIFS band area more appealing.

STANDARDS FOR SITE PLAN & ARCHITECTUAL APPROVAL

Section III.T.2. of the Zoning Ordinance requires that the conditions listed below must be met and reviewed for Site Plan approval. Specific findings are not required but all standards shall be considered to have been met upon review from the Plan Commission.

Architectural

a. Building Materials: The size of the structure will dictate the required building materials (Section V.C. Supplementary District Regulations). Where tilt-up or pre-cast masonry walls (with face or thin brick inlay) are allowed vertical articulation, features are encouraged to mask the joint lines. Concrete panels must incorporate architectural finishes that comply with "Building Articulation" (Section III.U.5.h.) standards. Cast in place concrete may be used as an accent alternate building material (no greater than 15% per façade) provided there is sufficient articulation and detail to diminish it's the appearance if used on large, blank walls.

b. Cohesive Building Design: Buildings must be built with approved materials and provide architectural interest on all sides of the structure. Whatever an architectural style is chosen, a consistent style of architectural composition and building materials are to be applied on all building facades.

c. Compatible Architecture: All construction, whether it be new or part of an addition or renovation of an existing structure, must be compatible with the character of the site, adjacent structures and streetscape. Avoid architecture or building materials that significantly diverge from adjacent architecture. Maintain the rhythm of the block in terms of scale, massing and setback. Where a development includes outlots they shall be designed with compatible consistent architecture with the primary building(s). Site lighting, landscaping and architecture shall reflect a consistent design statement throughout the development.

d. Color: Color choices shall consider the context of the surrounding area and shall not be used for purposes of "attention getting" or branding of the proposed use. Color choices shall be harmonious with the surrounding buildings; excessively bright or brilliant colors are to be avoided except to be used on a minor scale for accents.

e. Sustainable architectural design: The overall design must meet the needs of the current use without compromising the ability of future uses. Do not let the current use dictate an architecture so unique that it limits its potential for other uses (i.e. Medieval Times).

f. Defined Entry: Entrance shall be readily identifiable from public right-of-way or parking fields. The entry can be clearly defined by using unique architecture, a canopy, overhang or some other type of weather protection, some form of roof element or enhanced landscaping.

g. Roof: For buildings 10,000 sf or less a pitched roof is required or a parapet that extends the full exterior of the building. For buildings with a continuous roof line of 100 feet of more, a change of at least five feet in height must be made for every 75 feet.

h. Building Articulation: Large expanses of walls void of color, material or texture variation are to be avoided. The use of material and color changes, articulation of details around doors, windows, plate lines, the provision of architectural details such as "belly-bands" (decorative cladding that runs horizontally around the building), the use of recessed design elements, exposed expansion joints, reveals, change in texture, or other methods of visual relief are encouraged as a means to minimize the oppressiveness of large expanses of walls and break down the overall scale of the building into intermediate scaled parts. On commercial buildings, facades greater than 100 feet must include some form of articulation of the façade through the use of recesses or projections of at least 6 inches for at least 20% of the length of the façade. For industrial buildings efforts to

break up the long façade shall be accomplished through a change in building material, color or vertical breaks of three feet or more every 250 feet.

i. Screen Mechanicals: All mechanical devices shall be screened from all public views.

j. Trash Enclosures: Trash enclosures must be screened on three sides by a masonry wall consistent with the architecture and building material of the building it serves. Gates must be kept closed at all times and constructed of a durable material such as wood or steel. They shall not be located in the front or corner side yard and shall be set behind the front building façade.

Site Design

a. Building/parking location: Buildings shall be located in a position of prominence with parking located to the rear or side of the main structure when possible. Parking areas shall be designed so as to provide continuous circulation avoiding dead-end parking aisles. Drive-through facilities shall be located to the rear or side of the structure and not dominate the aesthetics of the building. Architecture for canopies of drive-through areas shall be consistent with the architecture of the main structure.

b. Loading Areas: Loading docks shall be located at the rear or side of buildings whenever possible and screened from view from public rights-of-way.

c. Outdoor Storage: Outdoor storage areas shall be located at the rear of the site in accordance with Section III.O.1. (Open Storage). No open storage is allowed in front or corner side yards and are not permitted to occupy areas designated for parking, driveways or walkways.

d. Interior Circulation: Shared parking and cross access easements are encouraged with adjacent properties of similar use. Where possible visitor/employee traffic shall be separate from truck or equipment traffic.

e. Pedestrian Access: Public and interior sidewalks shall be provided to encourage pedestrian traffic. Bicycle use shall be encouraged by providing dedicated bikeways and parking. Where pedestrians or bicycles must cross vehicle pathways a cross walk shall be provided that is distinguished by a different pavement material or color.

RECOMMENDATION

Following a successful workshop, proceed to a Public Hearing at the May 20, 2021 Plan Commission meeting.

VILLAGE OF TINLEY PARK, ILLINOIS

PLANNING AND ZONING GENERAL APPLICATION

Authorized Representative Consent

It is required that the property owner or his designated representative be present at all requests made to the Plan Commission and Zoning Board of Appeals. During the course of a meeting, questions may arise regarding the overall project, the property, property improvements, special conditions attached to recommendations among other aspects of any formal request. The representative present must have knowledge of the property and all aspects of the project. They must have the authority to make commitments related to the project and property. Failure to have the property owner or designated representative present at the public meeting can lead to substantial delays to the project approval. If the owner cannot be present or does not wish to speak at the public meeting, the following statement must be signed by the owner for an authorized repetitive.

I hereby authorize 9561 W 171ST TINLEY PARK 2 LLC *(print clearly) to act on my behalf and advise that they have full authority to act as my/our representative in regards to the subject property and project, including modifying any project or request. I agree to be bound by all terms and agreements made by the designated representative.*

Property Owner Signature: [redacted]

Property Owner Name (Print): Randall Morrissey, VP, Real Estate Manager of Fifth Third Bank

Acknowledgements

- Applicant acknowledges, understands and agrees that under Illinois law, the Village President (Mayor), Village Trustees, Village Manager, Corporation Counsel and/or any employee or agent of the Village or any Planning and Zoning Commission member or Chair, does not have the authority to bind or obligate the Village in any way and therefore cannot bind or obligate the Village. Further, Applicant acknowledges, understands and agrees that only formal action (including, but not limited to, motions, resolutions, and ordinances) by the Board of Trustees, properly voting in an open meeting, can obligate the Village or confer any rights or entitlement on the applicant, legal, equitable, or otherwise.
- Members of the Plan Commission, Zoning Board of Appeals, Village Board as well as Village Staff may conduct inspections of subject site(s) as part of the pre-hearing and fact finding review of requests. These individuals are given permission to inspect the property in regards to the request being made.
- Required public notice signs will be obtained and installed by the Petitioner on their property for a minimum of 10 days prior to the public hearing. These may be provided by the Village or may need to be produced by the petitioner.
- The request is accompanied by all addendums and required additional information and all applicable fees are paid before scheduling any public meetings or hearings.
- Applicant verifies that all outstanding fees and monies owed to the Village of Tinley Park have been paid.
- Any applicable recapture, impact, engineering, contracted review or other required fees and donations shall be paid prior to issuance of any building permits, occupancy permits, or business licenses.
- The Owner and Applicant by signing this application certify that the above information and all supporting addendums and documentation is true and correct to the best of their knowledge.

DEMOLITION LEGEND

- EX. CONCRETE PAVEMENT TO BE REMOVED
- EX. ASPHALT PAVEMENT TO BE REMOVED
- EX. PAVEMENT TO BE MILLED (2" DEPTH)
- EX. TREE TO BE REMOVED
- EX. CURB TO BE REMOVED
- EX. STORM SEWER TO BE REMOVED OR ABANDONED IN PLACE

DEMOLITION NOTES

1. ALL UTILITY COMPANIES ARE TO BE CONTACTED TO PERMIT MARKING THEIR FACILITIES BEFORE ANY WORK IS DONE ON THE SITE.
2. THE OWNER SHALL BE PROVIDED WITH COPIES OF ALL DEMOLITION PERMITS AND UTILITY INFORMATION PRIOR TO THE COMMENCEMENT OF THE WORK.
3. THE EXTENT OF SITE DEMOLITION WORK IS AS SHOWN ON THE CONTRACT DOCUMENTS AND AS SPECIFIED HEREIN. FURNISH ALL LABOR, MATERIALS, EQUIPMENT AND SERVICE NECESSARY TO COMPLETE THE WORK. DEMOLITION INCLUDES, BUT IS NOT LIMITED TO, REMOVAL AND DISPOSAL OFF-SITE OF THE FOLLOWING ITEMS:
   - ON-SITE PAVEMENT
   - EXISTING DRIVE-THRU CANOPY AND CONCRETE PADS
   - DEBRIS FROM ALL DEMOLISHED STRUCTURES
   - ALL PAVEMENT TO BE REMOVED ADJACENT TO PAVEMENT THAT IS TO REMAIN SHALL BE SAWCUT FULL DEPTH AT THE EDGES PRIOR TO REMOVAL TO OBTAIN A "CLEAN" JOINT WHERE IT ABUTS NEW CURB OR PAVEMENT.

   CONTRACTOR MUST RECEIVE APPROVAL FROM THE GEOTECHNICAL ENGINEER FOR THE MATERIAL TYPE AND USE IF CONTRACTOR DESIRES TO REUSE DEMOLISHED SITE PAVEMENT AS STRUCTURAL FILL OR IF THE CONTRACTOR WOULD LIKE TO RE-USE THE EXISTING SUBGRADE STONE LAYER.
4. STRUCTURES TO BE DEMOLISHED SHALL BE VACATED AND DISCONTINUED FROM USE PRIOR TO START OF WORK. OWNER ASSUMES NO RESPONSIBILITY FOR ACTUAL CONDITION OF STRUCTURES TO BE DEMOLISHED. CONDITIONS EXISTING AT TIME OF INSPECTION FOR BIDDING PURPOSES WILL BE MAINTAINED BY OWNER IN SO FAR AS PRACTICABLE. HOWEVER, VARIATIONS WITHIN THE STRUCTURES MAY OCCUR BY OWNER'S REMOVAL AND SALVAGE OPERATIONS PRIOR TO START OF DEMOLITION WORK. ITEMS OF SALVAGEABLE VALUE TO CONTRACTOR MAY BE REMOVED FROM SITE AS WORK PROGRESSES AND AS APPROVED BY THE OWNER. SALVAGED ITEMS MUST BE TRANSPORTED FROM THE SITE AS THEY ARE REMOVED. STORAGE OR SALE OF REMOVED ITEMS ON SITE WILL NOT BE PERMITTED. THE USE OF EXPLOSIVES WILL NOT BE PERMITTED. CONDUCT DEMOLITION OPERATIONS AND REMOVAL OF DEBRIS TO ENSURE MINIMUM INTERFERENCE WITH ROADS, STREETS, WALKS AND OTHER ADJACENT OCCUPIED OR USED FACILITIES. THE CONTRACTOR SHALL PROVIDE MAINTENANCE OF TRAFFIC TO PROVIDE SAFE PASSAGE FOR VEHICULAR AND PEDESTRIAN TRAFFIC. THIS INCLUDES APPROPRIATE SIGNAGE FOR CLOSING THE PUBLIC SIDEWALK, ROADWAY AND NECESSARY PARKING SPACES. ALL MAINTENANCE OF TRAFFIC SHALL BE APPROVED BY THE MUNICIPALITY.
5. EXISTING UTILITIES TO REMAIN ARE TO BE KEPT IN SERVICE AND PROTECTED AGAINST DAMAGE DURING DEMOLITION OPERATIONS. CONTRACTOR IS RESPONSIBLE FOR TURNING OFF, DISCONNECTING, AND SEALING INDICATED UTILITIES BEFORE STARTING DEMOLITION OPERATIONS. EXISTING UTILITIES TO BE ABANDONED ARE TO BE CAPPED AT BOTH ENDS AND FILLED WITH FA-1 OR APPROVED EQUAL. ALL UNDERGROUND UTILITIES TO BE REMOVED ARE TO BE BACKFILLED WITH ENGINEERED FILL OR SELECT EXCAVATED MATERIAL, AS APPROVED BY THE GEOTECHNICAL ENGINEER, TO 95% OF MODIFIED PROCTOR DENSITY WITHIN PAVED AREAS AND TO 90% OF MODIFIED PROCTOR DENSITY FOR GREEN SPACE AREAS, IN ACCORDANCE WITH THE EARTHWORK SPECIFICATIONS. ALL PRIVATE UTILITIES (ELECTRIC, CABLE, TELEPHONE, FIBER OPTIC, GAS) SHALL BE REMOVED AND RELOCATED PER THE UTILITY OWNER AND THE LOCAL MUNICIPALITY'S REQUIREMENTS.
6. UNDERGROUND UTILITIES SHOWN ARE BASED ON ATLASES AND AVAILABLE INFORMATION PRESENTED AT THE TIME OF SURVEY. CONTRACTOR SHOULD CALL "JULIE" (800-892-0123) TO COORDINATE FIELD LOCATIONS OF EXISTING UNDERGROUND UTILITIES BEFORE ORDERING MATERIALS OR COMMENCING CONSTRUCTION. NOTIFY ENGINEER OF ANY DISCREPANCIES IMMEDIATELY. CONTRACTOR SHALL LOCATE AND PROTECT EXISTING UNDERGROUND AND OVERHEAD UTILITIES DURING CONSTRUCTION. UTILITY PROTECTION SHALL BE COORDINATED WITH THE RESPECTIVE UTILITY OWNER AND AS DIRECTED BY THE GOVERNING MUNICIPALITY. DAMAGED CABLES/CONDUITS SHALL BE REPLACED IMMEDIATELY. ALL EXISTING STRUCTURES TO REMAIN SHALL BE PROTECTED THROUGHOUT THE CONSTRUCTION PROCESS. ALL DAMAGED STRUCTURES SHALL BE REPLACED IN-KIND AND THEIR REPLACEMENT COST SHALL BE CONSIDERED INCIDENTAL TO THE CONTRACT. PROPER NOTIFICATION TO THE OWNERS OF THE EXISTING UTILITIES SHALL BE MADE AT LEAST 48 HOURS BEFORE CONSTRUCTION COMMENCES.
7. USE WATER SPRINKLING, TEMPORARY ENCLOSURES, AND OTHER SUITABLE METHODS TO LIMIT DUST AND DIRT RISING AND SCATTERING IN THE AIR TO THE LOWEST LEVEL. COMPLY WITH ALL GOVERNING REGULATIONS PERTAINING TO ENVIRONMENTAL PROTECTION. SEE EROSION CONTROL SHEETS FOR FURTHER EROSION CONTROL REQUIREMENTS.
8. REMOVE FROM SITE DEBRIS, RUBBISH AND OTHER MATERIALS RESULTING FROM DEMOLITION OPERATIONS. BURNING OF REMOVED MATERIALS WILL NOT BE PERMITTED ON SITE. TRANSPORT MATERIALS REMOVED AND DISPOSE OF OFF-SITE IN A LEGAL MANNER.
9. ALL EXISTING BUILDINGS, FOUNDATIONS, UTILITIES, AND LANDSCAPING AND OTHER IMPROVEMENTS ON ADJACENT PROPERTIES SHALL BE PROTECTED AT ALL TIMES DURING DEMOLITION AND CONSTRUCTION WORK. THE CONTRACTOR IS RESPONSIBLE TO PROVIDE AND INSTALL ANY MATERIALS, EQUIPMENT, AND/OR MANPOWER NECESSARY TO ACCOMPLISH THIS.

EXISTING LOT COVERAGE DATA

TOTAL LOT AREA = 45,697 SF

OVERALL BUILDING AREA = 5,593 SF (5,241 SF IS LEASEABLE)

PARKING REQUIRED
5,241 SF / 1,000 x 6.5 = 34 SPACES

PARKING PROVIDED
HANDICAP SPACES = 2
REGULAR SPACES = 33

TOTAL PROPOSED PARKING = 35 SPACES

PAVEMENT MARKING AND SIGN LEGEND

- (1) R7-8 HANDICAP PARKING SIGN (12"X18") WITH $250 FINE
- (2) R1-1 STOP SIGN (30"X30")
- (3) R5-1 DO NOT ENTER SIGN (30"X30")
- (4) CONCRETE WHEEL STOP
- (A) HANDICAP SYMBOL PER LATEST ADA STANDARDS
- (B) 4" SOLID YELLOW AT 24" C-C AT 45 DEGREES
- (C) 4" SOLID YELLOW STRIPE (TYP)
- (D) 24" WIDE WHITE STOP BAR
- (E) CROSSWALK - 24" SOLID WHITE AT 36" C-C

GENERAL NOTES

1. ALL DIMENSIONS AND CURB RADII ARE TO FACE OF CURB UNLESS OTHERWISE NOTED.
2. ALL CURB SHALL BE B6.12 CURB AND GUTTER.
3. SIDEWALK IN FRONT OF THE BUILDING SHALL BE COMBINATION SIDEWALK AND BARRIER CURB AND SHALL BE MONOLITHICALLY CAST ACCORDING TO THE DETAIL ON SHEET C6.0.
4. ALL RADII ARE 3.0' UNLESS OTHERWISE NOTED.
5. ALL SITE SIGNAGE SHALL BE IN CONFORMANCE WITH MANUAL ON UNIFORM TRAFFIC CONTROL DEVICES (M.U.T.C.D.) STANDARDS, LATEST EDITION.
6. PARKING SPACES SHALL BE ANGLED AT 90° TO THE ASSOCIATED DRIVE AISLE UNLESS OTHERWISE NOTED.
7. DETECTABLE WARNING STRIPS WITH TRUNCATED DOMES ON ALL CURB RAMPS SHALL CONSIST OF CONTRASTING COLOR TO ADJACENT PAVEMENT COLOR PER IDOT REGULATIONS, PREFERRED COLOR IS RED (FEDERAL COLOR STANDARD 30166)
8. REFER TO ARCHITECTURAL AND SIGNAGE PLANS FOR ANY ADDITIONAL SITE SIGNAGE AND PAVEMENT MARKINGS.
9. ALL TRAFFIC SIGNS SHALL BE INSTALLED AT 7' HIGH MEASURED FROM THE GROUND ELEVATION TO THE BOTTOM OF SIGN.

PROPOSED LOT COVERAGE DATA

TOTAL LOT AREA = 47,282 SF

PROPOSED PERVIOUS AREA = 13,510 SF

PROPOSED IMPERVIOUS AREA = 33,772 SF

PERCENT PROPOSED IMPERVIOUS AREA = 71.43%

SITE PAVING LEGEND

☆ 6" ST OVER 4" SAN 6" ST B/P = 734.58 4" SAN T/P = 728.19

GENERAL UTILITY NOTES

1. EXISTING UTILITY INFORMATION SHOWN IS BASED ON BEST AVAILABLE RECORDS AT THIS TIME. THE CONTRACTOR SHALL FIELD VERIFY LOCATION, SIZE AND DEPTH BEFORE ORDERING ANY MATERIAL, OR BEGINNING ANY PROPOSED CONSTRUCTION.
2. DIMENSIONS ARE TO FACE OF CURB UNLESS OTHERWISE NOTED.
3. SEE LANDSCAPE PLANS FOR PROPOSED TREE LOCATIONS.
4. UTILITY CROSSINGS BETWEEN WET UTILITIES (WATER, SANITARY, STORM) AND DRY UTILITIES (GAS, ELECTRIC, TELEPHONE, TELE-COMMUNICATIONS) SHALL BE COORDINATED BETWEEN THE CONTRACTOR AND THE UTILITY COMPANIES TO ACCOMMODATE THE DESIGN OF THE WET UTILITY.
5. SEE ARCHITECTURAL AND PLUMBING PLANS FOR INVERT AND EXACT ENTRY LOCATION OF ALL BUILDING SERVICES.
6. THE ROUTING FOR TELEPHONE, ELECTRIC AND GAS SERVICE IF SHOWN IS FOR SCHEMATIC PURPOSES ONLY. THE CONTRACTOR SHALL CONTACT THE INDIVIDUAL UTILITY COMPANIES TO DETERMINE ACTUAL ROUTE AND COORDINATE THEIR CONSTRUCTION.
7. DRY UTILITY CONDUITS SHALL MAINTAIN 5 FT. OF HORIZONTAL SEPARATION FROM OTHER UTILITIES EXCEPT AT CROSSINGS.
8. CONTRACTOR SHALL BE RESPONSIBLE FOR ALL FINAL UTILITY PIPE CLEANING PRIOR TO UTILITY BEING PUT INTO SERVICE.
9. STRUCTURE ADJUSTMENTS SHALL BE ACCOMPLISHED USING ADJUSTING RINGS UP TO A MAXIMUM OF 8". STRUCTURE ADJUSTMENTS OF MORE THAN 12" IN HEIGHT SHALL BE ACCOMPLISHED BY REMOVING THE STRUCTURE TOP AND INSTALLING A NEW BARREL SECTION OF SUFFICIENT HEIGHT TO LIMIT THE REQUIRED ADJUSTING RING HEIGHT TO 8" OR LESS.

NOTE:
THE LOCATION, ELEVATION, SIZE, AND TYPES OF ALL EXISTING UNDERGROUND UTILITIES ARE SHOWN IN AN APPROXIMATE WAY ONLY AND HAVE NOT BEEN INDEPENDENTLY VERIFIED BY THE OWNER OR ITS REPRESENTATIVE. THE CONTRACTOR SHALL BE RESPONSIBLE FOR DETERMINING THE EXACT LOCATION, ELEVATION, SIZE AND TYPES OF ALL EXISTING UTILITIES PRIOR TO COMMENCING WORK AND AGREES TO BE FULLY RESPONSIBLE FOR ANY AND ALL DAMAGES WHICH MIGHT BE OCCASIONED BY THE CONTRACTOR'S FAILURE TO EXACTLY LOCATE AND PRESERVE ANY AND ALL UNDERGROUND UTILITIES.

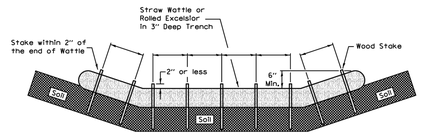
ROLLED EROSION CONTROL PRODUCTS

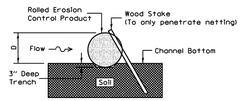
Staking Pattern Guide



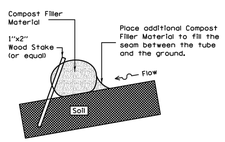
Notes:

1. Overlap minimum is the diameter of the roll.
2. 4' spacing for wattles.
3. 2' spacing for rolled excelsior.
4. Or space according to manufacturer's specifications.

Stake Detail



Compost Filter Sock Detail



When compost filter sock ditch check is used, place a compost berm upstream of the filter sock (see IUM 805). A trench is not required.

Notes:

1. Drawings are not to scale.
2. Ends of wattles or rolled excelsior shall be turned at least 6" upslope.
3. Recommended stakes are 1 1/8" wide x 1 1/8" thick x 30" long
4. Stakes shall not extend above the straw wattle more than 2".
5. Spacing: The toe of the upstream ditch check shall create a horizontal line with the top of the downstream ditch check.
6. When compost filter sock ditch check is used, place a compost berm upstream of the filter sock (see IUM 805). A trench is not required.

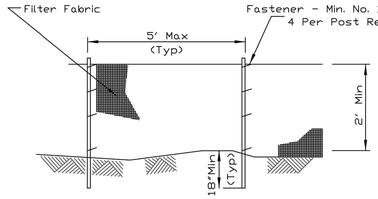
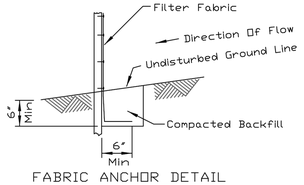
1. THE EXCAVATING AND UNDERGROUND CONTRACTOR SHALL BE RESPONSIBLE FOR THE INITIAL CONSTRUCITON OF THE EROSION CONTROL MEASURES SHOWN IN THE PLAN, AND SHALL BE RESPONSIBLE FOR THE MAINTENANCE OF SAID FACILITIES UNTIL THE COMPLETION OF HIS FINAL GRADING OPERATIONS AFTER CONSTRUCTION OF THOSE IMPROVEMENTS IN HIS CONTRACT. THE CONTRACTOR'S EROSION CONTROL MAINTENANCE RESPONSIBILITIES SHALL BE EXCLUSIVE OF THE CONSTRUCTION WARRANTY AND/OR GUARANTEE PERIOD.
2. ALL EROSION AND SEDIMENT CONTROL PRACTICES ARE TO BE CHECKED FOR STABILITY AND OPERATION AT LEAST ONCE EVERY SEVEN (7) CALENDAR DAYS AND WITHIN 24 HOURS OF THE END OF A STORM THAT IS 0.5 INCH OR GREATER OR EQUIVALENT SNOWFALL. ANY NEEDED REPAIRS WILL BE MADE IMMEDIATELY TO MAINTAIN ALL PRACTICES AS DESIGNED.
3. SEDIMENT SHALL BE REMOVED FROM THE SEDIMENT TRAPS WHEN THE STORAGE CAPACITY HAS BEEN APPROXIMATELY 50% FILLED.
4. SEDIMENT SHALL BE REMOVED FROM BEHIND THE SILT FENCE WHEN IT BECOMES APPROXIMATELY 0.5' DEEP AT THE FENCE. THE SILT FENCE SHALL BE REPAIRED AS NECESSARY TO MAINTAIN A BARRIER.
5. ALL SEEDED AREAS WILL BE FERTILIZED, RE-SEEDED AS NECESSARY, AND MULCHED AS REQUIRED TO MAINTAIN A VIGOROUS, DENSE VEGETATIVE COVER.
6. **AFTER CONSTRUCTION AND UPON FINAL SITE STABILIZATION, THE CONTRACTOR SHALL REMOVE ALL TEMPORARY EROSION CONTROL DEVICES AND TURN OVER MAINTENANCE OF THE PERMANENT EROSION CONTROL MEASURES TO THE OWNER.**
7. **AFTER CONSTRUCTION, THE OWNER SHALL MAINTAIN ALL PERMANENT CONTROL DEVICES IN ORDER TO PREVENT EROSION.**

RECOMMENDED EROSION CONTROL MAINTENANCE SCHEDULE

SILT FENCE PLAN



ELEVATION



FABRIC ANCHOR DETAIL

NOTES:
1. Temporary sediment fence shall be installed prior to any grading work in the area to be protected. They shall be maintained throughout the construction period and removed in conjunction with the final grading and site stabilization.
2. Filter fabric shall meet the requirements of material specification 592 Geotextile Table 1 or 2, Class I with equivalent opening size of at least 30 for nonwoven and 40 for woven.
3. Fence posts shall be either standard steel post or wood post with a minimum cross-sectional area of 3.0 sq. in.

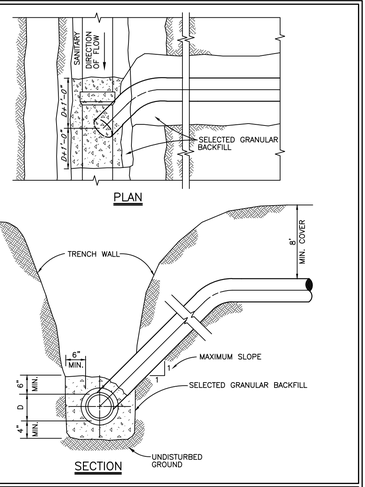
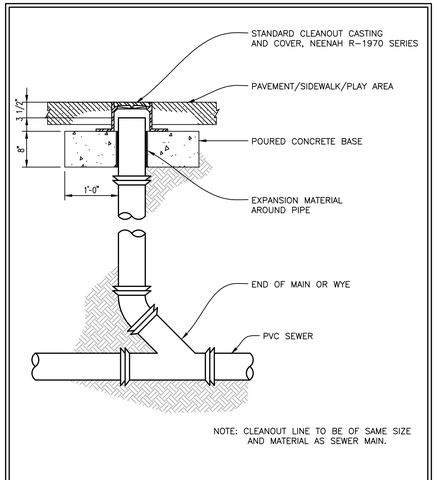
HANDICAP ACCESSIBLE CURB RAMPS FOR SIDEWALKS (to be placed where all sidewalks meet curb)

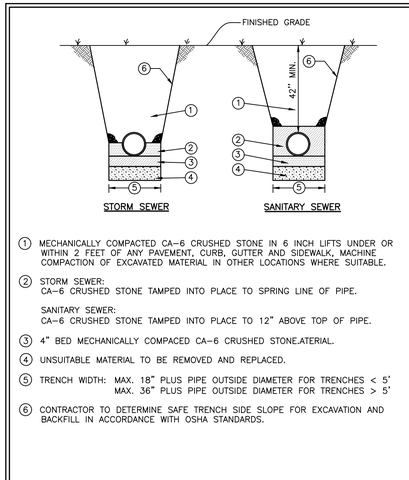


SANITARY SERVICE RISER



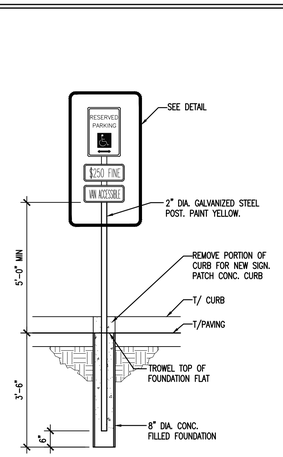
NOTE: CLEANOUT LINE TO BE OF SAME SIZE AND MATERIAL AS SEWER MAIN.

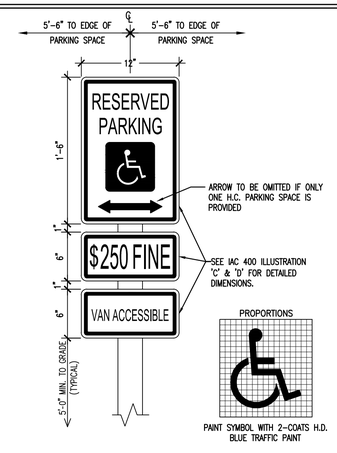
CLEANOUT AT PAVEMENT AREA



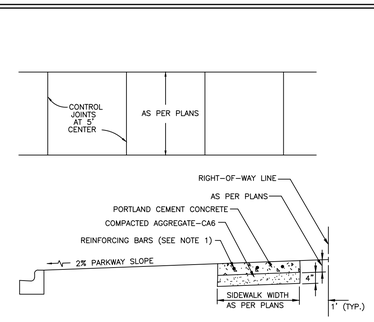
1. MECHANICALLY COMPACTED CA–6 CRUSHED STONE IN 6 INCH LIFTS UNDER OR WITHIN 2 FEET OF ANY PAVEMENT, CURB, GUTTER AND SIDEWALK, MACHINE COMPACTION OF EXCAVATED MATERIAL IN OTHER LOCATIONS WHERE SUITABLE.
2. STORM SEWER:
   CA–6 CRUSHED STONE TAMPED INTO PLACE TO SPRING LINE OF PIPE.
   SANITARY SEWER:
   CA–6 CRUSHED STONE TAMPED INTO PLACE TO 12" ABOVE TOP OF PIPE.
3. 4" BED MECHANICALLY COMPACED CA–6 CRUSHED STONE.ATERIAL.
4. UNSUITABLE MATERIAL TO BE REMOVED AND REPLACED.
5. TRENCH WIDTH: MAX. 18" PLUS PIPE OUTSIDE DIAMETER FOR TRENCHES < 5'
   MAX. 36" PLUS PIPE OUTSIDE DIAMETER FOR TRENCHES > 5'
6. CONTRACTOR TO DETERMINE SAFE TRENCH SIDE SLOPE FOR EXCAVATION AND BACKFILL IN ACCORDANCE WITH OSHA STANDARDS.

PIPE BEDDING DETAIL



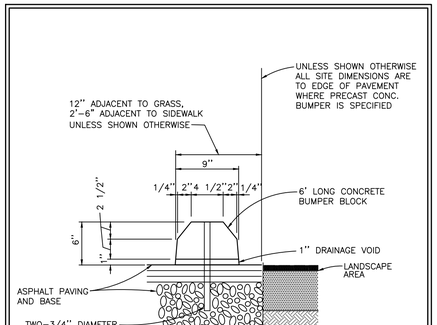


R7–8 HANDICAPPED SIGN DETAIL

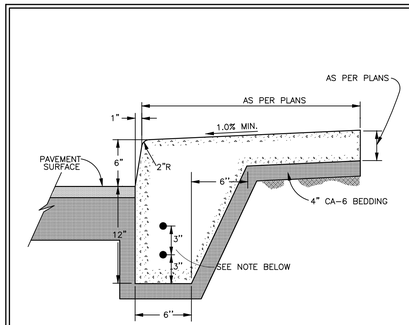


NOTES:
1. AT ALL TRENCH CROSSINGS, 3–1/2" REINFORCING BARS (10' LONG) SHALL BE PLACED, EQUALLY SPACED AND CENTERED OVER THE TRENCH.
2. CONCRETE THICKNESS SHALL BE 6" AT ALL DRIVEWAYS AND TRENCH CROSSINGS.
3. 3/4" EXPANSION JOINTS SHALL BE CONSTRUCTED AT A MAXIMUM SPACING OF 50'.
4. CONTROL JOINTS SHALL BE THE SAME AS THE SIDEWALK WIDTH AND 1/4" IN DEPTH.

TYPICAL SIDEWALK DETAIL

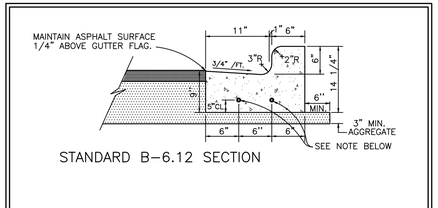


WHEEL STOP DETAIL



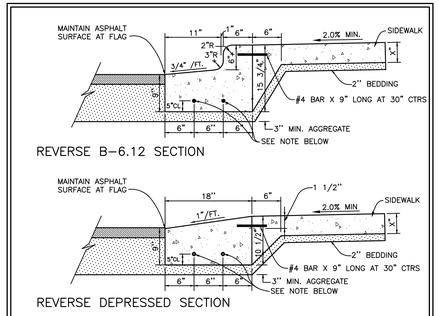
NOTES:
1. EXPANSION JOINTS TO BE LOCATED AT HIGH POINTS, INLETS, CATCHBASINS, CURB RETURNS, COLD JOINTS OR 60' MAX. (SEE DETAIL).
2. CONTRACTION JOINTS ARE TO BE SAW CUT 2" DEEP AT 20' INTERVALS MAX.
3. INSTALL 2–#4 DEFORMED BARS X 10'–0" LONG OVER ALL TRENCHES.

COMBINATION BARRIER CURB AND SIDEWALK DETAIL



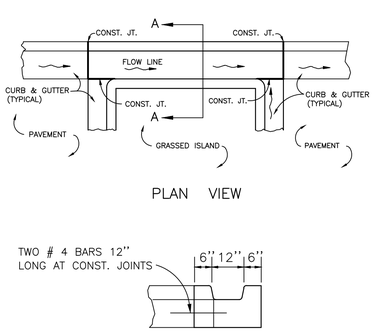
NOTES:
1. EXPANSION JOINTS TO BE LOCATED AT HIGH POINTS, INLETS, CATCHBASINS, CURB RETURNS, COLD JOINTS OR 60' MAX. (SEE DETAIL).
2. CONTRACTION JOINTS ARE TO BE SAW CUT 2" DEEP AT 20' INTERVALS MAX.
3. INSTALL 2–#4 DEFORMED BARS X 10'–0" LONG OVER ALL TRENCHES.
4. TRANSITION CURB AND GUTTER AS NECESSARY TO MEET DRAINAGE STRUCTURE FRAME AND GRATE.

STANDARD B–6.12 CURB AND GUTTER DETAIL



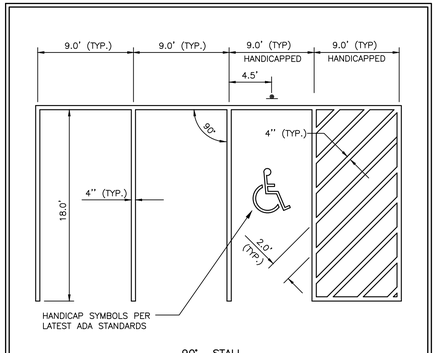
NOTES:
1. EXPANSION JOINTS TO BE LOCATED AT HIGH POINTS, INLETS, CATCHBASINS, CURB RETURNS, COLD JOINTS OR 60' MAX. (SEE DETAIL).
2. CONTRACTION JOINTS ARE TO BE SAW CUT 2" DEEP AT 20' INTERVALS MAX.
3. INSTALL 2–#4 DEFORMED BARS X 10'–0" LONG OVER ALL TRENCHES.
4. TRANSITION CURB AND GUTTER AS NECESSARY TO MEET DRAINAGE STRUCTURE FRAME AND GRATE.

REVERSE COMBINATION B–6.12 CURB AND GUTTER AND SIDEWALK DETAIL



NOTE:
1. INSTALL 2–#4 DEFORMED BARS, 10'–0" LONG OVER ALL TRENCHES.
2. CONSTRUCT AS PER CURB & GUTTER DETAIL.

VALLEY GUTTER DETAIL



NOTE:
1. ALL STRIPING TO BE TWO COATS WHITE PAINT, UNLESS OTHERWISE NOTED.

TYPICAL 90° PARKING STRIPING DETAIL

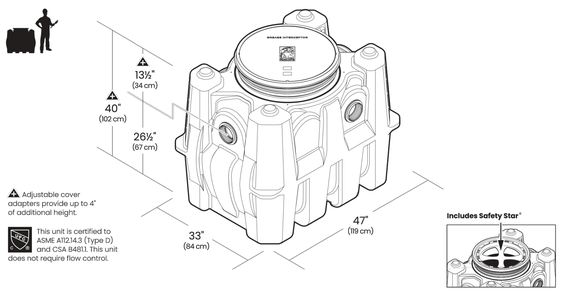
SPECIFICATION AND SUBMITTAL

GB-75 75 GPM Great Basin™ Indoor/Outdoor Grease Interceptor



⚠ Adjustable cover adapters provide up to 4" of additional height.

This unit is certified to ASME A112.14.3 (Type D) and CSA B481.1. This unit does not require flow control.

Includes Safety Star®

SUBMITTAL

Standard

Location: Indoor/outdoor
Installation: Above/below grade
Flow Rate / Grease Capacity: 75 GPM (4.7 L/s) / 861 lbs. (391 kg), 118 gal. (447 L)
Removal Efficiency at the Rated Capacity: 95.8%
Solids Capacity: 31 gal. (117 L)
Liquid Capacity: 125 gal. (473 L)
Weight: 190 lbs. (86 kg)
Connections: 4" FPT with 4" plain end adapters, single inlet and triple outlet
Covers: Cast iron cover, pickable 24" gas/water tight, H-20 rated, proof-load tested to 40,000 lbs.
Access Restrictor: Safety Star® (450 lb. rating) built into cover adapter

Options

- ☐ 6" plain end inlet/outlet (straight-through) with dual pumpout port connections
- ☐ 6" MPT inlet/outlet (stainless steel, straight-through)
- ☐ **-FO** (fixed outlet)
- ☐ **C24H2** Composite covers, bolted 24" gas/water tight, traffic load rated for 16,000 lbs.

Accessories

- ☐ **FCR2** >4" – 34" field cut riser
- ☐ **FCR2 (x2)** >34" – 64" field cut risers
- ☐ **FCR2 (x3)** >64" – 94" field cut risers
- ☐ **CA2** Adapter for 24" corrugated pipe riser
- ☐ **PP3** Pumpout port
- ☐ **AK1** High water anchor kit
- ☐ **ATDI** Cover adapter tie-down kit
- ☐ **PLAIN-EA-24** 2" plain end fitting
- ☐ **PLAIN-EA-34** 3" plain end fitting
- ☐ **FPT-EA-34** 4" x 3" FPT fitting
- ☐ **FPT-EA-23** 3" x 2" FPT fitting
- ☐ **CC2** Integral membrane clamping collar kit

SCHIER

MODEL NUMBER: GB-75	DESCRIPTION: 75 GPM Polyethylene Grease Interceptor			
PART #: 4045-007-01	DWG BY: B. Karrer	DATE: 8/28/2020	REV:	ECO:

9500 Woodend Road | Edwardsville, KS 66111 | 913-951-3300 | schierproducts.com

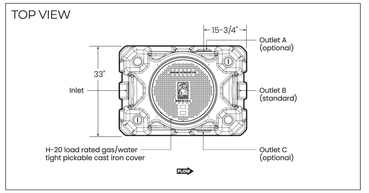
SPECIFICATIONS

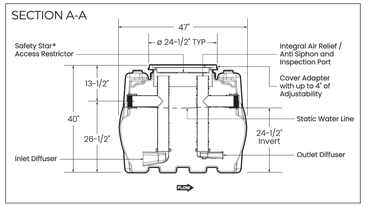
NOTES
1. 4" FPT with 4" plain end adapters, single inlet and triple outlet
2. Unit weight – w/cast iron cover: 190 lbs.; w/composite cover: 135 lbs. (For wet weight add 1,043 lbs.)
3. Maximum operating temperature: 150° F continuous
4. Capacities – Liquid: 125 gal.; Grease: 861 lbs. Solids: 31 gal.
5. This unit does not require flow control.
6. For gravity drainage applications only.
7. Do not use for pressure applications.
8. Cover placement allows full access to tank for proper maintenance.
9. Vent not required unless per local code.
10. Engineered inlet and outlet diffusers are removable to inspect / clean piping.
11. Integral air relief / Anti-siphon / Sampling access.
12. Adjustable cover adapters provide up to 4" of additional height.
13. Fixed outlet models (-FO) have inlet and outlet permanently welded at the factory in the straight-through (B) positions.
14. Flow rates are based on 2-minute drain time.
15. Safety Star®, access restrictor built into cover adapter, prevents accidental entry to tanks (450 lb rating)

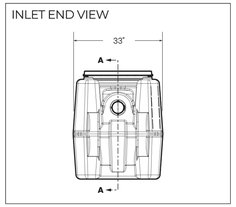
DIFFUSION FLOW TECHNOLOGY
The inlet diffuser reduces turbulence, creates laminar flow and allows the entire tank volume to be utilized for efficient grease separation and minimal disturbance to existing grease and sediment layers. The integral air relief / anti-siphon at the outlet diffuser top allows pressure stabilization within the unit during operation. The outlet diffuser can easily be attached to any of the three outlets provided to ease job site piping layouts.

ENGINEER SPECIFICATION GUIDE
Schier Great Basin™ grease interceptor model # GB-75 shall be lifetime guaranteed and made in USA of seamless, rotationally-molded polyethylene. Interceptor shall be furnished for above or below grade installation. Interceptor shall be certified to ASME A112.14.3 (Type D) and CSA B481.1, with adjustable cover adapter, Safety Star® access restrictor built into cover adapter, and three outlet options. Interceptor flow rate shall be 75 GPM. Interceptor grease capacity shall be 861 lbs. Cover shall provide water/gas-tight seal and have minimum 16,000 lbs. load capacity.

CERTIFIED PERFORMANCE
Great Basin™ hydromechanical grease interceptors are third party performance-tested and listed by IAPMO to ASME #A112.14.3 and CSA B481.1 grease interceptor standards and greatly exceed requirements for grease separation and storage. They are compliant to the Uniform Plumbing Code and the International Plumbing Code.







Rated Grease Capacities for Units Piped in Series

No. of Units in Series	Removal Efficiency 75 GPM 95.8%
2	1,722 lbs.
3	2,583 lbs.
4	3,444 lbs.

Notes
1. Unit weight: 32 lbs.
2. Riser not designed to hold water

Engineer Specification Guide:
Field-cut adjustable riser system to consist of injection molded polypropylene body, 100% Silicone Sealant for assembly of riser components, butyl mastic sealant for tank-riser or riser-riser joints, stainless steel fastening hardware and heavy duty nylon cable ties and mounts. Riser shall allow field adjustability of cover to grade.

Installation Note
Minimum install height: 4". Maximum install height: 34". Riser system may be stacked no more than three units high to a maximum of 94" extension. Access to internal components will not be compromised.

Riser Height Needed	Risers Required (per accessway)
0" – 4"	None (use adapter)

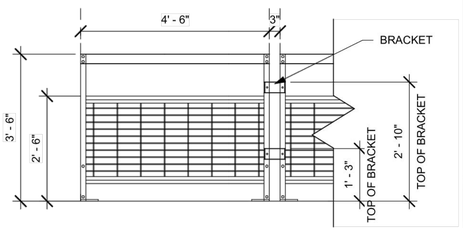
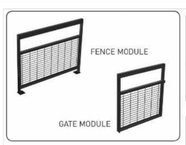
RAILING SPECIFICATION:

AWNEX. EVENING FENCE.
MATERIAL: ALUMINUM FRAME, STEEL MESH AND FEET.
FINISH: #MT0028.
DID: 21486

NOTE: CONTRACTOR TO PROVIDE SHOP DRAWINGS TO STARBUCKS CONSTRUCTION MANAGER/ARCHITECT FOR APPROVAL. INSTALLED BY GC





Description:
Create the perfect atmosphere with this exclusive Starbucks Patio Fencing system. This flexible sectional design can be configured to fit Starbucks Patios. Finished with Starbucks classic Black and built with 100% recyclable aluminum.

Made in USA.

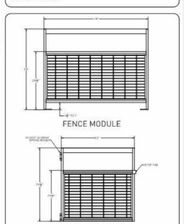
Specs:

Materials:
- Aluminum Frame
- Steel Mesh and Feet

Finish:
- Powder Coated Starbucks Flat Black, #MT0028

Size:
- Fence, 42" high x 54" wide x 2" thick
- 3" gap between modules
- 4" wide plate at foot
- Gate, 38-1/4" high x 38" wide x 2" thick.

Weight:
- 33 lbs per module



How to Request a Quote:
Send your Patio Layout along with dimensions include openings and gates to Awnex.

SHEET TITLE: SITE CONSTRUCTION DETAILS - 2

PROJECT: SITE AND SHELL DEVELOPMENT
17111-17119 LAGRANGE ROAD, TINLEY PARK, IL 60487

PROJ. MGR.:	OP
DRAWN BY:	OP
FIRST ISSUE DATE:	03-26-2021
SCALE:	N.T.S.

SHEET NO. C6.2

PROJ. NUMBER: 21008

GENERAL CONDITIONS

DEFINITION OF TERMS

a. "CLIENT" shall mean Vequity, LLC, which is the person or entity with whom CivWorks Consulting, LLC has contracted with to prepare Civil Engineering PLANS and SPECIFICATIONS.

b. "ENGINEER" shall mean CivWorks Consulting, LLC, a Civil Engineering consultant on the subject project.

c. "PLANS and SPECIFICATIONS" shall mean the Civil Engineering PLANS and SPECIFICATIONS prepared by the ENGINEER, which may be a part of the contract documents for the subject project.

d. "CONTRACTOR" shall mean any person or entity performing any work described in the PLANS and SPECIFICATIONS.

e. "JURISDICTIONAL GOVERNMENTAL ENTITY" shall mean any municipal, county, state or federal unit of government from whom an approval, permit and/or review is required for any aspect of the subject project.

INTENT OF THE CONTRACT DOCUMENTS

The intention of the PLANS and SPECIFICATIONS is to set forth certain requirements of performance, type of equipment and structures, and standards of materials and construction. They may also identify labor and materials, equipment and transportation necessary for the proper execution of the work but are not intended to be infinitely determined so as to include minor items obviously required as part of the work. The PLANS and SPECIFICATIONS require new material and equipment unless otherwise indicated, and to require complete performance of the work in spite of omissions of specific references to any minor component part. It is not intended, however, that materials or work not covered by or properly inferred from any heading, branch, class or trade of the SPECIFICATIONS shall be supplied unless distinctly so noted. Materials or work described in words, which so applied have a well-known technical or trade meaning, shall be held to refer to such recognized standards.

INTERPRETATION OF PLANS AND SPECIFICATIONS

a. The CLIENT and/or CONTRACTOR shall promptly report any errors or ambiguities in the PLANS and SPECIFICATIONS to the ENGINEER. Questions as to meaning of PLANS and SPECIFICATIONS shall be interpreted by the ENGINEER, whose decision shall be final and binding on all parties concerned.

b. The ENGINEER will provide the CLIENT with such information as may be required to show revised or additional details of construction.

c. Should any discrepancies or conflicts on the PLANS or SPECIFICATIONS be discovered either prior to or after award of the contract, the ENGINEER's attention shall be called to the same before the work is begun thereon and the proper corrections made. Neither the CLIENT nor the CONTRACTOR may take advantage of any error or omissions in the PLANS and SPECIFICATIONS. The ENGINEER will provide information when errors or omissions are discovered.

GOVERNING BODIES

All works herein proposed shall be completed in accordance with all requirements of any JURISDICTIONAL GOVERNMENTAL ENTITY, and all such pertinent laws, directives, ordinances and the like shall be considered to be a part of these SPECIFICATIONS. If a discrepancy is noted between the PLANS and SPECIFICATIONS and requirements of any JURISDICTIONAL GOVERNMENTAL ENTITY, the CLIENT and/or the CONTRACTOR shall immediately notify the ENGINEER in writing.

LOCATION OF UNDERGROUND FACILITIES

When the PLANS and SPECIFICATIONS include information pertaining to the location of existing underground facilities, such information represents only the opinion of the ENGINEER as to the approximate location of such utilities. At the locations wherein detailed positions of these facilities become necessary to the new construction, the CLIENT or the CONTRACTOR shall furnish all labor and tools to either verify and substantiate the location or definitely establish the position of the facilities. The ENGINEER assumes no responsibility whatever with respect to the sufficiency or accuracy of the information shown on the PLANS and SPECIFICATIONS relative to the location of underground facilities.

It shall be the CLIENT's and/or the CONTRACTOR's responsibility prior to construction, to notify all Utility Companies of the intentions to begin construction and to verify the actual location of all such facilities. The CLIENT and/or the CONTRACTOR shall also obtain from the respective Utility Companies the working schedules for removing or adjusting these facilities.

UNSUITABLE SOILS

The PLANS have been prepared by the ENGINEER based on the assumption that all soils on the project are suitable to support the proposed improvements shown. The CLIENT or the CONTRACTOR shall immediately notify the ENGINEER if he discovers or encounters an obstruction that prevents the installation of the improvement according to the line and grades shown on the PLANS.

PROTECTION OF TREES

All trees that are not to be removed shall be protected from damage. Trees shall not be removed unless requested to do so in writing by the CLIENT.

NOTIFICATION OF UTILITY COMPANIES

The CLIENT and/or CONTRACTOR shall notify all applicable Jurisdictional Governmental Entities or utility companies, i.e., electric, telephone, gas and cable TV prior to beginning any construction so that said entity or company can establish the location of underground pipes, conduits or cables adjoining or crossing proposed construction.

SOIL BORING DATA

Copies of results of soil boring and reports, if such borings were taken by the CLIENT in the vicinity of the proposed construction site, should be made available by the CLIENT to the CONTRACTOR. These borings are presented for whatever purpose the CONTRACTOR chooses to make of them. The ENGINEER makes no representation or warranty regarding the number, location, spacing or depth of borings taken, nor of the accuracy or reliability of the information given in the results thereof.

Further, the ENGINEER does not assume responsibility for the possibility that during construction, the soil and groundwater condition may be different than indicated. Neither does the ENGINEER assume responsibility for variations of soil and groundwater at location between borings. The CONTRACTOR is required to make its own borings, explorations and observations to determine soil and groundwater conditions.

TRAFFIC CONTROL

The CONTRACTOR shall provide when required by any JURISDICTIONAL GOVERNMENTAL ENTITY, all signs, equipment, and personnel necessary to provide for safe and efficient traffic flow in all areas where the work will interrupt, interfere or cause to change in any form, the conditions of traffic flow that existed prior to the commencement of any portions of the work. The CLIENT may, at his discretion, require the CONTRACTOR to furnish traffic control under these or other circumstances where in his opinion it is necessary for the protection of life and property. The need for traffic control shall be anticipated by the CLIENT.

UTILITY POLES

It shall be the responsibility of the CONTRACTOR to arrange for the relocation or bracing of existing utility poles that may be within the working limits of this contract. It is expressly understood that all work and costs connected with the maintenance of these utility poles, their temporary relocations, etc., shall be the responsibility of the CLIENT or the CONTRACTOR.

RESTORATION

Restoration of damage to public or private property outside the limits of this project and of all existing roads and rights-of-way and easements shall be completed in accordance with the applicable sections of the Standard Specifications for Road and Bridge Construction, Department of Transportation, State of Illinois, latest edition.

It is the intent of these SPECIFICATIONS that clean-up and final restoration shall be performed immediately upon completion of each phase of the work so that these areas will be restored as nearly as possible to their original condition or better, and shall include but not be limited to, restoration of maintained lawns and rights-of-way, roadways, driveways, sidewalks, ditches, bushes, hedges, trees, shrubs, fences, mailboxes, sewers, drain tiles, water mains, etc.

ROAD CLEANING

The CONTRACTOR shall maintain roadways adjoining the project site free from mud and debris at all times. If mud and/or debris is carried onto the roadways from vehicles entering onto the highway from either the CONTRACTOR's trucks, his employees' vehicles, or his material suppliers, the CONTRACTOR shall immediately remove said mud and/or debris.

DETAILED SPECIFICATIONS

I. EXCAVATION AND GRADING

A. STANDARDS

This work shall be completed in conformance with the applicable sections of the Standard Specifications for Road and Bridge Construction, Department of Transportation, State of Illinois, latest edition.

B. GENERAL

EARTHWORK CALCULATIONS AND CROSS SECTIONS

The CONTRACTOR understands that any earthwork calculations, quantities or cross sections that have been furnished by the ENGINEER are for information only and are provided without any guarantee by the CLIENT or ENGINEER whatsoever as to their sufficiency or accuracy. CONTRACTOR warrants that he has performed his own subsurface investigations as necessary and his own calculations and cross sections to determine site soil conditions and earthwork volumes.

C. EXCAVATION AND EMBANKMENT

DEMOLITION

(a) CONTRACTOR shall perform all demolition work in accordance with all applicable Federal, State and local requirements.

(b) The CONTRACTOR shall coordinate all demolition with the JURISDICTIONAL GOVERNING ENTITY and CLIENT to ensure protection and maintenance of sanitary sewer and water utilities as necessary and to provide stormwater conveyance until new facilities are constructed, tested and placed into operation.

(c) CONTRACTOR shall develop and implement a daily program of dust control and shall submit and obtain JURISDICTIONAL GOVERNING ENTITY approval of dust control procedures prior to demolition of any structures. Modification of dust control procedures shall be performed by the CONTRACTOR to the satisfaction of the JURISDICTIONAL GOVERNING ENTITY as requested.

(d) All asphalt pavement curb and gutter and miscellaneous structures shall be demolished by the CONTRACTOR and disposed of as approved by CLIENT.

(e) All existing sewers outside the building as indicated on the PLANS to be abandoned shall be removed from the site and disposed of by the CONTRACTOR.

(f) Voids left by any item removed under any proposed building, pavement or walk or within 24" thereof shall be filled and compacted with suitable materials by the CONTRACTOR.

(g) All fire access lanes within the project area shall remain in service, clean of debris, and accessible for use by emergency vehicles.

(h) Any existing wells encountered shall be exposed and sealed 3' below proposed finish grade by the CONTRACTOR in accordance with Section 920.120 of the Illinois Water Well Construction Code, Department of Public Health, Latest Edition, and all applicable local rules and regulations.

(i) Any existing septic tanks and grease traps encountered shall have all liquids and solids removed and disposed of by a licensed commercial hauler in accordance with Governmental Jurisdictional Entity regulations, and the tank and grease traps shall then be filled with suitable materials or removed from the site and disposed of by the CONTRACTOR.

(j) Any material containing asbestos found within existing structures shall be removed from the site and disposed of off-site by the CONTRACTOR in accordance with County, State and Federal regulations.

CLEARING, GRUBBING AND TREE REMOVAL

The site shall be cleared, grubbed, and trees and stumps removed where designated on the PLANS. Trees designated to remain shall be protected from damage.

TOPSOIL STRIPPING

Upon completion of demolition, clearing, grubbing and tree removal, all topsoil shall be stripped from under all buildings and pavements areas, and other areas necessary to complete the work. Topsoil stripped shall be placed in stockpiles in locations as designated by the CLIENT.

TOPSOIL RESPREAD

Upon completion of parking lot improvements and installation of underground utilities a minimum of six inches (6") of topsoil shall be respread over all onsite areas which are disturbed by earthwork construction, except building pads and pavements, which shall be kept free from topsoil.

EXCAVATION AND EMBANKMENT (FILL)

Upon completion of topsoil stripping, all excavation and embankments shall be completed as shown on the PLANS. All suitable excavated materials shall be hauled, placed (moisture conditioned if necessary) and compacted in the embankment areas. The CONTRACTOR shall include all dewatering, temporary ditching and culverts necessary to complete the excavation and embankment.

Specifically included in the scope of Excavation and Embankments is grading and shaping of all cut or fill areas including swales and ditches; handling of sewer spoil, etc., and all work required to provide positive drainage at the end of each working day and upon completion of a section.

The CONTRACTOR shall be responsible for the excavation of all swales and ditches and for the excavation or filling of the parking lot within the work limits to within ±0.1 feet of the proposed subgrade elevations indicated on the PLANS. He shall be responsible for obtaining compaction in accordance with the minimum values listed in the table below for all embankments unless more stringent values are listed in the soils report, and to use any method approved by the CLIENT necessary to obtain this compaction (i.e., soil fabric or any undercutting that may be required). All existing materials are assumed to have a California Bearing Ratio (CBR) of 3.0.

Type Material	Percent Compaction Standard	Pavement & Floor Slabs	Grass Areas
Sandy Soils	Modified Proctor	95%	90%
Clayey Soils	Standard Proctor	95%	90%

unless approved otherwise in the soils report or by the CLIENT.

The CONTRACTOR shall notify the CLIENT if proper compaction cannot be obtained so that the CLIENT may determine what remedial measures may be needed.

A soils testing firm employed by the CLIENT shall determine which soils are unsuitable. Materials in their natural state being defined as unsuitable that would be suitable material if moisture conditioned, shall be conditioned by the CONTRACTOR and used as suitable embankment material or hauled from the site.

For purposes of definition, unsuitable material shall be as follows unless determined otherwise by the Soils Engineer:

a. Any soil whose optimum moisture content exceeds 25%.
b. Any cohesive soil with a unconfined compressive strength of 1.5 tons per square foot or less.
c. Any soil whose silt content exceeds 60% by weight.
d. Any soil whose maximum density is less than 100 pounds per cubic foot.
e. Any soil containing organic, deleterious, or hazardous material.

Upon completion of excavation and shaping of the water retention areas, all silt seams and granular or sandy soils shall be removed to a minimum depth of three feet below the subgrade and replaced with an impermeable clay liner, including adjacent to and under storm sewer inlets and outlets. It is the intent of these PLANS and SPECIFICATIONS that the CONTRACTOR shall prepare the lake bottoms, side slopes, and compaction thereof so that the lakes will maintain the proposed normal water level and that leakage does not exceed ½ inch per week.

Ditches and swales are to be excavated to the lines and grades indicated on the PLANS. All suitable materials excavated from the ditches shall be used in construction of the embankments.

The CONTRACTOR shall notify the CLIENT immediately upon encountering groundwater during excavation. If in the opinion of the CLIENT or the JURISDICTIONAL GOVERNING ENTITY this condition necessitates the installation of perforated drain tile bedded in washed gravel or open storm sewer joints wrapped with fabric, the CONTRACTOR shall install same.

During excavation and embankment, grades may be adjusted to provide an overall site earthwork balance. The CONTRACTOR shall cooperate fully with the CLIENT in adjustment of grades, construction methods and placement of material to meet the above goals and shall immediately advise CLIENT if he believes that the earthwork will not balance.

It is the intent of these PLANS that storm waters falling on the site be diverted into sedimentation / lake / detention basins during construction. The CONTRACTOR shall construct and maintain any temporary ditches or swales that are necessary to accomplish this prior to beginning mass excavation.

EROSION CONTROL

Suitable erosion control practices shall be maintained by the CONTRACTOR in accordance with Illinois Urban Manual and all applicable Soil Erosion and Sedimentation Control ordinances and the PLANS.

UNDERCUTTING DURING EARTHWORK

If the subgrade cannot be dried adequately by discing as outlined above for placement of material to planned grades and if the CLIENT determines that the subgrade does not meet the standards set forth above, the CLIENT may require undercutting.

II. UNDERGROUND IMPROVEMENTS

A. GENERAL

STANDARDS

All underground improvements shall be constructed and tested in accordance with the Standard Specifications for Water and Sewer Main Construction in Illinois, latest edition, The Standard Specifications for Road and Bridge Construction, Department of Transportation, State of Illinois and the Village of Tinley Park Water Main, Sanitary Sewer and Storm Sewer Specifications and Details, latest version. In the event of conflicting guidelines, the more restrictive shall govern.

SELECTED GRANULAR BACKFILL

Selected Granular Backfill shall be required for all sewer and water main trenches lying under existing or proposed streets, driveways, parking lots and within 24" thereof, and where noted on PLANS. All material placed in such trenches shall be in accordance with the above standards.l

MANHOLES, CATCH BASIN, INLETS & VALVE VAULTS

All Manholes, Catch Basins, Inlets, and Valve Vaults shall be constructed of reinforced precast concrete ring construction with tongue and groove joints in conformance with the latest revision of ASTM designation C-478. All joints between sections and frames (except sanitary manholes, see Section IIB Manholes, below) shall be sealed with mastic type bituminous jointing compound. CONTRACTOR shall remove all excess mastic on inside of structure and butter joints with mortar. Manholes are to have offset cones except that no cone shall be used on storm manholes 6'-0" deep or less in which case a reinforced concrete flat top section shall be used, and Valve Vaults shall have concentric cones. Only concrete adjustment rings will be permitted where necessary and shall be limited to two adjustment rings totaling not more than 8" in height. All manholes and catch basin steps shall be copolymer polypropylene with continuous ½" steel reinforcement as manufactured by MA Industries, or approved equal.

HORIZONTAL AND VERTICAL SEPARATION OF WATER AND SEWER MAINS

Horizontal and vertical separation of water and sewer mains shall be in accordance with Standard Specifications for Water and Sewer Construction in Illinois Section 41-2.01B and 41-2.01C and Standard Drawing 18, 19, 20, 21, 22, 23 and 24.

STRUCTURE ADJUSTMENTS

Structures shall be adjusted to the finished grade as shown on PLANS.

B. SANITARY SEWERS AND APPURTENANCES

SANITARY SEWER PIPE

Sanitary sewer pipe including building services, shall conform to the following:

(a) Polyvinyl Chloride (PVC) Sewer Pipe shall conform to ASTM D-3034 minimum, SDR 21 with gasket joints conforming to ASTM D-3212.

Sanitary sewers shall include bedding and backfilling.

BEDDING

Bedding shall be placed as shown on the detail.

TESTING

Sanitary sewers shall be air tested and tested for deflection in accordance with the requirements of Section 31-1.1 "TESTING AND INSPECTION FOR ACCEPTANCE OF SANITARY SEWERS" of the Standard Specifications for Water and Sewer Main Construction in Illinois or the JURISDICTIONAL GOVERNING ENTITY, whichever is more restrictive. In addition, a televised inspection of the completed sanitary sewers shall be conducted and a copy of the videotape and report furnished to the JURISDICTIONAL GOVERNING ENTITY.

All sanitary manholes are to be tested for water tightness in accordance with ASTM C969-94-"Standard Practice for Infiltration and Exfiltration Acceptance Testing of Installed Precast Concrete Pipe Sewer Lines", Vol. 04.05 or ASTM C1244-93-"Standard Test Method for Concrete Sewer Manholes by the Negative Pressure (Vacuum) Test", Vol. 04-05.

SERVICES

A wye branch or "tee" and sanitary service line, properly plugged and sealed shall be constructed as shown on the PLANS. The ends of all services shall be marked with a 4"x4" post extending 36" above grade and painted red. The CONTRACTOR shall keep accurate records of all Wye or Tee locations as measured from the downstream manhole as well as the service lengths and furnish same to CLIENT.

RISERS

Risers shall be constructed in locations as shown on the PLANS and according to the detail.

TELEVISION INSPECTION

Upon completion of construction a television inspection of the sanitary sewer system shall be performed on all portions of the sewer if required by the JURISDICTIONAL GOVERNING ENTITY. Videotapes and written report of all television inspections shall be provided to the CLIENT. The form of report and type and format of the videotape shall be approved by the JURISDICTIONAL GOVERNING ENTITY.

All sewers and appurtenances shall be cleaned prior to inspection and testing required by this section.

All defects and corrective work required as the result of television inspection shall be performed by the CONTRACTOR without delay. All dips, cracks, leaks, improperly sealed joints and departures from approved grades and alignment shall be repaired by removing and replacing the involved sections of pipe. Upon completion thereof, the sewer shall be retested and such further inspection made as may appear warranted by the CLIENT.

MISCELLANEOUS

All floor drains shall be connected to the sanitary sewer.

C. STORM SEWERS AND APPURTENANCES

STORM SEWER PIPE

Storm sewer pipe shall conform to the following:

(a) Polyvinyl Chloride (PVC) Pipe: ASTM D3034, rated SDR 35, continually marked with manufacturer's name, pipe size, cell classification, SDR rating. Joints shall conform to ASTM D3212.

Storm sewer shall include bedding and trench backfill.

BEDDING

Bedding shall be placed as shown on the detail.

UNDERDRAINS

Pipe underdrains shall be corrugated flexible plastic pipe conforming to AASHTO Designation M252, 4-inch perforated corrugated polyethylene pipe (PCPP) with a smooth interior and wrapped in a soil filter fabric supplied and installed by the CONTRACTOR. CONTRACTOR shall submit fabric and pipe catalogue Specifications for approval by the CLIENT. CONTRACTOR shall bed and backfill the underdrain in one of the following IDOT gradations of aggregate (CA5, CA7, CA11, CA14 or CA15).

MISCELLANEOUS

(a) All existing field drainage tile or storm sewers encountered or damaged during construction shall either be restored to their original condition, properly rerouted and/or connected to the storm sewer system.

(b) Footing drains shall be connected to sump pumps or discharged directly into storm sewers. Footing drains or drainage tile shall not be connected to the sanitary sewer.

III. ROADWAY AND PARKING LOT IMPROVEMENTS

STANDARDS

Work shall be completed in accordance with the applicable sections of the Standard Specifications for Road and Bridge Construction, Department of Transportation, State of Illinois, latest edition.

SUBGRADE PREPARATION

The CONTRACTOR shall be responsible for all subgrade compaction and preparation to ±0.1-foot of the proposed subgrade elevation with the average subgrade elevation to be within ±0.02-feet of the proposed subgrade grade elevation.

BITUMINOUS BASE COURSE

Bituminous base course shall be installed where shown on the PLANS and shall have a Marshall stability of 750 or greater.

AGGREGATE BASE COURSE TYPE 'B'

Compacted aggregate base course type "B" shall be constructed using IDOT Type CA6 materials and shall be placed where shown on the PLANS.

BITUMINOUS CONCRETE, BINDER AND SURFACE COURSE

Bituminous pavement shall consist of bituminous concrete binder and surface courses (IDOT) Class I, to the compacted thickness as shown on the PLANS. The base course shall be cleaned and primed in accordance with the JURISDICTIONAL GOVERNING ENTITY. The bituminous concrete surface course shall be placed after the base course has gone through one winter season, as directed by the CLIENT. Prior to the placement of the bituminous concrete surface, the JURISDICTIONAL GOVERNING ENTITY shall examine the completed pavement, including curb and gutter, and all failures shall be corrected by the CONTRACTOR.

SIDEWALKS

Concrete sidewalks shall be constructed to width and thickness as shown on the PLANS. Sidewalks shall be thickened to a minimum of 6" at all driveways. All sidewalks shall be IDOT Class SI concrete, on aggregate base as shown on the detail. A ½" expansion joint shall be provided when meeting existing sidewalk.

CURB AND GUTTER

Curb and gutter shall be as per the detail shown on the PLANS, which shall include compacted aggregate base course under the curb and gutter. All contraction and expansion joints shall be constructed as per the detail.

CONCRETE PAVEMENTS

Concrete pavements shall be constructed as shown on the PLANS. Slabs and aprons shall be constructed with 6" x 6" - W2.9 x W2.9 welded wire fabric on a aggregate base course Type B. The CONTRACTOR shall sawcut joints in concrete pavements immediately after installation.

CONCRETE CURB REMOVAL AND REPLACEMENT

The CONTRACTOR shall saw cut and remove the existing concrete curb where shown on the PLANS and install a curb of similar cross section and pavement to that removed (or depressed curb and gutter if shown on the PLANS). Upon completion of the curb all voids, if any, between the existing pavement and the new curb shall be filled with concrete to within 2" of the final surface, which is to be filled with bituminous pavement. The area behind the curb shall be filled and compacted with embankment material within 6" of the top of the new curb. The CONTRACTOR shall then restore the remaining 6" to its original condition (i.e., sod, gravel, topsoil). Where proposed curb connects to an existing curb, the existing curb shall be saw cut and then two 18" long x ¾" (#6) dowel bars shall be drilled and installed 9" into the existing and proposed curb. Bars shall be installed in a location similar to the expansion joint in the curb.

PROOF ROLLING

The CONTRACTOR shall provide a fully loaded vehicle, size approved by the CLIENT or JURISDICTIONAL GOVERNING ENTITY if required. Proof rolling shall be observed by the CLIENT and JURISDICTIONAL GOVERNING ENTITY. It shall be at the CLIENT's option which of the following methods of proof rolling is to be completed:

(a) If the base course is proof-rolled and passes, then the binder course and the surface course may be placed without further proof rolling.

(b) If the binder course is placed it will be proof-rolled when the CLIENT requests and the surface course shall not be applied until the binder course passes a proper proof rolling.

In any case, the base course and/or the binder course shall be repaired before proceeding to the next step.

PAVEMENT MARKING - PAINT

The CONTRACTOR shall furnish and apply painted marking lines, letters & symbols of the patterns, sizes and colors where shown on the PLANS. Paint shall be as follows:

Federal SPECIFICATIONS and Standards:

1. A-A-2886A Paint, Traffic, Solvent Based (supercedes FS TT-P-85E and FS-TT-P-115F, Type I).

American Association of State Highway and Transportation (AASHTO)

1. AASHTO M248 Ready-Mixed White and Yellow Traffic Paints

PAVEMENT MARKING - THERMOPLASTIC

The CONTRACTOR shall furnish and apply extruded thermoplastic pavement marking lines, letters and symbols of the patterns, sizes and colors where shown on the PLANS. Thermoplastic pavement marking shall be installed in accordance with the IDOT Standard Specifications.

INSURANCE AND LEGAL

HOLD HARMLESS

To the fullest extent permitted by law, the CONTRACTOR shall waive any right of contribution and shall indemnify and hold harmless the ENGINEER, its agents, employees and consultants from and against all claims, damages, losses and expenses, including but not limited to, attorneys' fees and economic or consequential damages, arising out of or resulting from or in connection with the performance of their work. However, this indemnity agreement shall not require the CONTRACTOR to indemnify the ENGINEER, it s consultants, agents or employees against its own negligence.

Claims, damages, losses and expenses as these words are used in the Agreement shall be construed to include, but not be limited to (1) injury or damage consequent upon the failure of or use or misuse of any hoist, rigging, blocking, scaffolding or any and all other kinds of items of equipment, whether or not the same be owned, furnished or loaned by the CONTRACTOR; (2) all attorneys' fees and costs incurred in bringing an action to enforce the provisions of this indemnity or any other indemnity; and (3) time expended by the party being indemnified and their employees, at their usual rates plus costs or travel, long distance telephone and reproduction of documents.

Only to the extent necessary to prevent this provision from being void under Statute 740 ILCS 35/1, this indemnity agreement shall not require the CONTRACTOR to indemnify the ENGINEER, its consultants, agents or employees against its own negligence.

INSURANCE

CONTRACTOR will purchase insurance to protect the ENGINEER and its consultants, agents, and employees from any claims for bodily injuries or property damage arising out of the construction work, including but not limited to naming the ENGINEER and its consultants, agents and employees as additional named insureds under the CONTRACTOR'S general liability policy applicable to the project, which must contain a clause stating that it is primary coverage for the ENGINEER with ENGINEER'S other applicable coverage to be considered excess.

THIRD PARTY BENEFICIARY

The ENGINEER is intended to be a third party beneficiary of the construction contract.

SCHEDULE B SURVEY RELATED ITEMS

PER FREEDOM TITLE CORPORATION COMMITMENT NUMBER: 6719213 DATED DECEMBER 31, 2020.

ITEM 17: RECIPROCAL EASEMENT AGREEMENT DATED JUNE 30, 2006 AND RECORDED JULY 5, 2006 AS DOCUMENT NO. 0618632049 (NOT PLOTABLE-SEE DOCUMENT FOR PARTICULARS).

ITEM 19: EASEMENT IN FAVOR OF VILLAGE OF TINLEY PARK,NORTHERN ILLINOIS GAS CO. (NICOR), ILLINOIS BELL TELEPHONE COMPANY D/B/A AT&T, THE COMMONWEALTH EDISON COMPANY AND COMCAST CORPORATION, AND ITS/THEIR RESPECTIVE SUCCESSORS AND ASSIGNS,TO INSTALL, OPERATE AND MAINTAIN ALL EQUIPMENT NECESSARY FOR THE PURPOSE OF SERVICING THE LAND AND OTHER PROPERTY, TOGETHER WITH THE RIGHT OF ACCESS TO SAID EQUIPMENT,AND THE PROVISIONS RELATING THERETO CONTAINED IN THE GRANT RECORDED AS DOCUMENT NO. 0608145020, AFFECTING THE SOUTH AND WEST 15 FEET OF LOT 11 AND THE EAST 7.5 FEET OF LOT 11 AND AMENDMENT RECORDED NOVEMBER 1, 2006 AS DOCUMENT NO. 0630546010. (SHOWN HEREON).

ITEM 20: RIGHT OF WAY ENCROACHMENT WAIVER AND AGREEMENT RECORDED DECEMBER 22, 2009 AS DOCUMENT NO. 0935603045 (NOT PLOTTABLE, SEE DOCUMENT FOR PARTICULARS).

ITEM 21: TERMS AND PROVISIONS AS CONTAINED IN THE AGREEMENT RECORDED DECEMBER 17, 2004 AS DOCUMENT 0435245107 MADE BY AND BETWEEN VILLAGE OF TINLEY PARK AND SORD MANAGEMENT INC. (NOT PLOTTABLE, SEE DOCUMENT FOR PARTICULARS).

ITEM 25: PERPETUAL SIGN EASEMENT TOGETHER WITH ACCESS CREATED BY THE GRANT OF PERPETUAL EASEMENTS AND DECLARATION OF RESTRICTIONS RECORDED JANUARY 28, 2000 AS DOCUMENT 00076064 OVER THE LAND. (SIGN EASEMENT ON LOT 11 SHOWN HEREON).

ITEM 26: EASEMENT PROVISION, FOR EACH AND EVERY PARCEL, A NON-EXCLUSIVE IRREVOCABLE AND PERPETUAL EASEMENT FOR THE PARKING OF PASSENGER VEHICLES AND FOR PEDESTRIAN AND VEHICULAR INGRESS AND EGRESS UPON, OVER AND ACROSS ALL THE SIDEWALKS,ENTRANCES, DRIVES, LANES,ROADWAYS AND SERVICE DRIVES AS THE SAME MAY EXIST FROM TIME TO TIME WITH EACH PARCEL HAVING AT LEAST ONE ENTRANCE TO EACH ADJOINING PARCEL AS GRANTED ON PLAT OF FORMULA SUBDIVISION RECORDED JANUARY28, 2000 AS DOCUMENT 00076061. NOTE: LOTS 1, 2, 3 AND 4 IN FORMULA SUBDIVISION HAVE BEEN RESUBDIVIDED INTO PARK HILLS TOWNE CENTRE RESUBDIVISION RECORDED AS DOCUMENT NO. 0528603044. (SEE DOCUMENT FOR PARTICULARS).

ITEM 27: RIGHTS OF THE PUBLIC, THE STATE OF ILLINOIS AND THE MUNICIPALITY IN AND TO THAT PART OF THE LAND, IF ANY, TAKEN OR USED FOR ROAD PURPOSES: (SHOWN HEREON)

TABLE "A" NOTES:

ITEM 2: COMMON ADDRESS: 9561 WEST 171ST STREET, TINLEY PARK, ILLINOIS 60487

ITEM 3: I CERTIFY THAT A REVIEW OF THE FEDERAL EMERGENCY MANAGEMENT AGENCY (FEMA) FLOOD INSURANCE RATE MAPS COMMUNITY PANEL 17031C0703K WITH AN EFFECTIVE DATE OF NOVEMBER 1, 2019 THAT THE PROPERTY PLATTED HEREON IS SITUATED IN ZONE "X", AREAS DETERMINED TO BE OUTSIDE THE 0.2% ANNUAL CHANCE FLOODPLAIN AS DESIGNATED BY FLOOD INSURANCE RATE MAP.

ITEM 4: TOTAL AREA ± 45,697.08 SQUARE FEET OR 1.049 ACRES

ITEM 8: SUBSTANTIAL FEATURES ARE AS SHOWN ON THE FACE OF PLAT.

ITEM 9: 33 REGULAR AND 2 HANDICAPPED ON-SITE PAINTED PARKING SPACES AT THE TIME OF THIS SURVEY.

ITEM 11: EXISTING UNDERGROUND UTILITIES ARE SHOWN AS OBSERVED EVIDENCE ONLY. NO PLANS OR REPORTS HAVE BEEN PROVIDED TO THE SURVEYOR. A UTILITY LOCATE MARKINGS REQUEST HAD NOT BEEN PERFORMED FOR THIS SITE AT THE TIME OF THE SURVEY.

GRAPHIC SCALE

20 0 10 20 40 80

(IN FEET)
1 inch = 20 ft.

NOTES:
THIS COPY NOT VALID WITHOUT EMBOSSED SEAL.
ALL DISTANCES ARE IN FEET AND DECIMAL PARTS THEREOF.
BUILDING LINES AND EASEMENTS ARE SHOWN ONLY WHERE THEY ARE SO RECORDED IN THE MAPS. COMPARE THE LEGAL DESCRIPTION, BUILDING LINES, AND EASEMENTS AS SHOWN HEREON WITH YOUR DEED OR TITLE POLICY.
CONSULT THE LOCAL AUTHORITIES FOR ADDITIONAL SETBACK LINES AND RESTRICTIONS NOT SHOWN HEREON. COMPARE ALL POINTS PRIOR TO CONSTRUCTION AND REPORT ANY DISCREPANCIES AT ONCE.
DO NOT ASSUME DISTANCES FROM SCALED MEASUREMENTS MADE HEREON.

GENERAL NOTES

1. THESE INSTRUCTIONS TO BIDDERS AND GENERAL CONDITIONS SHALL BE CONSIDERED PART OF THE CONTRACT DOCUMENTS.

2. ALL WORK IS TO BE COMPLETED IN STRICT ACCORDANCE WITH ALL APPLICABLE CODES, ORDINANCES, RULES, REGULATIONS, AND STANDARDS, INCLUDING, BUT NOT LIMITED TO THE 2012INTERNATIONAL BUILDING CODE , THE ILLINOIS HANDICAPPED CODE, THE ILLINOIS PLUMBING, MECHANICAL, AND ELECTRICAL CODES, THE ILLINOIS FIRE CODE, THE AMERICANS WITH DISABILITIES ACT (ADA), AND APPLICABLE TRADE STANDARDS. ALL APPLICABLE RULES AND REGULATIONS ARE TO BE THE MOST CURRENT ADOPTED EDITION.

3. THE GENERAL CONTRACTOR (GC) IS RESPONSIBLE FOR OBTAINING ALL STATE AND LOCAL PERMITS REQUIRED FOR THE COMPLETION OF THE PROJECT. THE GENERAL CONTRACTOR SHALL PAY ALL PERMIT FEES, PLAN REVIEW FEES, LICENSE FEES, INSPECTION AND TAXES APPLICABLE TO THIS DIVISION AND SHALL BE INCLUDED IN THE BASE BID AS PART OF THIS CONTRACT.

4. ALL WORK MATERIALS AND CONSTRUCTION DETAILS MUST COMPLY WITH ANY AND ALL APPLICABLE FEDERAL, STATE AND LOCAL BUILDING, HEALTH AND FIRE CODES. THIS INCLUDES THE GOVERNING CODES AND ORDINANCES OF THE VILLAGE OF TINLEY PARK AND OTHER APPLICABLE FEDERAL AND STATE REGULATIONS.

5. THE GENERAL CONTRACTOR AND ALL SUB-CONTRACTORS SHALL COMPLY WITH THE LATEST EDITION OF THE O.S.H.A. CONSTRUCTION AND SAFETY MANUAL.

6. THE GC SHALL COORDINATE WITH OWNER AND/OR ARCHITECT ALL PHASING OF CONSTRUCTION OPERATIONS IN ORDER TO MAINTAIN USE OF ALL CRITICAL FUNCTIONS, UTILITIES, SERVICES AND OTHER RELATED ITEMS WITHIN THE EXISTING FACILITIES. COORDINATE WITH ARCHITECT AND/OR OWNER PRIOR TO BIDDING.

7. GC SHALL ADVISE THE ARCHITECT AND OWNER, IN WRITING, OF THE ACTUAL START OF WORK DATE - TO BEGIN IMPLEMENTATION OF THE WORK INDICATED ON THESE DRAWINGS. GC TO FURNISH A GRAPHIC CONSTRUCTION SCHEDULE SHOWING MAJOR TRADES AND FINAL COMPLETION OF SAME.

8. THE ARCHITECT SHALL HAVE THE RIGHT AT ANY TIME TO MAKE ALTERATIONS, ADDITIONS TO AND DEDUCTIONS FROM THE WORK SHOWN ON THE DRAWINGS OR DESCRIBED IN THE SPECIFICATIONS WITHOUT VOIDING THE CONTRACT. ALL SUCH ITEMS WILL BE COVERED BY A REVISION DATE TO THE PLANS, WRITTEN JOB ORDER AND/OR SUPPLEMENT TO THE CONTRACT BY THE OWNER AND THE ARCHITECT. THE CONTRACTOR SHALL COMPUTE THE VALUE OF THE WORK AND SUBMIT A PROPOSAL FOR THE APPROVAL OF THE ARCHITECT AND THE OWNER. IN THE CASE OF REVISION, ADDENDUM, OR BULLETIN, THE CONTRACTOR SHALL NOT PROCEED WITH CHANGES WITHOUT AN AUTHORIZED JOB ORDER OR SUPPLEMENT TO THE CONTRACT.

9. ANY CHANGES, SUBSTITUTION, OMISSION, OR OTHER DEVIATIONS FROM THESE DRAWINGS DURING OR BEFORE CONSTRUCTION OF THE BUILDING SHALL NOT BE THE RESPONSIBILITY OF THE ARCHITECT UNLESS AUTHORIZED IN WRITING BY THE ARCHITECT, OR HIS CONSULTANTS. CHANGES NOT APPROVED SHALL BE CORRECTED AT THE CONTRACTOR'S EXPENSE.

10. THE GC, WITHOUT EXTRA CHARGE, SHALL MAKE SUCH SLIGHT ALTERATION: CUTTING FITTING OR PATCHING OF HIS WORK AS MAY BE NECESSARY TO MAKE ADJUSTABLE PARTS FIT TO FIXED PARTS, LEAVING ALL COMPLETE AND IN PROPER CONDITION WHEN COMPLETED.

11. ALL CONTRACTORS ARE REQUIRED TO VISIT THE JOBSITE AND BECOME FAMILIAR WITH EXISTING CONDITIONS PRIOR TO SUBMITTING THEIR PROPOSAL. EACH INDIVIDUAL CONTRACTOR IS RESPONSIBLE FOR CHECKING ALL CONTRACT DOCUMENTS FOR FIELD CONDITIONS AND DIMENSIONS FOR ACCURACY PRIOR TO SUBMITTING BIDS AND/OR PROCEEDING WITH ANY WORK. SHOULD ANY CONTRACTOR FIND DISCREPANCIES IN, OR OMISSION FROM THE DRAWINGS, OR SPECIFICATIONS, OR BE IN DOUBT AS TO THEIR MEANING, NOTIFY THE ARCHITECT AT ONCE, IN WRITING, OF ANY DISCREPANCIES BETWEEN EXISTING CONDITIONS OR THE WORK OF OTHER TRADES PRIOR TO OBTAIN CLARIFICATION PRIOR TO SUBMITTING BID. LACK OF SUCH NOTIFICATION SHALL BE CONSTRUED TO INDICATE NO DISCREPANCIES OR CONFLICTS EXIST. ADDITIONAL COMPENSATION WILL NOT BE GRANTED AFTER THE AWARD OF THE CONTRACT FOR ANY WORK REQUESTED TO COMPLY WITH THESE REQUIREMENTS.

12. IT SHALL BE THE RESPONSIBILITY OF EACH CONTRACTOR AND HIS RESPECTIVE SUBCONTRACTORS TO KEEP THE BUILDING AND ADJOINING PREMISES FREE AT ALL TIMES FROM THE ACCUMULATION OF DEBRIS CAUSED AS A RESULT OF THE WORK PERFORMED EACH DAY OF CONSTRUCTION.

13. THE GENERAL CONTRACTOR SHALL PROVIDE TEMPORARY BARRIERS OR PARTITIONS DURING CONSTRUCTION TO PREVENT SPREAD OF DUST OR OTHER RELATED MATERIALS. VERIFY AND COORDINATE LOCATIONS WITH THE ARCHITECT AND/OR OWNER. CONTRACTOR SHALL MAINTAIN ALL REQUIRED EXITWAYS AT ALL TIMES.

14. THE GENERAL CONTRACTOR SHALL BE RESPONSIBLE FOR THE REMOVAL OF ALL DEMOLITION MATERIAL. REMOVAL OF DEBRIS AND DUMPSTER LOCATION MUST BE COORDINATED WITH OWNER/PROPERTY MANAGER.

15. THE METHOD OF ATTACHING NEW CONSTRUCTION TO EXISTING BUILDING STRUCTURE WILL BE IN ACCORDANCE WITH OWNERS CRITERIA AND AS REQUIRED BY CODE.

16. ALL MATTERS OF AESTHETIC EFFECT MUST BE DETERMINED BY THE ARCHITECT.

17. UNLESS OTHERWISE NOTED: WHERE EXISTING PARTITION AND WALLS ARE TO BE REMOVED, CONTRACTOR SHALL REMOVE OR RELOCATE ALL EXISTING ELECTRICAL CONDUITS, PLUMBING AND OTHER RELATED ITEMS SO AS TO RECEIVE NEW CONSTRUCTION. NON-RELOCATED LIGHT FIXTURES, SPEAKERS, ETC., WILL BE TURNED BACK TO OWNER OR DISPOSED OF AT HIS DIRECTION.

18. WHERE EXISTING ITEMS ARE TO BE RELOCATED AND/OR REINSTALLED, THE CONTRACTOR SHALL INSTALL SUCH ITEMS EQUALING OR EXCEEDING THE QUALITY OF EXISTING INSTALLATION BOTH STRUCTURALLY AND AESTHETICALLY. CONTRACTOR TO VERIFY PROCEDURE WITH THE ARCHITECT.

19. IN ALL AREAS WHERE EXISTING CONDITIONS ARE ALTERED, NEW MATERIALS, PARTITIONS, OR PRODUCTS ARE INSTALLED, THE CONTRACTOR SHALL PATCH AND FINISH FLOORS, WALLS, CEILINGS AND OTHER AFFECTED AREAS TO MATCH EXISTING CONDITIONS.

20. CONTRACTOR TO REPLACE OR CORRECT ANY AND ALL EXISTING CONSTRUCTION TO REMAIN, TO MATCH THAT DAMAGED BY CONSTRUCTION AND/OR INSTALLATION PROCESS AT NO ADDITIONAL COST TO THE OWNER.

21. CONTRACTORS TO REPLACE ALL DAMAGED AND/OR MISSING CEILING GRID. REPLACE ALL DAMAGED, DISCOLORED OR MISSING CEILING TILES WITH NEW TO MATCH EXISTING.

22. ARCHITECTURAL DRAWINGS TAKE PRECEDENCE OVER ENGINEERING DRAWINGS FOR ELECTRICAL AND TELEPHONE OUTLETS AND LIGHT FIXTURE LOCATIONS. G.C. TO NOTIFY ARCH. OF DISCREPANCIES.

23. GENERAL CONTRACTORS SHALL COORDINATE ALL MECHANICAL AND ELECTRICAL FLOOR AND WALL SLEEVES, CONDUIT AND ALL MECHANICAL SHAFTS WITH THE MECHANICAL, ELECTRICAL, PLUMBING, FIRE PROTECTION, STRUCTURAL AND ARCHITECTURAL DRAWINGS.

24. DIMENSIONS SHOWN ARE TO FINISH FACE OF WALL, UNLESS SPECIALTY NOTED OTHERWISE. PARTITION THICKNESS AND CONSTRUCTION ARE DESIGNATED BY PARTITION TARGETS-REFER TO PARTITION DETAILS FOR REQUIREMENTS.

25. CONTRACTORS TO MEET WITH BUILDING MANAGEMENT PRIOR TO BEGINNING OF WORK TO UNDERSTAND BUILDING RULES, HOURS OF WORK, REMOVAL OF DEBRIS, ETC.

26. ANY SHUTDOWNS WILL BE COORDINATED WITH BUILDING MANAGEMENT.

27. ALL WORK IS TO BE COORDINATED BY THE GENERAL CONTRACTOR TO ASSURE ADEQUATE FIT, FINISH, SYSTEM OPERATION, AND FULL COMPLETION OF THE WORK, INCLUDING SERVICE REQUIREMENTS OF THE OWNERS FIXTURES, FURNISHING AND EQUIPMENT.

28. ALL DIMENSIONS ARE SHOWN ON DRAWINGS. ANY DIMENSIONS NOT SHOWN OR DEEMED QUESTIONABLE ARE TO BE VERIFIED WITH THE ARCHITECT DESIGNER. DO NOT SCALE DRAWINGS.

29. CONTRACTOR IS TO SIGN EACH SHOP DRAWING SUBMITTAL CERTIFYING THAT THE SUBMITTAL HAS BEEN REVIEWED, APPROVED, AND THAT THE CONTRACTOR COORDINATION HAS BEEN APPROVED.

30. DURING THE ENTIRE PERIOD OF DEMOLITION AND CONSTRUCTION, ALL EXISTING EXITS, EXIT LIGHTING, FIRE PROTECTION DEVICES, AND ALARMS SHALL BE CONTINUOUSLY MAINTAINED IN WORKING ORDER.

31. ALL WOOD WILL BE FIRE RETARDANT TREATED TO COMPLY WITH APPLICABLE CODES.

32. PROVIDE CONCEALED WOOD OR SHEET METAL F.T. BLOCKING FOR ALL MILLWORK AND SPECIALTY ITEMS AND ACCESSORIES HUNG FROM PARTITIONS. (U.N.O.).

33. ALL FIRE EXT. CABINET LOCATIONS ARE TO BE COORDINATED W/THE ARCHITECT/DESIGNER AND LOCAL FIRE OFFICIAL PRIOR TO INSTALLATION.

34. AT COMPLETION OF JOB, PRIOR TO FINAL PAYMENT, GENERAL CONTRACTOR SHALL PROVIDE ONE COMPLETE MARKED-UP SET OF TRANSPARENCIES AND TWO SETS OF PRINTS WITH AS-BUILT CONDITIONS NOTED AND TWO COPIES OF APPLICABLE WARRANTIES, OPERATIONS MANUAL AND/OR MAINTENANCE INSTRUCTIONS.

35. MOVING OF EXISTING KITCHEN EQUIPMENT, EXISTING. DINING ROOM FURNITURE, EXISTING LIBRARY FURNITURE, BOOKS, EQUIPMENT, ETC. BY OWNER.

36. CONTRACTOR TO COORDINATE ALL ACTIVITIES TO FACILITATE WORK. CONTRACTOR TO PROVIDE 5 BUSINESS DAY ADVANCED NOTICE TO CPS PRIOR TO COMMENCEMENT OF WORK.

37. GENERAL CONTRACTOR IS TO COORDINATE WITH SUB CONTRACTORS ALL ASPECTS OF WORK AND IS RESPONSIBLE FOR CONTACTING AOR WITH REGARD TO ANY CONFLICTS.

TYPICAL DEMOLITION NOTES

1. ALL CONTRACTORS TO PROVIDE ALL NECESSARY INSURANCE AND HOLD HARMLESS THE OWNER, PROPERTY MANAGER, ARCHITECT AND AGENTS THEREOF FROM ANY DAMAGES RESULTING FROM CONTRACTORS EXECUTION OF WORK.

2. IT IS THE SOLE RESPONSIBILITY OF THE CONTRACTORS TO DETERMINE IN ACCORDANCE WITH ALL CODES AND OWNERS CRITERIA, ALL METHODS FOR CONSTRUCTION, DEMOLITION, AND ALL RELATED PROCEDURES. THE CONTRACTOR IS RESPONSIBLE FOR ALL MATTERS OF LIFE SAFETY RESULTING FROM ALL CONSTRUCTION AND DEMOLITION.

3. ALL CONTRACTORS SHALL PERFORM THE DEMOLITION WORK IN ACCORDANCE WITH THE CURRENT VERSION OF ANSI/ASSE A10 - THE AMERICAN NATIONAL STANDARDS FOR SAFETY IN CONSTRUCTION AND DEMOLITION OPERATIONS.

4. THE CONTRACTOR SHALL SCHEDULE HIS/HER WORK TO INSURE MINIMUM DISTURBANCE TO THE REMAINDER OF OCCUPIED SPACE(S). THE CONTRACTOR SHALL SUBMIT A DETAILED SCHEDULE OF WORK AT THE PRE-CONSTRUCTION MEETING. ALL UTILITY SHUTDOWNS SHALL BE COORDINATED WITH THE OWNER AND PROPERTY MANAGER.

5. ALL DEMOLITION WORK SHALL BE COORDINATED BY THE GENERAL CONTRACTOR. TIMING OF ALL DEMOLITION WORK SHALL BE COORDINATED BY THE GENERAL CONTRACTOR. ALL CONTRACTORS SHALL COMPLY WITH ALL RULES AND REGULATIONS OF GOVERNMENTAL AUTHORITIES HAVING JURISDICTION OVER DEMOLITION WORK.

6. CONTRACTORS SHALL PROVIDE TEMPORARY PARTITION DUST BARRIERS AT THE BUILDING INTERIOR IN ORDER TO MINIMIZE THE SPREAD OF DUST AND DEBRIS TO THE ADJOINING SPACE(S). THESE SHALL HAVE DRYWALL ON ONE SIDE, TAPED AND PAINTED.

7. THE GENERAL CONTRACTOR SHALL BE RESPONSIBLE FOR THE REMOVAL OF ALL DEMOLITION MATERIAL.

8. CONTRACTOR TO REPLACE OR CORRECT ANY AND ALL EXISTING CONSTRUCTION TO REMAIN, TO MATCH THAT DAMAGED BY CONSTRUCTION AND/OR INSTALLATION PROCESS AT NO ADDITIONAL COST TO THE OWNER. AFTER THE CONTRACTOR REMOVES THE PARTITIONS AND CEILING SYSTEM THE CONTRACTOR MUST CONTACT BOTH THE ARCHITECT AND BUILDING ENGINEER PRIOR TO FURTHER DEMOLITION FOR ANY QUESTIONS/CLARIFICATION REGARDING SYSTEMS TO REMAIN.

9. SELECTIVELY REMOVE, RELOCATE AND/OR MODIFY EXISTING SPRINKLER SYSTEM AS REQUIRED TO MEET VILLAGE OF TINLEY PARK IL AND NFPA CODES AND ACCOMMODATE NEW REFLECTED CEILING PLAN. REFER TO FIRE PROTECTION DRAWINGS.

10. ALL ITEMS REMOVED AND NOT SCHEDULED TO BE REINSTALLED INCLUDING MILLWORK, HARDWARE, SHELVING, LIGHT FIXTURES, THERMOSTATS, ETC. ARE TO BE TURNED OVER TO THE OWNER. IF THE OWNER CHOOSES NOT TO KEEP ANY OF THESE ITEMS CONTRACTOR SHALL DISCARD.

TYPICAL FINISH NOTES

1. PREPARE ALL EXISTING WALLS AND FLOORS TO RECEIVE NEW FINISHES, AS REQUIRED BY THE MANUFACTURER OF THE NEW FINISHES.

2. FINISHED DOOR OPENING IN ALL NEW PARTITIONS SHALL BE SET TO ALLOW FULL TRIM EXPOSURES (4" MIN.) FROM ADJACENT PERPENDICULAR PARTITIONS, UNLESS NOTED OTHERWISE.

3. ALL FINISH CARPENTRY IS TO BE COMPLETED IN STRICT ACCORDANCE WITH A.W.I STANDARDS PREMIUM GRADE.

4. INTERIOR FINISHES: ALL INTERIOR FINISH MATERIAL SHALL COMPLY WITH THE REQUIREMENTS OF ALL APPLICABLE CODES, ORDINANCES AND REGULATORY AGENCIES.

A. ALL INTERIOR FINISHES SHALL BE RATED AS FOLLOWS:

1. ALL INTERIOR WALL & CEILING FINISH MATERIALS SHALL COMPLY WITH THE REQUIREMENTS OF 2009 INTERNATIONAL BUILDING CODE WITH VILLAGE OF TINLEY PARK IL AMENDMENTS, AND SHALL NOT BE LESS RESISTANT TO FLAME SPREAD THAN CLASS 2 FLAME SPREAD RATING 0 TO 25, SMOKE DEVELOPED 200 OR BETTER

2. ALL INTERIORS FLOOR COVERINGS SHALL COMPLY WITH THE 2009 INTERNATIONAL BUILDING CODE WITH VILLAGE OF TINLEY PARK IL AMENDMENT, CLASS B, INTERIOR FLOOR FINISH CRITICAL RADIANT FLUX BETWEEN 0.22 AND 0.44 WATTS/SQUARE CENTIMETER.

B. WALL AND/OR CEILING ASSEMBLIES THAT ARE IDENTIFIED WITH A FIRE RESISTIVE RATING SHALL BE CONSTRUCTED PER PRODUCTS MANUFACTURER'S SPECIFICATIONS AND THE REQUIREMENTS OF ALL APPLICABLE CURRENT CODES AND GOVERNING BODIES.

5. PAINTING AND DECORATING:

A. ALL SURFACES SHALL BE FREE OF DEFECTS, TAPED, FILLED AND SANDED SMOOTH TO RECEIVE INTERIOR FINISH AS SPECIFIED ON THE ROOM FINISH SCHEDULE. ALL PAINT AND WALL COVERING SHALL BE INSTALLED IN STRICT CONFORMANCE WITH THE MANUFACTURERS RECOMMENDATIONS. PATCH ANY CRACKS OR HOLES, SCRAPE LOOSE OR PEELING PAINT, FILL AND SAND SMOOTH, SKIM COAT ANY NECESSARY AREAS SO THAT THE WALLS ARE PERFECTLY SMOOTH PRIOR TO PRIMING

B. EXISTING PAINTED WALLS TO HAVE PATCHED AREAS FILLED, PRIMED, AND ONE FINISH COAT. NEW WORK TO HAVE A PRIMER COAT AND 2 FINISHED COATS. AREAS TO HAVE A SPECIALTY PAINTING SHOULD FOLLOW MANUFACTURERS SPECIFICATIONS.

C. TOUCH-UP EXISTING DOORS TO REMAIN WHICH HAVE DAMAGE WITH MATCHING STAIN AND REVARNISH.

6. FLOORS AND COVERINGS:

A. GENERAL CONTRACTORS SHALL VERIFY THAT ALL FLOORS ARE IN GOOD AND LEVEL CONDITION. ALL AREA FOUND NOT SO ARE TO BE FLASH PATCHED BY GENERAL CONTRACTORS.

B. FLOOR COVERINGS IN CLOSETS SHALL BE THE SAME AS THAT OF THE SPACE UNTO WHICH THE CLOSETS DOOR OPENS, UNLESS NOTED OTHERWISE.

C. WHERE TWO DISSIMILAR FLOORING MATERIALS MEET, GENERAL CONTRACTOR SHALL PROVIDE SUITABLE TRANSITION STRIPE UNLESS NOTED OTHERWISE.

D. PROVIDE AND INSTALL RESILIENT BASE SPECIFIED. INSTALLATION OF ALL WALL BASE SHALL BE IN STRICT ACCORDANCE WITH MANUFACTURERS RECOMMENDATION. WHERE BASE IS BEING PATCHED CONTRACTOR TO USE MINIMUM OF 6'-0" PIECES.

7. THE COLOR AND TEXTURE OF ALL NEW CONSTRUCTION SURFACES TO MATCH THAT OF EXISTING ADJACENT SURFACES UNLESS OTHERWISE INDICATED OR NOTED.

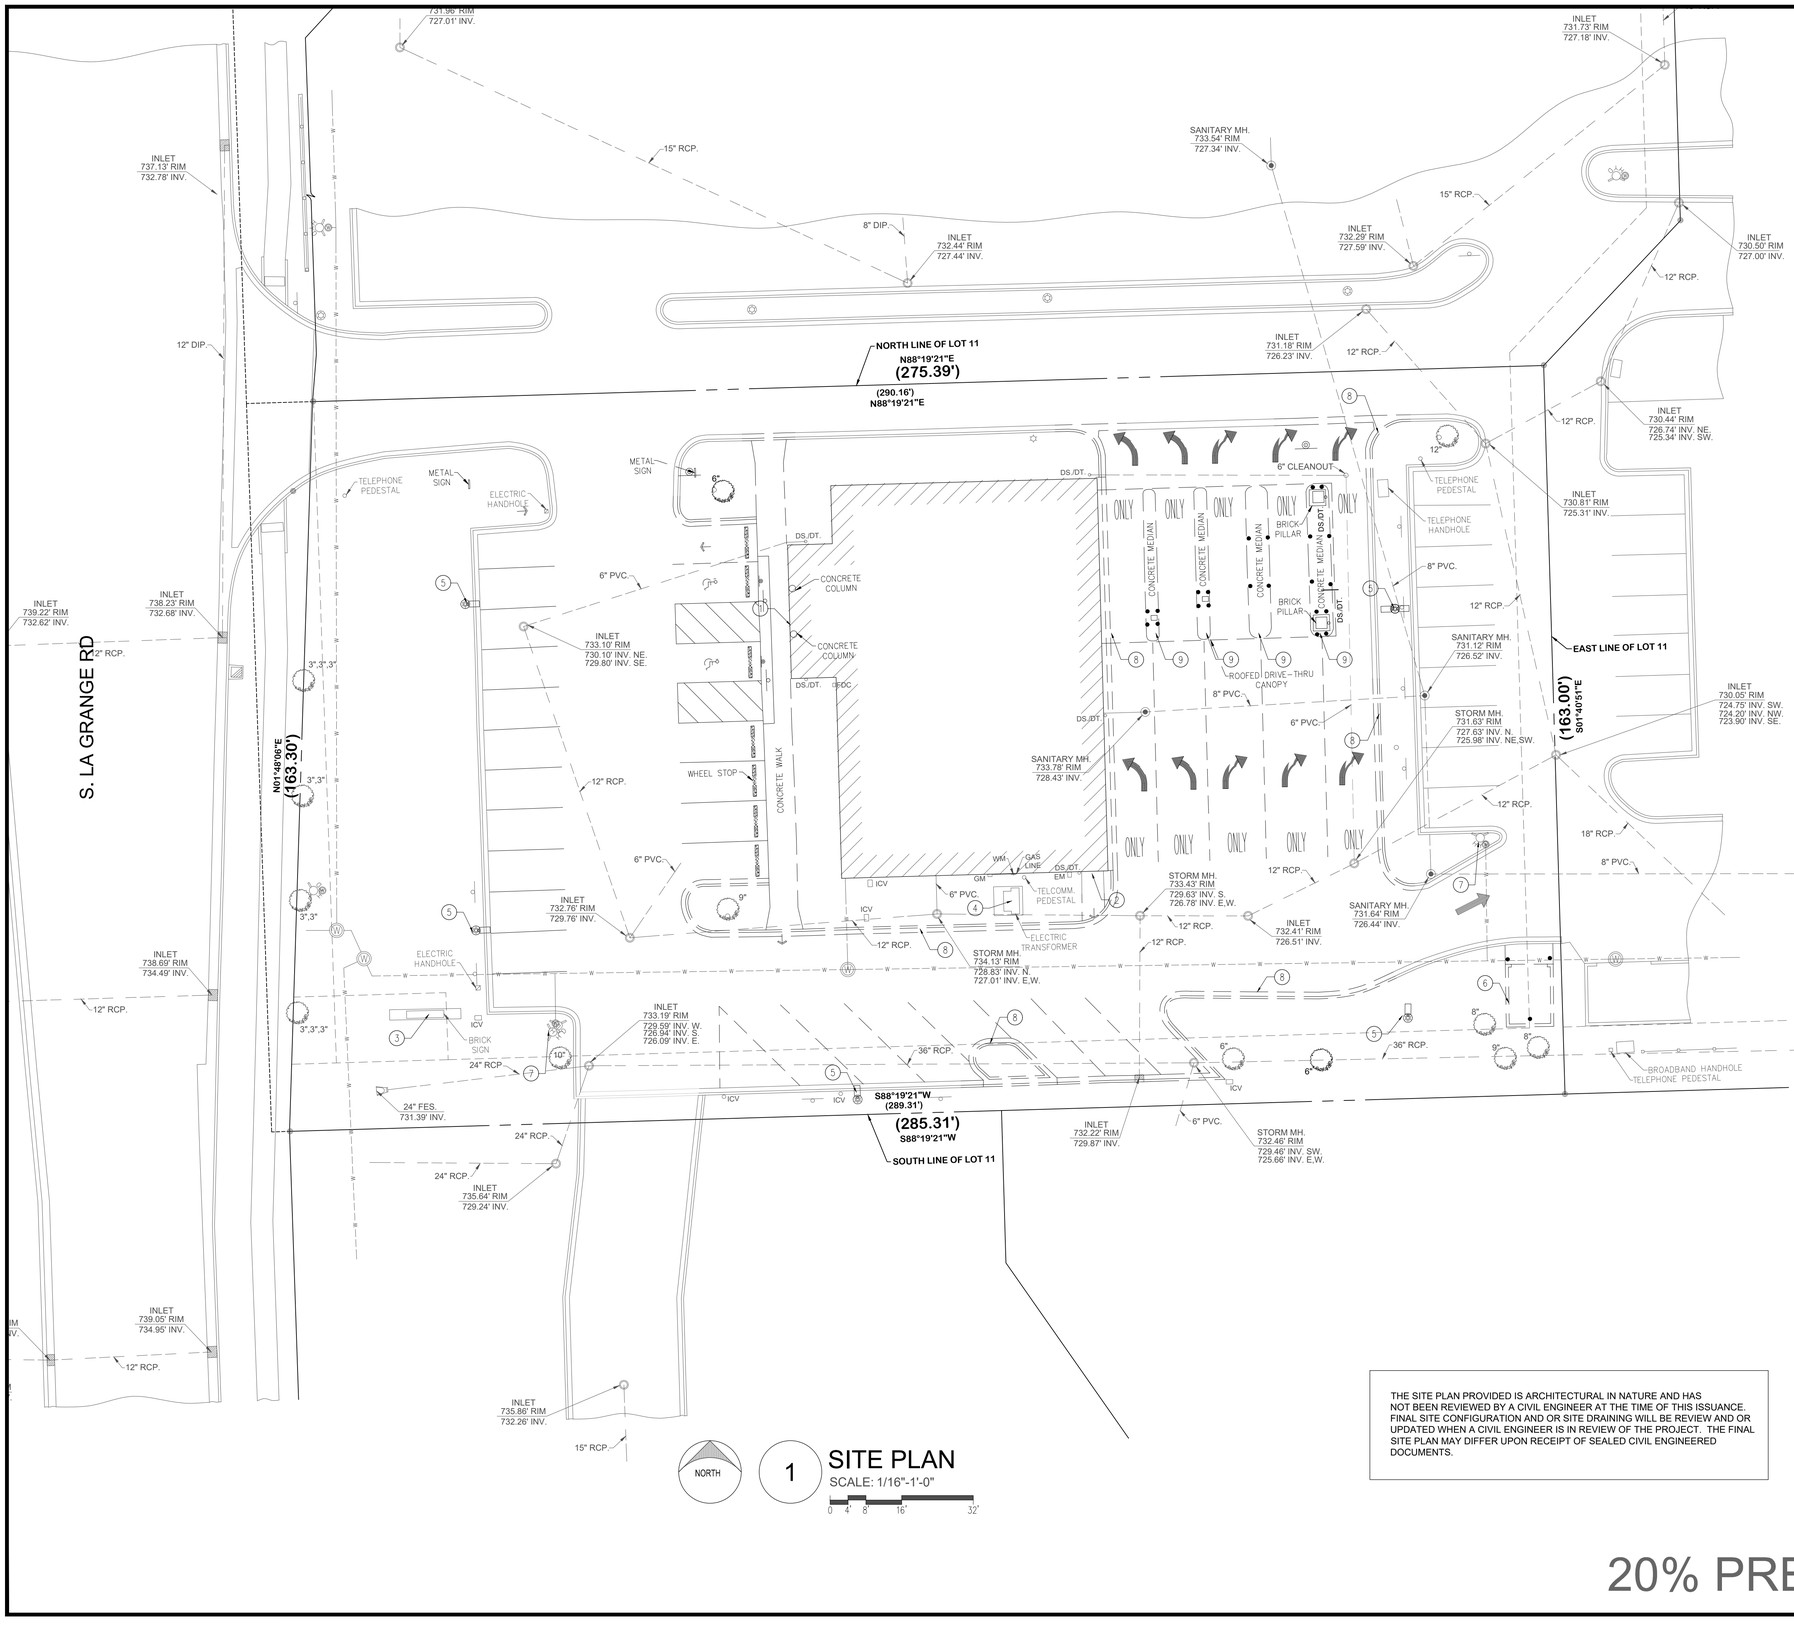
DEMOLITION EXTERIOR ELEVATIONS

D3.01



NORTH

1 SITE PLAN

SCALE: 1/16"-1'-0"

0 4' 8' 16' 32'

THE SITE PLAN PROVIDED IS ARCHITECTURAL IN NATURE AND HAS NOT BEEN REVIEWED BY A CIVIL ENGINEER AT THE TIME OF THIS ISSUANCE. FINAL SITE CONFIGURATION AND OR SITE DRAINING WILL BE REVIEW AND OR UPDATED WHEN A CIVIL ENGINEER IS IN REVIEW OF THE PROJECT. THE FINAL SITE PLAN MAY DIFFER UPON RECEIPT OF SEALED CIVIL ENGINEERED DOCUMENTS.

GENERAL NOTES:

A. SEE CIVIL FOR GRADING PLAN. SEE CIVIL DRAWING FOR DEMOLITION, NEW PAVEMENT, SITE UTILITIES, SIGNAGE AND FINAL SITE DIMENSIONS.
B. SEE AS1.02 FOR ADDITIONAL SITE DETAILS.
C. VERIFY THE EXISTENCE OF AND PROTECT ALL EXISTING UTILITY LINES. EXCAVATE WITH CARE.
D. INSTALL ADDRESS ON BUILDING AS REQUIRED BY LOCAL CODE.
E. PROVIDE KNOX BOX ON REAR OF PROPERTY, PER FIRE DEPARTMENT REQUIREMENTS.
F. SEE CIVIL DRAWINGS FOR ADDITIONAL SITE SIGNAGE REQUIREMENTS.
G. CLEAN LOT AFTER SITE WORK AND AFTER CONSTRUCTION COMPLETION.
H. PROTECT ADJACENT PROPERTY. ANY DAMAGE IS TO BE REPAIRED AT CONTRACTOR EXPENSE WITH PERMISSION OF ADJACENT BUILDING OWNER. FOR EXAMPLE, IF SOD IS DAMAGED IT WILL BE REPLACED AND WATERED REGULARLY UNTIL ESTABLISHED.
I. PROVIDE EXPANSION JOINTS IN CONCRETE PAVING AND CURBS AS REQUIRED BY MFGR SPECS, OR 30FT SPACING WHICHEVER IS LESS. REFER TO CIVIL DRAWINGS FOR MORE INFORMATION AND DETAILS.

KEY NOTES:

1. EXISTING MAIN DOOR.
2. EXISTING EXIT DOOR.
3. EXISTING MONUMENT SIGN TO BE REUSED.
4. EXISTING ELECTRICAL TRANSFORMER.
5. EXISTING LIGHT POLE. TO REMAIN. REMOVE AND REPLACE HEADS WITH NEW.
6. REMOVE EXISTING TRASH ENCLOSURE.
7. EXISTING FIRE HYDRANT.
8. REMOVE EXISTING CURB.
9. REMOVE EXISTING DRIVE THRU IN ITS ENTIRETY WITH ALL ASSOCIATED COLUMNS, CURBS, BOLLARDS, DRIVE THRU EQUIPMENT AND ROOF ABOVE.
10. REMOVE PARKING STALL.

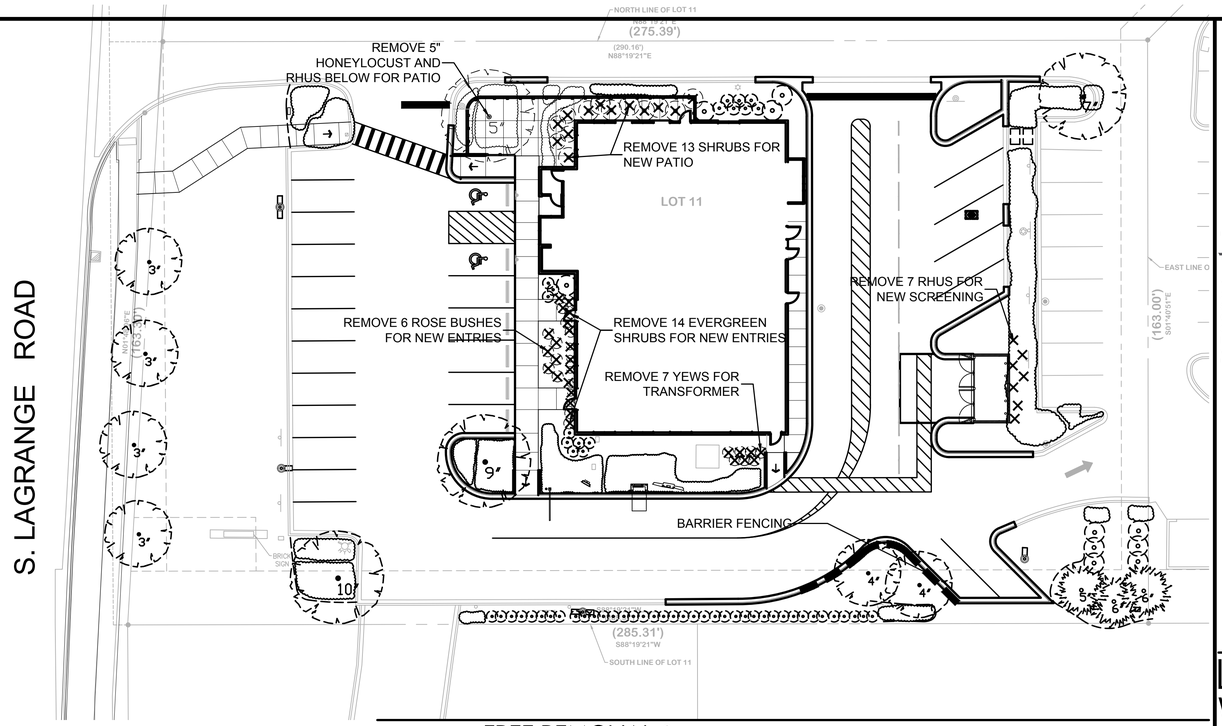
2 TREE PROTECTION FENCING DETAIL

NOT TO SCALE



1 TREE REMOVAL & PROTECTION PLAN

TREE PROTECTION & REMOVAL LEGEND

- XX" EXISTING DECIDUOUS TREE TO REMAIN
- EXISTING DECIDUOUS TREE TO BE REMOVED
- BARRIER FENCING TO BE INSTALLED

TREE PROTECTION & REMOVAL NOTES

1. CONTRACTOR SHALL OBTAIN ALL NECESSARY STATE AND LOCAL PERMITS AND PERMISSIONS TO PRUNE, REMOVE, AND/OR TRANSPLANT ANY TREES ON SITE.
2. DEAD AND DYING MATERIAL ON THE SITE SHALL BE REMOVED OR PRUNED. MATERIALS NOT LABELED ON THE PROTECTION PLAN SHALL BE BROUGHT TO THE ATTENTION OF THE LANDSCAPE ARCHITECT FOR REMEDIATION.
3. DURING CONSTRUCTION EXISTING TREES OVER FOUR INCHES IN CALIPER SHALL BE PROTECTED WITH BARRIER FENCING.
4. BARRIER SHALL BE CONSTRUCTED OF A MIN. 3' TALL SNOW FENCE OR SIMILAR AND SUPPORT POSTS MIN. 6' O.C. AND SHALL BE ERECTED ONE FOOT BEYOND THE DRIP LINE OFF ALL EXISTING TREES ON SITE AND ADJACENT SITES TO REMAIN.
5. BARRIER FENCING SHOWN ON THE PLAN IS APPROXIMATE. CONTRACTOR SHALL ADJUST LOCATION OF BARRIER TO POSITION OUTLINED IN COMMENT 4.
6. NO EXCESS SOIL OR ADDITIONAL FILL, BUILDING MATERIALS OR DEBRIS SHALL BE PLACED WITHIN THE PROTECTIVE BARRIER.
7. NO VEHICLES OR HEAVY MACHINERY SHALL BE ALLOWED TO WORK WITHIN THE BARRIER AREA.
8. NO ATTACHMENTS OR WIRES, OTHER THAN PROTECTIVE GUY WIRES, SHALL BE ATTACHED TO ANY OF THE TREES WHICH ARE WITHIN PROTECTIVE BARRIER.
9. STUMPS OR TREE REMAINS NOT TO BE FULLY EXCAVATED SHALL BE REMOVEED. A STUMP GRINDER SHALL BE USED TO REMOVE ALL REMAINING ROOTS AND WOODY MATERIAL. WITHIN A 24" RADIUS OF THE TREE TRUNK TO MIN. 6" BELOW GRADE. DISTURBED AREA SHALL BE BACKFILLED WITH COMPACTED TOPSOIL TO MEET SURROUNDING GRADES.

EXISTING VEGETATION DESCRIPTION

THE PROJECT SITE CONSIST OF A VACATED BANK BUILDING AND DRIVE THRU. EXISTING FOUNDATION PLANTINGS, PARKWAY TREES, AND SITE LANDSCAPING EXIST, ONE CRABAPPLE WILL BE REMOVED FOR CURB REALIGNMENT AND SEVERAL SHRUBS AROUND THE BUILDING WILL BE REMOVED FOR NEW LANDSCAPE TREATMENT.

- PROPOSED EVERGREEN SHRUB
- PROPOSED LOW SHRUB
- PROPOSED ORNAMENTAL GRASS
- PROPOSED PERENNIAL MASSING

LANDSCAPE NOTES

1. CONTRACTOR SHALL OBTAIN ALL NECESSARY LOCAL PERMITS AND PERMISSIONS TO INSTALL THE PROPOSED IMPROVEMENTS
2. ALL LANDSCAPE MATERIALS SHALL BE INSTALLED IN ACCORDANCE WITH THE VILLAGE OF TINLEY PARK LANDSCAPING CODES AND ZONING ORDINANCES.
3. PRIOR TO COMMENCING ANY WORK, CONTRACTOR SHALL HAVE DIGGERS HOTLINE LOCATE AND MARK ALL UNDERGROUND UTILITY FACILITIES AND LINES.
4. ALL PLANT MATERIALS (EXCEPT FOR GROUNDCOVER, ANNUALS, AND PERENNIALS) SHALL BE BALLED AND BURLAPPED STOCK AND MEET CURRENT STANDARDS OF THE AMERICAN ASSOCIATION OF NURSERYMEN'S STANDARD FOR NURSERY STOCK (ANSI 260.1-1986) OR EQUAL. PLANT MATERIALS MUST BE SUPPLIED WITHIN A 150 MILE RADIUS OF PROJECT SITE WITHIN NORTHEAST ILLINOIS. CONTRACTOR MAY SUBSTITUTE CONTAINER STOCK FOR SHRUBS IF SIZES ARE EQUAL TO SPECIFIED B&B STOCK, WITH THE APPROVAL OF THE LANDSCAPE ARCHITECT.
5. IF SPECIFIED PLANTS ARE NOT AVAILABLE AT THE TIME OF ORDERING, PLANTS WITH SIMILAR WHOLESALE VALUE AND LANDSCAPE CHARACTERISTICS MAY BE SUBSTITUTED UPON THE APPROVAL OF THE LANDSCAPE ARCHITECT AND VILLAGE STAFF.
6. SOIL IN GROUNDCOVER BEDS SHALL BE AMENDED USING 2 INCHES OF MUSHROOM COMPOST INCORPORATED INTO THE TOP 4 INCHES OF SOIL.
7. DISTURBED AREAS TO RECEIVE SOD SHALL BE TILLED TO 6" DEPTH AND FINE GRADED TO PROVIDE SMOOTH BASE SURFACE. IF EXISTING SOIL IS A MAJORITY OF CLAY OR UNSUITABLE, 2" OF FINE GRADED TOPSOIL SHALL BE ADDED PRIOR TO TILLING. EXISTING SOD AREAS SHALL HAVE TURF REMOVED WITH AUTOMATED SODCUTTER OR HAND SPACE TO REMOVE ALL BLADES AND ROOTS. 1" OF FIND GRADED TOPSOIL SHALL BE TILLED AND GRADED.
8. TREE AND SHRUB BACKFILL MIXTURE SHALL BE 2 PARTS EXIST. NATIVE TOPSOIL AND 1 PART SPHAGNUM PEAT MOSS W/ DECOMPOSED MANURE
9. ALL SHRUB BEDS AND INDIVIDUAL TREE PLANTINGS, UNLESS OTHERWISE NOTED, SHALL RECEIVE A 4 INCH LAYER OF SHREDDED HARDWOOD MULCH. ALL GROUNDCOVER, ANNUAL AND PERENNIAL BEDS SHALL RECEIVE A 2 INCH LAYER OF THE SAME MULCH MATERIAL. COSTS FOR MULCH SHALL BE CONSIDERED INCIDENTAL AND SHALL BE INCLUDED IN THE COST OF PLANTINGS.
10. NURSERY TAGS (SPECIES, SIZE) FOR ALL SHADE TREES SHALL REMAIN ATTACHED TO TREES UNTIL FINAL APPROVAL FROM MUNICIPALITY.
11. THE LANDSCAPE CONTRACTOR SHALL PROVIDE THE OWNER A BONDED WRITTEN ONE-YEAR WARRANTY AGREEMENT (BEGINNING ON THE OWNER'S POSSESSION DATE). THIS AGREEMENT SHALL COVER MAINTENANCE, REPAIR, AND REPLACEMENT OF ALL DEAD OR DAMAGED LANDSCAPING TO PRESERVE THE SAME QUANTITY AND QUALITY AS INITIALLY APPROVED.
12. CONTRACTOR SHALL PROVIDE A SEPARATE ESTIMATE FOR AN AUTOMATIC UNDERGROUND IRRIGATION SYSTEM FOR COMPLETE EFFECTIVE COVERAGE OF ALL LAWN AREAS AND SHRUB BEDS. CONTRACTOR SHALL SUBMIT SHOP DRAWINGS FOR APPROVAL AND APPLY FOR ALL NECESSARY PERMITS PRIOR TO COMMENCING WORK. IRRIGATION PLANS SHALL INCLUDE HUNTER PRO-C CONTROLLER W/WIRELESS SOLAR SYNC STATION AND HUNTER SPRAYHEADS AND NOZZLES. IRRIGATION WORK SHALL BE WARRANTY ALL LABOR AND MATERIALS FOR 1 FULL YEAR AFTER INSTALLATION AND TESTING.
13. SEEDED LAWN AREAS SHALL BE BID WITH A BID ALTERNATE FOR HYDROSEEDED LAWN. PRIOR TO SEEDING, 2" OF FINE TOPSOIL SHALL BE TILLED INTO EXIST SOIL MIXTURE. A MIX CONSISTING OF ROUGHLY 30 % BLUEGRASS / 30% FINE FESCUES / 40% RYE GRASSES (AND TACKIFIER FOR HYDROSEEDING) SHALL BE APPLIED AT MANUFACTURERS SPECIFIED RATES FOR NEW LAWNS BETWEEN 5 AND 10 LBS PER 1,0000 SF.
14. TREES AND SHRUBS SHALL NOT BE LOCATED CLOSER THAN TEN (10) FEET TO FIRE HYDRANTS, TRANSFORMER OR OTHER ABOVE GROUND UTILITIES. ANY DISCREPANCY ON THE PLAN RELATED TO THESE PROXIMATE UTILITIES SHALL BE BROUGHT TO THE ATTENTION OF THE LANDSCAPE ARCHITECT FOR RESOLUTION.

GENERAL NOTES

1. ALL EXTERIOR WALL DIMENSIONS ON THE PLANS UNLESS OTHERWISE NOTED TO OUTSIDE FACE OF SIP PANEL.
2. PROVIDE ACCESSIBLE THRESHOLD AT EACH EXTERIOR DOOR–SEE DOOR SCHEDULE
3. PRIME INTERIOR WALLS, COLUMNS AND DOOR FRAMES
4. SEE STRUCTURAL FOR CONTROL AND ISOLATION JOINTS AT CONCRETE SLAB AND AROUND COLUMNS
5. CONTACT OWNER REGARDING HOW THEY WANT TO REKEY THE LOCK FOR THE MAIN ENTRY VS THE SERVICE DOOR, SPRINKLER ROOM TO HAVE ELECTRONIC KEY PAD KEY LOCK.
6. ARABIC NUMERALS AT LEAST FOUR INCHES HIGH WITH A MINIMUM STROKE WIDTH OF 0.5 INCHES SHOWING THE ADDRESS OF THE BUILDING SHALL CONTRAST WITH THE BACKGROUND, SHALL BE CONSTRUCTED OF DURABLE MATERIALS, BE PERMANENTLY INSTALLED AND BE READILY VISIBLE. SCRIPT OR WRITTEN NUMBERS ARE NOT PERMITTED. ADDITIONAL NUMBERS SHALL ALSO BE PLACED ON THE SIDE OF THE BUILDINGS STREET ADDRESS.
   AT SERVICE DOORS USED AS EXIT/ACCESS FOR FIRE FIGHTING, ARABIC NUMERALS A MINIMUM OF FOUR INCHES IN HEIGHT WITH A MINIMUM STROKE OF 0.5 INCH SHALL BE APPLIED TO THE ADDITIONAL DOOR TO INDICATE THE ADDRESS. THE ADDRESS SHALL BE VISIBLE FROM THE PARKING LOT OR FIRE APPARATUS ACCESS.
7. THIS IS A SPRINKLERED BUILDING PER REQUIREMENT OF VILLAGE OF TINLEY PARK IL SEE FP DRAWINGS FOR LAYOUT.
8. PROVIDE A KNOX BOX TO ENABLE THE FIRE DISTRICT TO HAVE ACCESS TO THE BUILDING AND THE BUILDING'S FIRE PROTECTION FEATURES. FINAL LOCATION TBD.
9. G.C. TO PROVIDE PORTABLE FIRE EXTINGUISHERS WITHIN THE BUILDING. THE TYPE, SIZE, AND SPACING MUST MATCH THE SPECIFIC HAZARD THEY ARE TO PROTECT. CONTACT THE FIRE DISTRICT FOR APPROVAL OF THE TYPES AND LOCATIONS OF PORTABLE FIRE EXTINGUISHERS TO BE USED PRIOR TO FINAL OCCUPANCY.

MEMORANDUM TO: Chris Ilekis
Vequity

FROM: Elise Purguette
Consultant

Luay R. Aboona, PE, PTOE
Principal

DATE: April 23, 2021

SUBJECT: Traffic Impact Statement
Proposed Retail Building
Tinley Park, Illinois

This memorandum summarizes the results and findings of a site traffic evaluation conducted by Kenig, Lindgren, O'Hara, Aboona, Inc. (KLOA, Inc.) for the proposed retail building to be located at 9561 West 171st Street in Tinley Park, Illinois. As proposed, the site, which is currently occupied by a vacant MB Financial Bank building, will be redeveloped with a three-tenant 5,593 square-foot retail building which will include a drive-through Starbucks coffee shop. In addition, the proposed retail building will provide approximately 35 parking spaces. Access will continue to be provided via the existing access system serving the adjoining shopping center with access off South LaGrange Road and 171st Street. **Figure 1** shows an aerial view of the site.

The purpose of this evaluation is to determine the impact of the proposed retail building on the area roadway system, evaluate its on-site circulation and drive-through utilization, and evaluate the adequacy of the parking supply.

Existing Traffic Conditions

The following provides a detailed description of the physical characteristics of the roadways including geometry and traffic control, adjacent land uses, and average daily traffic volumes along the area roadways.

South LaGrange Road (US 45) is a north-south, other principal arterial that generally provides three lanes in each direction separated by a landscaped median in the vicinity of the site. At its signalized intersection with 171st Street, South LaGrange Road provides an exclusive U-turn lane, three through lanes, and an exclusive right-turn lane on the northbound approach. The southbound approach provides dual left-turn lanes and three through lanes. A standard style crosswalk is provided on the south leg of this intersection. At its unsignalized intersection with the access drive located north of the site, South LaGrange Road provides two through lanes and a combined through/right-turn lane on the northbound approach. The southbound approach provides three through lanes. South LaGrange Road is under the jurisdiction of the Illinois Department of Transportation (IDOT), is classified as a Strategic Regional Arterial (SRA), and carries an Annual Average Daily Traffic (AADT) volume of 39,300 vehicles (IDOT 2019). South LaGrange Road has a posted speed limit of 45 miles per hour.

Aerial View of Site **Figure 1**

171st Street is an east-west, local road that generally provides two lanes in each direction in the vicinity of the site. At its signalized intersection with South LaGrange Road, 171st Street provides an exclusive left-turn lane and dual right-turn lanes on the westbound approach. At its unsignalized intersection with the existing right-in/right-out access drive serving the CVS Pharmacy, 171st Street provides a through lane and a combined through/right-turn lane on the eastbound approach. The westbound approach provides two through lanes. At its unsignalized intersection with the full movement access drive serving the shopping center, 171st Street provides a through lane and a combined through/right-turn lane on the eastbound approach. The westbound approach provides an exclusive left-turn lane and two through lanes. At its unsignalized intersection with the right-in/right-out access drive serving the shopping center, 171st Street provides a through lane and a combined through/right-turn lane on the eastbound approach. The westbound approach provides an exclusive left-turn lane and two through lanes. 171st Street is under the jurisdiction of the Village of Tinley Park.

Traffic Characteristics of the Proposed Retail Building

As proposed, the site, which is currently occupied by a vacant MB Financial Bank building, will be redeveloped with a three-tenant, 5,593 square-foot retail building which will include a drive-through Starbucks coffee shop. Access will continue to be provided via the existing access system serving the adjoining shopping center off South LaGrange Road with 171st Street, as follows:

- An existing right-in/right-out access drive off South LaGrange Road located approximately 290 feet south of 171st Street. Left-turn movements are prohibited via the existing landscape median along South LaGrange Road. This access provides one inbound lane and one outbound lane with outbound movements under stop sign control.

- An existing right-in/right-out access drive off 171st Street located approximately 290 feet east of South LaGrange Road. This access drive is channelized to prohibit left-turn movements and provides one inbound lane and one outbound lane with outbound movements under stop sign control.

- A full movement access drive off 171st Street located approximately 800 feet east of South LaGrange Road. This access drive provides one inbound lane and two outbound lanes striped as an exclusive left-turn lane and an exclusive right-turn lane. Outbound movements are under stop sign control.

- An existing right-in/right-out access drive off 171st Street located approximately 1,080 feet east of South LaGrange Road. This access drive is channelized to prohibit left-turn movements and provides one inbound lane and one outbound lane with outbound movements under stop sign control.

- An existing full movement access drive off 94th Street located approximately 400 feet south of 171st Street. This access drive provides one inbound lane and one outbound lane with outbound movements under stop sign control.

- A cross access connection to The Great Escape located south of the site, which is provided with restricted access off South LaGrange Road.

A copy of the site plan and drive-through stacking exhibit is included in the Appendix.

Development Traffic Generation

The estimates of traffic to be generated by the development are based upon the proposed land use type and size using data published in the Institute of Transportation Engineers' (ITE) *Trip Generation Manual*, 10th Edition. It should be noted that surveys conducted by ITE have shown that approximately 70 and 20 percent of trips made to fast-food restaurants with drive-through and retail uses are diverted from the existing traffic on the roadway system, respectively. Such diverted trips are referred to as pass-by traffic. To account for the potential pass-by traffic, a 70 percent and 20 percent reduction were applied to the trips projected to be generated by the proposed drive-through Starbucks coffee shop and the retail, respectively. **Table 1** shows the estimated vehicle trip generation for the weekday morning, weekday evening, and Saturday midday peak hours as well as two-way daily traffic.

Trip Generation Comparison

As previously indicated, the site is currently occupied by a vacant MB Financial Bank building, which is approximately 5,593 square feet in size. In order to determine the impacts of the proposed retail building on the roadway system, the trips to be generated by the proposed retail building were compared to the estimated trips generated by the existing drive-through bank. The estimates of traffic to be generated by the existing drive-through bank are based upon the proposed land use type and size using data published in the ITE *Trip Generation Manual*, 10th Edition. It should be noted that surveys conducted by ITE have shown that approximately 30 percent of trips made to banks with drive-throughs are diverted from the existing traffic on the roadway system. Such diverted trips are referred to as pass-by traffic. To account for the potential pass-by traffic, a 30 percent reduction was applied to the trips projected to be generated by the existing bank.

Table 2 shows the estimated peak hour traffic to be generated by the proposed development compared to the traffic to be generated by the existing drive-through bank.

Inspection of Table 2 indicates that the proposed retail building will generate 26 more trips during the weekday morning peak hour, 14 fewer trips during the weekday evening peak hour, and six fewer trips during the Saturday midday peak hour. Given that the development will generate a comparable volume of traffic during the peak hours, site traffic will be adequately accommodated by area roadways and the access system serving the site.

Table 1
PROJECTED SITE-GENERATED TRAFFIC VOLUMES

1 – Applied to the trips estimated to be generated by the existing bank with drive-through window after interaction reduction applied

Evaluation

When the estimated peak hour traffic volumes anticipated to be generated by the proposed retail building are compared to the total projected peak traffic volumes on the adjacent roadway system, the new traffic that will be generated by the proposed retail building will amount to approximately one percent of the existing two-way daily traffic volume along South LaGrange Road and 171st Street ((0.5*944)÷39,300=1.2%). Given the low estimated traffic to be generated by the proposed development, the existing access system serving the adjoining shopping center off South LaGrange Road and 171st Street will be adequate in accommodating the future traffic volumes.

On-Site Circulation and Design

As proposed, the pick-up window will be located on the east side of the building with the order board located on the south side of the building. Vehicles will enter the drive-through lane at the southwest corner of the building and travel around the south and east sides of the building. A review of the site plan and drive-through stacking exhibit indicates that approximately seven vehicles can stack from the pick-up window and approximately three vehicles can stack from the order board within the drive-through lane. Further, additional vehicles can stack within the site before reaching the access road north of the site.

In order to determine the average and peak stacking that can be expected at the drive-through serving the proposed Starbucks coffee shop, surveys were conducted at the Starbucks located at 1048 Maple Avenue in Lisle, Illinois. **Table A**, included in the Appendix, summarizes the drive-through queue surveys in five-minute intervals. The results of the drive-through surveys indicated the following:

- During the weekday morning peak period (6:00 A.M. to 9:00 A.M.), the Starbucks had an average queue of six vehicles and a maximum queue of 11 vehicles, occurring twice.
- During the weekday midday peak period (11:30 A.M. to 1:30 P.M.), the Starbucks had an average queue of three vehicles and a maximum queue of six vehicles, occurring once.
- During the weekday evening peak period (4:00 P.M. to 6:00 P.M.), the Starbucks had an average queue of one vehicle and a maximum queue of four vehicles, occurring once.

In addition, this data was compared to data provided by Starbucks, which indicated the following:

- Starbucks drive-throughs are designed to operate most efficiently with an average queue of seven vehicles.
- Starbucks peak drive-through queues range from 10 to 12 vehicles, typically occurring between 7:00 A.M. 9:00 A.M.
- Typical service time for vehicles in the drive-through is 45 seconds.
- Starbucks traffic is typically 60 percent drive-through traffic.

This data coincides with the survey data and further confirms the average queue of approximately six vehicles and maximum queue of 11 vehicles. As such, the proposed drive-through design can accommodate the peak demand of the drive-through operation without impacting traffic flow within the site main parking lot. Should additional stacking be required, overflow vehicles can be accommodated within the parking lot. If this were to occur, it would only be during the morning peak hour when the other retail uses within the building are expected to generate minimal traffic, thus not impacting and/or conflicting with their operations.

In order to provide efficient and orderly internal traffic flow, the following is recommended:

- Wayfinding signs directing traffic to the drive-through lane should be provided within the site, primarily near the northwest and southwest corners of the building, directing traffic to the entrance of the drive-through lane.

- "Do Not Enter" signs facing north should be posted at the exit of the drive-through lane.

- A stop sign facing south should be posted at the exit of the drive-through lane.

Parking Evaluation

As previously indicated, the site will be redeveloped with a three-tenant 5,593 square-foot retail building which will include a drive-through Starbucks coffee shop and will provide 35 parking spaces. The building will contain 5,241 square-feet of gross leasable space. In order to determine the projected parking demand of the proposed retail building, the parking demand was estimated based on the Village of Tinley Park Zoning Ordinance and the rates published in the Institute of Transportation Engineers' (ITE) *Parking Generation Manual*, 5th Edition. Based on the two methodologies, the parking demand for the proposed retail building is as follows:

Village of Tinley Park Requirements

The Tinley Park Zoning Ordinance requires a parking ratio of 6.5 parking spaces per 1,000 square feet of gross leasable space. Based on the above and the total gross leasable space of 5,241 square-feet, the proposed retail building should provide a total of 34 parking spaces, which results in a surplus of one parking space.

ITE Parking Generation Manual

In reviewing the survey data published in the Institute of Transportation Engineers' (ITE) 5th Edition of the *Parking Generation Manual*, the following average peak parking demands were determined:

- Drive-Through Starbucks Coffee Shop (Coffee/Donut Shop with Drive-Through Window)
    - Monday-Friday: 13 spaces (ratio of 5.22 spaces per 1,000 square feet)
    - Saturday: 21 spaces (ratio of 8.70 spaces per 1,000 square feet)

- Retail (Shopping Center – Land Use Code 820)
  - Monday-Thursday: seven spaces (ratio of 1.95 spaces per 1,000 square feet)
  - Friday: nine spaces (ratio of 2.61 spaces per 1,000 square feet)
  - Saturday: 10 (ratio of 2.91 spaces per 1,000 square feet)

Based on ITE *Parking Generation Manual* rates, the proposed retail building should provide a total of 31 parking spaces to accommodate the peak parking demand (Saturday), which results in a surplus of four parking spaces.

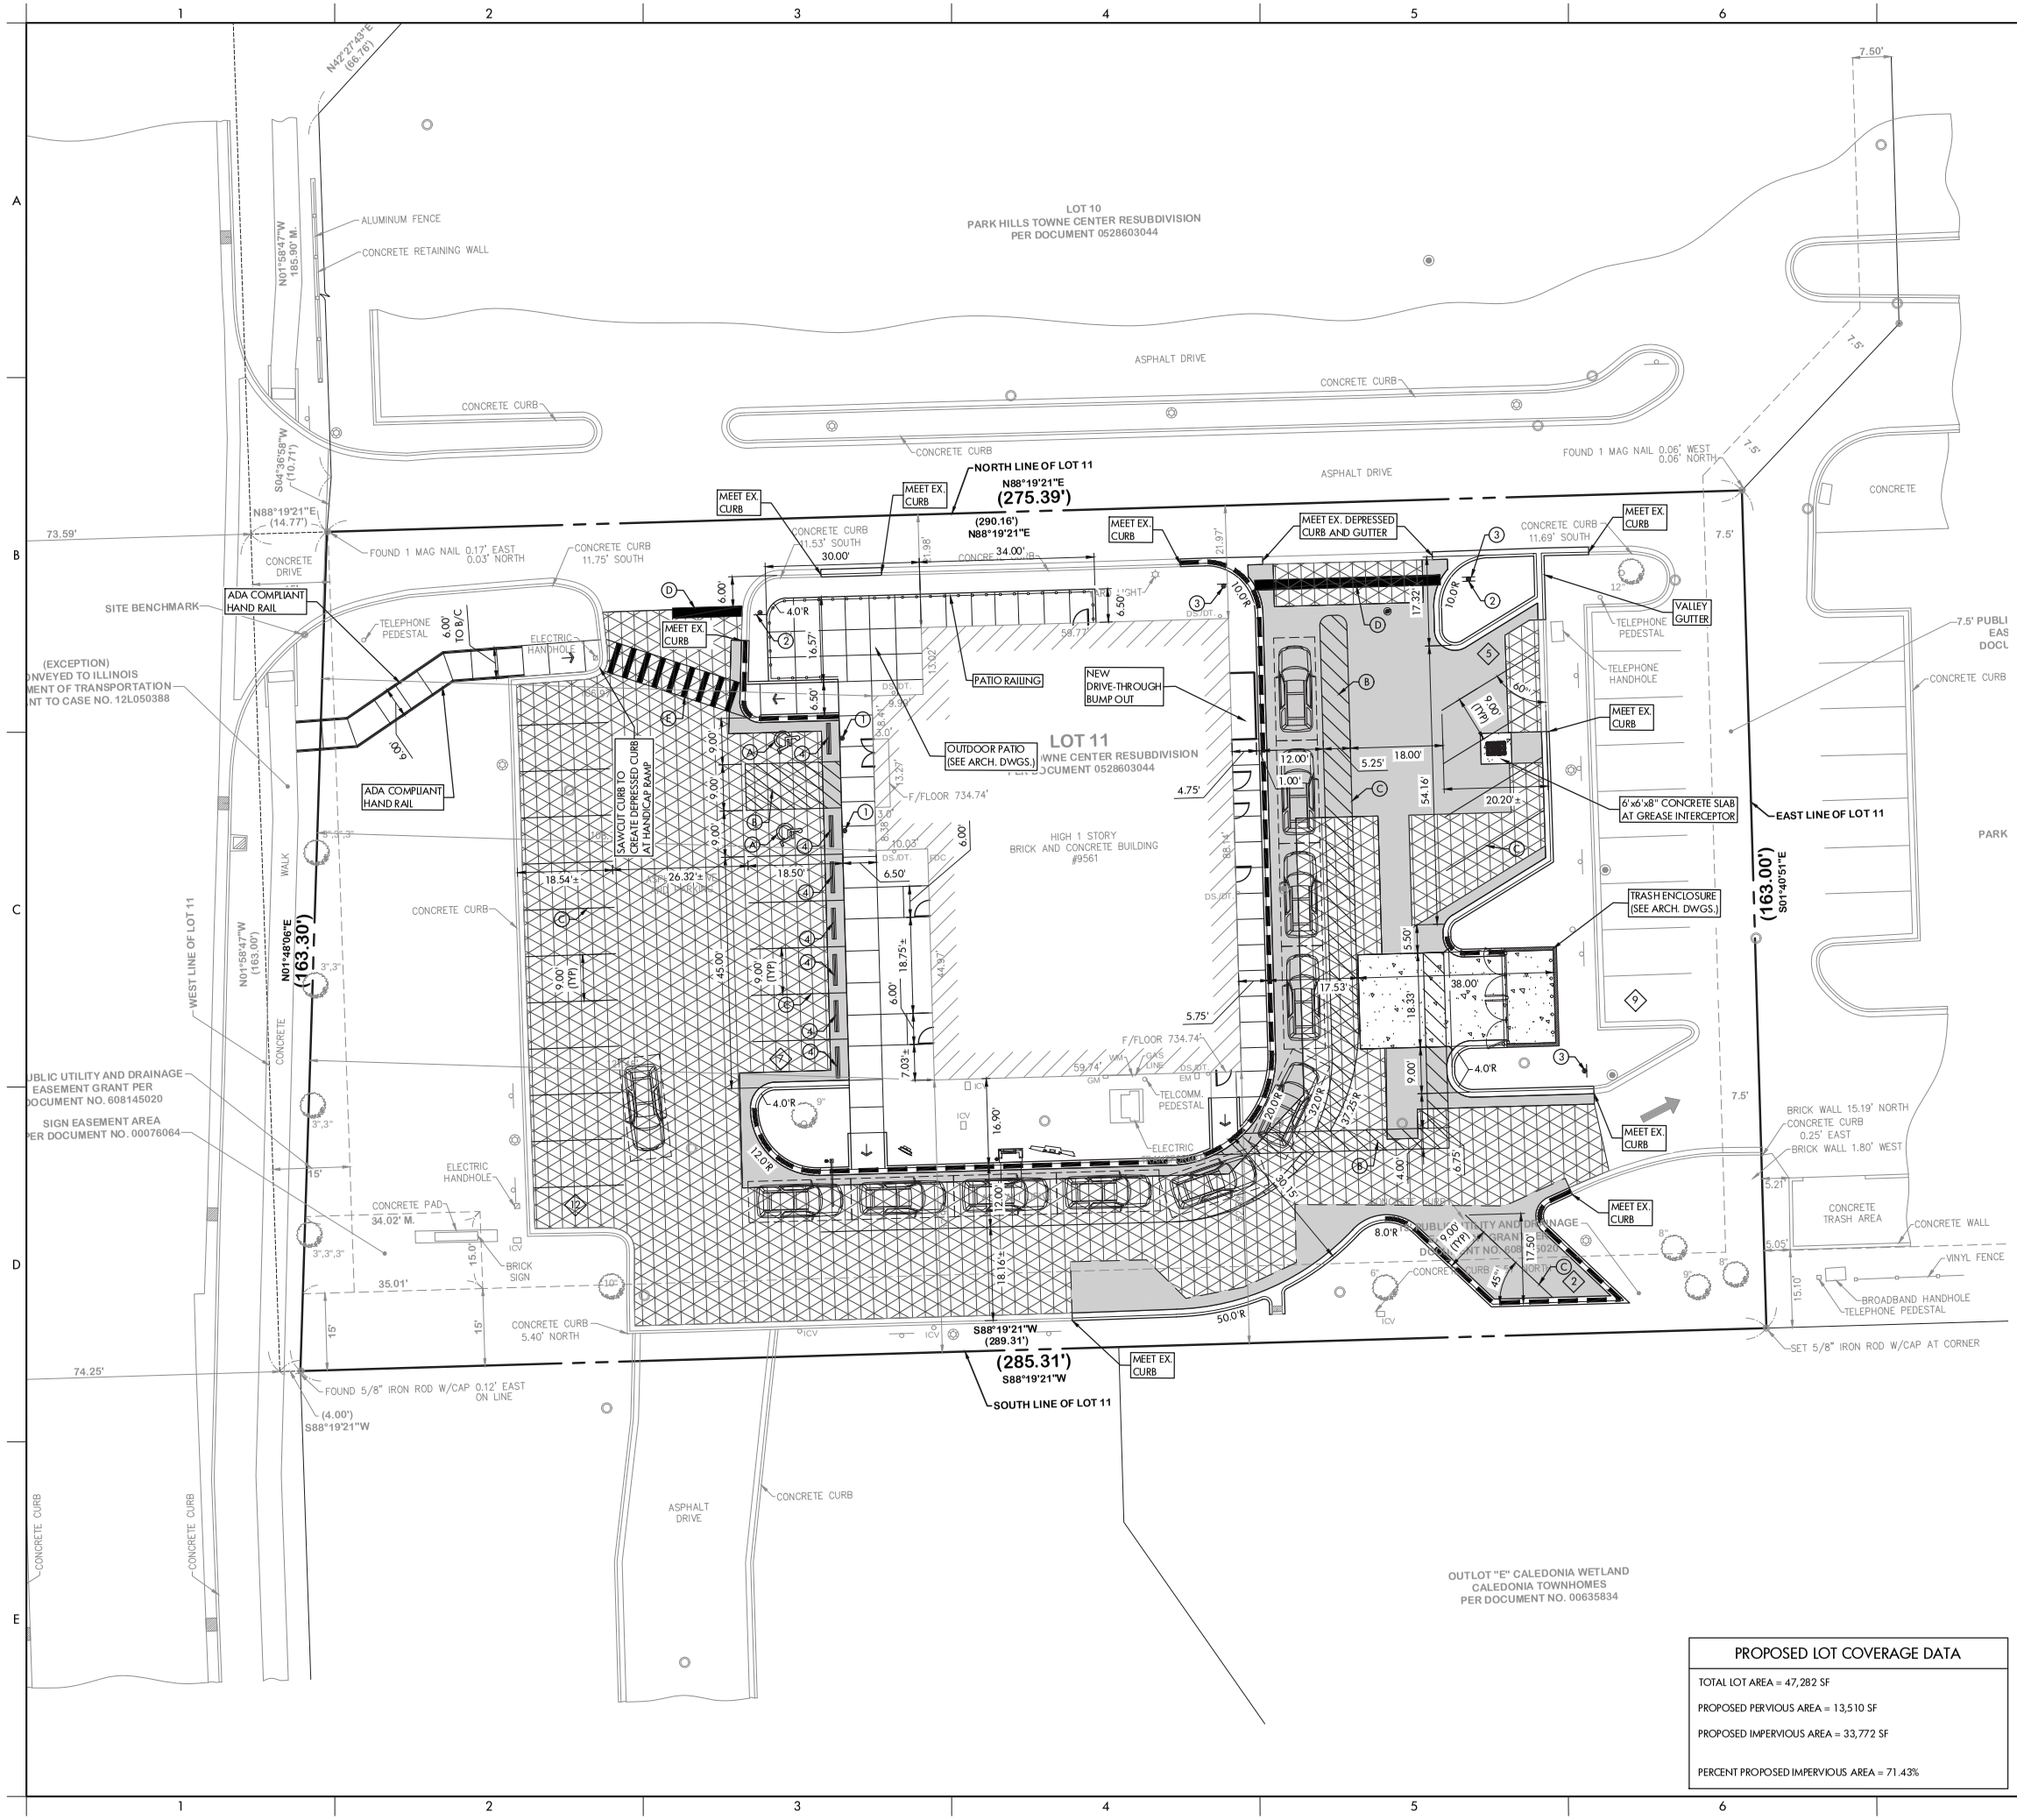
Therefore, the proposed parking supply of 345 parking spaces will be adequate in accommodating the projected peak parking demand of the proposed retail building, based on the Village of Tinley Park Zoning Ordinance and the parking rates published in the ITE *Parking Generation Manual.*

Conclusion

Based on the proposed development plan and the preceding evaluation, the following conclusions and recommendations are made:

- The volume of traffic estimated by the proposed retail building will be reduced due to pass-by trips.
- The proposed retail building will generate a comparable volume of traffic to the previous drive-through bank.
- The site plan provides for efficient circulation and adequate stacking for the proposed drive-through Starbucks coffee shop.
- Wayfinding signage should be provided directing vehicles to the entrance of the drive-through lane.
- A “Do Not Enter” sign facing north should be provided at the exit of the drive-through lane.
- Exiting movements from the drive-through lane should be under stop sign control.
- The proposed parking supply of 35 parking spaces will be adequate in accommodating the projected peak parking demand of the proposed retail building. This was based on the Village of Tinley Park Zoning Ordinance and the parking rates published in the ITE *Parking Generation Manual.*

Appendix



PROPOSED PARKING DATA

OVERALL BUILDING AREA = 5,593 SF (5,241 SF IS LEASEABLE)

PARKING REQUIRED
5,241 SF / 1,000 x 6.5 = 34 SPACES

PARKING PROVIDED
HANDICAP SPACES = 2
REGULAR SPACES = 33

TOTAL PROPOSED PARKING = 35 SPACES

PAVEMENT MARKING AND SIGN LEGEND

1. R7-8 HANDICAP PARKING SIGN (12"X18") WITH $250 FINE
2. R1-1 STOP SIGN (30"X30")
3. R5-1 DO NOT ENTER SIGN (30"X30")
4. CONCRETE WHEEL STOP
- A. HANDICAP SYMBOL PER LATEST ADA STANDARDS
- B. 4" SOLID YELLOW AT 24" C-C AT 45 DEGREES
- C. 4" SOLID YELLOW STRIPE (TYP)
- D. 24" WIDE WHITE STOP BAR
- E. CROSSWALK - 24" SOLID WHITE AT 36" C-C

GENERAL NOTES

1. ALL DIMENSIONS AND CURB RADII ARE TO FACE OF CURB UNLESS OTHERWISE NOTED.
2. ALL CURB SHALL BE B6.12 CURB AND GUTTER.
3. SIDEWALK IN FRONT OF THE BUILDING SHALL BE COMBINATION SIDEWALK AND BARRIER CURB AND SHALL BE MONOLITHICALLY CAST ACCORDING TO THE DETAIL ON SHEET C6.0.
4. ALL RADII ARE 3.0' UNLESS OTHERWISE NOTED.
5. ALL SITE SIGNAGE SHALL BE IN CONFORMANCE WITH MANUAL ON UNIFORM TRAFFIC CONTROL DEVICES (M.U.T.C.D.) STANDARDS, LATEST EDITION.
6. PARKING SPACES SHALL BE ANGLED AT 90° TO THE ASSOCIATED DRIVE AISLE UNLESS OTHERWISE NOTED.
7. DETECTABLE WARNING STRIPS WITH TRUNCATED DOMES ON ALL CURB RAMPS SHALL CONSIST OF CONTRASTING COLOR TO ADJACENT PAVEMENT COLOR PER IDOT REGULATIONS, PREFERRED COLOR IS RED (FEDERAL COLOR STANDARD 30166)
8. REFER TO ARCHITECTURAL AND SIGNAGE PLANS FOR ANY ADDITIONAL SITE SIGNAGE AND PAVEMENT MARKINGS.
9. ALL TRAFFIC SIGNS SHALL BE INSTALLED AT 7' HIGH MEASURED FROM THE GROUND ELEVATION TO THE BOTTOM OF SIGN.

SITE PAVING LEGEND

NEW ASPHALT PAVEMENT
1.5" BITUMINOUS SURFACE COURSE, HOT MIX ASPHALT, MIX D, N50
2.5" BITUMINOUS BINDER COURSE, HOT MIX ASPHALT, IL-19, N50
10" AGGREGATE BASE COURSE, TYPE B (IDOT GRAD CA-6)

MILL AND RESURFACE
1.5" MILL - REMOVE EX. ASPHALT SURFACE COURSE
1.5" BITUMINOUS SURFACE COURSE, HOT MIX ASPHALT, MIX D, N50

CONCRETE PAVEMENT
8" P.C. CONCRETE PAVEMENT
4" AGGREGATE BASE (CA-6)

SIDEWALK PAVEMENT
5" P.C. CONCRETE PAVEMENT (THICKEN TO 8" AT DRIVEWAYS)
4" AGGREGATE BASE (CA-6)

PROPOSED LOT COVERAGE DATA

TOTAL LOT AREA = 47,282 SF

PROPOSED PERVIOUS AREA = 13,510 SF

PROPOSED IMPERVIOUS AREA = 33,772 SF

PERCENT PROPOSED IMPERVIOUS AREA = 71.43%

OSQ Series

OSQ™ LED Area/Flood Luminaire featuring Cree TrueWhite® Technology – Large

Rev. Date: V27 10/21/2020

Product Description

The OSQ™ Area/Flood luminaire blends extreme optical control, advanced thermal management and modern, clean aesthetics. Built to last, the housing is rugged cast aluminum with an integral, weathertight LED driver compartment. Versatile mounting configurations offer simple installation. Its slim, low-profile design minimizes wind load requirements and blends seamlessly into the site providing even, quality illumination. The 'T' input power designator is a suitable upgrade for HID applications up to 750 Watts, and the 'U' input power designator is a suitable upgrade for HID applications up to 1000 Watts.

Applications: Parking lots, walkways, campuses, auto dealerships, office complexes, tunnels, underpasses and internal roadways

Performance Summary

Utilizes Cree TrueWhite® Technology on 5000K Luminaires

NanoOptic® Precision Delivery Grid™ optic

Assembled in the U.S.A. of U.S. and imported parts

Initial Delivered Lumens: Up to 29,700

Efficacy: Up to 173 LPW

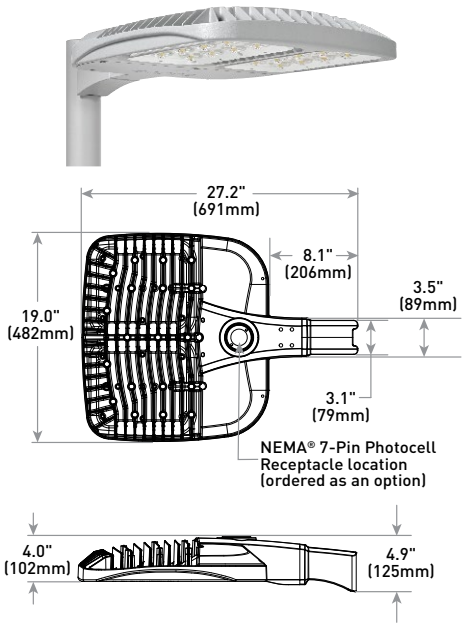
CRI: Minimum 70 CRI (3000K, 4000K & 5700K); 90 CRI (5000K)

CCT: 3000K, 4000K, 5000K, 5700K

Limited Warranty†: 10 years on luminaire; 10 years on Colorfast DeltaGuard® finish; up to 5 years for Synapse® accessories; 1 year on luminaire accessories

† See http://creelighting.com/warranty for warranty terms. For Synapse accessories, consult Synapse spec sheets for details on warranty terms.

DA Mount



Weight
32.4 lbs. (14.7kg)

Ordering Information

Fully assembled luminaire is composed of two components that must be ordered separately:
Example: **Mount:** OSQ-B-AASV + **Luminaire:** OSQ-A-NM-2ME-T-40K-UL-SV

Mount (Luminaire must be ordered separately)*	
OSQ-

Product Specifications

CREE TRUEWHITE® TECHNOLOGY

A revolutionary way to generate high-quality white light, Cree TrueWhite® Technology is a patented approach that delivers an exclusive combination of 90+ CRI, beautiful light characteristics and lifelong color consistency, all while maintaining high luminous efficacy – a true no compromise solution.

CONSTRUCTION & MATERIALS

- Slim, low profile design minimizes wind load requirements
- Luminaire housing is rugged die cast aluminum with an integral, weathertight LED driver compartment and high-performance heat sink
- Convenient interlocking mounting method on direct arm mount. Mounting adaptor is rugged die cast aluminum and mounts to 3" (76mm) or larger square or round pole, secured by two 5/16-18 UNC bolts spaced on 2" (51mm) centers
- Mounting for the adjustable arm mount adaptor is rugged die cast aluminum and mounts to 2" (51mm) IP, 2.375" (60mm) O.D. tenon
- Adjustable arm mount can be adjusted 180˚ in 2.5˚ increments
- Transportation mount is constructed of 316 stainless steel and mounts to surface with (4) 3/8" fasteners by others
- Trunnion mount is constructed of A500 and A1011 steel and is adjustable from 0-180˚ in 15˚ degree increments. Trunnion mount secures to surface with (1) 3/4" bolt or (2) 1/2" or 3/8" bolts
- Includes 18" (340mm) 18/5 or 16/5 cord exiting the luminaire. When ordered with R option, 18" (340mm) 18/7 or 16/7 cord is provided
- Designed for uplight and downlight applications
- Exclusive Colorfast DeltaGuard® finish features an E-Coat epoxy primer with an ultra-durable powder topcoat, providing excellent resistance to corrosion, ultraviolet degradation and abrasion. Silver, bronze, black, and white are available
- **Weight:** OSQ-DA: 32.4 lbs. (14.7kg); OSQ-B-AA: 32.0 lbs. (14.5kg); OSQ-L-TSP: 44 lbs. (20.0kg); OSQ-TM: 36.1 lbs. (16.4kg)

ELECTRICAL SYSTEM

- **Input Voltage:** 120-277V or 347-480V, 50/60Hz, Class 1 drivers
- **Power Factor:** > 0.9 at full load
- **Total Harmonic Distortion:** < 20% at full load
- Integral 10kV surge suppression protection standard
- When code dictates fusing, a slow blow fuse or type C/D breaker should be used to address inrush current
- Designed with 0-10V dimming capabilities. Controls by others
- Refer to Dimming spec sheet for details
- **10V Source Current:** 0.15mA
- **Operating Temperature Range:** -40˚C - +40˚C (-40˚F - +104˚F)

REGULATORY & VOLUNTARY QUALIFICATIONS

- cULus Listed
- Suitable for wet locations
- Enclosure rated IP66 per IEC 60529 when ordered without R option
- Consult factory for CE Certified products
- Certified to ANSI C136.31-2001, 3G bridge and overpass vibration standards with AA, DA, TM, and TSP mounts. For adjustable arm applications requiring ANSI C136.31-2001 3G vibration certification, ensure that existing or new adjustable arm mount model number matches OSQ-B-AA for all OSQ large housing luminaires with power designations "T", and "U"
- ANSI C136.2 10kV surge protection, tested in accordance with IEEE/ANSI C62.41.2
- Meets FCC Part 15, Subpart B, Class A limits for conducted and radiated emissions
- Luminaire and finish endurance tested to withstand 5,000 hours of elevated ambient salt fog conditions as defined in ASTM Standard B 117
- Meets Buy American requirements within ARRA
- DLC and DLC Premium qualified versions available. Some exceptions apply. Please refer to https://www.designlights.org/search/ for most current information
- RoHS compliant. Consult factory for additional details
- Dark Sky Friendly, IDA Approved when ordered with 30K CCT and direct or transportation mounts only. Please refer to https://www.darksky.org/our-work/lighting/lighting-for-industry/fsa/fsa-products/ for most current information
- ⚠ **CA RESIDENTS WARNING:** Cancer and Reproductive Harm – www.p65warnings.ca.gov

Product Specifications

SYNAPSE® SIMPLYSNAP INTELLIGENT CONTROL

The Synapse SimplySNAP platform is a highly intuitive connected lighting solution featuring zone dimming, motion sensing, and daylight harvesting with utility-grade power monitoring and support of up to 1000 nodes per gateway. The system features a reliable and robust self-healing mesh network with a browser-based interface that runs on smartphones, tablets, and PCs. The Twist-Lock Lighting Controller (TL7-B2) and Site Controller (SS450-002) take the OSQ Series to a new performance plateau, providing extreme energy productivity, code compliance and a better light experience.

Electrical Data*

Input Power Designator	System Watts 120-480V	Total Current (A)					
		120V	208V	240V	277V	347V	480V
T	132	1.12	0.63	0.55	0.47	0.39	0.28
U	202	1.72	0.96	0.84	0.72	0.60	0.43

* Electrical data at 25˚C (77˚F). Actual wattage may differ by +/- 10% when operating between 120-277V or 347-480V +/-10%

	Symmetric	1.00	1.00	1.00	1.00[3]	1.00[3]

[1] Lumen maintenance values at 25˚C (77˚F) are calculated per IES TM-21 based on IES LM-80 report data for the LED package and in-situ luminaire testing. Luminaire ambient temperature factors (LATF) have been applied to all lumen maintenance factors. Please refer to the Temperature Zone Reference Document for outdoor average nighttime ambient conditions.
[2] In accordance with IES TM-21, Reported values represent interpolated values based on time durations that are up to 6x the tested duration in the IES LM-80 report for the LED.
[3] Estimated values are calculated and represent time durations that exceed the 6x test duration of the LED.

Accessories

Field-Installed

Backlight Shield
OSQ-BLSLF
– Front facing optics
OSQ-BLSLR
– Rotated optics

Hand-Held Remote
XA-SENSREM
- For successful implementation of the programmable multi-level option, a minimum of one hand-held remote is required

Bird Spikes
OSQ-LG-BRDSPK

Shorting Cap
XA-XSLSHRT

Synapse Wireless Control Accessories

Twist-Lock Lighting Controller
TL7-B2
- Suitable for 120-277V (UL) voltage only
- Requires NEMA/ANSI C136.41 7-Pin Dimming Receptacle
- Not for use with PML or Q options
- Provides On/Off switching, dimming, power metering, digital sensor input, and status monitoring of luminaires
- Refer to TL7-B2 spec sheet for details

SimplySNAP Central Base Station
CBSSW-450-002
- Includes On-Site Controller (SS450-002) and 5-button switch
- Indoor and Outdoor rated
- Refer to CBSSW-450-002 spec sheet for details

Synapse Wireless Sensor
WSN-DPM
- Motion and light sensor
- Control multiple zones
- Refer to WSN-DPM spec sheet for details

SimplySNAP On-Site Controller
SS450-002
- Verizon® LTE-enabled
- Designed for indoor applications
- Refer to SS450-002 spec sheet for details

Building Management System (BMS) Gateway
BMS-GW-002
- Required for BACnet integration
- Refer to BMS-GW-002 spec sheet for details

Outdoor Antennas (Optional, for increased range, 8dB gain)
KIT-ANT420SM
- Kit includes antenna, 20' cable and bracket

KIT-ANT360
- Kit includes antenna, 30' cable and bracket

KIT-ANT600
- Kit includes antenna, 50' cable and bracket
- Refer to Outdoor antenna spec sheet for details

Photometry

All published luminaire photometric testing performed to IES LM-79-08 standards. To obtain an IES file specific to your project consult: http://creelighting.com/products/outdoor/area/osq-series

WM-DM	None

* Specify pole size: 3 (3"), 4 (4"), 5 (5"), or 6 (6") for single, double or triple luminaire orientation or 4 (4"), 5 (5"), or 6 (6") for quad luminaire orientation
** These EPA values must be multiplied by the following ratio: Fixture Mounting Height/Total Pole Height. Specify pole size: 3 (3"), 4 (4"), 5 (5"), or 6 (6")

Tenons and Brackets‡ (must specify color)

Square Internal Mount Vertical Tenons (Steel)
- Mounts to 3-6" (76-152mm) square aluminum or steel poles

PB-1A* – Single
PB-2A* – 180˚ Twin
PB-3A* – 180˚ Triple
PB-4A*(90) – 90˚ Quad
PB-4A*(180) – 180˚ Quad

Square Internal Mount Horizontal Tenons (Aluminum)
- Mounts to 4" (102mm) square aluminum or steel poles

PD-2A4(90) – 90˚ Twin
PD-2A4(180) – 180˚ Twin
PD-3A4(90) – 90˚ Triple
PD-4A4(90) – 90˚ Quad

Wall Mount Brackets
- Mounts to wall or roof

WM-2 – Horizontal for OSQ-B-AA mount
WM-4 – L-Shape for OSQ-B-AA mount
WM-DM – Plate for OSQ-DA mount

Round External Mount Vertical Tenons (Steel)
- Mounts to 2.375" (60mm) O.D. round aluminum or steel poles or tenons

PB-2R2.375 – Twin
PB-3R2.375 – Triple
PB-4R2.375 – Quad

Round External Mount Horizontal Tenons (Aluminum)
- Mounts to 2.375" (60mm) O.D. round aluminum or steel poles or tenons
- Mounts to square pole with PB-1A* tenon

PT-1 – Single (Vertical)
PT-2(90) – 90˚ Twin
PT-2(180) – 180˚ Twin
PT-3(90) – 90˚ Triple
PT-3(120) – 120˚ Triple
PT-4(90) – 90˚ Quad

Mid-Pole Bracket
- Mounts to square pole

PW-1A3** – Single
PW-2A3** – Double

Ground Mount Post
- For ground-mounted flood luminaires

PGM-1 - for OSQ-B-AA mount

‡ Refer to the Bracket and Tenons spec sheet for more details

Field Adjustable Output (Q9/Q8/Q7/Q6/Q5/Q4/Q3/Q2/Q1) Option Description:

The Field Adjustable Output option enables the OSQ area luminaires to be tuned to the exact needs of a particular application through multiple levels of adjustment. When ordered with the Q option, the luminaire will be shipped from the factory at the selected Q setting and will be fully adjustable between the nine settings.

FEATURES & SPECIFICATIONS

INTENDED USE — The 4" Wafer-Thin LED recessed downlight with remote driver box combines high quality light output and efficiency while eliminating the pot light housing for competitive affordability. This innovative wafer-slim Type IC design allows easy installation for new construction or remodel from below the ceiling without the requirement of a pot light housing. The LED module maintains at least 70% light output for 36,000 hours. These LED Wafer downlights are intended for closets, attics, hallways, bathrooms, kitchens, basements, soffits, entry ways, porches, garages, stairwells, corridors, nursing/retirement homes, condos, elevators, apartments, and any other small areas.

CONSTRUCTION — Ideal for shallow ceiling plenum since a pot light housing is NOT required. IC rated driver and fixture - approved for direct contact with insulation. Aluminum die cast outer frame. Durable, powder coat paint to prevent rust. Round fixture with integral edge-lit LED's. Steel spring clip for easy installation. Plenum rated cable connector to connect from module to remote driver box. Isolated driver integrated inside steel remote box with four 7/8" knockouts with slots for pryout. Not suitable for pulling wires.

OPTICS — Wafer-Thin downlight edge-lit LED technology uses light guided plate to distribute light. Polycarbonate lens provides even illumination throughout the space. Utilized 3000K and 4000K color temperature LEDs.

ELECTRICAL — Connect directly to 120V power supply via provided UL recognized driver. High efficient driver with power factor > 0.9. Ambient operating temperature: -40°F (-40°C) to +104°F (+40°C). Dimming down to 10% (See page 2 for recommended dimmers). Standard input wattage is 9.6W, 70 lumens per watt.

LISTINGS — CSA certified to Canadian safety standards. ENERGY STAR® certified. Wet location. Air Tight certified in accordance with ASTM E283-2004.

WARRANTY — 5-year limited warranty. Complete warranty terms located at: www.acuitybrands.com/CustomerResources/Terms_and_conditions.aspx

Note: Actual performance may differ as a result of end-user environment and application.
All values are design or typical values, measured under laboratory conditions at 25 °C.

Zoning
Existing: R-1 (Single-Family Residential)

Proposed: B-1 PD (Neighborhood Commercial, Planned Unit Development)

Approvals Sought
- Site Plan/ Architecture
- Rezoning
- Special Use for a PUD w/ Exceptions
- Final Plat Approval

Project Planner
Daniel Ritter, AICP
Senior Planner

EXECUTIVE SUMMARY

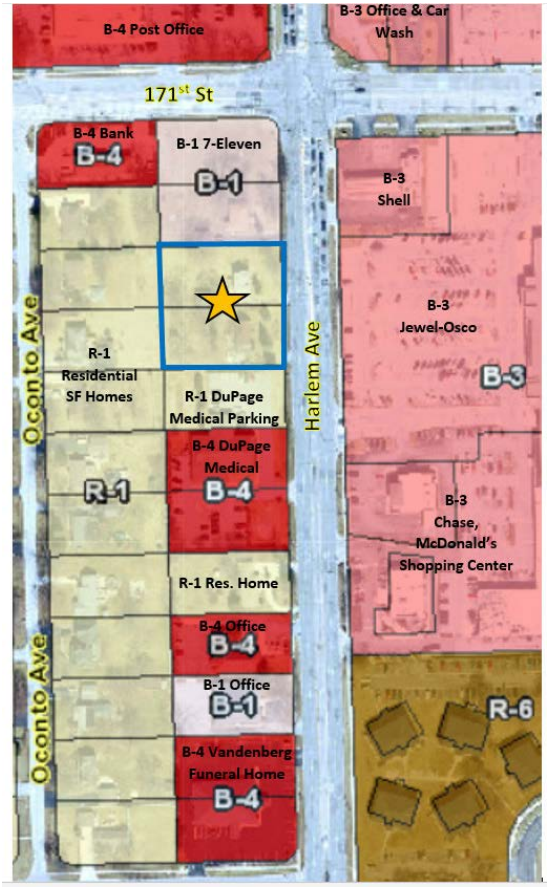
The Petitioner, Christopher Ilekis, on behalf of 17118 S Harlem Tinley Park LLC (d/b/a Vequity) (Contract Purchaser), is seeking approval to construct a 7,422 sq. ft. multi-tenant-tenant commercial building with a Starbucks drive-thru at 17120-17126 Harlem Avenue. The project requires the Rezoning of the property to the B-1 (Neighborhood Shopping) zoning district, Site Plan/Architecture Approval, and Final Plat Approval. Additionally, a Special Use for a Planned Unit Development(PUD) with Exceptions is requested over both the new development and the 7-Eleven project immediately adjacent to the north which is currently under construction by the same developer. The PUD allows for a drive-thru use to be permitted as well as a cohesive development pattern, shared access, and shared signage between the developments.

The subject site area on the west side of Harlem Ave was originally developed in the county with single-family homes for the full block. Starting in the 1980s the area began to transition from residential to commercial uses; the Comprehensive Plan designates the area as a "commercial/office" use. As the homes have been demolished and new commercial buildings constructed, the properties have been rezoned to low-intensity districts like B-1 (Neighborhood Shopping) or B-4 (Office and Service) due to their proximity to single-family residential homes. The conversion of this area to commercial uses is nearly complete. The Petitioner has added fencing and landscaping to buffer noise or light from the development. The lighting plan was designed so that no light spillage occurs and no light glare will be visible to the residences to the west. Additionally, the Petitioner has noted that the speaker system on the drive-thru ordering system has a low volume and the fencing and landscaping proposed have further been designed to limit any off-site noise (closest home is ~180 ft. from the speaker).

EXISTING SITE & ZONING

The subject property consists of two interior lots on the western side of Harlem Avenue The subject property is just south of 171st Street and the 7-Eleven gas station and convenience store development currently under construction by the same developer at 17100 Harlem Ave. The subject property lots are zoned R-1 (Single-Family Residential) indicated by the yellow star below. Both lots previously had vacant single-family homes on them. The homes were blighted and in violation of multiple property maintenance codes. The demolition of the homes was part of the 7-Eleven project approval and took place in 2020 leaving only one residential home on the block.

The west side of Harlem Ave was originally developed with single-family homes in the 1950s-1960s. Starting in the 1980s this area began to transition from residential to commercial uses due to their frontage along the heavily traveled commercial corridor and the development of the Jewel-Osco shopping center on the east side of Harlem Avenue. Due to the multiple curb cuts and difficulty of access from an arterial roadway, residential uses are not considered the highest and best use for this area. The expectation in the transition of this area is supported by the commercial/office use designation in the Village's Comprehensive Plan. As the lots have been redeveloped with commercial buildings, the properties have been rezoned to lower-intensity zoning districts like B-1 (Neighborhood Shopping) and B-4 (Office and Service Business), due to the proximity of single-family residential homes to the west.



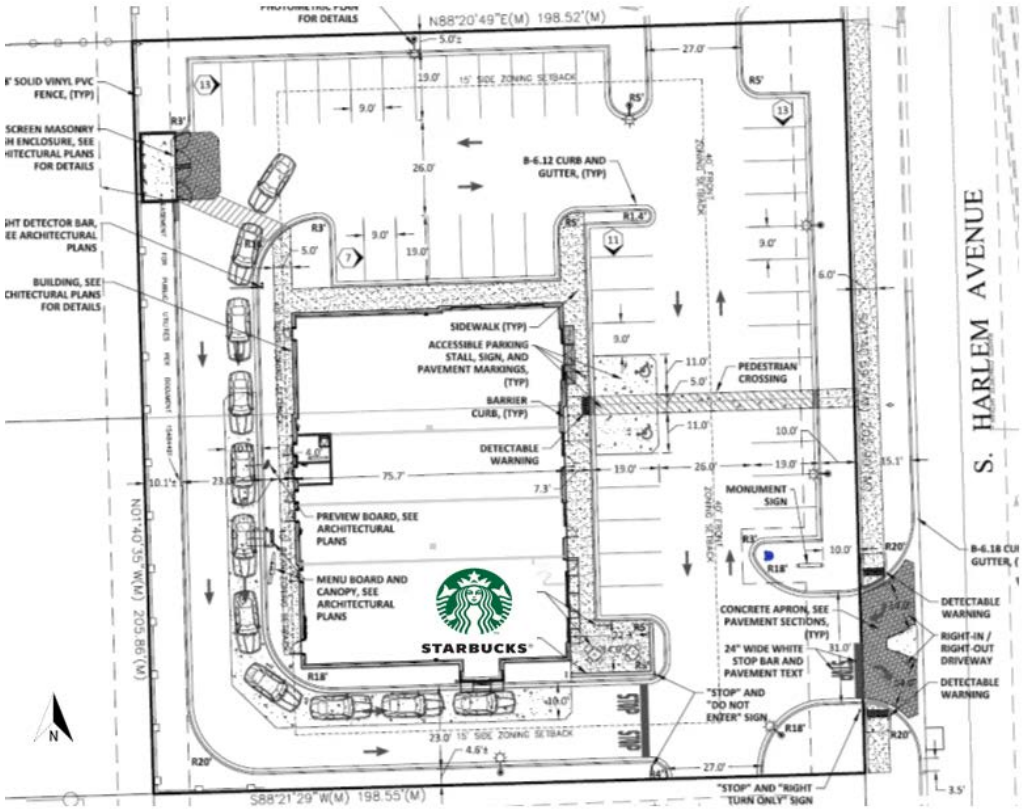
To the north of the subject property is the 7-Eleven property currently under construction and zoned B-1. To the east of the property across Harlem Avenue is Jewel-Osco and Tinley Park Commons Shopping Center zoned B-3 (General Business & Commercial). To the west are single-family homes (R-1). To the south is the DuPage Medical Group office zoned B-4, with a portion of the parking lot still zoned R-1.

PROPOSED USE

The proposed building will include a Starbucks Coffee with a drive-thru lane and window. The building is 7,422 sq. ft. in total size, with 7,279 sq. ft. leasable space (excluding mechanical and sprinkler rooms). The Starbucks will use approximately 2,202 sq. ft. of the leasable floor space. They have a high reliance on drive-thru business, particularly during the pandemic, but also will offer dine-in and patio seating at the location. The additional 5,077 sq. ft. of floor space has been designed to be able to accommodate up to three tenants depending on the space needs of the businesses. There is no contract on the other tenant spaces but it will be marketed upon approval to other commercial uses permitted in the B-1 zoning district.

SITE PLAN

The site plan includes the commercial building, vehicle parking, drive-thru lane, walkways, landscaping, and a dumpster enclosure. Due to the size of the parcel there are several bulk regulations that do not meet code and will require an Exception to the PUD and underlying zoning district. These exceptions are the same as those approved for the 7-Eleven development to the north that were treated as Variations.



These include an exception for the lot size of .938 acres instead of the minimum of 4 acres in the B-1 district; a lot width of 205.90 ft. instead of the minimum of 600 ft.; a lot depth of 198.52 instead of the minimum of 250 ft.; and a front yard setback of 81 ft. instead of the minimum of 125 ft. The exceptions are basically a result of the original platting of the area that did not contemplate the commercial uses that are now being developed in this area.

Access to the site will primarily be through a curb cut on Harlem Avenue at the south end of the parcel. However, cross-access is provided between the 7-Eleven site to the north and the bank (7231 171st St) along 171st Street. Cross-access has also been planned to the south so that a future connection can potentially be made to the DuPage Medical property.

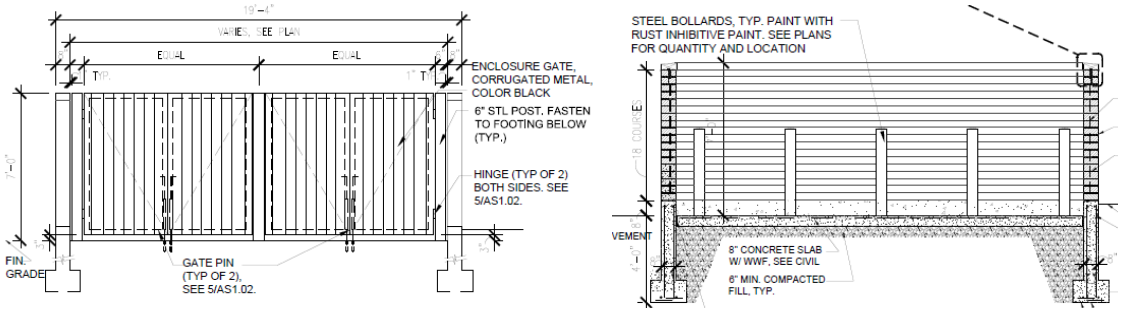
The new access point on Harlem Avenue is limited to right-in/right-out turns. A raised "pork chop" and directional signage have been proposed to ensure left turns are not made. The geometrics of the access has been altered slightly to allow for safe delivery truck and fire engine circulation through the site. Two-way drive aisles meet the required

26 ft. width minimum. The drive-thru lane is proposed at 23 ft. wide and includes the stacking lane and an "escape" lane.

The site generally circulates in a counter-clockwise fashion with order taking on the west side of the building and then order pickup on the south side of the building. The dedicated drive-thru lane includes stacking for up to 11 vehicles. A *Parking and Traffic Analysis* from their traffic consultant, KLOA, has been submitted outlining the expected demand. The report concluded adequate parking and drive-thru stacking is present in the proposed plan. Any drive-thru stacking beyond the drive-thru lane will happen on-site and not in any public roadways or shared drive aisles.

A public sidewalk is proposed as part of the development in compliance with the Village's Subdivision and Development Regulations. The sidewalk will connect to the 7-Eleven development's sidewalk. A private walkway will connect the stores to the public sidewalk that allows for better pedestrian connectivity and accessibility.

A new trash enclosure has been proposed at the northwest corner of the site and sized proportionately for Starbucks and up to three other commercial tenants. The enclosure will be constructed with exterior brick that matches the existing building façade texture and color.



An outdoor patio will be constructed near the entrance of the Starbucks. A 2-3 ft. high brick knee wall will be constructed around two sides of the patio area to protect patrons from vehicles.

Open Item #1: Review overall proposed Site Plan, layout, site circulation, and drive-thru stacking and the Exceptions required to approve the Site Plan.

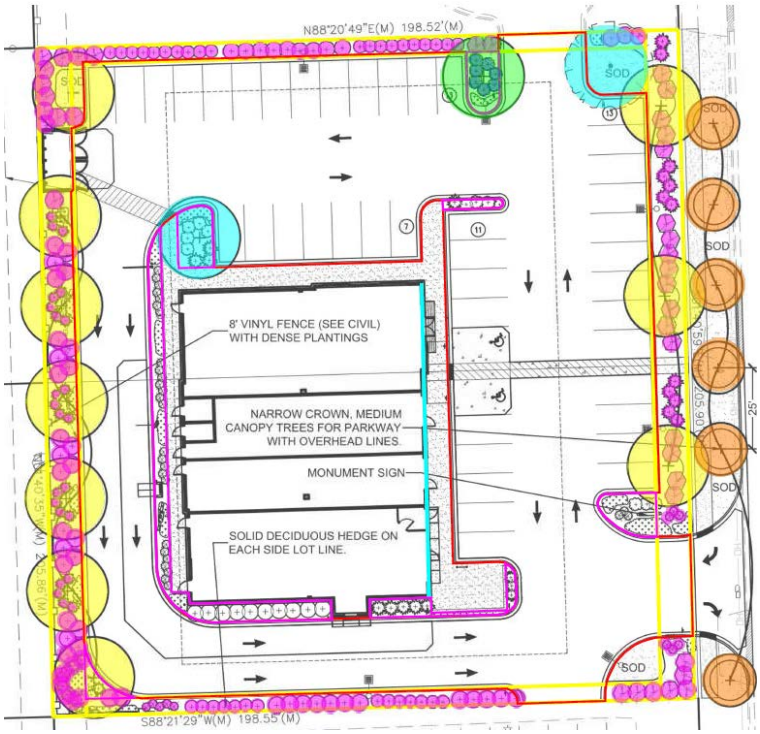
As with most new developments, the site plan is finalized, but the engineering of the site still has some outstanding comments and revisions that will need to be addressed prior to permit submittal. Staff is recommending that the site plan approval be conditioned upon final engineering review and approval.

Open Item #2: Staff is recommending the site plan approval be conditioned upon final engineering review and approval.

LANDSCAPE ARCHITECTURE

The proposed Landscape Plan has been reviewed by the Village's Landscape Architect and finds it to be in general conformance with the Village's Landscape Ordinance with a few exceptions due to the site's constraints. The proposal requests a waiver from a few of the bufferyard requirements, parkway tree requirements, and interior landscaping

requirements. The Petitioner has indicated that they have worked to meet the landscape requirements to the greatest extent possible and focused on making their available bufferyard width and landscaping adequate to buffer views from the residential properties to the west. The requirements of the landscape code are largely designed for new development "green" sites and are more difficult to meet on redevelopment or infill development due to limited site dimensions. When the requirements cannot be met, waivers can be requested, but the goal is to meet the intent of the requirements and create an attractively landscaped site. The total analysis and deficiencies are outlined in the table below.



Landscape Review Table A

Please review the landscape requirements within the following tables on the next page. Deficiencies must be addressed in a revised Landscape Plan. Please note the following abbreviations: CT = Canopy Tree, US = Understory Tree, SH = Shrub, T = Tree.

BUFFERYARD REQUIREMENTS							
Bufferyard Location	**Required Width**	**Proposed Width**	**Length**	**Required Plantings**	**Proposed Plantings**	**Deficit**	**Comments**
North ("B" Bufferyard)	5'	5'	179'	8 CT 3 US 36 SH	0 CT 0 US 36 SH	**-8 CT** **-3 US** -	Overlap of east and west proposed bufferyards excluded.
East ("C" Bufferyard)	10'	10'	206'	11 CT 5 US 42 SH	3 CT 0 US 39 SH	**-8 CT** **-5 US** **-3 SH**	
South ("B" Bufferyard)	5'	5'	179"	8 CT 3 US 36 SH	0 CT 0 US 36 SH	**-8 CT** **-3 US** -	Overlap of east and west proposed bufferyards excluded.
West ("D" Bufferyard)	30'	10'	206'	7 CT 4 US 29 SH	7 CT 0 US 67 SH	- **-4 US** **+38 SH**	Required plantings reduced by 50% due to proposed fencing. Bufferyard calculations utilize 30' wide requirements.
INTERIOR LOT LANDSCAPING REQUIREMENTS							

Location	Requirement	Proposed	Deficit	Comments
Foundation	Landscape coverage along 70% of building foundation that faces public right-of-way; 10' wide landscaped area	0% (lineal feet)	**100% (67 lineal feet)**	Total lineal feet of foundation fronting Harlem Ave. = 95'
Interior	4 canopy trees	2	**-2 CT**	40,873 s.f. of lot area (Audit includes 1 existing tree to remain)

PARKWAY STANDARDS					
Location	**Requirement**	**Required Trees**	**Proposed Trees**	**Deficit**	**Comments**
Parkway	1 Tree per 25 Lineal Feet	7	6	**-1**	Final plans to ensure low mature height trees to not conflict with existing power lines.

PARKING LOT LANDSCAPING STANDARDS				
Location	**Requirement**	**Provided**	**Deficit**	**Comments**
Parking Lot	15% of parking lot area to be landscaped or 3,291 square feet	1,680 square feet	**-1,611 square feet**	21,945 s.f. of parking lot shown on landscape plan
Parking Lot	Screening of adjacent properties and streets.	Continuous screening not provided.	-	Bufferyard plantings counted towards continuous screening requirements.
Parking Lot Islands	1 CT and 1 SH per 200 square feet (2 CT and 2 SH required)	1 CT 7 SH	**-1 CT** **+5 SH**	NE island = 169 s.f.

Two staff recommendations were utilized in the revised plan including the use of evergreen/spruce along the western buffer to allow for year-round screening of the development from the residents to the west. These trees provide for a better visual and noise buffer between commercial and residential properties. Additionally, trees throughout the site have been "upsized" from the minimum requirements to ensure quicker establishment and growth. The evergreen/spruce trees will be planted at an 8-foot height which will allow for quick maturity and additional screening.

A fence is proposed along the west property line; it will match the fence installed with the 7-Eleven and bank developments. The fence is an eight-foot-high beige PVC fence. This will create a cohesive look along the property line between the commercial and residential developments. PVC fencing has also been preferred between most commercial developments as they require less maintenance to keep a high-quality appearance.

Staff has recognized the difficulty in meeting the Landscape Ordinance requirements for smaller "infill" sites. The Petitioner has met the majority of the Landscape Ordinance, yet these few deficiencies remain due to site constraints. The proposed landscaping is similar to or exceeds the quality of landscaping on surrounding area properties and along Harlem Avenue. The proposed plan provides a plethora of screening (natural and fencing) along the west property line to help buffer views and noise from the residential homes the property adjoins.

Open Item #3: Discuss the proposed landscape plan and requested Landscape Ordinance waivers.

ARCHITECTURE

The design of the building utilizes high-quality materials, including face brick and a stone base. All mechanical equipment will be screened by the rooftop parapet. The majority of the face brick will be a shade of brown/espresso with the Starbucks portion of the building being a black/gray color brick. The use of different color brick and a different roofline is atypical for one tenant on strip center/outlet properties. However, the Petitioner wishes to differentiate that tenant space since the drive-thru component is likely to mean that it will be an anchor tenant in the future. The front façade does have a small ~6-inch offset to help transition between the different brick colors on the front facade. The proposed structure will have metal architectural canopies on the front façade over windows and doors. The dumpster enclosure is also proposed to match the building's brick material in color and style.

Open Item #4: Review the proposed architectural design, brick color, rooflines, and materials used throughout the development.

2 WEST ELEVATION
SCALE: 1/8"=1'-0"

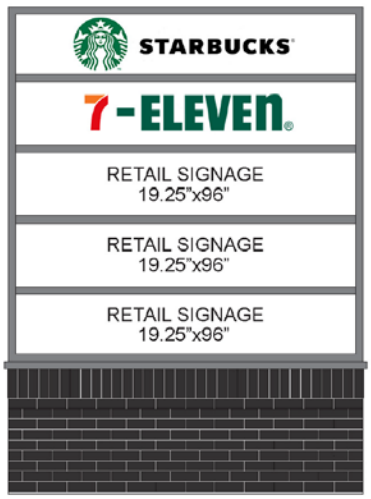
3 SOUTH ELEVATION
SCALE: 1/8"=1'-0"

4 NORTH ELEVATION
SCALE: 1/8"=1'-0"

20% PRELIMINARY DESIGN

SIGNAGE

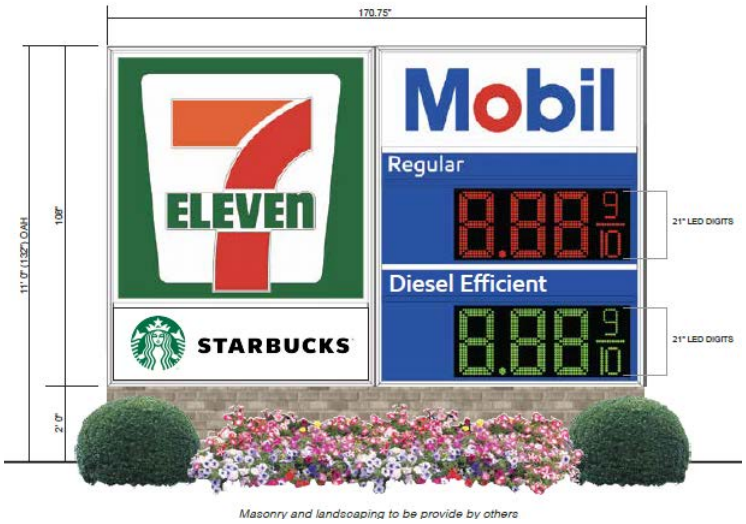
A new monument sign is proposed that will have space for up to five tenants. One of these tenants will be 7-Eleven who will also be dedicating a space on their ground sign for Starbucks. The shared signage between the properties is useful because they will have shared access/entrances and are part of the same PUD. An Exception covered under the PUD allows for this offsite signage for businesses within the same PUD. The new proposed ground sign complies with the size (10 ft.), height, and design requirements of the zoning code and PUD sign regulations. The brick base will match in color to the brick used on the Starbucks portion of the building.



No wall, directional, or drive-thru signage has been proposed at this time. Typically, staff requests to review these signs for any known tenants as part of a new proposal. Specifically, staff has noted that no preview menu board, which is typical of Starbucks, is permitted (code only allows one sign accessory to a drive-thru use). The Petitioner has noted that all other signage except for the primary ground sign will be the responsibility of the tenants. They have noted it is understood by both them and Starbucks that any signage that isn't in compliance with the existing codes may require a separate review and public hearing process to receive approval.

7-Eleven Site

As part of the interconnection of the two sites, the Petitioner has requested to modify the approved sign. In addition to allowing offsite signage within the PUD, an Exception is also requested for an additional one foot in height, for a total of 11 ft. height on the sign. This will allow for the sign to have space for one tenant on the new development in addition to the signage required for the gas station and convenience store. The gas station signage is unique in that is provides changing gas prices. The sign will be the most visible sign at the main intersection near both developments. Due to the increased height the sign also increases to 128 sq. ft. which exceeds the 120 sq. ft. maximum size. The sign will otherwise remain the same general design as originally proposed and meet other zoning code requirements.



Open Item #5: Review the proposed signage and the Exceptions required for the additional one-foot height and size of the ground sign at the intersection of 171st St & Harlem Ave.

PARKING

The petitioner has 7,279 sq. ft. of leasable commercial floor space. With the requirement of 6.5 spaces per 1,000 sq. ft. for planned commercial centers, this requires a total of 47 stalls on the site. A total of 44 parking stalls have been provided on the site resulting in a shortage of three stalls and thereby requiring an Exception as part of the PUD. A *Parking and Traffic Analysis* from their traffic consultant KLOA has been supplied outlining the expected traffic demand and concluding there is adequate parking and drive-thru stacking present in the proposed plan.

Parking for multi-tenant properties is sometimes difficult to predict due to unknown tenant-specific demand and changes in the tenancy over time. Parking requirements, which are already an imperfect science are thus even more difficult to determine. The property owners will have the ability to manage the tenancy to ensure an adequate supply of parking spaces.

Open Item #6: Review the proposed parking and the requested exception to reduce parking requirements by a total of three stalls.

LIGHTING

A new lighting ordinance was recently adopted in September 2019. The lighting plan for the proposed development complies with the new lighting standards with respect to fixture type, illumination intensity, and light intensity at the property lines.

The Petitioner has provided a Photometric Plan that provides lighting via six LED light poles and five LED wall mount fixtures throughout the site. The Photometric Plan indicates light spillage of less than one-foot candle at the roadway and zero at the western property line, which is adjacent to residential uses. All light fixtures are full cutoff and downcast to prevent glare on adjacent properties and roadways. Particular thought was put into the light placement and height (20' pole height) to avoid their visibility from the residential properties to the west.

Open Item #7: Discuss the overall light plan and light fixture placement.

ZONING (MAP AMENDMENT, SPECIAL USE FOR A PLANNED UNIT DEVELOPMENT WITH EXCEPTIONS)

The Petitioner has requested a rezoning from R-1 (Single Family Residential) to B-1 (Neighborhood Commercial) with a Special Use for a Planned Unit Development (PUD). The area along the west side of Harlem Avenue is in transition from residential to commercial uses. The property's adjacency to one of the Village's major commercial corridors (Harlem Avenue) and B-3 (General Business and Commercial) zoning district with the Jewel/Osco center to the east has influenced this transition. Additionally, the Village's Comprehensive Plan identifies this property as a "commercial/office" use. The demolition of blighted residential structures has provided the opportunity to develop new quality commercial uses that are designed to minimize potential impact on residential uses to the west. Per staff recommendation, the Petitioner is seeking a PUD with the underlying B-1 zoning district that will include the recently approved 7-Eleven parcel to the north.

Village code requires a minimum of 5 acres for a Planned unit Development (PUD); the proposed PUD is 1.89 acres. Planned Unit Developments are intended to *encourage the most imaginative and best possible design of building forms and site planning for tracts of land where a unitary plan would best adapt to the natural and physical characteristics of the site. Under this procedure, well planned residential, commercial, industrial, and other types of land use, individually or in combination, may be developed with complete design flexibility. Planned Unit Developments are of such a size and character that they may create their own environment.* The establishment of a minimum size addresses the need to create a distinct environment as in some of the Village's larger PUDs like Brookside Marketplace. While this area does not meet the minimum size requirement, the prominence of the corner, the consistency of design and landscape, the cross-access easements and the request to provide comprehensive signage on each parcel, supports Staff's recommendation to develop the two sites under a common Planned Unit Development.

The proposed underlying B-1 zoning district is often located adjacent to single-family residential development and is among the most restrictive commercial zoning, limiting high-intensity and other objectionable uses (loud noise, smells, tobacco sales, etc.) While restaurants are a permitted use in a B-1 district, drive-thus are not. The petitioner has identified the Starbucks as the tenant and the drive thru is a critical component of their business. Additionally, a few other uses have been requested as permitted uses, which are not included in the B-1 district. A full list of additional uses requested by the Petitioner is listed below:

- Only one (1) drive thru facility;
- Automotive parts & accessories, no on-site repairs or installation;
- Office Supply and equipment sales; and

- Personal service establishments – which services are performed on premises (ex. spas, massage, 1-on-1 personal training, beauty/makeup/eyebrow threading, weight loss counseling, etc.)

These uses will be considered as part of the PUD request and be included as permitted uses in the PUD ordinance. A complete list of permitted and special uses can be found in Schedule I, page 11 of Section V in the Zoning Ordinance. The PUD ordinance will include all approvals of the previously approved Special Use for the 7-Eleven development.

Open Item # 8: Review the requested zoning district of B-1, the establishment of a PUD and the additional uses requested with the PUD.

Similar to the 7-Eleven development, which included Variations for items such as the lot depth, minimum lot size, and drive aisle widths, the subject site will include Exceptions to the Zoning Code for a number of items. As a PUD these deviations from code are considered 'exceptions' not 'variations' and therefore to not follow the standard findings required of Variations. There are three exceptions related to the size of the parcel (similar to the 7-Eleven parcel). These exceptions to the bulk regulations include lot size, lot width and depth. The exceptions are needed for redevelopment to occur on the site and due to the limited lot area available for the development. The Following Exceptions will be requested as part of the PUD:

a. Permit a ground sign at the intersection on 17100 Harlem to be 11 ft. high, instead of the maximum of 10ft.
b. Permit a ground sign at the intersection on 17100 Harlem to be 128 sq. ft. instead of the maximum of 120 sq. ft.
c. Permit off-site signage for businesses within the PUD to be placed on either of the two permitted ground signs.
d. Permit 44 parking stalls instead of the minimum requirement of 47 stalls.
e. Permit a lot size of .938 acres instead of the minimum of 4 acres in the B-1 district.
f. Permit a lot width of 205.90 ft. instead of the minimum of 600 ft.
g. Permit a lot depth of 198.52 instead of the minimum of 250 ft.
h. Permit a front yard setback of 81 ft. instead of the minimum of 125 ft.

Open Item #9: Review the requested Exceptions from the Zoning Ordinance in the PUD.

FINAL PLAT OF SUBDIVISION

The proposed Plat of Subdivision will consolidate two existing lots (17118 and 17130 Harlem Avenue) resulting in a single lot that is .938 acres in size. Existing drainage and utility easements will remain on the property with a new easement where the watermain extension will run. Easements for cross-access to north and south have been included in the Final Plat of Subdivision.

Open Item #10: Review the Plat of Subdivision for recommendation to the Village Board

SUMMARY OF OPEN ITEMS

Staff identified the following open items for discussion at the workshop:

1. Review overall proposed Site Plan, layout, site circulation, and drive-thru stacking and the exceptions required to approve the Site Plan.
2. Staff is recommending the site plan approval be conditioned upon final engineering review and approval.
3. Discuss the proposed landscape plan and requested Landscape Ordinance waivers.
4. Review the proposed architectural design, brick color, rooflines, and materials used throughout the development.
5. Review the proposed signage and the Exceptions required for the additional one-foot height and size of the ground sign at the intersection of 171st St & Harlem Ave.
6. Review the proposed parking and the requested exception to reduce parking requirements by a total of three stalls.
7. Discuss the overall light plan and light fixture placement.
8. Review the requested zoning district of B-1 and the additional uses requested with the PUD.
9. Review the requested Exceptions from the Zoning Ordinance in the PUD.
10. Review the Plat of Subdivision for recommendation to the Village Board.

STANDARDS FOR REZONING APPROVAL

The Zoning Code does not establish any specific criteria that must be met in order for the Village Board to approve a rezoning request. Likewise, Illinois Statutes does not provide any specific criteria. Historically, Illinois courts have used eight factors enunciated in two court cases. The following "LaSalle Standards" have been supplied for the Commission to consider. Staff will prepare draft responses for these conditions within the next Staff Report.

a. The existing uses and zoning of nearby property;
b. The extent to which property values are diminished by the particular zoning;
c. The extent to which the destruction of property values of the complaining party benefits the health, safety, or general welfare of the public;
d. The relative gain to the public as compared to the hardship imposed on the individual property owner;
e. The suitability of the property for the zoned purpose;
f. The length of time the property has been vacant as zoned, compared to development in the vicinity of the property;
g. The public need for the proposed use; and
h. The thoroughness with which the municipality has planned and zoned its land use.

STANDARDS FOR PLANNED UNIT DEVELOPMENTS

No Planned Unit Development shall be authorized by the Village Board unless the following standards and criteria are met:

General Provisions For All Planned Unit Developments:

a. The site of the proposed Planned Unit Development is not less than five (5) acres in area, is under single ownership and/or unified control, and is suitable to be planned and developed, or redeveloped, as a unit and in a manner consistent with the purpose and intent of this Ordinance and with the Comprehensive Plan of the Village;
b. The Planned Unit Development will not substantially injure, or damage the use, value, and enjoyment of the surrounding property, nor hinder or prevent the development of surrounding property in accordance with the Land Use Plan of the Village;
c. The uses permitted in the development are necessary or desirable and that the need for such uses has been clearly demonstrated;
d. The proposed development will not impose an undue burden on public facilities and services, such as sewer and water systems, police, and fire protection;
e. The proposed development can be substantially completed within the period of time specified in the schedule of development submitted by the developer;
f. The street system serving the Planned Unit Development is adequate to carry the traffic that will be imposed upon the streets by the proposed development, and that the streets and driveways on the site of the Planned Unit Development will be adequate to serve the residents or occupants of the proposed development;
g. When a Planned Unit Development proposes the use of private streets, common driveways, private recreation facilities, or common open space, the developer shall provide and submit, as part of the application, the method and arrangement whereby these private facilities shall be operated and maintained;
h. The general development plan shall contain such proposed covenants, easements, and other provisions relating to the bulk, location, and density of residential buildings, non-residential uses and structures, and public facilities as are necessary for the welfare of the Planned Unit Development and the Village. All such covenants shall specifically provide for enforcement by the Village of Tinley Park in addition to the landowners within the development;
i. The developer shall provide and record easements and covenants, and shall make such other arrangements as furnishing a performance bond, escrow deposit, or other financial guarantees as may be reasonably be required to assure performance in accordance with the development plan and to protect the public interest in the event of abandonment of said plan before completion; and
j. Any exceptions or modifications of the zoning, subdivision, or other regulations that would otherwise be applicable to the site are warranted by the design of the proposed development plan, and the amenities incorporated in it, are consistent with the general interest of the public.

STANDARDS FOR A SPECIAL USE

Section X.J.5. of the Zoning Ordinance lists standards that need to be considered by the Plan Commission. The Plan Commission is encouraged to consider these standards (listed below) when analyzing a Special Use request. Staff will provide draft Findings in the Staff Report for the Public Hearing.

X.J.5. Standards: No Special Use shall be recommended by the Plan Commission unless said Commission shall find:

a. That the establishment, maintenance, or operation of the Special Use will not be detrimental to or endanger the public health, safety, morals, comfort, or general welfare;

b. That the Special Use will not be injurious to the use and enjoyment of other property in the immediate vicinity for the purposes already permitted, nor substantially diminish and impair property values within the neighborhood;
c. That the establishment of the Special Use will not impede the normal and orderly development and improvement of surrounding property for uses permitted in the district;
d. That adequate utilities, access roads, drainage, and/or other necessary facilities have been or are being provided;
e. That adequate measures have been or will be taken to provide ingress and egress so designed as to minimize traffic congestion in the public streets; and
f. That the Special Use shall, in all other respects, conform to the applicable regulations of the district in which it is located, except as such regulations may in each instance be modified by the Village Board pursuant to the recommendation of the Plan Commission. The Village Board shall impose such conditions and restrictions upon the premises benefited by a Special Use Permit as may be necessary to ensure compliance with the above standards, to reduce or minimize the effect of such permit upon other properties in the neighborhood, and to better carry out the general intent of this Ordinance. Failure to comply with such conditions or restrictions shall constitute a violation of this Ordinance.
g. The extent to which the Special Use contributes directly or indirectly to the economic development of the community as a whole.

It is also important to recognize that a Special Use Permit does not run with the land and instead the Special Use Permit is tied to the Petitioner. This is different from a process such as a variance, since a variance will forever apply to the property to which it is granted. Staff encourages the Plan Commission to refer to Section X.J.6. to examine the conditions where a Special Use Permit will expire.

STANDARDS FOR SITE PLAN & ARCHITECTUAL APPROVAL

Section III.T.2. of the Zoning Ordinance requires that the conditions listed below must be met and reviewed for Site Plan approval. Specific findings are not required but all standards shall be considered to have been met upon review from the Plan Commission.

Architectural

a. Building Materials: The size of the structure will dictate the required building materials (Section V.C. Supplementary District Regulations). Where tilt-up or pre-cast masonry walls (with face or thin brick inlay) are allowed vertical articulation, features are encouraged to mask the joint lines. Concrete panels must incorporate architectural finishes that comply with "Building Articulation" (Section III.U.5.h.) standards. Cast in place concrete may be used as an accent alternate building material (no greater than 15% per façade) provided there is sufficient articulation and detail to diminish it's the appearance if used on large, blank walls.
b. Cohesive Building Design: Buildings must be built with approved materials and provide architectural interest on all sides of the structure. Whatever an architectural style is chosen, a consistent style of architectural composition and building materials are to be applied on all building facades.
c. Compatible Architecture: All construction, whether it be new or part of an addition or renovation of an existing structure, must be compatible with the character of the site, adjacent structures and streetscape. Avoid architecture or building materials that significantly diverge from adjacent architecture. Maintain the rhythm of the block in terms of scale, massing and setback. Where a development includes outlots they shall be designed with compatible consistent architecture with the primary building(s). Site lighting, landscaping and architecture shall reflect a consistent design statement throughout the development.

d. Color: Color choices shall consider the context of the surrounding area and shall not be used for purposes of "attention getting" or branding of the proposed use. Color choices shall be harmonious with the surrounding buildings; excessively bright or brilliant colors are to be avoided except to be used on a minor scale for accents.
e. Sustainable architectural design: The overall design must meet the needs of the current use without compromising the ability of future uses. Do not let the current use dictate an architecture so unique that it limits its potential for other uses (i.e. Medieval Times).
f. Defined Entry: Entrance shall be readily identifiable from public right-of-way or parking fields. The entry can be clearly defined by using unique architecture, a canopy, overhang or some other type of weather protection, some form of roof element or enhanced landscaping.
g. Roof: For buildings 10,000 sf or less a pitched roof is required or a parapet that extends the full exterior of the building. For buildings with a continuous roof line of 100 feet of more, a change of at least five feet in height must be made for every 75 feet.
h. Building Articulation: Large expanses of walls void of color, material or texture variation are to be avoided. The use of material and color changes, articulation of details around doors, windows, plate lines, the provision of architectural details such as "belly-bands" (decorative cladding that runs horizontally around the building), the use of recessed design elements, exposed expansion joints, reveals, change in texture, or other methods of visual relief are encouraged as a means to minimize the oppressiveness of large expanses of walls and break down the overall scale of the building into intermediate scaled parts. On commercial buildings, facades greater than 100 feet must include some form of articulation of the façade through the use of recesses or projections of at least 6 inches for at least 20% of the length of the façade. For industrial buildings efforts to break up the long façade shall be accomplished through a change in building material, color or vertical breaks of three feet or more every 250 feet.
i. Screen Mechanicals: All mechanical devices shall be screened from all public views.
j. Trash Enclosures: Trash enclosures must be screened on three sides by a masonry wall consistent with the architecture and building material of the building it serves. Gates must be kept closed at all times and constructed of a durable material such as wood or steel. They shall not be located in the front or corner side yard and shall be set behind the front building façade.

<u>Site Design</u>

a. Building/parking location: Buildings shall be located in a position of prominence with parking located to the rear or side of the main structure when possible. Parking areas shall be designed so as to provide continuous circulation avoiding dead-end parking aisles. Drive-through facilities shall be located to the rear or side of the structure and not dominate the aesthetics of the building. Architecture for canopies of drive-through areas shall be consistent with the architecture of the main structure.
b. Loading Areas: Loading docks shall be located at the rear or side of buildings whenever possible and screened from view from public rights-of-way.
c. Outdoor Storage: Outdoor storage areas shall be located at the rear of the site in accordance with Section III.O.1. (Open Storage). No open storage is allowed in front or corner side yards and are not permitted to occupy areas designated for parking, driveways or walkways.
d. Interior Circulation: Shared parking and cross access easements are encouraged with adjacent properties of similar use. Where possible visitor/employee traffic shall be separate from truck or equipment traffic.
e. Pedestrian Access: Public and interior sidewalks shall be provided to encourage pedestrian traffic. Bicycle use shall be encouraged by providing dedicated bikeways and parking. Where pedestrians or bicycles must cross vehicle pathways a cross walk shall be provided that is distinguished by a different pavement material or color.

RECOMMENDATION

Following a successful workshop, proceed to a Public Hearing at the May 20, 2021 Plan Commission meeting.

PLANNING AND ZONING GENERAL APPLICATION

Authorized Representative Consent

It is required that the property owner or his designated representative be present at all requests made to the Plan Commission and Zoning Board of Appeals. During the course of a meeting, questions may arise regarding the overall project, the property, property improvements, special conditions attached to recommendations among other aspects of any formal request. The representative present must have knowledge of the property and all aspects of the project. They must have the authority to make commitments related to the project and property. Failure to have the property owner or designated representative present at the public meeting can lead to substantial delays to the project approval. If the owner cannot be present or does not wish to speak at the public meeting, the following statement must be signed by the owner for an authorized repetitive.

I hereby authorize 11718 S Harlem Tinley Park LLC *(print clearly) to act on my behalf and advise that they have full authority to act as my/our representative in regards to the subject property and project, including modifying any project or request. I agree to be bound by all terms and agreements made by the designated representative.*

Property Owner Signature: [redacted]

Property Owner Name (Print): Emaar Properties, LLC

Acknowledgements

- Applicant acknowledges, understands and agrees that under Illinois law, the Village President (Mayor), Village Trustees, Village Manager, Corporation Counsel and/or any employee or agent of the Village or any Planning and Zoning Commission member or Chair, does not have the authority to bind or obligate the Village in any way and therefore cannot bind or obligate the Village. Further, Applicant acknowledges, understands and agrees that only formal action (including, but not limited to, motions, resolutions, and ordinances) by the Board of Trustees, properly voting in an open meeting, can obligate the Village or confer any rights or entitlement on the applicant, legal, equitable, or otherwise.
- Members of the Plan Commission, Zoning Board of Appeals, Village Board as well as Village Staff may conduct inspections of subject site(s) as part of the pre-hearing and fact finding review of requests. These individuals are given permission to inspect the property in regards to the request being made.
- Required public notice signs will be obtained and installed by the Petitioner on their property for a minimum of 10 days prior to the public hearing. These may be provided by the Village or may need to be produced by the petitioner.
- The request is accompanied by all addendums and required additional information and all applicable fees are paid before scheduling any public meetings or hearings.
- Applicant verifies that all outstanding fees and monies owed to the Village of Tinley Park have been paid.
- Any applicable recapture, impact, engineering, contracted review or other required fees and donations shall be paid prior to issuance of any building permits, occupancy permits, or business licenses.
- The Owner and Applicant by signing this application certify that the above information and all supporting addendums and documentation is true and correct to the best of their knowledge.

REZONING (MAP AMENDMENT) ADDENDUM

APPLICATION & SUBMITTAL REQUIREMENTS

A complete application consists of the following items submitted in a comprehensive package. If materials are submitted separately or are incomplete they may not be accepted and may delay the review and meeting dates until a complete application package is received. The following information is being provided in order to assist applicants with the process of requesting a **Map Amendment for Rezoning** from the terms of the Zoning Ordinance. This information is a summary of the application submittal requirements and may be modified based upon the particular nature and scope of the specific request.

Depending upon meeting schedules, legal notification requirements, and the specific type and scope of the request, this process generally takes between 45 to 60 days from the date of submission of a complete application package. Please schedule a pre-application meeting with Planning Department staff to review the feasibility of the proposal, discuss applicable Ordinance requirements, discuss submittal requirements, and receive some preliminary feedback on any concept ideas or plans prior to making a submittal.

☑ General Application form is complete and is signed by the property owner(s) and applicant (if applicable).

☑ Ownership documentation is submitted indicating proper ownership through a title report or title policy. If a corporation or partnership, documentation of the authorized agent must be supplied as well. All beneficiaries of a property must be disclosed.

☑ Response to LaSalle Factors/Criteria listed below.

☐ A written project narrative detailing the general nature and specific aspects of the proposal being requested. Details should include the existing zoning designation, the proposed designation and the intended future use and function of the site. The narrative should describe how the rezoning conforms to the Village's Comprehensive Plan as well as how it works with adjacent and nearby existing and proposed land uses. Any additional requests such as a Site Plan approval, Special Use permit or Variation should be indicated in the narrative as well.

☑ A Plat of Survey of the property, including the legal description, that is prepared by a register land surveyor and has all up-to-date structures and property improvements indicated.

☐ It is standard practice and policy that zoning is not changed without specific plans for development that can be attached to the zoning change. Site Plan or interior layout plans that indicate how the property and site will be utilized and developed should be submitted and it is likely site plan approval will be required at the same time.

☐ $750 Map Amendment/Rezoning hearing fee.

LASALLE FACTORS/CRITERIA FOR REZONING (MAP AMENDMENT)

The Zoning Code does not establish any specific criteria that must be met in order for the Village Board to approve a rezoning request. Likewise, Illinois Statutes does not provide any specific criteria. Historically, Illinois courts have used eight factors enunciated in two court cases, LaSalle Bank of Chicago v. Count of Cook (1957) and Sinclair Pipeline v. Village of Richton Park (1960), when evaluating the validity of zoning changes. The so-called "LaSalle factors" are listed below. Village staff and officials will take these factors into consideration when evaluating and deciding rezoning requests. The petitioner should prepare their own responses to the "LaSalle Factors" with factual evidence to defend the requested rezoning. If additional space is required, you may provide the responses on a separate document or page.

A. The existing uses and zoning of nearby property;

Variation #1, Two-Way Parking Aisle; variation is an existing condition. conforming would require demolition of existing foundation and roof structure. Variation #2, Side Yard Set Back variation; proposed addition aligns with existing east wall of building at 9'-6" from property line.

B. The extent to which property values are diminished by the particular zoning;

Variation #1, Two-Way Parking Aisle; variation is an existing condition. conforming would require demolition of existing foundation and roof structure. Variation #2, Side Yard Set Back variation; proposed addition aligns with existing east wall of building at 9'-6" from property line.

C. The extent to which the destruction of property values of the complaining party benefits the health, safety, or general welfare of the public;

Variation #1, Two-Way Parking Aisle; hardship was created by and existing condition. Variation #2, Side Yard Set Back variation; hardship was created by an existing non-conforming setback.

D. The relative gain to the public as compared to the hardship imposed on the individual property owner;

Variation #1, Two-Way Parking Aisle; variation is an existing condition and is unique to this property. Variation #2, Side Yard Set Back variation; proposed addition aligns with existing east wall of building at 9'-6" from property line which is a unique existing condition.

E. The suitability of the property for the zoned purpose;

Variation #1, Two-Way Parking Aisle; variation is an existing condition and will not be detrimental to public welfare. Variation #2, Side Yard Set Back variation; proposed addition aligns with existing east wall of building at 9'-6" from property line and will not be detrimental to public welfare

F. The length of time the property has been vacant as zoned, compared to development in the vicinity of the property;

Variation #1, Two-Way Parking Aisle; variation is an existing condition. Variation #2, Side Yard Set Back variation; proposed addition aligns with existing east wall of building at 9'-6" from property line.

G. The public need for the proposed use; and

There is no impact on lair and light to adjacent properties.

H. The thoroughness with which the municipality has planned and zoned its land use.

There is no proposed additional parking for the development and 400s.f. addition will have minimal impact on facility traffic.

LEGAL DESCRIPTION

PARCEL 1:
LOT 3 IN BLOCK 1 IN ARTHUR T. MCINTOSH AND COMPANY'S SOUTHLANDS IN THE SOUTHEAST 1/4 OF SECTION 25, TOWNSHIP 36 NORTH, RANGE 12, EAST OF THE THIRD PRINCIPAL MERIDIAN, IN COOK COUNTY, ILLINOIS.

PARCEL 2:
LOT 4 IN BLOCK 1 IN ARTHUR T. MCINTOSH AND COMPANY'S SOUTHLANDS IN THE SOUTHEAST 1/4 OF SECTION 25, TOWNSHIP 36 NORTH, RANGE 12, EAST OF THE THIRD PRINCIPAL MERIDIAN, IN COOK COUNTY, ILLINOIS.

PARCEL 3:
NON-EXCLUSIVE EASEMENTS FOR THE BENEFIT OF PARCEL 1 AND 2 AS CREATED BY THE DECLARATION OF RECIPROCAL EASEMENTS DATED APRIL 3, 2020 AND RECORDED MAY 29, 2020 AS DOCUMENT 2015015003 MADE BY EMAAR PROPERTIES, LLC – 17110 HARLEM, FOR THE PURPOSES OF INGRESS AND EGRESS OVERALL PAVED DRIVEWAYS, ROADWAYS AND WALKWAYS AS THEN OR THEREAFTER CONSTRUCTED AND FOR THE INSTALLATION, CONSTRUCTION, USE, OPERATION, MAINTENANCE, REPAIR, REPLACEMENT AND REMOVAL OF SANITARY SEWER SYSTEMS, WATER UTILITY SYSTEMS AND ALL OTHER UTILITY SYSTEMS, FACILITIES AND CONNECTIONS OVER THE FOLLOWING DESCRIBED LAND:

LOTS 1 AND 2 IN BLOCK 1 IN ARTHUR T. MCINTOSH AND COMPANY'S SOUTHLANDS IN THE SOUTHEAST 1/4 OF SECTION 25, TOWNSHIP 36 NORTH, RANGE 12, EAST OF THE THIRD PRINCIPAL MERIDIAN, IN COOK COUNTY, ILLINOIS.

BENCHMARKS

REFERENCE BENCHMARK:
NGS DESIGNATION – DK2006
PID – DN4691

STATION IS 39 FEET WEST OF THE CENTERLINE OF WILL/COOK ROAD, 54 FEET SOUTH OF THE CENTERLINE OF 167TH STREET, 10 FEET WEST OF A TRAFFIC SIGNAL HAND HOLE AND 1 FOOT NORTHEAST OF AN ORANGE CARSONITE MARKER. ACCESS TO THE DATUM POINT IS THROUGH A 6 INCH LOGO CAP AND THE ROD (DATUM POINT) IS SURROUNDED BY A FLOATING BRONZE DISK TO AID IN IDENTIFICATION.

DATUM: NAVD88
ELEVATION = 751.92

SITE BENCHMARKS:

SITE BENCHMARK 1
RAILROAD SPIKE IN SOUTHWEST FACE OF UTILITY POLE

ELEVATION = 704.47

SITE BENCHMARK 2
TOP OF REBAR IN CONCRETE, SOUTHWEST CORNER OF LOT 4.

ELEVATION = 704.66

SITE BENCHMARK 3
CROSS CUT ON TRAFFIC SIGNAL MANHOLE.

ELEVATION = 700.19

SCHEDULE B EXCEPTIONS

SHOWN OR NOTED HEREON

10 COVENANTS AND RESTRICTIONS (BUT OMITTING ANY SUCH COVENANT OR RESTRICTIONS, IF ANY, BASED ON RACE, COLOR, RELIGION, SEX, SEXUAL ORIENTATION, FAMILIAL STATUS, MARITAL STATUS, DISABILITY, HANDICAP, NATIONAL ORIGIN, ANCESTRY OR SOURCE OF INCOME, AS SET FORTH IN APPLICABLE STATE OR FEDERAL LAWS, EXCEPT TO THE EXTENT THAT SAID COVENANT OR RESTRICTION IS PERMITTED BY APPLICABLE LAW) CONTAINED IN DOCUMENT RECORDED AS DOCUMENT NO. 17258782, RELATING TO RELATING TO SIZE, AREA AND USE OF THE LAND, WHICH DOES NOT CONTAIN A REVERSIONARY OR FORFEITURE CLAUSE.

AFFECTS LOT 3

11 COVENANTS AND RESTRICTIONS (BUT OMITTING ANY SUCH COVENANT OR RESTRICTIONS, IF ANY, BASED ON RACE, COLOR, RELIGION, SEX, SEXUAL ORIENTATION, FAMILIAL STATUS, MARITAL STATUS, DISABILITY, HANDICAP, NATIONAL ORIGIN, ANCESTRY OR SOURCE OF INCOME, AS SET FORTH IN APPLICABLE STATE OR FEDERAL LAWS, EXCEPT TO THE EXTENT THAT SAID COVENANT OR RESTRICTION IS PERMITTED BY APPLICABLE LAW) CONTAINED IN DOCUMENT RECORDED AS DOCUMENT NO. 15832298, RELATING TO RELATING TO SIZE, AREA AND USE OF THE LAND, WHICH DOES NOT CONTAIN A REVERSIONARY OR FORFEITURE CLAUSE.

AFFECTS LOT 4

12 EASEMENT IN FAVOR OF PUBLIC UTILITIES, AND ITS/THEIR RESPECTIVE SUCCESSORS AND ASSIGNS, TO INSTALL, OPERATE AND MAINTAIN ALL EQUIPMENT NECESSARY FOR THE PURPOSE OF SERVING THE LAND AND OTHER PROPERTY, TOGETHER WITH THE RIGHT OF ACCESS TO SAID EQUIPMENT, AND THE PROVISIONS RELATING THERETO CONTAINED IN THE PLAT OF SUBDIVISION.

AFFECTS THE REAR 10 FEET OF LOTS 3 AND 4

13 TERMS, PROVISIONS AND CONDITIONS WITHIN THE DECLARATION OF RECIPROCAL EASEMENTS FOR NON-EXCLUSIVE AND PERPETUAL INGRESS AND EGRESS OVERALL PAVED DRIVEWAYS, ROADWAYS AND WALKWAYS, THE MAINTENANCE OF EASEMENT AREAS AND THE RIGHTS OF ADJOINING OWNER OR OWNERS TO THE CONCURRENT USE OF SAID EASEMENT, CONDITIONS AND BENEFITS RELATING TO THE INSTALLATION, CONSTRUCTION, USE, OPERATION, MAINTENANCE, REPAIR, REPLACEMENT , RELOCATION AND REMOVAL OF SANITARY SEWER SYSTEMS, WATER UTILITY SYSTEMS AND ALL OTHER UTILITIES SYSTEMS , FACILITIES AND CONNECTIONS, POTENTIAL LIEN RIGHTS RELATING TO REIMBURSEMENT OF MAINTENANCE EXPENSES AS SET FORTH IN THE DECLARATION OF RECIPROCAL EASEMENTS RECORDED MAY 29, 2020 AS DOCUMENT NUMBER 2015015003.

14 (A). TERMS, PROVISIONS, AND CONDITIONS RELATING TO THE EASEMENT DESCRIBED AS PARCEL 3 CONTAINED IN THE INSTRUMENT CREATING SAID EASEMENT.

(B) RIGHTS OF THE ADJOINING OWNER OR OWNERS TO THE CONCURRENT USE OF SAID EASEMENT.

SCHEDULE B EXCEPTIONS 8, 9, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26 AND 27 ARE NOT SURVEY RELATED AND THEREFORE NOT SHOWN

NOTES

1. THIS SURVEY IS BASED ON THE LEGAL DESCRIPTION AND EASEMENTS OF RECORD AS IDENTIFIED IN TITLE COMMITMENT NUMBER 6719123 ISSUED BY FREEDOM TITLE CORPORATION HAVING AN EFFECTIVE DATE OF OCTOBER 16, 2020.
2. THE BASIS OF BEARINGS FOR THIS SURVEY IS THE ILLINOIS STATE PLANE COORDINATE SYSTEM, NAD 83 (2011), ZONE 1201 (ILLINOIS EAST).
3. THIS SITE FALLS WITHIN "OTHER AREAS: ZONE X" (AREAS DETERMINED TO BE OUTSIDE THE 0.2% ANNUAL CHANCE FLOODPLAIN) AS DEFINED BY THE FLOOD INSURANCE RATE MAP, MAP NUMBER 17031C0708IJ, HAVING A REVISED DATE OF AUGUST 19, 2008.
4. THIS PROFESSIONAL SERVICE CONFORMS TO THE CURRENT ILLINOIS MINIMUM STANDARDS FOR TOPOGRAPHIC SURVEYS, AND IS BASED ON FIELD WORK PERFORMED ON NOVEMBER 19, 2020.
5. THE SURVEYOR CONTACTED J.U.L.I.E. (JOINT UTILITY LOCATING INFORMATION FOR EXCAVATORS) FOR AN ON-SITE LOCATE WHICH WAS ASSIGNED A DIG NUMBER OF X321 1901. THE UTILITIES AS MARKED ON-SITE AT THE TIME OF THE SURVEY ARE SHOWN HEREON. ADDITIONALLY, THE SURVEYOR CONTACTED J.U.L.I.E. FOR A DESIGN STAGE REQUEST FOR THIS SITE WHICH WAS ASSIGNED A DIG NUMBER OF A322 1222. INQUIRIES WERE SENT OUT TO THE VARIOUS UTILITY COMPANIES REQUESTING MAPS AND/OR ATLASES OF THEIR RESPECTIVE FACILITIES. THE INFORMATION RECEIVED TO DATE IS SHOWN HEREON.
6. EVIDENCE OF RECENT EARTH MOVING WORK OBSERVED IN THE PROCESS OF CONDUCTING THE FIELD WORK.
7. NO PROPOSED CHANGES IN STREET RIGHT OF WAY LINES BASED ON INFORMATION RECEIVED FROM THE CONTROLLING JURISDICTION AT THE TIME OF THE SURVEY. NO OBSERVED EVIDENCE OF RECENT STREET OR SIDEWALK CONSTRUCTION OR REPAIRS.
8. THERE WERE NO WETLAND DELINEATION MARKERS OBSERVED IN THE PROCESS OF CONDUCTING FIELD WORK.
10. 9. DOCUMENT 17258782 WAS NOT PROVIDED TO THE SURVEYOR FOR REVIEW. NOT PLOTTABLE.
11. 10. WARRANTY DEED RECORDED AS DOCUMENT 15832298 CONTAINS THE FOLLOWING:
    a. THE AREA OF THE FIRST FLOOR OF ANY MAIN BUILDING SHALL NOT BE LESS THAN 800 SQUARE FEET.
    b. RESTRICTIONS REGARDING USE OF THE LAND WHICH ARE NOT SURVEY RELATED.

PARCEL 3 13 14 11. DOCUMENT 2015015003 GRANTS:
    a. A RECIPROCAL ACCESS, INGRESS AND EGRESS EASEMENT OVER THE SURVEYED SITE AND OVER LOTS 1 AND 2 ADJOINING AND NORTH OF THE SURVEYED SITE OVER PAVED DRIVEWAYS, ROADWAYS AND WALKWAYS. BLANKET IN NATURE.
    b. A UTILITY EASEMENT OVER THE SURVEYED SITE AND OVER LOTS 1 AND 2 ADJOINING AND NORTH OF THE SURVEYED SITE, EXCLUDING ANY BUILDING AREA. BLANKET IN NATURE.

ZONING INFORMATION

THE FOLLOWING INFORMATION IS FROM THE ZONING REPORT FOR 17118 & 17130 HARLEM AVENUE, TINLEY PARK, ILLINOIS, PREPARED BY NVS, DATED DECEMBER 16, 2020

THIS SITE IS ZONED R-1

SETBACKS (SHOWN HEREON)
- FRONT: 40 FEET MINIMUM
- SIDE: 15 FEET MINIMUM, 30 FEET MINIMUM TOTAL
- REAR: 40 FEET MINIMUM

MAXIMUM BUILDING HEIGHT: 40 FEET

LOT SIZE:
- MINIMUM LOT AREA: 20,000 SQUARE FEET
- MINIMUM LOT WIDTH: 100 FEET
- MINIMUM LOT DEPTH: NO REQUIREMENT NOTED

MAXIMUM LOT COVERAGE: NO REQUIREMENT NOTED

MAXIMUM FLOOR AREA RATIO: 0.3

PARKING SPACES REQUIRED: N/A – NO BUILDINGS OBSERVED

SURVEYOR'S CERTIFICATION

TO: 17100 S. HARLEM, LLC, AN ILLINOIS LIMITED LIABILITY COMPANY, LAKESIDE BANK, ITS SUCCESSORS AND/OR ASSIGNS, CHICAGO TITLE INSURANCE COMPANY AND FREEDOM TITLE CORPORATION

THIS IS TO CERTIFY THAT THIS MAP OR PLAT AND THE SURVEY ON WHICH IT IS BASED WERE MADE IN ACCORDANCE WITH THE 2016 MINIMUM STANDARD DETAIL REQUIREMENTS FOR ALTA/NSPS LAND TITLE SURVEYS, JOINTLY ESTABLISHED AND ADOPTED BY ALTA AND NSPS, AND INCLUDES ITEMS 1, 2, 3, 4, 5, 6(A), 6(B), 7(A), 8, 9, 11, 14, 16, 17, 18 AND 20 OF TABLE A THEREOF. THE FIELD WORK WAS COMPLETED ON NOVEMBER 19, 2020.

UTILITY STATEMENT
THE UNDERGROUND UTILITIES SHOWN HEREON WERE LOCATED FROM VISIBLE FIELD EVIDENCE AND EXISTING DRAWINGS, MAPS AND INFORMATION SUPPLIED BY UTILITY COMPANIES. WE DO NOT GUARANTEE/CERTIFY THAT THE UNDERGROUND UTILITIES SHOWN COMPRISE ALL SUCH UTILITIES IN THE AREA, EITHER IN SERVICE OR ABANDONED. WE FURTHER DO NOT GUARANTEE/CERTIFY THAT THE UNDERGROUND UTILITIES SHOWN ARE IN THE EXACT LOCATION INDICATED ALTHOUGH WE DO CERTIFY THAT THEY ARE LOCATED AS ACCURATELY AS POSSIBLE FROM AVAILABLE INFORMATION. THE SURVEYOR HAS NOT PHYSICALLY LOCATED THE UNDERGROUND LINES.

GENERAL NOTES

1. THESE INSTRUCTIONS TO BIDDERS AND GENERAL CONDITIONS SHALL BE CONSIDERED PART OF THE CONTRACT DOCUMENTS.

2. ALL WORK IS TO BE COMPLETED IN STRICT ACCORDANCE WITH ALL APPLICABLE CODES, ORDINANCES, RULES, REGULATIONS, AND STANDARDS, INCLUDING, BUT NOT LIMITED TO THE 2012 INTERNATIONAL BUILDING CODE , THE ILLINOIS HANDICAPPED CODE, THE ILLINOIS PLUMBING, MECHANICAL, AND ELECTRICAL CODES, THE ILLINOIS FIRE CODE, THE AMERICANS WITH DISABILITIES ACT (ADA), AND APPLICABLE TRADE STANDARDS. ALL APPLICABLE RULES AND REGULATIONS ARE TO BE THE MOST CURRENT ADOPTED EDITION.

3. THE GENERAL CONTRACTOR (GC) IS RESPONSIBLE FOR OBTAINING ALL STATE AND LOCAL PERMITS REQUIRED FOR THE COMPLETION OF THE PROJECT. THE GENERAL CONTRACTOR SHALL PAY ALL PERMIT FEES, PLAN REVIEW FEES, LICENSE FEES, INSPECTION AND TAXES APPLICABLE TO THIS DIVISION AND SHALL BE INCLUDED IN THE BASE BID AS PART OF THIS CONTRACT.

4. ALL WORK MATERIALS AND CONSTRUCTION DETAILS MUST COMPLY WITH ANY AND ALL APPLICABLE FEDERAL, STATE AND LOCAL BUILDING, HEALTH AND FIRE CODES. THIS INCLUDES THE GOVERNING CODES AND ORDINANCES OF THE VILLAGE OF TINLEY PARK AND OTHER APPLICABLE FEDERAL AND STATE REGULATIONS.

5. THE GENERAL CONTRACTOR AND ALL SUB-CONTRACTORS SHALL COMPLY WITH THE LATEST EDITION OF THE O.S.H.A. CONSTRUCTION AND SAFETY MANUAL.

6. THE GC SHALL COORDINATE WITH OWNER AND/OR ARCHITECT ALL PHASING OF CONSTRUCTION OPERATIONS IN ORDER TO MAINTAIN USE OF ALL CRITICAL FUNCTIONS, UTILITIES, SERVICES AND OTHER RELATED ITEMS WITHIN THE EXISTING FACILITIES. COORDINATE WITH ARCHITECT AND/OR OWNER PRIOR TO BIDDING.

7. GC SHALL ADVISE THE ARCHITECT AND OWNER, IN WRITING, OF THE ACTUAL START OF WORK DATE - TO BEGIN IMPLEMENTATION OF THE WORK INDICATED ON THESE DRAWINGS. GC TO FURNISH A GRAPHIC CONSTRUCTION SCHEDULE SHOWING MAJOR TRADES AND FINAL COMPLETION OF SAME.

8. THE ARCHITECT SHALL HAVE THE RIGHT AT ANY TIME TO MAKE ALTERATIONS, ADDITIONS TO AND DEDUCTIONS FROM THE WORK SHOWN ON THE DRAWINGS OR DESCRIBED IN THE SPECIFICATIONS WITHOUT VOIDING THE CONTRACT. ALL SUCH ITEMS WILL BE COVERED BY A REVISION DATE TO THE PLANS, WRITTEN JOB ORDER AND/OR SUPPLEMENT TO THE CONTRACT BY THE OWNER AND THE ARCHITECT. THE CONTRACTOR SHALL COMPUTE THE VALUE OF THE WORK AND SUBMIT A PROPOSAL FOR THE APPROVAL OF THE ARCHITECT AND THE OWNER. IN THE CASE OF REVISION, ADDENDUM, OR BULLETIN, THE CONTRACTOR SHALL NOT PROCEED WITH CHANGES WITHOUT AN AUTHORIZED JOB ORDER OR SUPPLEMENT TO THE CONTRACT.

9. ANY CHANGES, SUBSTITUTION, OMISSION, OR OTHER DEVIATIONS FROM THESE DRAWINGS DURING OR BEFORE CONSTRUCTION OF THE BUILDING SHALL NOT BE THE RESPONSIBILITY OF THE ARCHITECT UNLESS AUTHORIZED IN WRITING BY THE ARCHITECT, OR HIS CONSULTANTS. CHANGES NOT APPROVED SHALL BE CORRECTED AT THE CONTRACTOR'S EXPENSE.

10. THE GC, WITHOUT EXTRA CHARGE, SHALL MAKE SUCH SLIGHT ALTERATION: CUTTING FITTING OR PATCHING OF HIS WORK AS MAY BE NECESSARY TO MAKE ADJUSTABLE PARTS FIT TO FIXED PARTS, LEAVING ALL COMPLETE AND IN PROPER CONDITION WHEN COMPLETED.

11. ALL CONTRACTORS ARE REQUIRED TO VISIT THE JOBSITE AND BECOME FAMILIAR WITH EXISTING CONDITIONS PRIOR TO SUBMITTING THEIR PROPOSAL. EACH INDIVIDUAL CONTRACTOR IS RESPONSIBLE FOR CHECKING ALL CONTRACT DOCUMENTS FOR FIELD CONDITIONS AND DIMENSIONS FOR ACCURACY PRIOR TO SUBMITTING BIDS AND/OR PROCEEDING WITH ANY WORK. SHOULD ANY CONTRACTOR FIND DISCREPANCIES IN, OR OMISSION FROM THE DRAWINGS, OR SPECIFICATIONS, OR BE IN DOUBT AS TO THEIR MEANING, NOTIFY THE ARCHITECT AT ONCE, IN WRITING, OF ANY DISCREPANCIES BETWEEN EXISTING CONDITIONS OR THE WORK OF OTHER TRADES PRIOR TO OBTAIN CLARIFICATION PRIOR TO SUBMITTING BID. LACK OF SUCH NOTIFICATION SHALL BE CONSTRUED TO INDICATE NO DISCREPANCIES OR CONFLICTS EXIST. ADDITIONAL COMPENSATION WILL NOT BE GRANTED AFTER THE AWARD OF THE CONTRACT FOR ANY WORK REQUESTED TO COMPLY WITH THESE REQUIREMENTS.

12. IT SHALL BE THE RESPONSIBILITY OF EACH CONTRACTOR AND HIS RESPECTIVE SUBCONTRACTORS TO KEEP THE BUILDING AND ADJOINING PREMISES FREE AT ALL TIMES FROM THE ACCUMULATION OF DEBRIS CAUSED AS A RESULT OF THE WORK PERFORMED EACH DAY OF CONSTRUCTION.

13. THE GENERAL CONTRACTOR SHALL PROVIDE TEMPORARY BARRIERS OR PARTITIONS DURING CONSTRUCTION TO PREVENT SPREAD OF DUST OR OTHER RELATED MATERIALS. VERIFY AND COORDINATE LOCATIONS WITH THE ARCHITECT AND/OR OWNER. CONTRACTOR SHALL MAINTAIN ALL REQUIRED EXITWAYS AT ALL TIMES.

14. THE GENERAL CONTRACTOR SHALL BE RESPONSIBLE FOR THE REMOVAL OF ALL DEMOLITION MATERIAL. REMOVAL OF DEBRIS AND DUMPSTER LOCATION MUST BE COORDINATED WITH OWNER/PROPERTY MANAGER.

15. THE METHOD OF ATTACHING NEW CONSTRUCTION TO EXISTING BUILDING STRUCTURE WILL BE IN ACCORDANCE WITH OWNERS CRITERIA AND AS REQUIRED BY CODE.

16. ALL MATTERS OF AESTHETIC EFFECT MUST BE DETERMINED BY THE ARCHITECT.

17. UNLESS OTHERWISE NOTED: WHERE EXISTING PARTITION AND WALLS ARE TO BE REMOVED, CONTRACTOR SHALL REMOVE OR RELOCATE ALL EXISTING ELECTRICAL CONDUITS, PLUMBING AND OTHER RELATED ITEMS SO AS TO RECEIVE NEW CONSTRUCTION. NON-RELOCATED LIGHT FIXTURES, SPEAKERS, ETC., WILL BE TURNED BACK TO OWNER OR DISPOSED OF AT HIS DIRECTION.

18. WHERE EXISTING ITEMS ARE TO BE RELOCATED AND/OR REINSTALLED, THE CONTRACTOR SHALL INSTALL SUCH ITEMS EQUALING OR EXCEEDING THE QUALITY OF EXISTING INSTALLATION BOTH STRUCTURALLY AND AESTHETICALLY. CONTRACTOR TO VERIFY PROCEDURE WITH THE ARCHITECT.

19. IN ALL AREAS WHERE EXISTING CONDITIONS ARE ALTERED, NEW MATERIALS, PARTITIONS, OR PRODUCTS ARE INSTALLED, THE CONTRACTOR SHALL PATCH AND FINISH FLOORS, WALLS, CEILINGS AND OTHER AFFECTED AREAS TO MATCH EXISTING CONDITIONS.

20. CONTRACTOR TO REPLACE OR CORRECT ANY AND ALL EXISTING CONSTRUCTION TO REMAIN, TO MATCH THAT DAMAGED BY CONSTRUCTION AND/OR INSTALLATION PROCESS AT NO ADDITIONAL COST TO THE OWNER.

21. CONTRACTORS TO REPLACE ALL DAMAGED AND/OR MISSING CEILING GRID. REPLACE ALL DAMAGED, DISCOLORED OR MISSING CEILING TILES WITH NEW TO MATCH EXISTING.

22. ARCHITECTURAL DRAWINGS TAKE PRECEDENCE OVER ENGINEERING DRAWINGS FOR ELECTRICAL AND TELEPHONE OUTLETS AND LIGHT FIXTURE LOCATIONS. G.C. TO NOTIFY ARCH. OF DISCREPANCIES.

23. GENERAL CONTRACTORS SHALL COORDINATE ALL MECHANICAL AND ELECTRICAL FLOOR AND WALL SLEEVES, CONDUIT AND ALL MECHANICAL SHAFTS WITH THE MECHANICAL, ELECTRICAL, PLUMBING, FIRE PROTECTION, STRUCTURAL AND ARCHITECTURAL DRAWINGS.

24. DIMENSIONS SHOWN ARE TO FINISH FACE OF WALL, UNLESS SPECIALTY NOTED OTHERWISE. PARTITION THICKNESS AND CONSTRUCTION ARE DESIGNATED BY PARTITION TARGETS-REFER TO PARTITION DETAILS FOR REQUIREMENTS.

25. CONTRACTORS TO MEET WITH BUILDING MANAGEMENT PRIOR TO BEGINNING OF WORK TO UNDERSTAND BUILDING RULES, HOURS OF WORK, REMOVAL OF DEBRIS, ETC.

26. ANY SHUTDOWNS WILL BE COORDINATED WITH BUILDING MANAGEMENT.

27. ALL WORK IS TO BE COORDINATED BY THE GENERAL CONTRACTOR TO ASSURE ADEQUATE FIT, FINISH, SYSTEM OPERATION, AND FULL COMPLETION OF THE WORK, INCLUDING SERVICE REQUIREMENTS OF THE OWNERS FIXTURES, FURNISHING AND EQUIPMENT.

28. ALL DIMENSIONS ARE SHOWN ON DRAWINGS. ANY DIMENSIONS NOT SHOWN OR DEEMED QUESTIONABLE ARE TO BE VERIFIED WITH THE ARCHITECT DESIGNER. DO NOT SCALE DRAWINGS.

29. CONTRACTOR IS TO SIGN EACH SHOP DRAWING SUBMITTAL CERTIFYING THAT THE SUBMITTAL HAS BEEN REVIEWED, APPROVED, AND THAT THE CONTRACTOR COORDINATION HAS BEEN APPROVED.

30. DURING THE ENTIRE PERIOD OF DEMOLITION AND CONSTRUCTION, ALL EXISTING EXITS, EXIT LIGHTING, FIRE PROTECTION DEVICES, AND ALARMS SHALL BE CONTINUOUSLY MAINTAINED IN WORKING ORDER.

31. ALL WOOD WILL BE FIRE RETARDANT TREATED TO COMPLY WITH APPLICABLE CODES.

32. PROVIDE CONCEALED WOOD OR SHEET METAL F.T. BLOCKING FOR ALL MILLWORK AND SPECIALTY ITEMS AND ACCESSORIES HUNG FROM PARTITIONS. (U.N.O.).

33. ALL FIRE EXT. CABINET LOCATIONS ARE TO BE COORDINATED W/THE ARCHITECT/DESIGNER AND LOCAL FIRE OFFICIAL PRIOR TO INSTALLATION.

34. AT COMPLETION OF JOB, PRIOR TO FINAL PAYMENT, GENERAL CONTRACTOR SHALL PROVIDE ONE COMPLETE MARKED-UP SET OF TRANSPARENCIES AND TWO SETS OF PRINTS WITH AS-BUILT CONDITIONS NOTED AND TWO COPIES OF APPLICABLE WARRANTIES, OPERATIONS MANUAL AND/OR MAINTENANCE INSTRUCTIONS.

35. MOVING OF EXISTING KITCHEN EQUIPMENT, EXISTING. DINING ROOM FURNITURE, EXISTING LIBRARY FURNITURE, BOOKS, EQUIPMENT, ETC. BY OWNER.

36. CONTRACTOR TO COORDINATE ALL ACTIVITIES TO FACILITATE WORK. CONTRACTOR TO PROVIDE 5 BUSINESS DAY ADVANCED NOTICE TO CPS PRIOR TO COMMENCEMENT OF WORK.

37. GENERAL CONTRACTOR IS TO COORDINATE WITH SUB CONTRACTORS ALL ASPECTS OF WORK AND IS RESPONSIBLE FOR CONTACTING AOR WITH REGARD TO ANY CONFLICTS.

TYPICAL DEMOLITION NOTES

1. ALL CONTRACTORS TO PROVIDE ALL NECESSARY INSURANCE AND HOLD HARMLESS THE OWNER, PROPERTY MANAGER, ARCHITECT AND AGENTS THEREOF FROM ANY DAMAGES RESULTING FROM CONTRACTORS EXECUTION OF WORK.

2. IT IS THE SOLE RESPONSIBILITY OF THE CONTRACTORS TO DETERMINE IN ACCORDANCE WITH ALL CODES AND OWNERS CRITERIA, ALL METHODS FOR CONSTRUCTION, DEMOLITION, AND ALL RELATED PROCEDURES. THE CONTRACTOR IS RESPONSIBLE FOR ALL MATTERS OF LIFE SAFETY RESULTING FROM ALL CONSTRUCTION AND DEMOLITION.

3. ALL CONTRACTORS SHALL PERFORM THE DEMOLITION WORK IN ACCORDANCE WITH THE CURRENT VERSION OF ANSI/ASSE A10 - THE AMERICAN NATIONAL STANDARDS FOR SAFETY IN CONSTRUCTION AND DEMOLITION OPERATIONS.

4. THE CONTRACTOR SHALL SCHEDULE HIS/HER WORK TO INSURE MINIMUM DISTURBANCE TO THE REMAINDER OF OCCUPIED SPACE(S). THE CONTRACTOR SHALL SUBMIT A DETAILED SCHEDULE OF WORK AT THE PRE-CONSTRUCTION MEETING. ALL UTILITY SHUTDOWNS SHALL BE COORDINATED WITH THE OWNER AND PROPERTY MANAGER.

5. ALL DEMOLITION WORK SHALL BE COORDINATED BY THE GENERAL CONTRACTOR. TIMING OF ALL DEMOLITION WORK SHALL BE COORDINATED BY THE GENERAL CONTRACTOR. ALL CONTRACTORS SHALL COMPLY WITH ALL RULES AND REGULATIONS OF GOVERNMENTAL AUTHORITIES HAVING JURISDICTION OVER DEMOLITION WORK.

6. CONTRACTORS SHALL PROVIDE TEMPORARY PARTITION DUST BARRIERS AT THE BUILDING INTERIOR IN ORDER TO MINIMIZE THE SPREAD OF DUST AND DEBRIS TO THE ADJOINING SPACE(S). THESE SHALL HAVE DRYWALL ON ONE SIDE, TAPED AND PAINTED.

7. THE GENERAL CONTRACTOR SHALL BE RESPONSIBLE FOR THE REMOVAL OF ALL DEMOLITION MATERIAL.

8. CONTRACTOR TO REPLACE OR CORRECT ANY AND ALL EXISTING CONSTRUCTION TO REMAIN, TO MATCH THAT DAMAGED BY CONSTRUCTION AND/OR INSTALLATION PROCESS AT NO ADDITIONAL COST TO THE OWNER. AFTER THE CONTRACTOR REMOVES THE PARTITIONS AND CEILING SYSTEM THE CONTRACTOR MUST CONTACT BOTH THE ARCHITECT AND BUILDING ENGINEER PRIOR TO FURTHER DEMOLITION FOR ANY QUESTIONS/CLARIFICATION REGARDING SYSTEMS TO REMAIN.

9. SELECTIVELY REMOVE, RELOCATE AND/OR MODIFY EXISTING SPRINKLER SYSTEM AS REQUIRED TO MEET VILLAGE OF TINLEY PARK AND NFPA CODES AND ACCOMMODATE NEW REFLECTED CEILING PLAN. REFER TO FIRE PROTECTION DRAWINGS.

10. ALL ITEMS REMOVED AND NOT SCHEDULED TO BE REINSTALLED INCLUDING MILLWORK, HARDWARE, SHELVING, LIGHT FIXTURES, THERMOSTATS, ETC. ARE TO BE TURNED OVER TO THE OWNER. IF THE OWNER CHOOSES NOT TO KEEP ANY OF THESE ITEMS CONTRACTOR SHALL DISCARD.

TYPICAL FINISH NOTES

1. PREPARE ALL EXISTING WALLS AND FLOORS TO RECEIVE NEW FINISHES, AS REQUIRED BY THE MANUFACTURER OF THE NEW FINISHES.

2. FINISHED DOOR OPENING IN ALL NEW PARTITIONS SHALL BE SET TO ALLOW FULL TRIM EXPOSURES (4" MIN.) FROM ADJACENT PERPENDICULAR PARTITIONS, UNLESS NOTED OTHERWISE.

3. ALL FINISH CARPENTRY IS TO BE COMPLETED IN STRICT ACCORDANCE WITH A.W.I STANDARDS PREMIUM GRADE.

4. INTERIOR FINISHES: ALL INTERIOR FINISH MATERIAL SHALL COMPLY WITH THE REQUIREMENTS OF ALL APPLICABLE CODES, ORDINANCES AND REGULATORY AGENCIES.

A. ALL INTERIOR FINISHES SHALL BE RATED AS FOLLOWS:

1. ALL INTERIOR WALL & CEILING FINISH MATERIALS SHALL COMPLY WITH THE REQUIREMENTS OF 2009 INTERNATIONAL BUILDING CODE WITH VILLAGE OF TINLEY PARK AMENDMENTS, AND SHALL NOT BE LESS RESISTANT TO FLAME SPREAD THAN CLASS 2 FLAME SPREAD RATING 0 TO 25, SMOKE DEVELOPED 200 OR BETTER

2. ALL INTERIORS FLOOR COVERINGS SHALL COMPLY WITH THE 2009 INTERNATIONAL BUILDING CODE WITH VILLAGE OF TINLEY PARK AMENDMENT, CLASS B, INTERIOR FLOOR FINISH CRITICAL RADIANT FLUX BETWEEN 0.22 AND 0.44 WATTS/SQUARE CENTIMETER.

B. WALL AND/OR CEILING ASSEMBLIES THAT ARE IDENTIFIED WITH A FIRE RESISTIVE RATING SHALL BE CONSTRUCTED PER PRODUCTS MANUFACTURER'S SPECIFICATIONS AND THE REQUIREMENTS OF ALL APPLICABLE CURRENT CODES AND GOVERNING BODIES.

5. PAINTING AND DECORATING:

A. ALL SURFACES SHALL BE FREE OF DEFECTS, TAPED, FILLED AND SANDED SMOOTH TO RECEIVE INTERIOR FINISH AS SPECIFIED ON THE ROOM FINISH SCHEDULE. ALL PAINT AND WALL COVERING SHALL BE INSTALLED IN STRICT CONFORMANCE WITH THE MANUFACTURERS RECOMMENDATIONS. PATCH ANY CRACKS OR HOLES, SCRAPE LOOSE OR PEELING PAINT, FILL AND SAND SMOOTH, SKIM COAT ANY NECESSARY AREAS SO THAT THE WALLS ARE PERFECTLY SMOOTH PRIOR TO PRIMING

B. EXISTING PAINTED WALLS TO HAVE PATCHED AREAS FILLED, PRIMED, AND ONE FINISH COAT. NEW WORK TO HAVE A PRIMER COAT AND 2 FINISHED COATS. AREAS TO HAVE A SPECIALTY PAINTING SHOULD FOLLOW MANUFACTURERS SPECIFICATIONS.

C. TOUCH-UP EXISTING DOORS TO REMAIN WHICH HAVE DAMAGE WITH MATCHING STAIN AND REVARNISH.

6. FLOORS AND COVERINGS:

A. GENERAL CONTRACTORS SHALL VERIFY THAT ALL FLOORS ARE IN GOOD AND LEVEL CONDITION. ALL AREA FOUND NOT SO ARE TO BE FLASH PATCHED BY GENERAL CONTRACTORS.

B. FLOOR COVERINGS IN CLOSETS SHALL BE THE SAME AS THAT OF THE SPACE UNTO WHICH THE CLOSETS DOOR OPENS, UNLESS NOTED OTHERWISE.

C. WHERE TWO DISSIMILAR FLOORING MATERIALS MEET, GENERAL CONTRACTOR SHALL PROVIDE SUITABLE TRANSITION STRIPE UNLESS NOTED OTHERWISE.

D. PROVIDE AND INSTALL RESILIENT BASE SPECIFIED. INSTALLATION OF ALL WALL BASE SHALL BE IN STRICT ACCORDANCE WITH MANUFACTURERS RECOMMENDATION. WHERE BASE IS BEING PATCHED CONTRACTOR TO USE MINIMUM OF 6'-0" PIECES.

7. THE COLOR AND TEXTURE OF ALL NEW CONSTRUCTION SURFACES TO MATCH THAT OF EXISTING ADJACENT SURFACES UNLESS OTHERWISE INDICATED OR NOTED.

GENERAL NOTES

1. ALL EXTERIOR WALL DIMENSIONS ON THE PLANS UNLESS OTHERWISE NOTED TO OUTSIDE FACE OF SIP PANEL.
2. PROVIDE ACCESSIBLE THRESHOLD AT EACH EXTERIOR DOOR-SEE DOOR SCHEDULE
3. PRIME INTERIOR WALLS, COLUMNS AND DOOR FRAMES
4. SEE STRUCTURAL FOR CONTROL AND ISOLATION JOINTS AT CONCRETE SLAB AND AROUND COLUMNS
5. CONTACT OWNER REGARDING HOW THEY WANT TO REKEY THE LOCK FOR THE MAIN ENTRY VS THE SERVICE DOOR, SPRINKLER ROOM TO HAVE ELECTRONIC KEY PAD KEY LOCK.
6. ARABIC NUMERALS AT LEAST FOUR INCHES HIGH WITH A MINIMUM STROKE WIDTH OF 0.5 INCHES SHOWING THE ADDRESS OF THE BUILDING SHALL CONTRAST WITH THE BACKGROUND, SHALL BE CONSTRUCTED OF DURABLE MATERIALS, BE PERMANENTLY INSTALLED AND BE READILY VISIBLE. SCRIPT OR WRITTEN NUMBERS ARE NOT PERMITTED. ADDITIONAL NUMBERS SHALL ALSO BE PLACED ON THE SIDE OF THE BUILDINGS STREET ADDRESS.
   AT SERVICE DOORS USED AS EXIT/ACCESS FOR FIRE FIGHTING, ARABIC NUMERALS A MINIMUM OF FOUR INCHES IN HEIGHT WITH A MINIMUM STROKE OF 0.5 INCH SHALL BE APPLIED TO THE ADDITIONAL DOOR TO INDICATE THE ADDRESS. THE ADDRESS SHALL BE VISIBLE FROM THE PARKING LOT OR FIRE APPARATUS ACCESS.
7. THIS IS A SPRINKLERED BUILDING PER REQUIREMENT OF VILLAGE OF TINLEY PARK IL SEE FP DRAWINGS FOR LAYOUT.
8. PROVIDE A KNOX BOX TO ENABLE THE FIRE DISTRICT TO HAVE ACCESS TO THE BUILDING AND THE BUILDING'S FIRE PROTECTION FEATURES. FINAL LOCATION TBD.
9. G.C. TO PROVIDE PORTABLE FIRE EXTINGUISHERS WITHIN THE BUILDING. THE TYPE, SIZE, AND SPACING MUST MATCH THE SPECIFIC HAZARD THEY ARE TO PROTECT. CONTACT THE FIRE DISTRICT FOR APPROVAL OF THE TYPES AND LOCATIONS OF PORTABLE FIRE EXTINGUISHERS TO BE USED PRIOR TO FINAL OCCUPANCY.

ROOF SLOPE

SLOPED CRICKET

H.P. - HIGH POINT
L.P. - LOW POINT

1. INSTALL NEW SINGLE MEMBRANE ROOF AT BUILDING TO CONSIST OF THE FOLLOWING:
   -60 MIL. MECHANICALLY ATTACHED
   -SINGLE-PLY TPO ROOFING MEMBRANE BY FIRESTONE OR APPROVED EQUAL IN WHITE
   -TPO ROOF LAYER MUST PROVIDE A MIN 10 YEAR WITH BONDED WARRANTY, AND BE INSTALLED PER MFGR RECOMMENDATIONS. VERIFY WITH MFGR IF COVERBOARD IS REQUIRED FOR ROOF WARRANTY.
2. FLASHING & ROOF DETAILS – ROOF MANUFACTURERS HAVE DIFFERENT DETAILS FOR INSTALLATION OF THEIR ROOF SYSTEMS, FLASHING CONDITIONS, ETC., THE DETAILS SHOWN ON THE DRAWINGS ARE TO BE CONSIDERED BASIS OF THE DESIGN. ITEMS SUCH AS PARAPET FLASHING, CANTS, BLOCKING, ROOF PENETRATIONS AND EXPANSION JOINTS ARE TO BE INSTALLED PER MANUFACTURERS DETAILS. THE GC IS TO SUBMIT THE MANUFACTURERS STANDARD ROOF DETAILS PRIOR TO THE BEGINNING OF THE WORK.
3. REFER TO MECHANICAL AND ELECTRICAL DRAWINGS FOR ADDITIONAL ITEMS ON OR THROUGH ROOF.
4. CLEAN ROOF OF ALL CONSTRUCTION DEBRIS AT PROJECT COMPLETION.
5. HIGH POINT = H.P., LOW POINT = L.P.
6. THE ROOF JOISTS AND STEEL ARE SLOPED @ 1/4" PER FT, SEE STRUCTURAL DRAWINGS.
7. SEE MEP ROOF PLANS FOR LOCATIONS OF STACKS, EXHAUST FANS, ROOF PENETRATIONS ETC.
8. SET PIPING TO THE RTUS ON A ROOF MFGR APPROVED BASE BLOCKING AT 24" O.C. MAX.
9. PREMOLDED ROOF CANT TO BE INSTALLED PER MANUFACTURER.
10. CONTRACTOR RESPONSIBLE FOR VENT/SOIL STACK PENETRATIONS THRU ROOF COORDINATE LOCATIONS WITH INTERIOR BUILDING DRAWINGS, SEE 2/A1.02
11. SEE MECHANICAL DRAWING FOR ROUTING OF GAS LINES TO RTUS AND THEIR SUPPORTS
12. COORDINATE EXACT LOCATION OF RTU'S WITH STRUCTURAL DRAWINGS FOR JOIST REINFORCEMENT
13. EXISTING ROUTE OF THE ROOF DRAIN PIPES TO BE FIELD VERIFY

CIVIL ENGINEER'S CERTIFICATE

STATE OF ILLINOIS)
) SS
COUNTY OF DUPAGE)

I, WILLIAM H. PERRY, A LICENSED PROFESSIONAL ENGINEER IN ILLINOIS, HEREBY CERTIFY THAT THESE CIVIL ENGINEERING PLANS, AS LISTED IN THE INDEX, THAT ARE PREFIXED WITH LETTER "C". HAVE BEEN PREPARED BY WEAVER CONSULTANTS GROUP UNDER MY PERSONAL DIRECTION.

WILLIAM H. PERRY, PE ______ DATE

DRAINAGE CERTIFICATE

THE UNDERSIGNED HEREBY CERTIFIES THAT, TO THE BEST OF OUR KNOWLEDGE AND BELIEF, THE DRAINAGE OF SURFACE WATERS WILL NOT BE CHANGED BY THIS CONSOLIDATION OR THAT, IF SUCH SURFACE WATER DRAINAGE WILL BE CHANGED, REASONABLE PROVISION WILL BE MADE FOR COLLECTION AND DIVERSION OF SUCH SURFACE WATERS INTO PUBLIC AREAS OR DRAINS THAT THE OWNER HAS A RIGHT TO USE, AND THAT SUCH SURFACE WATERS WILL BE PLANNED FOR IN ACCORDANCE WITH GENERALLY ACCEPTED ENGINEERING PRACTICES SO AS TO ELIMINATE THE LIKELIHOOD OF DAMAGE TO ADJOINING PROPERTY OWNERS BECAUSE OF THIS CONSOLIDATION. THE EXISTING OVERLAND FLOW ROUTES WILL CONFORM TO THE ORIGINAL SUBDIVISION GRADING PLAN AND ACCEPTED ENGINEERING DESIGN. SHOULD ANY PONDING OCCUR ON-SITE, IT WILL BE OUR RESPONSIBILITY TO ADDRESS AS PER ALL REQUIREMENTS OF THE VILLAGE'S CODES, ORDINANCES AND REGULATIONS RELATED TO STORMWATER MANAGEMENT, SOIL EROSION CONTROL AND SITE GRADING.

SHEET #: C-1

SPECIFICATIONS - GENERAL

1. **STANDARDS and SPECIFICATIONS:** ALL APPLICABLE REQUIREMENTS OF THE ORDINANCES OF AUTHORITIES HAVING JURISDICTION (INCLUDING BUT NOT LIMITED TO THE STATE AND MUNICIPALITY) SHALL GOVERN THIS WORK.
2. **ENGINEER of RECORD:** THE ENGINEER OF RECORD (ENGINEER) IS WEAVER CONSULTANTS GROUP NORTH CENTRAL, LLC (WEAVER). WEAVER'S REPRESENTATIVES MAY OBSERVE THE CONSTRUCTION AND COMMUNICATE WITH THE CONTRACTOR.
3. **EXAMINATION of THE SITE:** PRIOR TO COMMENCEMENT OF CONSTRUCTION, THE CONTRACTOR SHALL VERIFY THAT ALL DIMENSIONS AND CONDITIONS AFFECTING THE WORK WITH THE ACTUAL CONDITIONS AT THE JOB SITE. IN ADDITION, THE CONTRACTOR MUST VERIFY THE ENGINEER'S LINE AND GRADES. IF THERE ARE ANY DISCREPANCIES FROM WHAT IS SHOWN ON THE CONSTRUCTION PLANS, THE CONTRACTOR SHALL SECURE WRITTEN INSTRUCTION FROM THE ENGINEER PRIOR TO PROCEEDING WITH ANY PART OF THE WORK AFFECTED BY OMISSION OR DISCREPANCIES. FAILING TO SECURE SUCH INSTRUCTION, THE CONTRACTOR WILL BE CONSIDERED TO HAVE PROCEEDED AT HIS OWN RISK AND EXPENSE.
4. **CURRENT SET OF PLANS:** THE CONTRACTOR SHALL VERIFY THAT THEY ARE WORKING WITH THE CURRENT SET OF PLANS AND SHALL HAVE ONE (1) SIGNED COPY OF THE PLANS AND A COPY OF ANY PERMITS AND EXTENSION AGREEMENTS AT THE JOB SITE AT ALL TIMES. THE CONTRACTOR SHALL ONLY BUILD FROM THE SET OF PLANS LABELED "ISSUED FOR CONSTRUCTION".
5. **INDEMNIFICATION:** THE CONTRACTOR SHALL INDEMNIFY THE ENGINEER OF RECORD, THE ARCHITECT OF RECORD, THE OWNER AND THE OWNER'S AGENTS, THE MUNICIPALITY AND ALL OTHER AGENCIES FROM ALL LIABILITY INVOLVED WITH THE CONSTRUCTION, INSTALLATION, AND TESTING OF THE WORK ON THIS PROJECT.
6. **TOPOGRAPHIC SURVEY:** TOPOGRAPHIC SURVEY INFORMATION SHOWN ON THE PLANS IS PROVIDED FOR INFORMATIONAL PURPOSES. THE CONTRACTOR SHALL BE RESPONSIBLE FOR VERIFYING THAT THE INFORMATION SHOWN IS CORRECT AND SHALL NOTIFY THE ENGINEER IMMEDIATELY OF ANY ERRORS, DISCREPANCIES OR OMISSIONS TO THE SURVEY INFORMATION PROVIDED. ANY COSTS INCURRED AS THE RESULT OF NOT CONFIRMING THE ACTUAL SURVEY SHALL BE BORNE BY THE CONTRACTOR.
7. **UNDERGROUND UTILITIES:** THE LOCATION OF EXISTING UTILITIES IS APPROXIMATE. THE ENGINEER AND OWNER ASSUME NO RESPONSIBILITY WHATSOEVER IN RESPECT TO THE SUFFICIENCY OR ACCURACY OF THE INFORMATION SHOWN ON THE PLANS RELATIVE TO THE LOCATION OF UNDERGROUND UTILITY FACILITIES OR THE MANNER IN WHICH THEY ARE TO BE REMOVED OR ADJUSTED. IT SHALL BE THE CONTRACTOR'S RESPONSIBILITY TO DETERMINE THE ACTUAL LOCATION OF ALL SUCH FACILITIES. THE CONTRACTOR SHALL ALSO OBTAIN FROM THE RESPECTIVE UTILITY COMPANIES THE DETAILED INFORMATION RELATIVE TO THE LOCATION OF THEIR FACILITIES AND THE WORKING SCHEDULES OF THE UTILITY COMPANIES FOR REMOVING OR ADJUSTING THEM.
8. **SUBSURFACE INVESTIGATION:** SUBSURFACE EXPLORATION TO ASCERTAIN THE NATURE OF SOILS, INCLUDING THE AMOUNT OF ROCK, IF ANY, IS THE RESPONSIBILITY OF THE CONTRACTOR. IT SHALL BE THE RESPONSIBILITY OF THE CONTRACTOR TO MAKE SUCH SUBSURFACE INVESTIGATIONS AS DEEMED NECESSARY TO DETERMINE THE NATURE OF THE MATERIAL TO BE ENCOUNTERED. SOME SUBSURFACE EXPLORATION HAS BEEN PERFORMED BY THE GEOTECHNICAL ENGINEER OF RECORD ON THE PROJECT AND IS PROVIDED FOR INFORMATIONAL PURPOSES. THE DEVELOPER AND ENGINEER DISCLAIM ANY RESPONSIBILITY FOR THE ACCURACY, TRUE LOCATION AND EXTENT OF THE SOILS INFORMATION THAT HAS BEEN PREPARED BY OTHERS. THEY FURTHER DISCLAIM RESPONSIBILITY FOR INTERPRETATION OF THAT DATA BY THE CONTRACTOR, AS IN PROJECTING SOIL BEARING VALUES, ROCK PROFILES, SOILS STABILITY AND THE PRESENCE, LEVEL AND EXTENT OF UNDERGROUND WATER.
9. **PERMITS AND LICENSES:** THE CONTRACTOR SHALL BE RESPONSIBLE FOR OBTAINING ALL APPLICABLE PERMITS AND LICENSES AS REQUIRED BY STATE AND LOCAL AGENCIES. WHENEVER THE WORK REQUIRES THE CONTRACTOR TO OBTAIN PERMITS FROM THE GOVERNING AUTHORITIES, THE CONTRACTOR SHALL FURNISH DUPLICATE COPIES OF SUCH PERMITS TO THE DEVELOPER AND ENGINEER BEFORE THE WORK COVERED THEREBY IS STARTED. NO WORK WILL BE ALLOWED TO PROCEED BEFORE SUCH PERMITS ARE OBTAINED.
10. **BONDS:** PERFORMANCE, PAYMENT AND MAINTENANCE BONDS MAY BE REQUIRED FROM THE CONTRACTOR FOR ALL WORK CONSIDERED TO BE "PUBLIC" IMPROVEMENTS. BONDS SHALL BE IN THE FORM AND IN THE AMOUNTS AS REQUIRED BY THE GOVERNING AGENCIES.
11. **SAFETY:** WARNING DEVICES TO INFORM AND PROTECT THE PUBLIC DURING ALL PHASES OF CONSTRUCTION ARE REQUIRED. THE CONTRACTOR SHALL TAKE ALL NECESSARY PRECAUTIONS FOR THE SAFETY OF EMPLOYEES ON THE PROJECT AND SHALL COMPLY WITH ALL APPLICABLE PROVISIONS OF FEDERAL, STATE, AND MUNICIPAL SAFETY LAWS AND BUILDING CODES. CONTRACTOR SHALL ERECT AND PROPERLY MAINTAIN, AT ALL TIMES, AS REQUIRED BY THE CONDITIONS AND PROGRESS OF THE WORK, ALL NECESSARY SAFEGUARDS FOR PROTECTION OF WORKMEN AND THE PUBLIC AND SHALL POST DANGER SIGNS WARNING AGAINST KNOWN OR UNUSUAL HAZARDS.
12. **NOTIFICATIONS:** A MINIMUM OF 48 HOURS PRIOR TO CONSTRUCTION, THE CONTRACTOR SHALL NOTIFY ALL AGENCIES HAVING JURISDICTION OVER THE PROJECT, THE ENGINEER OF RECORD AND THE LOCAL UNDERGROUND LOCATE COMPANY FOR STAKING THE LOCATION OF EXISTING UNDERGROUND UTILITIES.
13. **INSPECTIONS:** INSPECTION OF THE PROPOSED CONSTRUCTION WILL BE PROVIDED BY THE GOVERNING AUTHORITIES AND/OR THE DEVELOPER OR ASSIGNED AGENTS. THE CONTRACTOR SHALL PROVIDE ASSISTANCE BY PROVIDING EXCAVATION, TRENCH SAFETY, OR OTHER WORK NECESSARY TO FACILITATE INSPECTION ACTIVITIES, AND SHALL GIVE SUFFICIENT NOTICE WELL IN ADVANCE OF PENDING CONSTRUCTION ACTIVITIES TO THE GOVERNING AUTHORITIES AND/OR DEVELOPER FOR SCHEDULING OF INSPECTION SERVICES. CONTRACTOR SHALL BE RESPONSIBLE FOR THE DETERMINATION OF ANY REQUIRED INSPECTIONS, THE SCHEDULING AND CONTROL OF INSPECTIONS AND THE ACCEPTANCE OF ALL PUBLIC AND/OR PRIVATE UTILITIES BY THE APPROPRIATE GOVERNING AUTHORITY PRIOR TO TRENCH BACKFILLING.
14. **SHOP DRAWINGS:** PROPOSED CONSTRUCTION MATERIALS SHALL BE SUBMITTED TO THE OWNER AND ENGINEER FOR APPROVAL IN ADVANCE OF MOBILIZATION. ANY DEVIATION FROM THE APPROVED CONSTRUCTION MATERIALS LIST MUST BE APPROVED BY THE ENGINEER IN WRITING.
15. **CONSTRUCTION DEBRIS:** IT SHALL BE THE RESPONSIBILITY OF THE CONTRACTOR TO REMOVE FROM THE SITE ANY AND ALL MATERIALS AND DEBRIS WHICH RESULT FROM THE CONSTRUCTION OPERATIONS AT NO ADDITIONAL EXPENSE TO THE OWNER. WHENEVER, DURING CONSTRUCTION OPERATIONS, ANY LOOSE MATERIAL IS DEPOSITED IN THE FLOW OF GUTTERS, DRAINAGE STRUCTURES, DITCHES, ETC. SUCH THAT THE NATURAL FLOW LINE OF WATER IS OBSTRUCTED, THE LOOSE MATERIAL WILL BE REMOVED AT THE END OF EACH WORKING DAY. AT THE CONCLUSION OF CONSTRUCTION OPERATIONS, ALL DRAINAGE STRUCTURES AND FLOW LINES SHALL BE FREE FROM DIRT AND DEBRIS. THIS WORK SHALL BE CONSIDERED INCIDENTAL TO THE CONTRACT.
16. **SITE DRAINAGE:** DURING CONSTRUCTION OPERATIONS, THE CONTRACTOR SHALL ENSURE POSITIVE SITE DRAINAGE AT THE CONCLUSION OF EACH DAY. ALL DRAINAGE MAY BE ACHIEVED BY DITCHING, PUMPING OR OTHER METHODS ACCEPTABLE TO THE ENGINEER.
17. **DISPOSITION AND DISPOSAL OF EXCESS MATERIALS:** ALL MATERIALS TO BE REMOVED FROM THE SITE, INCLUDING, BUT NOT LIMITED TO EXCESS MATERIALS AND UNSUITABLE MATERIALS SUCH AS CONCRETE, ASPHALT, LARGE ROCKS, REFUSE AND OTHER DEBRIS, SHALL BECOME THE PROPERTY OF THE CONTRACTOR AND SHALL BE DISPOSED OF OUTSIDE THE LIMITS OF THE PROJECT AT THE CONTRACTOR'S EXPENSE. DISPOSAL OF MATERIALS SHALL BE IN STRICT ACCORDANCE WITH ALL LOCAL, STATE, AND FEDERAL RULES AND REGULATIONS.
18. **CONSTRUCITON STAKING:** ALL SURVEYING REQUIRED FOR CONSTRUCTION STAKING SHALL BE THE RESPONSIBILITY OF THE CONTRACTOR. THE DEVELOPER SHALL PROVIDE THE PROPERTY CORNERS AND TWO BENCHMARKS FOR USE AS HORIZONTAL AND VERTICAL DATUM. THE CONTRACTOR SHALL EMPLOY A REGISTERED PROFESSIONAL LAND SURVEYOR TO PERFORM ALL ADDITIONAL SURVEY, LAYOUT AND MEASUREMENT WORK NECESSARY FOR THE COMPLETION OF THE PROJECT. THE CONTRACTOR SHALL VERIFY THE SITE BENCHMARKS' ELEVATION SHOWN ON THE PLANS AND REPORT ANY DISCREPANCIES TO THE OWNER AND ENGINEER PRIOR TO ANY CONSTRUCTION STAKING. ALL CONSTRUCTION TRADES SHALL COORDINATE THROUGH THE GENERAL CONTRACTOR USING THE SAME BENCHMARKS FOR VERTICAL CONTROL. THE CONTRACTOR SHALL BE RESPONSIBLE FOR ALL COSTS ASSOCIATED WITH THE REMOVAL, REPLACEMENT AND REDESIGN OF ANY IMPROVEMENTS CONSTRUCTED PRIOR TO CHECKING HORIZONTAL/VERTICAL CONTROL AND PLAN DIMENSIONS AND NOTIFICATION OF ANY DISCREPANCIES TO THE OWNER AND ENGINEER. ALL INSTRUMENTS ARE TO BE PROPERLY CALIBRATED PRIOR TO USE.
19. **PROPERTY CORNERS:** THE CONTRACTOR SHALL PROTECT ALL PROPERTY CORNER MARKERS AND BENCHMARKS, AND WHEN ANY SUCH MARKERS OR MONUMENTS ARE IN DANGER OF BEING DISTURBED, THEY SHALL BE PROPERLY REFERENCED AND IF DISTURBED SHALL BE RESET BY A REGISTERED PROFESSIONAL LAND SURVEYOR AT THE EXPENSE OF THE CONTRACTOR.
20. **RECORD DRAWINGS:** THE CONTRACTOR IS RESPONSIBLE TO PROVIDE TO THE VILLAGE OF TINLEY PARK, ENGINEER OF RECORD AND THE OWNER RECORD DRAWINGS, PREPARED BY A REGISTERED PROFESSIONAL LAND SURVEYOR, OF ALL SITE IMPROVEMENTS. THESE RECORD DRAWINGS SHALL INCLUDE ALL DEVIATIONS TO THE DESIGN PLANS, ALL AS-CONSTRUCTED SPOT GRADES ON THE GRADING PLAN AND ALL AS-CONSTRUCTED GRADES INCLUDING RIMS, INVERTS AND PIPE SLOPES ON THE UTILITY PLAN. CONTRACTOR IS ALSO RESPONSIBLE TO MAKE ANY CORRECTIONS AS DETERMINED NECESSARY BY THE ENGINEER, OWNER AND/OR MUNICIPALITY AND UPDATE THE RECORD DRAWINGS ACCORDINGLY.
21. **SOIL STABILIZATION:** THE CONTRACTOR SHALL COMPLY WITH THE CONDITIONS OF THE EROSION CONTROL SPECIFICATIONS. ALL SOIL SHALL BE STABILIZED PRIOR TO ISSUANCE OF FINAL APPROVAL. SEE LANDSCAPE PLAN FOR DETAILS.

SPECIFICATIONS - GRADING

1. **EROSION CONTROL MEASURES:** CONTRACTOR SHALL COMPLY WITH THE EROSION CONTROL PLAN INCLUDING, BUT NOT LIMITED TO, PERIMETER SILT FENCE AND INLET PROTECTION, PRIOR TO THE START OF DEMOLITION.
2. **TESTING:** ALL EARTHWORK OPERATIONS SHALL BE OBSERVED AND TESTED ON A CONTINUING BASIS BY THE GEOTECHNICAL ENGINEER FOR CONFORMANCE WITH THE REQUIREMENTS SET FORTH IN THE GEOTECHNICAL REPORT.
3. **UNDISTURBED AREAS:** PRIOR TO GRADING, BRUSH REMOVAL, OR SITE CONSTRUCTION, THE CONTRACTOR SHALL MEET WITH THE DEVELOPER AND/OR ENGINEER AT THE SITE TO ASCERTAIN THE AREAS OF THE PROJECT SITE THAT ARE TO BE PROTECTED AND PRESERVED. REFER TO THE LANDSCAPE PLANS AND TREE PROTECTION PLANS FOR ALL CONSTRUCTION IN THE VICINITY OF EXISTING TREES.
4. **STRIPPING and DEBRIS REMOVAL:** THE BUILDING PAD SITES, AREAS TO BE PAVED, AND ALL AREAS THAT ARE TO RECEIVE FILL MATERIAL SHALL BE STRIPPED OF VEGETATION, TREES, ROOTS, STUMPS, DEBRIS, AND OTHER ORGANIC MATERIAL. STRIPPED TOPSOIL SHALL BE STOCKPILED IN A LOCATION ON-SITE APPROVED BY THE DEVELOPER IF IT HAS BEEN DETERMINED THAT IT CAN BE RE-USED ON THE SITE. ALL TREES INCLUDING STUMPS AND ROOT SYSTEMS, VEGETATION, DEBRIS, AND OTHER OBJECTIONABLE MATERIAL SHALL BE REMOVED AND DISPOSED OFF-SITE. THE CONTRACTOR SHALL COMPLY WITH ALL APPLICABLE LAWS GOVERNING SPILLAGE OF DEBRIS WHILE TRANSPORTING TO A DISPOSAL SITE. ALL COSTS ASSOCIATED WITH DISPOSAL OF MATERIAL SHALL BE INCLUDED IN THE CONTRACT AMOUNT.
5. **PROOF ROLLING:** UPON COMPLETION OF STRIPPING OPERATIONS, AND PRIOR TO PLACEMENT OF ANY FILL MATERIALS, THE STRIPPED AREAS SHOULD BE OBSERVED TO DETERMINE IF ADDITIONAL EXCAVATION IS REQUIRED TO REMOVE WEAK OR OTHERWISE OBJECTIONABLE MATERIALS THAT WOULD ADVERSELY AFFECT THE FILL PLACEMENT. THE SUB-GRADE SHOULD BE FIRM AND STABLE TO SUPPORT CONSTRUCTION EQUIPMENT WITHOUT DISPLACEMENT. SOFT OR YIELDING SUB-GRADE SHOULD BE CORRECTED AND MADE STABLE BEFORE CONSTRUCTION PROCEEDS. PROOF ROLLING SHOULD BE PERFORMED USING A HEAVY PNEUMATIC TIRE ROLLER, LOADED DUMP TRUCK, OR SIMILAR PIECE OF EQUIPMENT WEIGHING 25 TONS. THE PROOF ROLLING OPERATIONS SHOULD BE OBSERVED BY THE GEOTECHNICAL ENGINEER OR HIS REPRESENTATIVE.
6. **CONTROLLED FILL:** ALL SOILS USED FOR CONTROLLED FILL SHOULD BE FREE OF ROOTS, VEGETATION, AND OTHER DELETERIOUS OR UNDESIRABLE MATTER. SOILS IMPORTED FROM OFF-SITE FOR USE AS FILL SHALL BE APPROVED BY THE GEOTECHNICAL ENGINEER. THE FILL MATERIAL SHOULD BE PLACED IN LEVEL, UNIFORM LIFTS, WITH EACH LIFT COMPACTED TO THE MINIMUM DRY DENSITY WITHIN THE COMPACTION SOIL MOISTURE RANGES RECOMMENDED. THE LOOSE LIFT THICKNESS SHOULD NOT EXCEED 10 INCHES. EACH LAYER SHOULD BE PROPERLY PLACED, SPREAD, AND COMPACTED TO BETWEEN 95 AND 100 PERCENT OF STANDARD PROCTOR DENSITY AS DETERMINED BY ASTM D-698.
7. **SOIL COMPACTION:** UNLESS OTHERWISE SPECIFIED BY THE GEOTECHNICAL ENGINEER, WITHIN THE LIMITS OF PROPOSED GRADING, THE SOIL SHALL BE COMPACTED IN 6" MAXIMUM LIFTS OF DRY SUB-GRADE, BACKFILL OR FILL MATERIAL TO NOT LESS THAN THE FOLLOWING PERCENTAGES OF MODIFIED PROCTOR DRY DENSITY IN ACCORDANCE WITH ASTM D 1157-78:
8. **UNDER STRUCTURES and PAVEMENTS:** 95% MODIFIED PROCTOR DRY DENSITY.
9. **LANDSCAPEWAY or UNPAVED AREAS:** 85% MODIFIED PROCTOR DRY DENSITY.
10. **PROPOSED GRADES:** THE PROPOSED CONTOURS INDICATED ON THE GRADING PLAN ARE FINISHED GRADES AND ARE SHOWN AT ONE-FOOT INTERVALS. SPOT ELEVATIONS SHOWN ARE FINAL GRADES AND ARE NOTED WITH A PREFIX AS IDENTIFIED IN THE LEGEND.
11. **TOLERANCE:** ALL SUB-GRADE SHALL BE GRADED TO WITHIN 0.1' +/- OF THE PROPOSED SUBGRADE ELEVATIONS. ALL FINAL GRADES IN LANDSCAPE AREAS SHALL BE WITHIN 0.1' +/- OF THE PROPOSED GRADES AND CONTOUR LINES. SEE PAVING SPECIFICATIONS FOR TOLERANCE ON PAVED SURFACES.
12. **SITE DRAINAGE:** DURING CONSTRUCTION OPERATIONS, THE CONTRACTOR SHALL ENSURE POSITIVE SITE DRAINAGE AT THE CONCLUSION OF EACH DAY. ALL DRAINAGE MAY BE ACHIEVED BY DITCHING, PUMPING OR OTHER METHODS ACCEPTABLE TO THE ENGINEER.
13. **TOPSOIL:** SEE LANDSCAPE PLAN FOR DETAILS AND SPECIFICATIONS. AT A MINIMUM, ALL LANDSCAPE AREAS SHALL BE RESPREAD WITH 4" OF FRIABLE, WEED FREE, AND ROCK FREE TOPSOIL.

SPECIFICATIONS - PAVEMENT

1. **STANDARDS and SPECIFICATIONS:** THE CURRENT EDITION OF THE ILLINOIS DEPARTMENT OF TRANSPORTATION "STANDARD SPECIFICATIONS FOR ROAD AND BRIDGE CONSTRUCTION" SHALL GOVERN THIS WORK.
2. **PAVING CONDITIONS:** THE BITUMINOUS MATERIALS SHALL ONLY BE LAID ON A SURFACE WHICH IS DRY AND WHEN THE WEATHER CONDITIONS ARE SUITABLE. THE BITUMINOUS BINDER COURSE SHALL BE PLACED ONLY WHEN THE TEMPERATURE IN THE SHADE IS AT LEAST 45 DEGREES F, WHEN THE TEMPERATURE IN THE SHADE FOR THE PREVIOUS 24 HOURS IS AT LEAST 32 DEGREES F AND WHEN RISING TEMPERATURES ARE FORECAST. THE SURFACE COURSE SHALL BE PLACED ONLY WHEN THE TEMPERATURE IN THE SHADE IS AT LEAST 50 DEGREES F, WHEN THE TEMPERATURE IN THE SHADE FOR THE PREVIOUS 24 HOURS IS AT LEAST 40 DEGREES F, AND WHEN RISING TEMPERATURES ARE FORECAST. ANY PAVEMENT ACTIVITY SHOULD BE STOPPED IN THE EVENT OF RAIN, REGARDLESS OF TEMPERATURE.
3. **SUB-GRADE PREPARATIONS:** IN ACCORDANCE WITH THE GOVERNING AUTHORITIES' SPECIFICATIONS AND THE GEOTECHNICAL REPORT, THE SUB-GRADE SHALL BE PROOF-ROLLED WITH HEAVY PNEUMATIC EQUIPMENT AND ANY SOFT OR PUMPING AREAS SHALL BE EXCAVATED TO FIRM SUB-GRADE AND BACKFILLED AND RE-COMPACTED. PAVEMENT SUB-GRADE SHALL NOT BE ALLOWED TO RETAIN WATER. WET MATERIAL SHALL BE REMOVED TO DRY.
4. **INSPECTIONS:** PAVEMENT SUB-BASE, BASE AND SURFACE MUST EACH BE INSPECTED BY THE OWNER'S REPRESENTATIVE PRIOR TO THE NEXT PHASE OF WORK. PROOF ROLLING AND NUCLEAR DENSITY TESTING WILL BE UTILIZED IF REQUESTED BY OWNER.
5. **CONCRETE TESTING:** CONTRACTOR SHALL EMPLOY AN INDEPENDENT TESTING ENGINEER TO VERIFY THE SLUMP, AIR ENTRAINMENT AND PROVIDE (3) CYLINDER SAMPLES FOR EACH DAYS POUR, OR 50 C.Y. OF CONCRETE WHICHEVER OCCURS MORE OFTEN. COPIES OF ALL TEST RESULTS SHALL BE FORWARDED TO THE OWNER'S REPRESENTATIVE FOR APPROVAL.
6. **JOINT SEALANT:** JOINT SEALANT SHALL BE A GRAY ELASTOMERIC SILICONE OR POLYURETHANE SEALANT DESIGNED FOR CONCRETE EXPANSION AND CONTROL JOINTS CONFORMING TO ASTM C920, OR APPROVED EQUAL.
7. **CONCRETE SEALER:** "SCOFIELD" CEMENTONE CLEAR SEALER OR APPROVED EQUAL SHALL BE APPLIED TO ALL CONCRETE PER MANUFACTURER'S RECOMMENDATIONS.
8. **CURB TAPERS:** DUB DOWN (TAPER) CONCRETE CURBS TO ZERO HEIGHT AT SIDEWALKS. RAMP SIDEWALKS AS REQUIRED TO MEET EXISTING AND PROPOSED ADJACENT GRADES.
9. **CONSTRUCTION TOLERANCE:** PAVEMENT SUB-GRADE SHALL BE FINISHED TO O.10' +/- OF DESIGN SUB-GRADE ELEVATIONS. ALL PROPOSED CURB, SIDEWALK AND PAVEMENT SHALL BE CONSTRUCTED TO WITHIN 0.05' +/- OF THE DESIGN GRADES.
10. **STRUCTURE ADJUSTMENTS:** ALL EXISTING STRUCTURES (MANHOLES, CATCH BASINS, VALVE BOXES, ETC.) SHALL BE ADJUSTED TO MEET THE FINAL PAVEMENT OR GROUND SURFACE ELEVATION AS REQUIRED.
11. **SAW CUTTING:** REMOVAL OF ALL PAVEMENT, SIDEWALK AND/OR CURB SHALL BE ACCOMPLISHED BY SAW CUTTING IN ACCORDANCE WITH THE STATE DOT SPECIFICATIONS.
12. **CONCRETE CURB AT ENTRANCES:** SAW CUTTING OF EXISTING CURB HEAD TO PROVIDE DEPRESSED CURB AT ENTRANCES IS PROHIBITED. THE CONTRACTOR SHALL SAW CUT EXISTING CURB AT LIMITS OF WORK AND REPLACE WITH DEPRESSED CURB AT ALL ENTRANCES. DRILL AND DOWEL ALL CURB INCLUDING DEPRESSED CURB TO EXISTING CURB PER THE DETAIL.
13. **CONNECTION TO EXISTING CONCRETE:** WHERE PROPOSED CONCRETE IS TO CONNECT TO EXISTING CONCRETE, AT LEAST 15" OF REINFORCING STEEL SHALL BE EXPOSED FROM THE EXISTING CONCRETE OR THE CONTRACTOR SHALL PROVIDE NEW HORIZONTAL DOWEL BARS PER THE DETAILS.
14. **ACCESSIBILITY SPECIFICATIONS:** SEE ACCESSIBILITY SPECIFICATIONS FOR MORE INFORMATION REGARDING PAVING IN THE ACCESSIBLE AREAS.

SPECIFICATIONS - UTILITIES

1. **STANDARDS and SPECIFICATIONS:** THE CURRENT EDITIONS OF THE "STANDARD SPECIFICATIONS FOR WATER AND SEWER MAIN CONSTRUCTION IN ILLINOIS" SHALL GOVERN THE PERFORMANCE OF THE WORK. "TRENCHING" AND "OPEN EXCAVATION" OPERATIONS SHALL COMPLY WITH ALL CURRENT O.S.H.A. REGULATORY REQUIREMENTS.
2. **EXISTING UTILITIES:** THE CONTRACTOR SHALL BE RESPONSIBLE FOR THE LOCATIONS AND PROTECTION OF ALL EXISTING UTILITIES SHOWN, ALL EXISTING UTILITIES NOT SHOWN, AND ALL PROPOSED UTILITIES ON THESE PLANS.
3. **TEMPORARY ROADWAY PATCHES:** IT IS THE CONTRACTORS RESPONSIBILITY TO MAINTAIN ANY TEMPORARY ROADWAY PATCHES THAT MAY OCCUR IN ORDER TO REOPEN A ROADWAY WHILE CONSTRUCTION ACTIVITY PROGRESSES, UNTIL SUCH TIME A PERMANENT PATCH CAN BE INSTALLED.
4. **TRENCH BACKFILL IN RIGHT OF WAYS:** CARE SHALL BE TAKEN IN PARKWAYS AREAS TO ASSURE COMPACTION ACCEPTABLE FOR THE FUTURE STABILITY OF DRIVEWAYS AND SIDEWALKS. WHILE SPECIAL BACKFILL MATERIAL IS NOT REQUIRED, IT SHALL BE THE RESPONSIBILITY OF THE CONTRACTOR TO PROTECT AGAINST POTENTIAL FUTURE SETTLEMENT OF BACKFILLED AREAS.
5. **TRENCH BACKFILL:** TRENCH BACKFILL MATERIAL (SEE DETAIL), SHALL BE PROVIDED UNDER AND WITHIN TWO FEET OF ALL PROPOSED AND FUTURE SIDEWALK, CURBS AND PAVEMENT.
6. **STRUCTURE BEDDING:** ALL STRUCTURE BEDDING SHALL BE COMPACTED CRUSHED STONE OR LIMESTONE MEETING CA-6 STANDARDS.
7. **WATER AND SEWER SEPARATION:** ALL SEWERS SHALL BE LAID AT LEAST 10 FEET HORIZONTALLY FROM ANY EXISTING OR PROPOSED WATER MAIN. THE DISTANCE SHALL BE MEASURED EDGE TO EDGE. ALL SEWERS CROSSING WATER MAINS SHALL BE LAID TO PROVIDE A MINIMUM VERTICAL DISTANCE OF 18 INCHES BETWEEN THE OUTSIDE OF THE WATER MAIN AND THE OUTSIDE OF THE SEWER. THIS SHALL BE THE CASE WHERE THE WATER MAIN IS EITHER ABOVE OR BELOW THE SEWER. THE CROSSING SHALL BE ARRANGED SO THAT THE SEWER JOINTS WILL BE EQUIDISTANT AND AS FAR AS POSSIBLE FROM THE WATER MAIN JOINTS. WHERE A WATER MAIN CROSSES UNDER A SEWER, ADEQUATE STRUCTURAL SUPPORT SHALL BE PROVIDED FOR THE SEWER TO PREVENT DAMAGE TO THE WATER MAIN AND THE SEWER SHALL BE CONSTRUCTED OF WATERMAIN QUALITY MATERIALS FOR 10' ON EITHER SIDE OF THE PIPE. WHEN IT IS IMPOSSIBLE TO OBTAIN PROPER HORIZONTAL AND/OR VERTICAL SEPARATION AS STIPULATED ABOVE, THE SEWER SHALL BE CONSTRUCTED WITH WATER MAIN QUALITY MATERIALS.
8. **TRANSFORMER PAD:** THE CONTRACTOR IS RESPONSIBLE FOR THE ELECTRICAL TRANSFORMER CONCRETE PAD PER THE UTILITY COMPANY SPECIFICATIONS.
9. **SEWER LID LETTERING:** ALL UTILITY LIDS SHALL HAVE "VILLAGE OF TINLEY PARK" CAST ON THEM. SANITARY SEWER CASTINGS TO BE LETTERED "SANITARY SEWER". ALL STORM SEWER SOLID LID CASTINGS SHALL BE LETTERED "STORM SEWER". ALL WATER CASTINGS TO BE LETTERED "WATER". ALL FRAMES AND CASTINGS SHALL MEET ALL MUNICIPAL, STATE AND REGULATORY AGENCY REQUIREMENTS AND SPECIFICATIONS.
10. **FRAME AND GRATES:** UNLESS OTHERWISE SPECIFIED ON A DETAIL OR WITHIN MUNICIPAL SPECIFICATIONS, ALL FRAME AND GRATES TO BE:
    - 10.1. STORM STRUCTURES WITH OPEN LIDS IN PAVEMENT: EJIW 1040 FRAME WITH TYPE M1 RADIAL FLAT GRATE, OR APPROVED EQUAL. THE VILLAGE OF TINLEY PARK DOES NOT ALLOW STORM STRUCTURES IN THE CURB. LID TO BE PLACED $\frac{1}{2}$ IN THE CURB AND $\frac{1}{2}$ IN THE PAVEMENT.
    - 10.2. STORM STRUCTURES WITH OPEN LIDS IN LANDSCAPE AREAS: EJIW 6527N 2" BEEHIVE GRATE, OR APPROVED EQUAL.
    - 10.3. STORM STRUCTURES WITH CLOSED LIDS: EJIW 1020-A FRAME WITH TYPE A SOLID COVER, OR APPROVED EQUAL.
    - 10.4. WATER VALVES: EJIW 1020-A, OR APPROVED EQUAL.
    - 10.5. SANITARY SEWER: EJIW 1020-A WITH WATERTIGHT LID AND CONCEALED PICK HOLE, OR APPROVED EQUAL.
11. **WATER MAIN BURY DEPTH:** THE MINIMUM COVER FOR WATER MAIN SHALL BE 5.5' FROM THE FINISHED GRADE TO THE TOP OF THE MAIN.
12. **CONDUIT AND SLEEVES:** ALL UNDERGROUND CONDUIT AND SLEEVES ARE TO BE PLACED BEFORE SITE PAVING CONSTRUCTION COMMENCES AND SHALL BE BURIED A MINIMUM OF 24" BELOW THE BOTTOM OF THE PAVEMENT EXCEPT ELECTRICAL CONDUIT WHICH SHALL BE A MINIMUM OF 36" DEEP. ALL CONDUIT SHALL EXTEND TWO FEET BEYOND THE BACK OF CURB OR EDGE OF SIDEWALK. CONTRACTOR SHALL FURNISH ALL CONDUIT AS NECESSARY FOR UTILITY SERVICES. GAS, TELEPHONE AND ELECTRIC LOCATIONS MAY BE SHOWN ON THE PLAN AS A GUIDE. EXACT LOCATIONS SHALL BE DETERMINED BETWEEN THE CONTRACTOR AND UTILITY COMPANIES.
13. **WATER MAIN TESTING:** ALL WATER MAINS, FITTINGS AND VALVES SHALL BE TESTED FOR PRESSURE AND LEAKAGE IN ACCORDANCE WITH AWWA C600 AND FLUSHED AND DISINFECTED IN ACCORDANCE WITH AWWA C651. ALL VAULTS SHALL BE VACUUM TESTED TO PREVENT INFILTRATION. ALL TESTING, FLUSHING AND DISINFECTION SHALL BE WITNESSED AND APPROVED AND SHALL BE IN COMPLIANCE WITH ALL MUNICIPAL, STATE AND REGULATORY AGENCY GUIDELINES, REQUIREMENTS AND SPECIFICATIONS.
14. **SANITARY SEWER TESTING:** ALL SANITARY SEWER SHALL BE INSPECTED AND TESTED UPON COMPLETION OF INSTALLATION TO THE APPROVAL OF THE MUNICIPALITY AND/OR SANITARY DISTRICT AND IEPA. EXFILTRATION TESTING (LEAKAGE SHALL NOT EXCEED 240 GALLONS PER INCH OF PIPE DIAMETER PER MILE PER DAY) OR AIR TESTING PER ASTM F-1417 (PLASTIC) AND ASTM C-828 (CLAY) AS WELL AS AND DEFLECTION TESTING ARE REQUIRED FOR THE SEWER. LEAKAGE TESTING PER ASTM C-969 OR VACUUM TESTING PER ASTM C-1244 ARE REQUIRED FOR MANHOLES.
15. **SEDIMENT REMOVAL:** ALL DRAINAGE STRUCTURES, PIPES AND PAVEMENT SURFACES WITHIN THE LIMITS OF CONSTRUCTION SHALL BE CLEANED TO REMOVE SEDIMENT PRIOR TO FINAL ACCEPTANCE AND AS MAY BE PERIODICALLY REQUIRED DURING THE COURSE OF CONSTRUCTION.
16. **FLARED END SECTION GRATES:** ALL FLARED END SECTIONS SHALL HAVE GRATES AND THE GRATES SHALL FOLLOW THE INTENT OF THE IDOT STANDARD.
17. **STEPS IN STRUCTURE:** ALL STRUCTURE STEPS SHALL BE GREY CAST IRON ASTM A-48 OR POLYPROPYLENE COATED STEEL REINFORCING RODS WITH LOAD AND PULLOUT RATINGS MEETING OSHA STANDARDS.

MWRD NOTES - GENERAL

REFERENCED SPECIFICATIONS:

ALL CONSTRUCTION SHALL BE IN ACCORDANCE WITH THE APPLICABLE SECTIONS OF THE FOLLOWING, EXCEPT AS MODIFIED HEREIN OR ON THE PLANS:

* STANDARD SPECIFICATIONS FOR ROAD AND BRIDGE CONSTRUCTION (LATEST EDITION), BY THE ILLINOIS DEPARTMENT OF TRANSPORTATION (IDOT SS) FOR ALL IMPROVEMENTS EXCEPT SANITARY SEWER AND WATER MAIN CONSTRUCTION;
* STANDARD SPECIFICATIONS FOR WATER AND SEWER MAIN CONSTRUCTION IN ILLINOIS, LATEST EDITION (SSWS) FOR SANITARY SEWER AND WATER MAIN CONSTRUCTION;
* VILLAGE OF TINLEY PARK MUNICIPAL CODE;
* THE METROPOLITAN WATER RECLAMATION DISTRICT OF GREATER CHICAGO (MWRD) WATERSHED MANAGEMENT ORDINANCE AND TECHNICAL GUIDANCE MANUAL;
* IN CASE OF CONFLICT BETWEEN THE APPLICABLE ORDINANCES NOTED, THE MORE STRINGENT SHALL TAKE PRECEDENCE AND SHALL CONTROL

MUNICIPAL/AGENCY APPROVAL STAMP

SPECIFICATIONS - DEMOLITION

1. **PERMITS:** CONTRACTOR SHALL APPLY FOR AND OBTAIN ALL REQUIRED PERMITS PRIOR TO DEMOLITION.
2. **EROSION CONTROL MEASURES:** CONTRACTOR SHALL COMPLY WITH THE EROSION CONTROL PLAN INCLUDING, BUT NOT LIMITED TO, PERIMETER SILT FENCE AND INLET PROTECTION, PRIOR TO THE START OF DEMOLITION.
3. **STRIPPING AND DEBRIS REMOVAL:** THE BUILDING PAD SITES, AREAS TO BE PAVED, AND ALL AREAS THAT ARE TO RECEIVE FILL MATERIAL SHALL BE STRIPPED OF VEGETATION, TREES, ROOTS, STUMPS, DEBRIS, AND OTHER ORGANIC MATERIAL. STRIPPED TOPSOIL SHALL BE STOCKPILED IN A LOCATION ON-SITE APPROVED BY THE DEVELOPER IF IT HAS BEEN DETERMINED THAT IT CAN BE RE-USED ON THE SITE. ALL TREES INCLUDING STUMPS AND ROOT SYSTEMS, VEGETATION, DEBRIS, AND OTHER OBJECTIONABLE MATERIAL SHALL BE REMOVED AND DISPOSED OFF-SITE. THE CONTRACTOR SHALL COMPLY WITH ALL APPLICABLE LAWS GOVERNING SPILLAGE OF DEBRIS WHILE TRANSPORTING TO A DISPOSAL SITE. ALL COSTS ASSOCIATED WITH DISPOSAL OF MATERIAL SHALL BE INCLUDED IN THE CONTRACT AMOUNT.
4. **BURNING:** BURNING SHALL NOT BE PERMITTED ON THE PROJECT SITE UNLESS APPROVED IN WRITING BY THE GOVERNING AUTHORITIES AND THE DEVELOPER.
5. **EXISTING UTILITIES:** ALL EXISTING UTILITIES ARE TO BE PROTECTED UNLESS OTHERWISE NOTED OR AGREED TO BY THE OWNER AND ENGINEER. ALL EXISTING UTILITIES THAT ARE NOTED TO BE REMOVED SHALL BE CAPPED AND REMOVED AS INDICATED AFTER EXISTING LINES ARE TAKEN OUT OF SERVICE AND UTILITY COMPANY APPROVALS ARE OBTAINED. EXISTING UTILITIES THAT ARE NOTED TO BE ABANDONED SHALL BE FILLED OR CRUSHED TO AVOID FUTURE PIPE FAILURE.
6. **RE-USE OF EXISTING MATERIALS:** CONTRACTOR SHALL RE-USE EXISTING MATERIALS ON THE SITE FOR BACKFILL AND/OR SUB-GRADE ONLY IF APPROVAL IS OBTAINED IN WRITING FROM THE OWNER, ENGINEER AND GEOTECHNICAL ENGINEER. DURING BIDDING, CONTRACTOR SHALL NOT ASSUME THAT MATERIALS CAN BE RE-USED ON-SITE.
7. **PLUGGING EXISTING SANITARY SEWERS:** CONTRACTOR SHALL PLUG DOWNSTREAM END OF EXISTING SANITARY SEWER PRIOR TO DEMOLITION TO PREVENT STORMWATER AND DEBRIS FROM ENTERING THE SEWER.
8. **DRAINAGE:** POSITIVE DRAINAGE SHALL BE MAINTAINED THROUGHOUT DEMOLITION. CONTRACTOR SHALL PLAN DEMOLITION IN STAGES TO PREVENT EXCESS PONDING OR BLOCKAGE OF DRAINAGE. ALL STORM SEWER OR FIELD TILES DAMAGED DURING DEMOLITION SHALL BE REPAIRED AND/OR RECONNECTED BEFORE THE END OF THE WORKDAY.
9. **REMOVAL OF BELOW GRADE IMPROVEMENTS:** ANY BUILDINGS, FOUNDATIONS, WALLS, FOOTINGS, CONCRETE, ETC. THAT ARE SHOWN TO BE REMOVED SHALL BE REMOVED TO THE FULL DEPTH UNLESS APPROVED BY THE OWNER AND ENGINEER.
10. **TREE PROTECTION:** CONTRACTOR SHALL FOLLOW THE TREE PROTECTION PLAN IF IT HAS BEEN PROVIDED AS A PART OF THIS CONSTRUCTION SET. ANY TREES REMOVED THAT WERE INDICATED TO BE PROTECTED SHALL BE REPLACED BY THE CONTRACTOR AND FINED ACCORDINGLY.

ACCESSIBLE PATH - KEY

ACCESSIBLE ROUTE TO THE PUBLIC WAY AND ACCESSIBLE PARKING STALLS

ACCESSIBILITY NOTES:

1. THIS PLAN HAS BEEN INCLUDED FOR SPECIFIC GRADING WITHIN THE ACCESSIBILITY AREAS. SEE GRADING AND STORMWATER PLAN FOR ADDITIONAL GRADES THROUGHOUT THE SITE.

MUNICIPAL/AGENCY APPROVAL STAMP

SPECIFICATIONS - ACCESSIBILITY

1. **STANDARDS AND SPECIFICATIONS:** THE CURRENT EDITION OF THE “ILLINOIS ACCESSIBILITY CODE” (IAC), THE “PROPOSED ACCESSIBILITY GUIDELINES FOR PEDESTRIAN FACILITIES IN THE PUBLIC RIGHT-OF-WAY” (PROWAG), IDOT STANDARDS AND “ADA STANDARDS FOR ACCESSIBLE DESIGN” SHALL GOVERN THIS WORK.
2. **VERIFY SLOPES PRIOR TO CONSTRUCTION:** EXISTING GRADES HAVE BEEN INTERPOLATED BASED ON ELEVATIONS PROVIDED ON THE SURVEY. PROPOSED GRADES NEAR EXISTING OR RECENTLY CONSTRUCTED STRUCTURES (BUILDINGS, PAVEMENT, SIDEWALKS, ETC) MAY REQUIRE MODIFICATIONS IN ORDER TO ACHIEVE COMPLIANCE. PRIOR TO INSTALLATION OF ANY ACCESSIBLE ROUTES, THE CONTRACTOR SHALL VERIFY THE SLOPE OF THE SUB-GRADE AND CONCRETE FORMS FOR COMPLIANCE WITH THE MAXIMUM SLOPES ALLOWABLE. IF ANY SLOPES ARE GREATER THAN ALLOWABLE, CONTRACTOR SHALL CONTACT THE DESIGN ENGINEER IMMEDIATELY TO RE-DESIGN THE ACCESSIBLE ROUTE.
3. **DETECTABLE WARNINGS:** DETECTABLE WARNINGS ARE REQUIRED ON PRIVATE PROPERTY AS REQUIRED BY VILLAGE OF TINLEY PARK. DETECTABLE WARNINGS ARE REQUIRED IN THE PUBLIC RIGHT OF WAY AT STOP CONTROLLED INTERSECTIONS AND SHALL BE AN INTEGRAL PART OF THE RAMP. WARNINGS SHALL BE RED 2'X5' ARMOR TILES, ADA SOLUTIONS OR APPROVED EQUAL CAST-IN-PLACE INLINE TRUNCATED DOME TILES.
4. **ACCESSIBLE ROUTES:** AT LEAST ONE ACCESSIBLE ROUTE SHALL BE PROVIDED WITHIN THE SITE FROM ACCESSIBLE PARKING SPACES AND ACCESSIBLE PASSENGER LOADING ZONES; PUBLIC STREET AND SIDEWALKS; AND PUBLIC TRANSPORTATION STOPS TO THE ACCESSIBLE BUILDING OR FACILITY ENTRANCE THEY SERVE. ACCESSIBLE ROUTES SHALL NOT HAVE A RUNNING SLOPE OF GREATER THAN 5% NOR A CROSS SLOPE OF GREATER THAN 2%.
5. **CURB RAMPS:** CURB RAMPS MAY BE PROVIDED WHEN A SIDEWALK MEETS A CURB. CURB RAMP SLOPES SHALL NOT EXCEED A RUNNING SLOPE OF GREATER THAN 8.33% NOR A CROSS SLOPE OF GREATER THAN 2%. A LANDING NO SHORTER THAN 36” SHALL BE PROVIDED AT THE TOP OF A CURB RAMP.
6. **ACCESSIBLE PARKING SPACES:** ACCESSIBLE PARKING SPACES SHALL BE PROVIDED AS SHOWN ON THE PLANS AND SHALL NOT HAVE A SLOPE THAT IS GREATER THAN 2% IN ANY DIRECTION. ACCESSIBLE PARKING SPACES SHALL BE DESIGNATED AS RESERVED BY PROVIDING A PERMANENTLY MOUNTED SIGN. SEE DETAILS FOR STRIPING AND SIGN REQUIREMENTS.
7. **RAMPS:** AN ACCESSIBLE ROUTE WITH A RUNNING SLOPE GREATER THAN 5% IS CONSIDERED A RAMP AND SHALL COMPLY WITH THE RAMP REQUIREMENTS INCLUDING HANDRAILS. SEE ARCHITECTURAL PLANS FOR RAMP DETAILS.

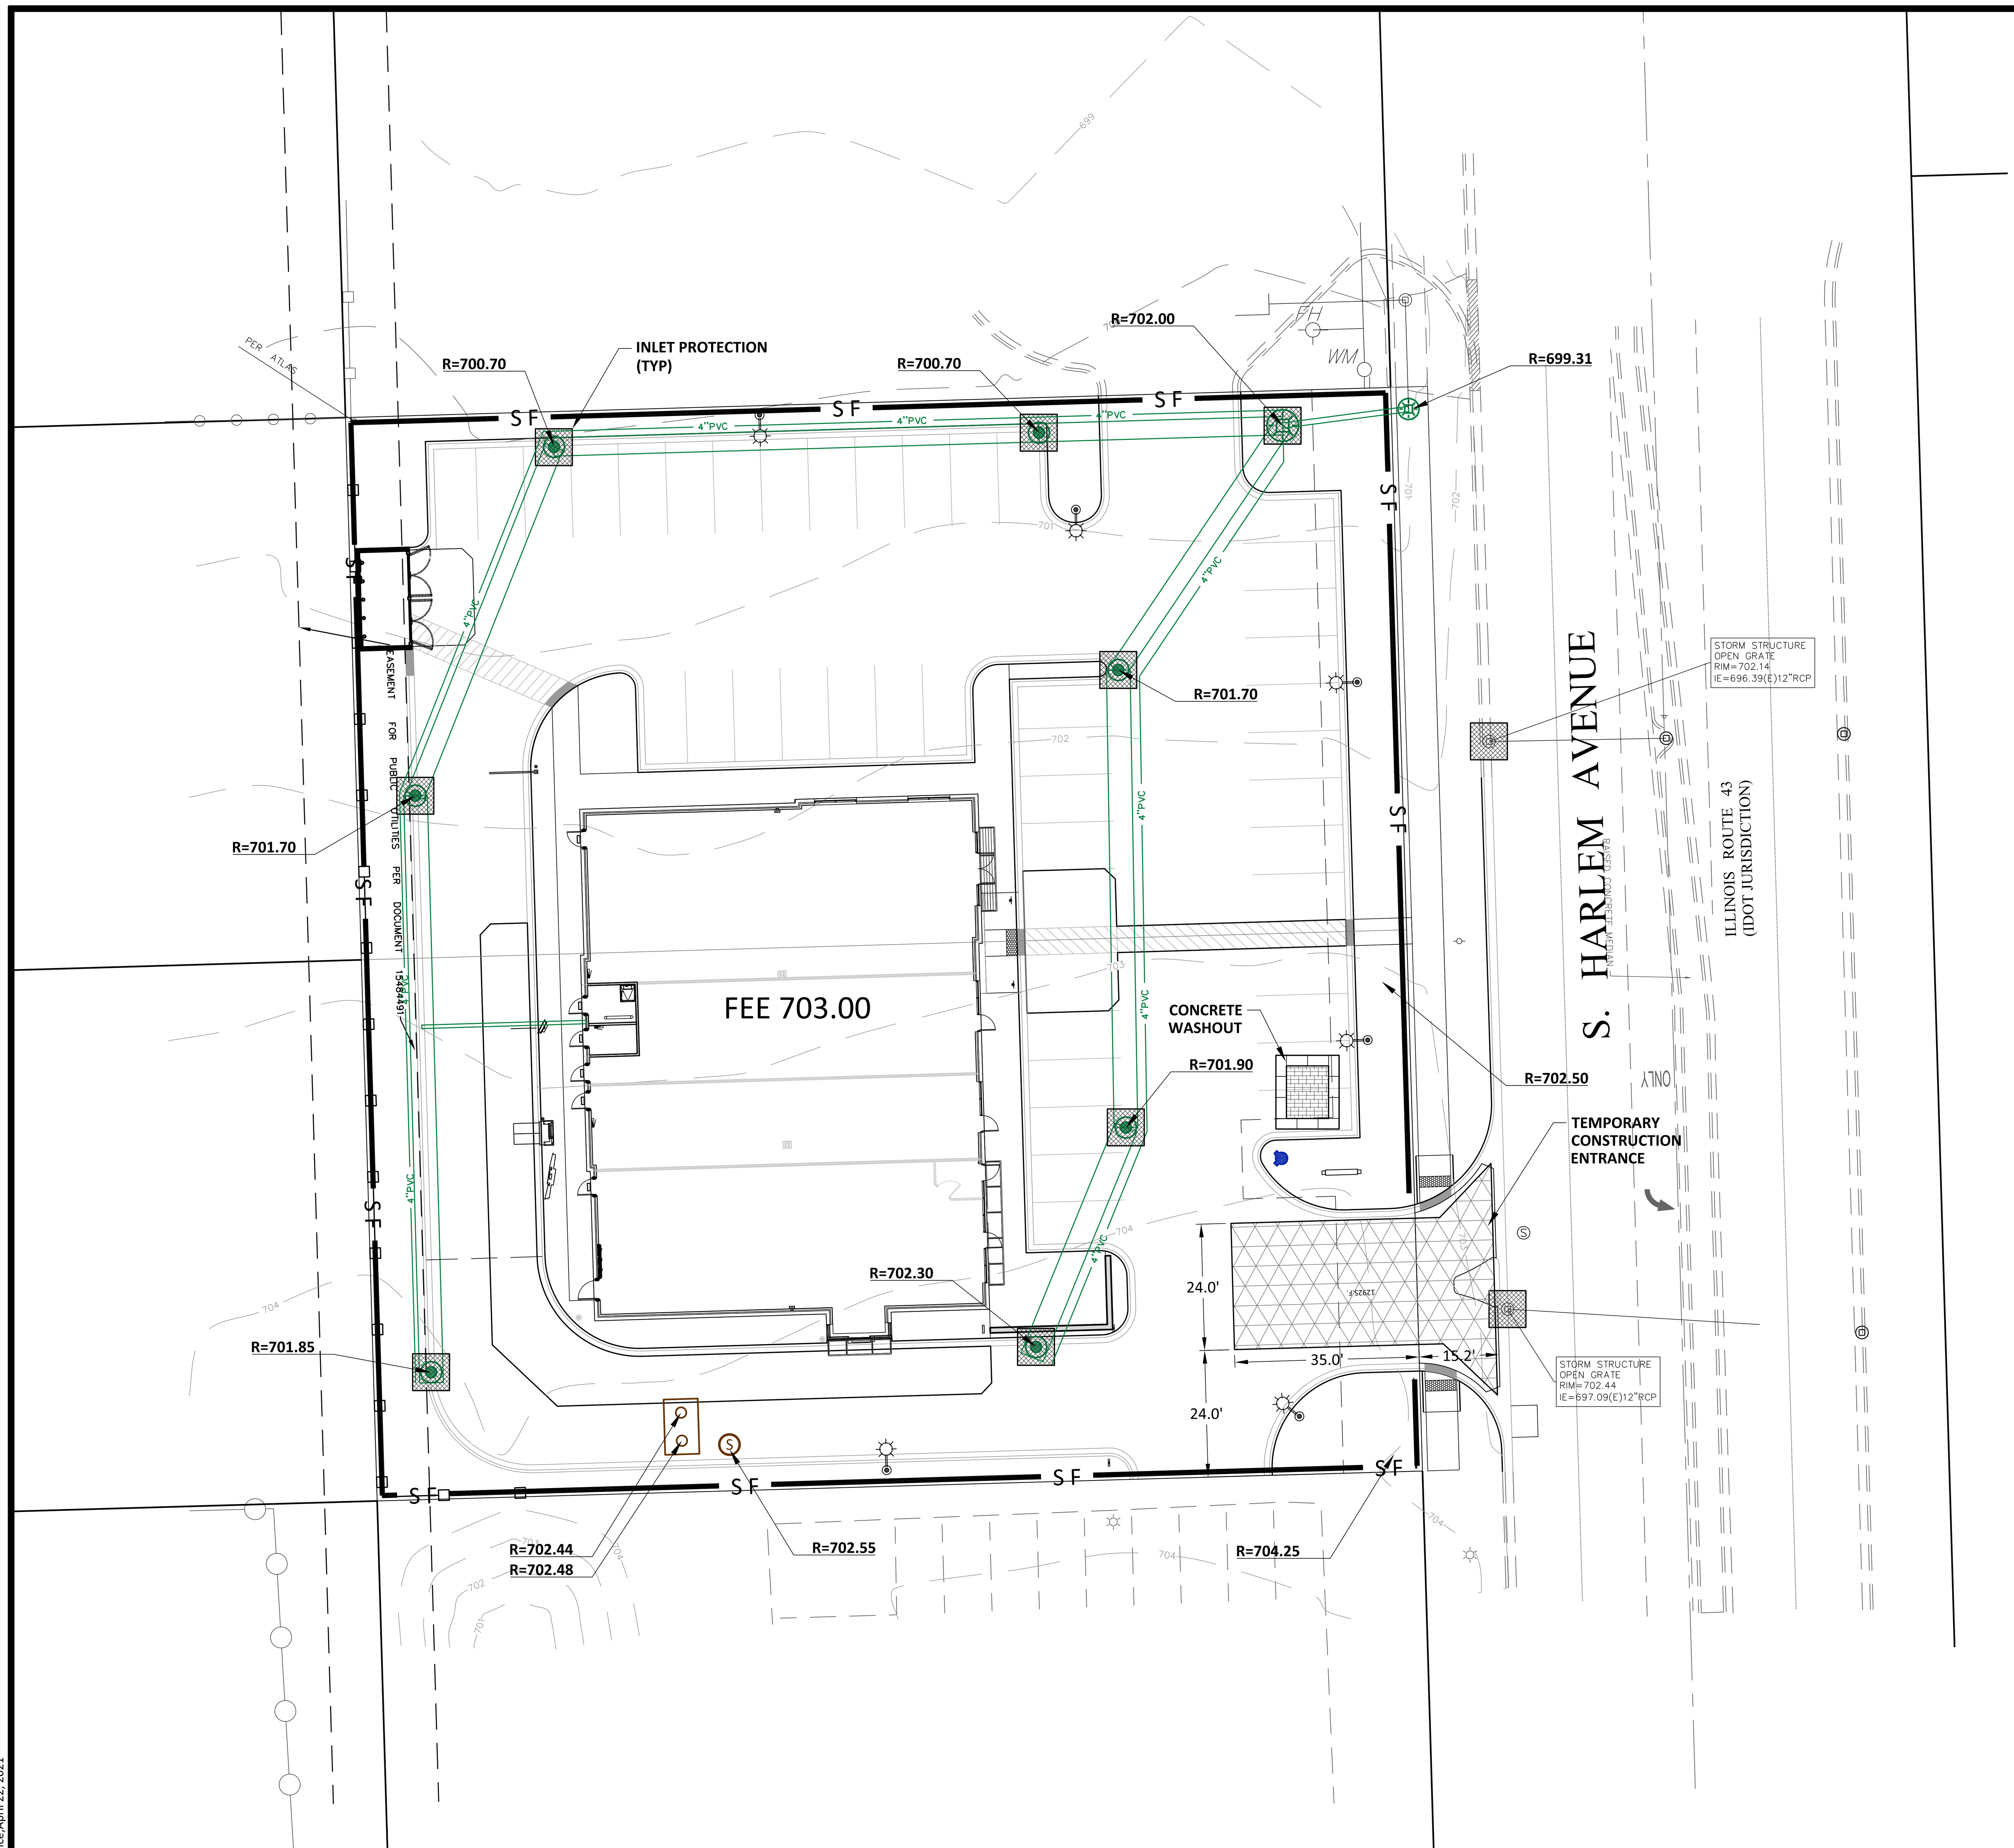
SHEET #: C-7



SPECIFICATIONS - SOIL EROSION

1. **STANDARDS AND SPECIFICATIONS:** THE CURRENT EDITION OF THE "ILLINOIS URBAN MANUAL", ALL STATE AND FEDERAL REGULATIONS, AND THE NPDES (NATIONAL POLLUTION DISCHARGE ELIMINATION SYSTEM) PERMIT PROVISIONS SHALL GOVERN THIS WORK.
2. **SWPPP INSPECTOR:** IF AN NPDES PERMIT IS REQUIRED FOR THE SITE, THE OWNER AND/OR CONTRACTOR SHALL APPOINT A QUALIFIED PERSON TO FULFILL THE INSPECTION REQUIREMENTS OF THE PERMIT (SWPPP INSPECTOR). THE SITE SHALL BE INSPECTED BY THE SWPPP INSPECTOR AT LEAST ONCE EVERY 7 CALENDAR DAYS AND WITHIN 24 HOURS OF THE END OF A STORM THAT IS 1/2" OR GREATER (OR EQUIVALENT SNOWFALL). SWPPP INSPECTIONS SHALL CONTINUE UNTIL FINAL STABILIZATION AND TERMINATION REQUIREMENTS OF THE SWPPP HAVE BEEN MET.
3. **SWPPP COMPLIANCE:** THE CONTRACTOR SHALL COMPLY WITH THE CONDITIONS OF THE STORM WATER POLLUTION PREVENTION PLAN (SWPPP) AND CONDITIONS DETERMINED BY THE SWPPP INSPECTOR WHILE CONDUCTING ACTIVITIES ON THIS PROJECT. THE SWPPP PLANS AND DOCUMENTS ARE PROVIDED FOR THE SOLE BENEFIT OF THE CONTRACTOR AS A PLANNING TOOL FOR COMPLYING WITH THE ENVIRONMENTAL REGULATIONS OF THIS PROJECT. THE CONTRACTOR TOGETHER WITH THE SWPPP INSPECTOR IS EXPECTED TO PROVIDE, EXPAND, SUBMIT AND MONITOR A FULL COMPREHENSIVE SWPPP BEYOND WHAT IS PROVIDED.
4. **CLEANING, REPAIR, AND MAINTENANCE:** THE CONTRACTOR SHALL REFER TO THE SWPPP FOR SEQUENCING OF CONSTRUCTION, INSTALLATION OF NEW EROSION CONTROL DEVICES AND CLEANING, REPAIR AND MAINTENANCE OF EXISTING EROSION CONTROL DEVICES. THE CONTRACTOR SHALL REVISE, RELOCATE AND/OR ADD DEVICES TO REFLECT ACTUAL SITE CONDITIONS AND TO ACCOMMODATE LOCATIONS FOR CONSTRUCTION TRAILER AREAS, STORAGE AREAS, FUELING AREAS, TOILETS, TRASH RECEPTACLES AND WASHOUT AREAS. ANY ACCIDENTAL RELEASE OF SEDIMENT OR POLLUTANTS FROM THE SITE SHALL BE CLEANED BY THE CONTRACTOR.
5. **LIMIT OF EXPOSURE:** TO THE EXTENT POSSIBLE, THE EXPOSED AREAS AND DURATION OF EXPOSURE SHALL BE KEPT TO A MINIMUM AND ALL AREAS WHERE CONSTRUCTION HAS STOPPED FOR 7 DAYS OR MORE MUST BE STABILIZED PER THE SWPPP.
6. **SILT FENCE:** AT A MINIMUM, CONTRACTOR SHALL INSTALL SILT FENCE AS SHOWN ON THE EROSION CONTROL PLANS. SILT FENCE SHALL ALSO BE INSTALLED AS NEEDED AND DIRECTED BY THE SWPPP INSPECTOR IN ORDER TO CONTROL SILT ON THE SITE. SEDIMENT SHALL BE REMOVED FROM BEHIND A SILT FENCE WHEN IT HAS REACHED ONE THIRD THE HEIGHT OF THE FENCE. TEARS SHALL BE REPAIRED AND/OR REPLACED IMMEDIATELY. WHEN A SILT FENCE HAS BROKEN FREE AND IS NO LONGER TOED INTO THE GROUND, IT SHALL BE REPAIRED AS SOON AS POSSIBLE.
7. **INLET FILTERS:** ALL STORMWATER INLETS AND CATCH BASINS WITH AN OPEN LID ARE TO BE PROTECTED WITH AN INLET FILTER PER THE DETAIL. ALL INLET FILTERS ARE TO BE INSPECTED PERIODICALLY TO DETERMINE IF THEY ARE WORKING PROPERLY. FILTERS SHALL BE CLEANED WHEN ONE HALF OF THE FILTER HAS BEEN FILLED WITH SILT AND/OR DEBRIS.
8. **CONCRETE WASHOUT:** CONTRACTOR SHALL SUPPLY A CONCRETE WASHOUT AREA PER THE DETAILS AND DIRECT ALL CONCRETE TRUCKS TO USE IT PRIOR TO LEAVING THE SITE. CONCRETE WASHOUT SHALL BE MAINTAINED AS NEEDED TO KEEP FROM SPILLING OUT ON THE DIRT.
9. **CONSTRUCTION ENTRANCE:** CONTRACTOR SHALL PROVIDE A TEMPORARY CONSTRUCTION ENTRANCE PER THE DETAILS AND IN THE LOCATION SHOWN ON THE PLANS. IF ADDITIONAL ENTRANCES ARE REQUESTED, PLEASE CONTACT THEN ENGINEER AND/OR THE AGENCIES HAVING JURISDICTION OVER THE ROADWAY FOR APPROVAL. ENTRANCE SHALL BE MAINTAINED TO ALLOW DIRT TO FALL OFF VEHICLES BEFORE ENTERING THE ROADWAY.
10. **STOCKPILES:** ALL TEMPORARY STOCKPILES SHALL BE SURROUNDED BY SILT FENCE. IF TOPSOIL STOCKPILE REMAINS UNDISTURBED FOR MORE THAN SEVEN DAYS, TEMPORARY SEEDING AND STABILIZATION IS REQUIRED.
11. **SILT TRAPS:** SILT TRAPS SHALL BE INSTALLED TO CATCH SILT LADEN WATER BEFORE ENTERING PROTECTED AREAS. SILT TRAPS SHALL BE EMPTIED WHEN THEY REACH ONE HALF OF THE CAPACITY OF THE TRAP.
12. **DUST MANAGEMENT:** DURING PERIODS OF EXTENDED DRY WEATHER, THE CONTRACTOR SHALL MAINTAIN A WATER TRUCK ON THE SITE FOR WATERING DOWN THE SOIL TO PREVENT WIND EROSION (DUST).
13. **DEWATERING:** DURING DEWATERING OPERATIONS, WATER WILL BE PUMPED INTO A DANDY BAG, SEDIMENT BASINS OR SILT TRAPS. DEWATERING DIRECTLY INTO FIELD TILES OR STORMWATER STRUCTURES IS PROHIBITED.
14. **SITE ENTRY/EXIT LOCATIONS:** SITE ENTRY AND EXIT LOCATIONS SHALL BE MAINTAINED BY THE CONTRACTOR IN A CONDITION THAT WILL PREVENT TRACKING OR FLOWING OF SEDIMENT ONTO PUBLIC ROADWAYS. ALL SEDIMENT SPILLED, DROPPED, WASHED OR TRACKED ONTO PUBLIC ROADWAYS MUST BE REMOVED IMMEDIATELY. CONTRACTOR SHALL EMPLOY A STREET CLEANER TO USE AS OFTEN AS NEEDED AS DETERMINED BY THE MUNICIPAL ENGINEER AND/OR SWPPP INSPECTOR. WHEN WASHING OF VEHICLES IS REQUIRED TO REMOVE SEDIMENT PRIOR TO ENTRANCE TO A PUBLIC ROADWAY, IT SHALL BE DONE ON AN AREA STABILIZED WITH CRUSHED STONE WHICH DRAINS INTO AN APPROVED SEDIMENT BASIN. ALL FINES IMPOSED FOR TRACKING ONTO PUBLIC ROADS SHALL BE PAID BY THE CONTRACTOR.
15. **PROTECTION OF ADJACENT PROPERTY:** CONTRACTOR SHALL ASSUME FULL LIABILITY FOR DAMAGE TO ADJACENT PROPERTIES AND/OR PUBLIC RIGHT-OF-WAY RESULTING FROM FAILURE TO FULLY IMPLEMENT AND EXECUTE ALL EROSION CONTROL METHODS AND PROCEDURES SHOWN AND NOTED ON THE PLANS AND SWPPP.
16. **RE-VEGETATION:** AT THE COMPLETION OF PAVING AND FINAL GRADING OPERATIONS, ALL DISTURBED AREAS SHALL BE VEGETATED IN ACCORDANCE WITH THE LANDSCAPE PLANS. IN AREAS NOT COVERED BY LANDSCAPE PLAN, THE CONTRACTOR SHALL PROVIDE HYDROMULCH SEEDING AND/OR SODDING FOR ALL DISTURBED AREAS (NOT DESIGNATED TO BE PAVED) IN ACCORDANCE WITH ALL GOVERNING AUTHORITIES' SPECIFICATIONS.
17. **ESTABLISHED VEGETATION:** CONTRACTOR IS TO REGULARLY INSPECT SEEDED AREAS TO VERIFY THAT A GOOD STAND OF VEGETATION IS "ESTABLISHED". VEGETATION WILL NOT BE CONSIDERED "ESTABLISHED" UNTIL 100% OF THE SOIL SURFACE IS UNIFORMLY COVERED WITH PERMANENT VEGETATION WITH A DENSITY OF 70% OR GREATER. CONTRACTOR SHALL FERTILIZE, WATER, RE-SEED AND MULCH AS NEEDED.
18. **EROSION CONTROL PRODUCT REMOVAL:** THE CONTRACTOR SHALL REMOVE AND DISPOSE OF ALL SEDIMENT BARRIERS AND INLET PROTECTION AFTER VEGETATION HAS BEEN COMPLETED AND ALL AREAS OF THE SITE HAVE BEEN STABILIZED AND ACCEPTED BY THE GOVERNING AUTHORITIES AND THE DEVELOPER.

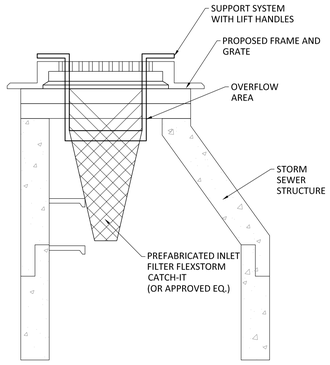
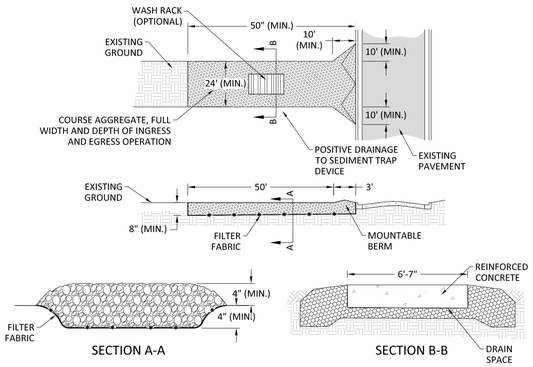
SHEET #: C-8



INLET FILTER PROTECTION - BASKET

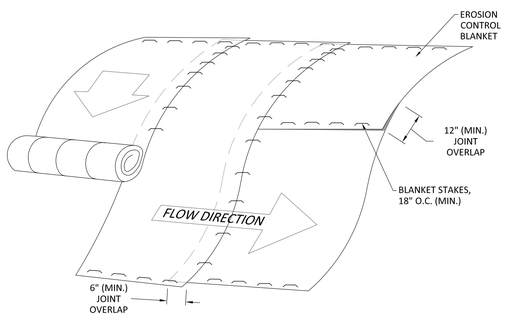
NOT TO SCALE



1. FILTER FABRIC SHALL MEET ASTM 592 GEOTEXTILE. TABLE 1 OR 2 FOR CLASS I, II, OR IV. AND SHALL BE PLACED OVER THE CLEARED AREA PRIOR TO PLACING STONE.
2. RECLAIMED CONCRETE OR COURSE AGGREGATE SHALL MEET EITHER IDOT GRADATION CA-1, CA-2, CA-3, OR CA-4 AND BE PLACED ACCORDING TO CONSTRUCTION SPECIFICATION 25 ROCKFILL USING PLACEMENT METHOD I OR CLASS III COMPACTION.
3. ANY DRAINAGE FACILITIES REQUIRED BECAUSE OF WASHING SHALL CONSTRUCTED ACCORDING TO MANUFACTURER'S SPECIFICATIONS.
4. IF WASH RACKS ARE USED, THEY SHALL BE INSTALLED ACCORDING TO THE MANUFACTURER'S SPECIFICATIONS.

TEMPORARY CONSTRUCTION ENTRANCE

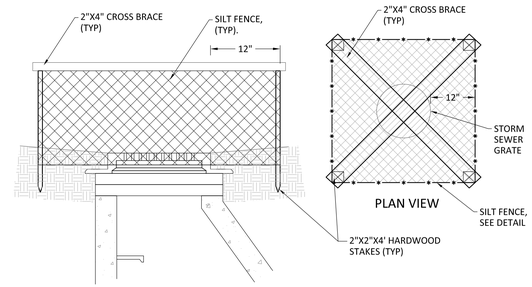
NOT TO SCALE



1. PREPARE SOIL BEFORE INSTALLING BLANKETS, INCLUDING APPLICATION OF LIME, FERTILIZER, AND SEED.
2. BEGIN AT THE TOP OF THE SLOPE (OR CHANNEL) BY ANCHORING THE BLANKET IN A 6" DEEP X 6" WIDE TRENCH. BACKFILL AND COMPACT THE TRENCH AFTER STAPLING.
3. ROLL THE BLANKETS DOWN (STARTING AT DOWNSTREAM PROCEEDING UPSTREAM) HORIZONTALLY ACROSS THE SLOPE.
4. THE EDGES OF PARALLEL BLANKETS MUST BE STAPLED WITH AN APPROXIMATELY (MIN) 4" OVERLAP.
5. WHEN BLANKETS MUST BE SPLICED DOWN THE SLOPE, PLACE BLANKETS END OVER END (SHINGLE STYLE) WITH APPROXIMATELY A (MIN) 6" OVERLAP. USE A DOUBLE ROW OF STAGGERED STAPLES 4" APART TO SECURE BLANKETS.
6. IN HIGH FLOW CHANNEL APPLICATIONS, A STAPLE CHECK SLOT IS RECOMMENDED AT 30 TO 40 FOOT INTERVALS. USE A ROW OF STAPLES 4" APART OVER ENTIRE WIDTH OF THE CHANNEL. PLACE A SECOND ROW 4" BELOW THE FIRST ROW IN A STAGGERED PATTERN.
7. THE TERMINAL END OF THE BLANKETS MUST BE ANCHORED IN A 6" DEEP X 6" WIDE TRENCH. BACKFILL AND COMPACT THE TRENCH AFTER STAPLING.

EROSION CONTROL BLANKET

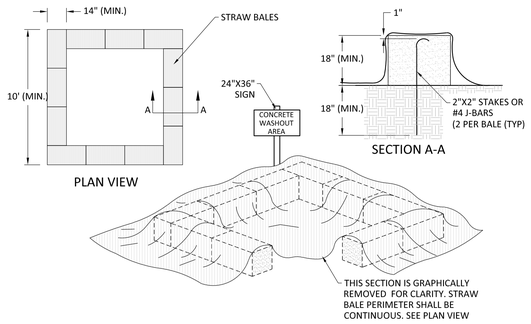
NOT TO SCALE



1. 2"X2" NOMINAL HARDWOOD STAKES, 4' MINIMUM LENGTH. DRIVEN INTO GROUND APPROXIMATELY 18" DEEP, 12" FROM INLET FRAME.
2. AREA INSIDE THE FENCE FROM EDGE OF FABRIC TO STRUCTURE, MUST BE STABILIZED WITH EROSION CONTROL BLANKET, TURF REINFORCEMENT MAT, GEOTEXTILE 592 TABLE 2 CLASS 2 OR CA-7 STONE.
3. MAX HEIGHT OF THE FABRIC ABOVE THE CREST OF THE INLET SHALL BE 30". PLACE THE BOTTOM 6" OF THE FABRIC IN A TRENCH AND BACKFILL WITH 6" OF 95% COMPACTED SOIL.
4. STAKES SHALL BE 4' MAX. SPACING.
5. A MAINTENANCE SCHEDULE SCHEDULE MUST MAINTAIN A SEDIMENT ACCUMULATION OF LESS THAN 50% OF THE HEIGHT OF THE MONOFILAMENT FABRIC.
6. MONOFILAMENT FABRIC SHALL MEET THE REQUIREMENT OF ASTM 592 GEOTEXTILE TABLE 1 CLASS 4.
7. MONOFILAMENT FABRIC SHALL BE SECURED TO EACH 2"X2" HARDWOOD STAKE WITH A MINIMUM OF 4 STEEL STAPLE FASTENERS AND WOOD LATH. WOOD LATH SHALL BE A MINIMUM LENGTH OF 10". WIRE FASTENERS SHOULD BE USED IF METAL T-POSTS SHOULD BE USED IF T-POSTS ARE INSTALLED IN PLACE OF HARDWOOD STAKES.

INLET PROTECTION - BARRIER SILT FENCE

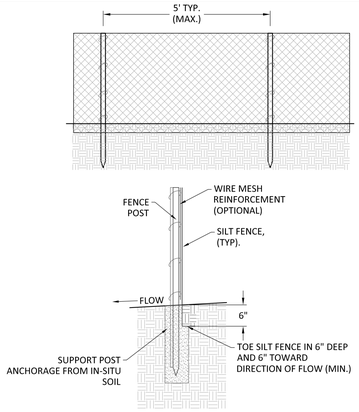
NOT TO SCALE



1. FACE SIGN TOWARD NEAREST STREET OR ACCESS POINT.
2. CONCRETE WASHOUT SHALL BE LOCATED BEHIND THE CURB AND 50' (MIN.) FROM NEAREST DRAINAGE INLET OR WATER COURSE.

CONCRETE WASHOUT

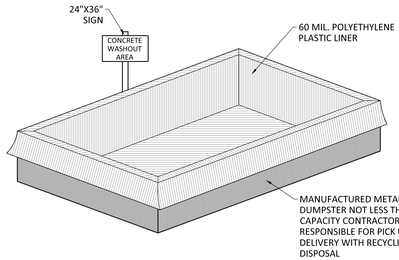
NOT TO SCALE



1. FILTER FABRIC SHALL MEET GEOTEXTILE 592 TABLE 1 OR 2, CLASS 1 WITH EQUIVLENT OPENING SIZE OF AT LEAST 30 FOR NONWOVEN AND 40 FOR WOVEN.
2. FENCE POSTS SHALL BE EITHER STANDARD STEEL POST OR WOOD POSTS WITH A MINIMUM CROSS SECTION AREA OF 3 SQ. IN.

SILT FENCE

NOT TO SCALE



1. FACE SIGN TOWARD NEAREST STREET OR ACCESS POINT.
2. CONCRETE WASHOUT SHALL BE LOCATED BEHIND THE CURB AND 50' (MIN.) FROM NEAREST DRAINAGE INLET OR WATER COURSE.

CONCRETE WASHOUT IN DUMPSTER - OPTION

NOT TO SCALE

DESCRIPTION	JAN	FEB	MAR	APR	MAY	JUN	JUL	AUG	SEP	OCT	NOV	DEC
TEMPORARY SEEDING				21ST					30TH			
OAT COVER CROP (90 LBS/AC.) (NOTE 2)				1ST			4TH					
WHEAT COVER CROP (90 LBS/ AC.) (NOTE 2)				1ST					30TH			
ANNUAL RYE COVER CROP (90 LBS. AC.) (NOTE 2)				1ST					30TH			

NOTE 1: CONTRACTOR TO COORDINATE WITH GROWER/ SUPPLIER TO ENSURE AVAILABILITY.
NOTE 2: COVER CROPS AS SHOWN MAY BE SUPERCEDED IN NATIVE SEED AREAS. SEE SPECIFICATION FOR NATIVE AREAS FOR SPECIFIC APPLICATIONS.

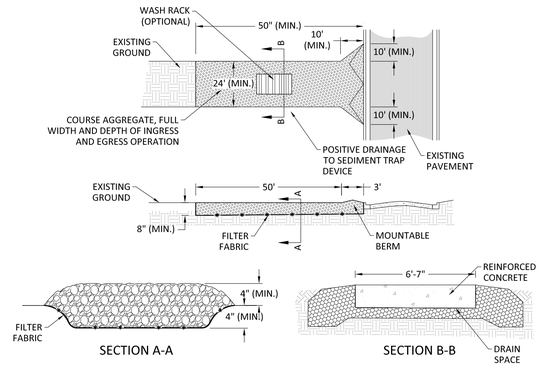
CONSTRUCTION SEQUENCE

1. MOBILIZE TO THE SITE.
2. INSTALL SOIL EROSION CONTROL MEASURES.
3. CONSTRUCT A TEMPORARY CONSTRUCTION ENTRANCE/ EXIT.
4. TOPSOIL STRIPPING AND STOCKPILING. PROVIDE TEMPORARY SEEDING ON STOCKPILES AND ALL OTHER AREAS OF THE SITE THAT WILL REMAIN UNDISTURBED FOR 30 DAYS OR MORE. REFER TO LANDSCAPE PLAN FOR SEEDING.
5. MASS GRADING OF DISTURBED SITE.
6. INSTALLATION OF BUILDING FOUNDATIONS.
7. INSTALLATION OF ALL UNDERGROUND UTILITIES.
8. INSPECT SOIL EROSION CONTROL MEASURES AND MAINTAIN OR REPLACE AS NECESSARY.
9. INSTALLATION OF PARKING LOT SUB-BASE MATERIAL.
10. INSTALLATION OF PARKING LOT BASE COURSE MATERIALS.
11. INSTALLATION OF PERMANENT SOIL STABILIZATION MEASURES AND RE-SPREAD TOPSOIL.
12. INSTALLATION OF PARKING LOT SURFACE COURSE MATERIALS.
13. INSTALLATION OF LANDSCAPE.
14. REMOVE TEMPORARY SOIL EROSION CONTROL MEASURES AFTER FINAL SOIL STABILIZATION MEASURES AND THE ESTABLISHMENT OF ADEQUATE VEGETATIVE COVER.
15. ALL STORM SEWERS, CATCH BASINS, PAVEMENT SURFACES AND/ OR DETENTION FACILITIES ARE TO BE CLEANED PRIOR TO FINAL INSPECTION.
16. ALL MAINTENANCE OF THE EROSION CONTROL MEASURES ARE THE RESPONSIBILITY OF THE CONTRACTOR.

1. CONTRACTOR IS RESPONSIBLE TO VERIFY AND ADJUST THE SEQUENCE OF OPERATION IF NECESSARY.
2. SEE LANDSCAPE PLAN FOR PLANTING DETAILS, SOIL PREPARATION, AMENDMENTS, PLANT LISTS, LANDSCAPE SPECIFICATIONS.
3. TEMPORARY SEED SHALL CONFORM TO THE "INDIANA HANDBOOK FOR EROSION CONTROL IN DEVELOPING AREAS" FOR ALL AREAS TO BE DISTURBED AREAS LESS THAN A YEAR OR BARREN AREAS THAT NEED TO BE STABILIZED.
4. CONTRACTOR TO UTILIZE MULCH FOR SEED PROTECTION, SOIL PROTECTION, DUST CONTROL, OR STABILIZATION AS NEEDED AND FOR WHEN SEEDING CANNOT BE PERFORMED.

TEMPORARY SEEDING TABLE AND CONSTRUCTION SEQUENCE

NOT TO SCALE



1. FILTER FABRIC SHALL MEET ASTM 592 GEOTEXTILE. TABLE 1 OR 2 FOR CLASS I, II, OR IV. AND SHALL BE PLACED OVER THE CLEARED AREA PRIOR TO PLACING STONE.
2. RECLAIMED CONCRETE OR COURSE AGGREGATE SHALL MEET EITHER IDOT GRADATION CA-1, CA-2, CA-3, OR CA-4 AND BE PLACED ACCORDING TO CONSTRUCTION SPECIFICATION 25 ROCKFILL USING PLACEMENT METHOD I OR CLASS III COMPACTION.
3. ANY DRAINAGE FACILITIES REQUIRED BECAUSE OF WASHING SHALL CONSTRUCTED ACCORDING TO MANUFACTURER'S SPECIFICATIONS.
4. IF WASH RACKS ARE USED, THEY SHALL BE INSTALLED ACCORDING TO THE MANUFACTURER'S SPECIFICATIONS.

TEMPORARY CONSTRUCTION ENTRANCE

NOT TO SCALE

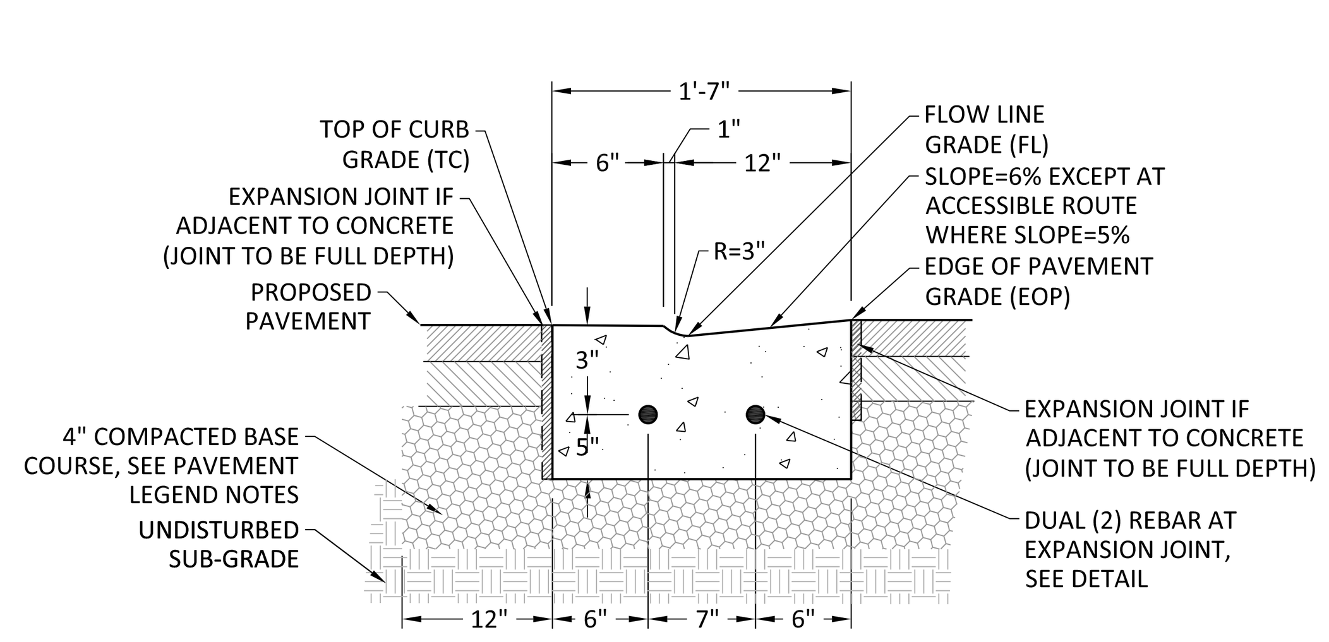
ASPHALT DESCRIPTION	ASPHALT SECTION	SECTION DESCRIPTION
STANDARD DUTY PAVEMENT		1.5" ASPHALT SURFACE COURSE 2.5" ASPHALT BINDER COURSE 8" BASE COURSE COMPACTED SUB-BASE

CONCRETE DESCRIPTION	CONCRETE SECTION	SECTION DESCRIPTION
CONCRETE SIDEWALK		5" CONCRETE PAVEMENT 4" BASE COURSE COMPACTED SUB-BASE
STANDARD CONCRETE PAVEMENT		6" CONCRETE PAVEMENT 4" BASE COURSE COMPACTED SUB-BASE
HEAVY DUTY CONCRETE PAVEMENT		8" CONCRETE PAVEMENT 6" BASE COURSE COMPACTED SUB-BASE

1. ALL ASPHALT SURFACE COURSE SHALL BE: IL-12.5, BITUMINOUS CONCRETE SURFACE COURSE, SUPERPAVE, N50 MIX C, 4% AIR VOIDS, MAX. RAP ALLOWED 15%, PG 64-22
2. ALL ASPHALT BINDER COURSE SHALL BE: IL-19.0 BITUMINOUS CONCRETE BINDER COURSE, SUPERPAVE, N50, 4% AIR VOIDS, MAX. RAP ALLOWED 25%, PG 64-22
3. ALL CONCRETE SHALL BE: 4,000 PSI AT 14 DAYS, LIMESTONE AGGREGATE, 5 - 7% AIR ENTRAINMENT, 4" SLUMP LIMIT. PROVIDE CONCRETE SEALER AND A LIGHT BROOM FINISH.
4. ALL BASE COURSE SHALL BE : CRUSHED STONE OR LIMESTONE (CA-6) COMPACTED TO 95% STANDARD LABORATORY DENSITY.
5. ALL SUB-BASE SHALL BE: PROOF ROLLED TO THE SATISFACTION OF THE OWNER (OR OWNER'S REPRESENTATIVE), AND MUNICIPALITY.
6. PRIOR TO THE PLACEMENT OF THE BINDER COURSE OF ASPHALT, THE BASE COURSE SHALL BE CLEANED AND A PRIME COAT SHALL BE APPLIED AT THE RATE OF 0.25 TO 0.50 GAL/SY PER IDOT STANDARDS.
7. PRIOR TO THE PLACEMENT OF THE SURFACE COURSE OF ASPHALT, THE BINDER COURSE SHALL BE CLEANED AND A TACK COAT SHALL BE APPLIED AT A RATE OF 0.10 GAL/SY PER IDOT STANDARDS.
8. SEE PAVING SPECIFICATIONS FOR ADDITIONAL REQUIREMENTS.

PAVEMENT LEGEND

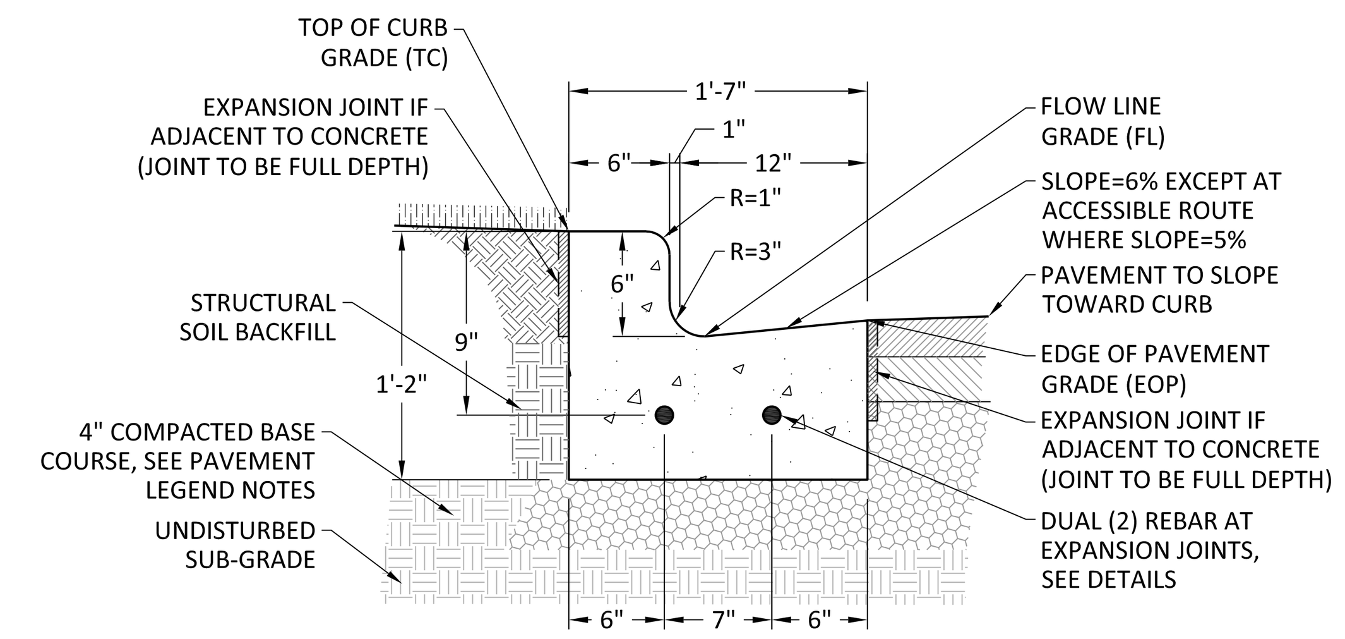
NOT TO SCALE



1. USE REVERSED PITCH GUTTERS WHERE WATER IS DIVERTED AWAY FROM CURB AND STANDARD PITCH GUTTERS WHERE WATER DRAINS TOWARD CURB.
2. LONGITUDINAL SLOPE SHALL BE 0.30% SLOPE MIN.
3. PROVIDE EXPANSION JOINTS AT ALL POINT OF CURVATURE, AT 10' ON EITHER SIDE OF UTILITY TRENCHES OR STRUCTURES AND AT A DISTANCE NOT TO EXCEED 50'.
4. PROVIDE HAND TOOLED CONTRACTION JOINTS IN BETWEEN EXPANSION JOINTS AT DISTANCES NOT TO EXCEED 20'.
5. PROVIDE LIGHT BROOM FINISH IN DIRECTION OF FLOW.
6. FIBER BOARD SHALL BE EXCLUDED AT ACCESSIBLE RAMPS

COMBINATION CONCRETE CURB AND GUTTER - DEPRESSED

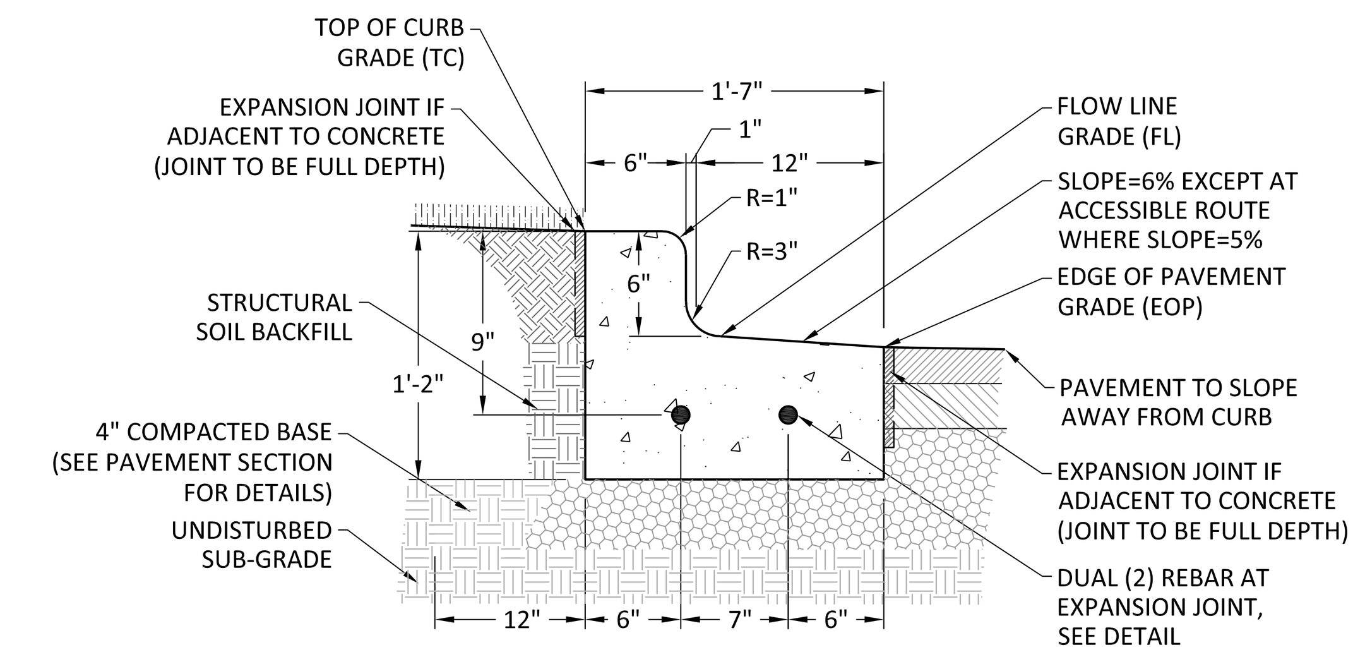
NOT TO SCALE



1. USE STNDARD PITCH GUTTERS WHERE WATER IS DIVERTED TOWARD CURB.
2. LONGITUDINAL SLOPE SHALL BE 0.50% MIN.
3. PROVIDE EXPANSION JOINTS AT ALL POINT OF CURVATURE, AT 10' ON EITHER SIDE OF UTILITY TRENCHES OR STRUCTURES AND AT A DISTANCE NOT TO EXCEED 50'
4. PROVIDE HAND TOOLED CONTRACTION JOINTS IN BETWEEN EXPANSION JOINTS AT DISTANCES NOT TO EXCEED 20'
5. PROVIDE LIGHT BROOM FINISH IN DIRECTION OF FLOW.

COMBINATION CONCRETE CURB AND GUTTER - STANDARD PITCH

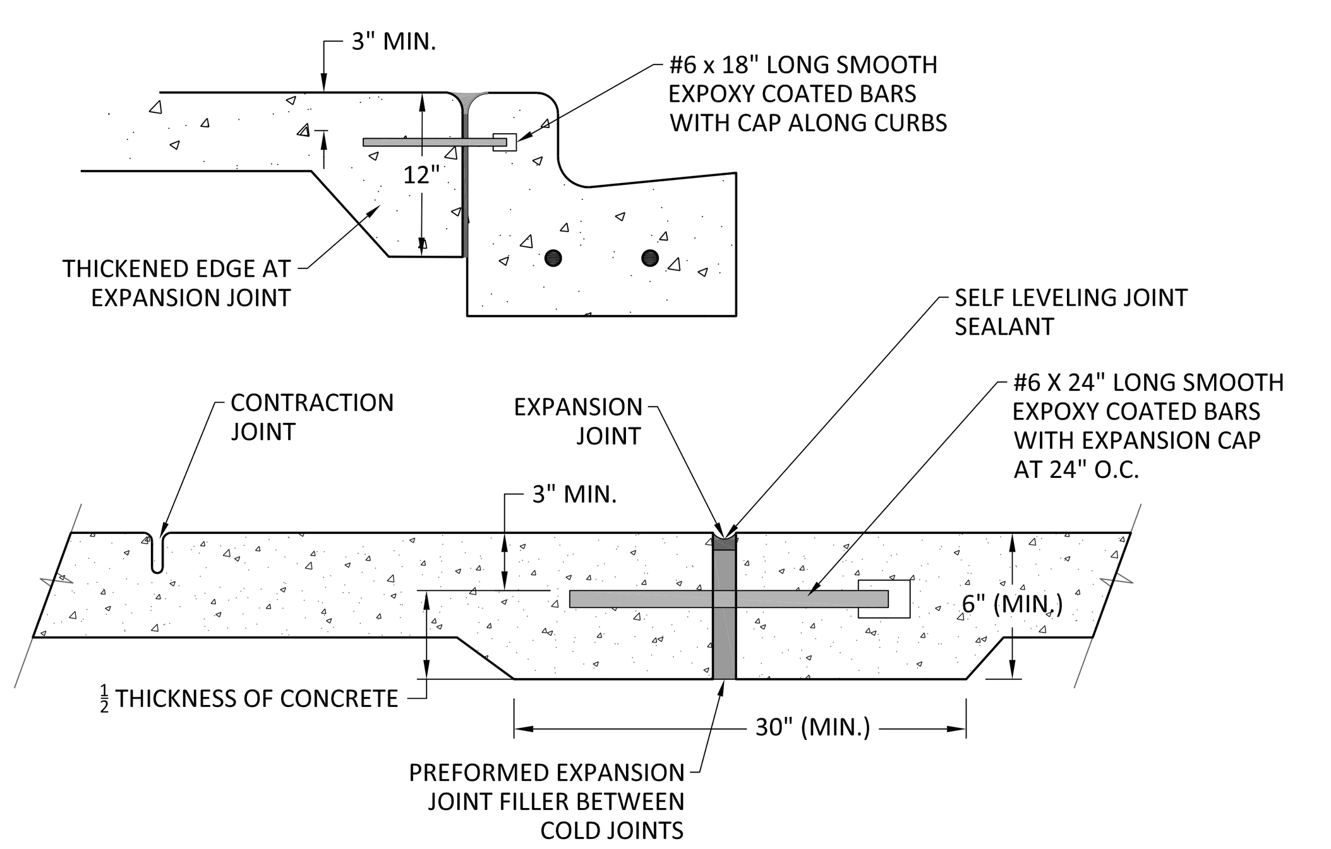
NOT TO SCALE



1. USE REVERSED PITCH GUTTERS WHERE WATER IS DIVERTED AWAY FROM CURB.
2. PROVIDE EXPANSION JOINTS AT ALL POINT OF CURVATURE, AT 10' ON EITHER SIDE OF UTILITY TRENCHES OR STRUCTURES AND AT A DISTANCE NOT TO EXCEED 50'
3. PROVIDE HAND TOOLED CONTRACTION JOINTS IN BETWEEN EXPANSION JOINTS AT DISTANCES NOT TO EXCEED 20'
4. PROVIDE LIGHT BROOM FINISH IN DIRECTION OF FLOW.

COMBINATION CONCRETE CURB AND GUTTER - REVERSE PITCH

NOT TO SCALE



CONTRACTION JOINTS

1. ¼" DEEP FOR CONCRETE PAVEMENT, 2" DEEP FOR CONCRETE SIDEWALKS.
2. TOOLED JOINTS WITH ¼" JOINT RADII.
3. ¼" MAXIMUM WIDTH.

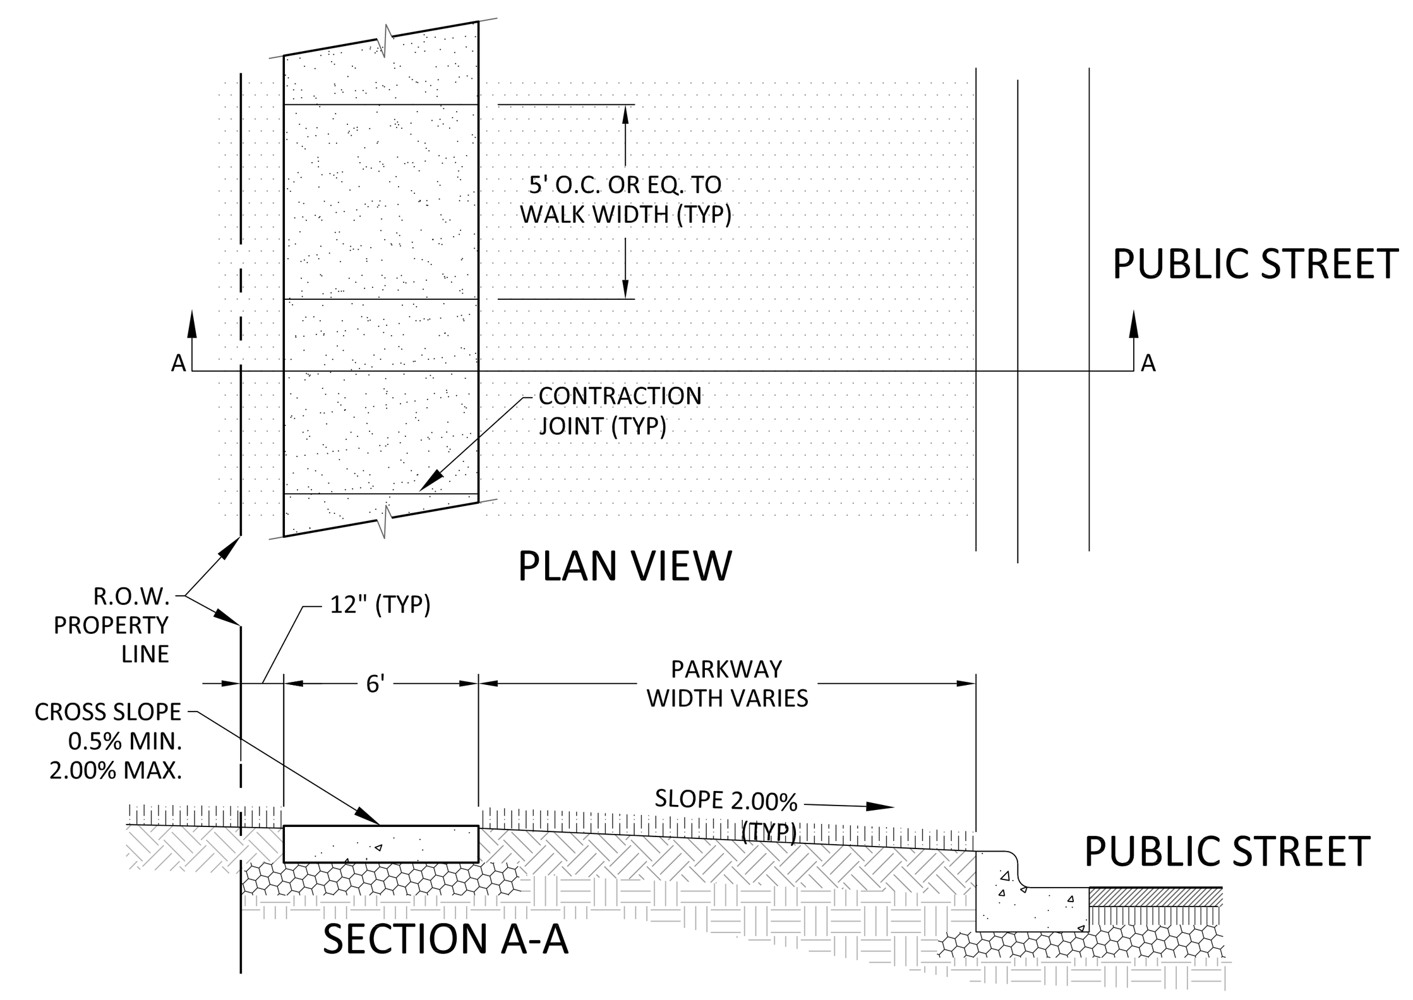
EXPANSION JOINTS

1. ALL EXPANSION JOINTS TO BE ½" PREMOLDED JOINTS.
2. JOINT TO BE FULL DEPTH OF CONCRETE.
3. CLEAN ALL DEBRIS WITH HIGH PRESSURE AIR BEFORE JOINT SEALANT INSTALLATION.
4. FIBER BOARD SHALL BE EXCLUDED AT ACCESSIBLE RAMPS ABUTTING A CURB.
5. EXPANSION JOINTS SHALL BE PROVIDED AROUND THE PERIMETER OF ANY BLOCKOUT IN THE CONCRETE PAVING.

1. SEE PAVEMENT SECTIONS FOR DETAILS.
2. SIDEWALK WIDTHS MAY VARY.
3. ALL REINFORCEMENT BARS SHALL BE GRADE 40 KSI DEFORMED REINFORCEING STEEL. SIZING AND SPACING SHALL BE IN ACCORDANCE WITH STATE DOT SPECIFICATIONS.

CONCRETE JOINTS

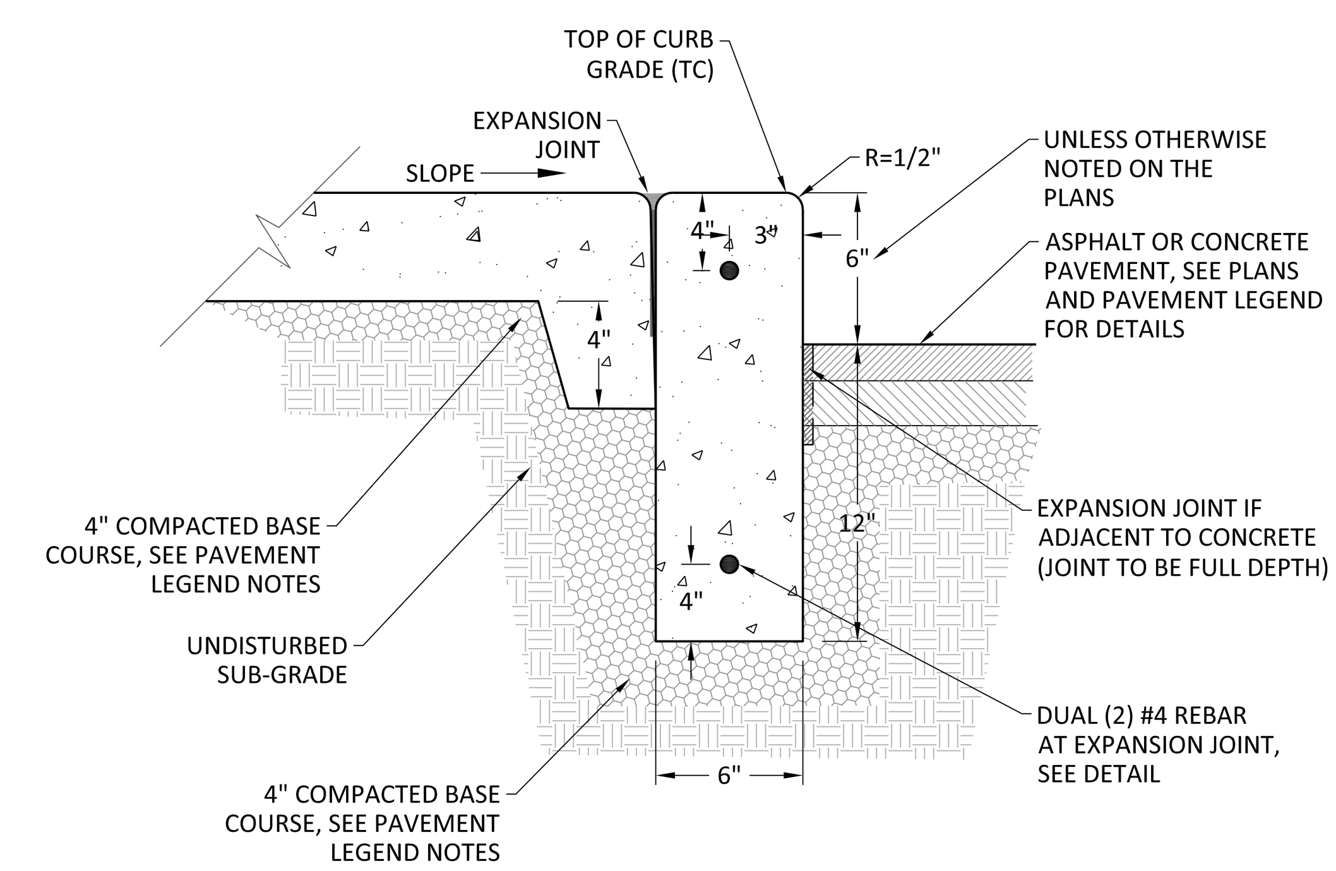
NOT TO SCALE



1. AREAS WITHIN 10' OF A DRIVEWAY APPROACH (PROPOSED OR FUTURE) SHALL BE CONSTRUCTED PER CONCRETE APRON CROSS SECTIONS SEE PAVEMENT SECTIONS DETAIL.
2. SIDEWALK INTERSECTIONS SHALL BE CAST MONOLITHICALLY WITH JOINT LINES PLACED PERPENDICULAR TO THE PATH.
3. PROVIDE EXPANSION JOINTS AT 50' O.C. INTERVALS.
4. PROVIDE CONTRACTION JOINTS 5' O.C. OR SHALL BE EQUAL TO THE WALK WIDTH (TYP).
5. WHERE CONNECTION TO EXISTING CONCRETE WALKS, CONTRACTOR SHALL SAWCUT AT THE NEAREST JOINT (TYP).

CONCRETE PUBLIC SIDEWALK

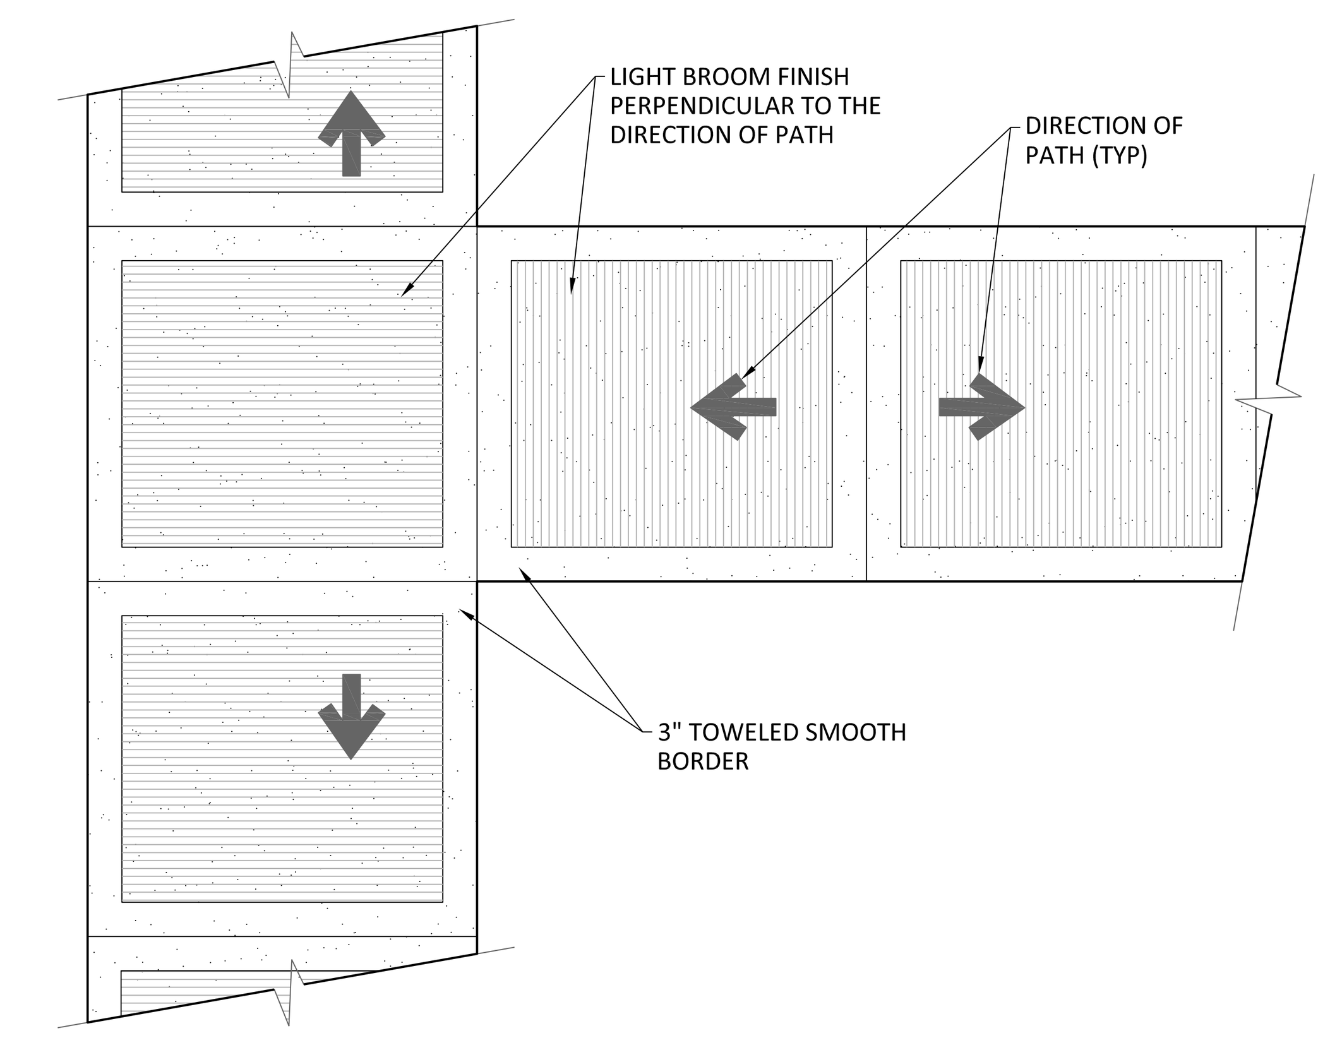
NOT TO SCALE



1. SEE PLANS FOR LOCATIONS.

BARRIER CURB AT PAVEMENT

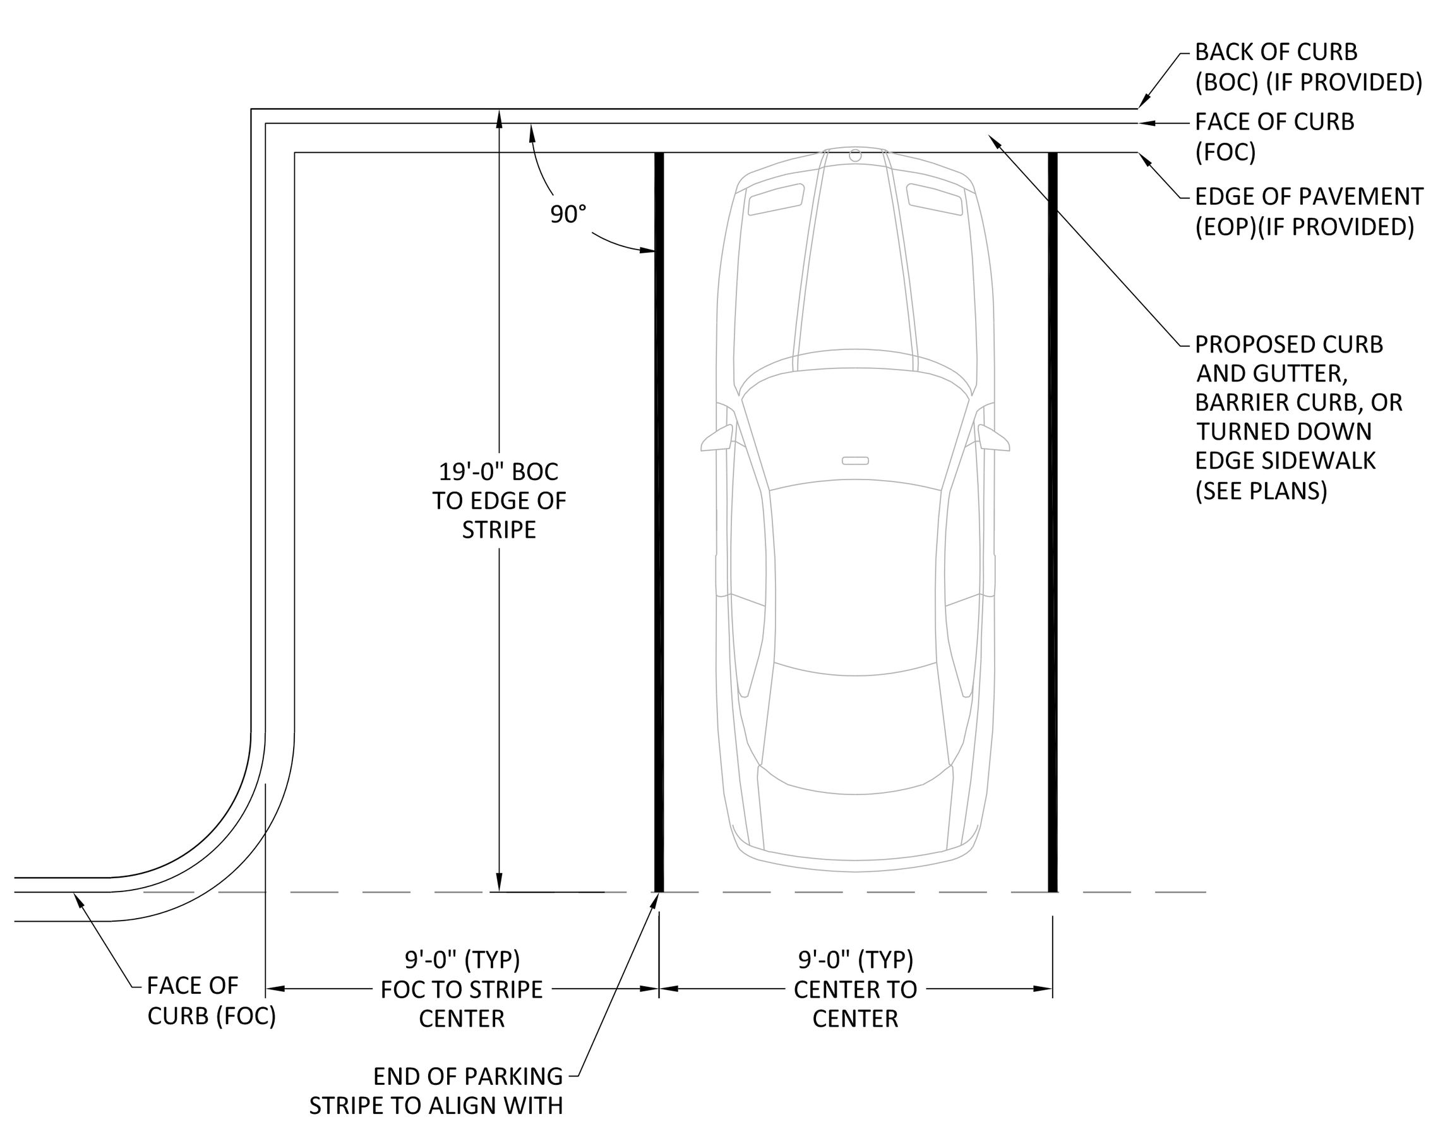
NOT TO SCALE



1. SEE PLANS FOR LOCATIONS.

CALIFORNIA FINISH CONCRETE

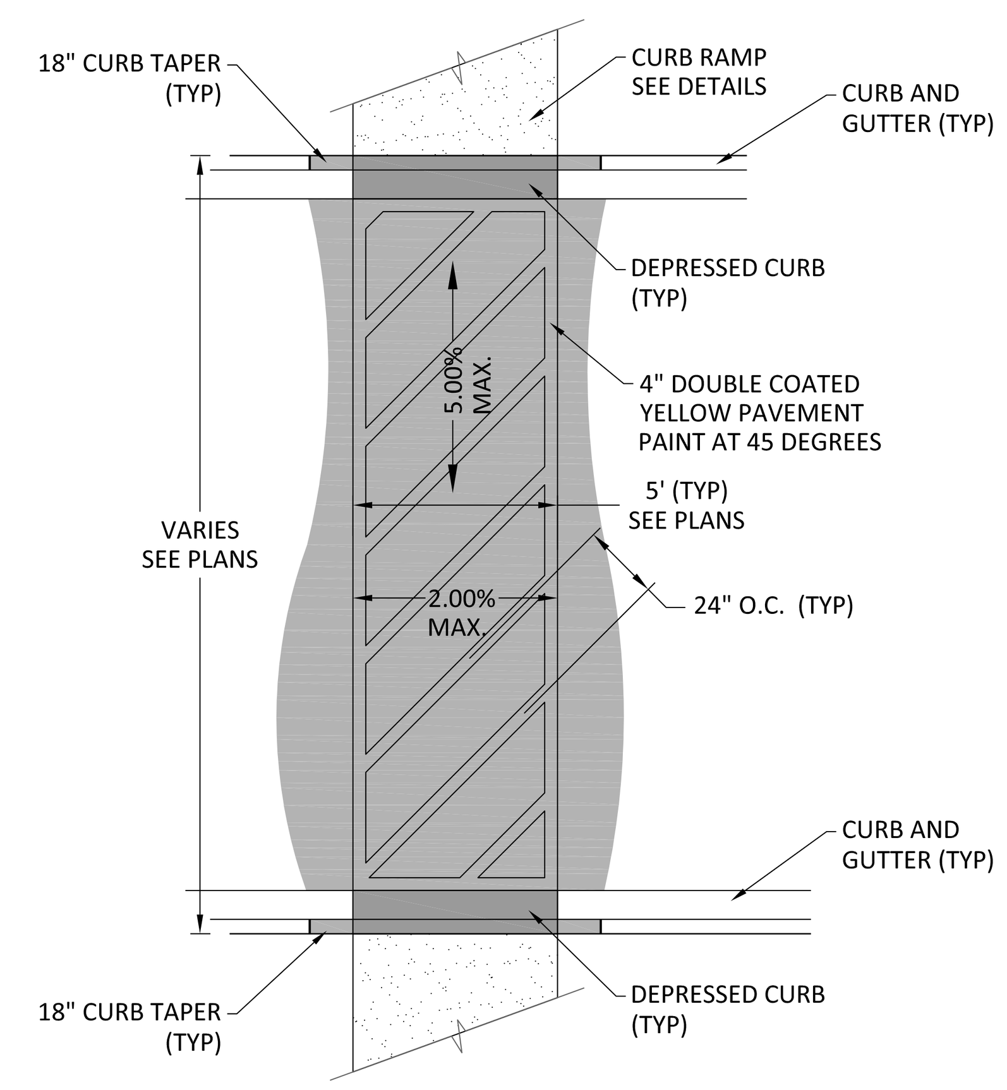
NOT TO SCALE



1. ALL STRIPING SHALL BE DOUBLE COATED YELLOW PAVEMENT PAINT

PARKING STALL STRIPING - 90 DEGREE

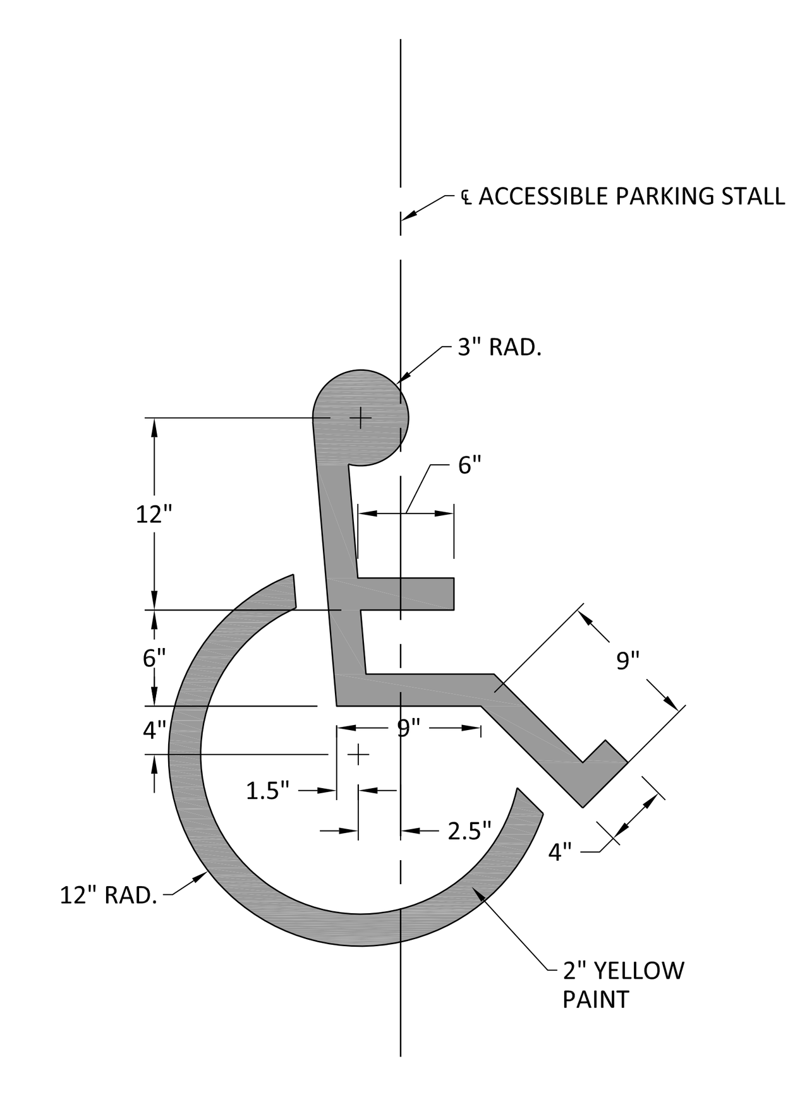
NOT TO SCALE



1. ALL STRIPING SHALL BE DOUBLE COATED YELLOW PAVEMENT PAINT

ACCESSIBLE CROSSWALK

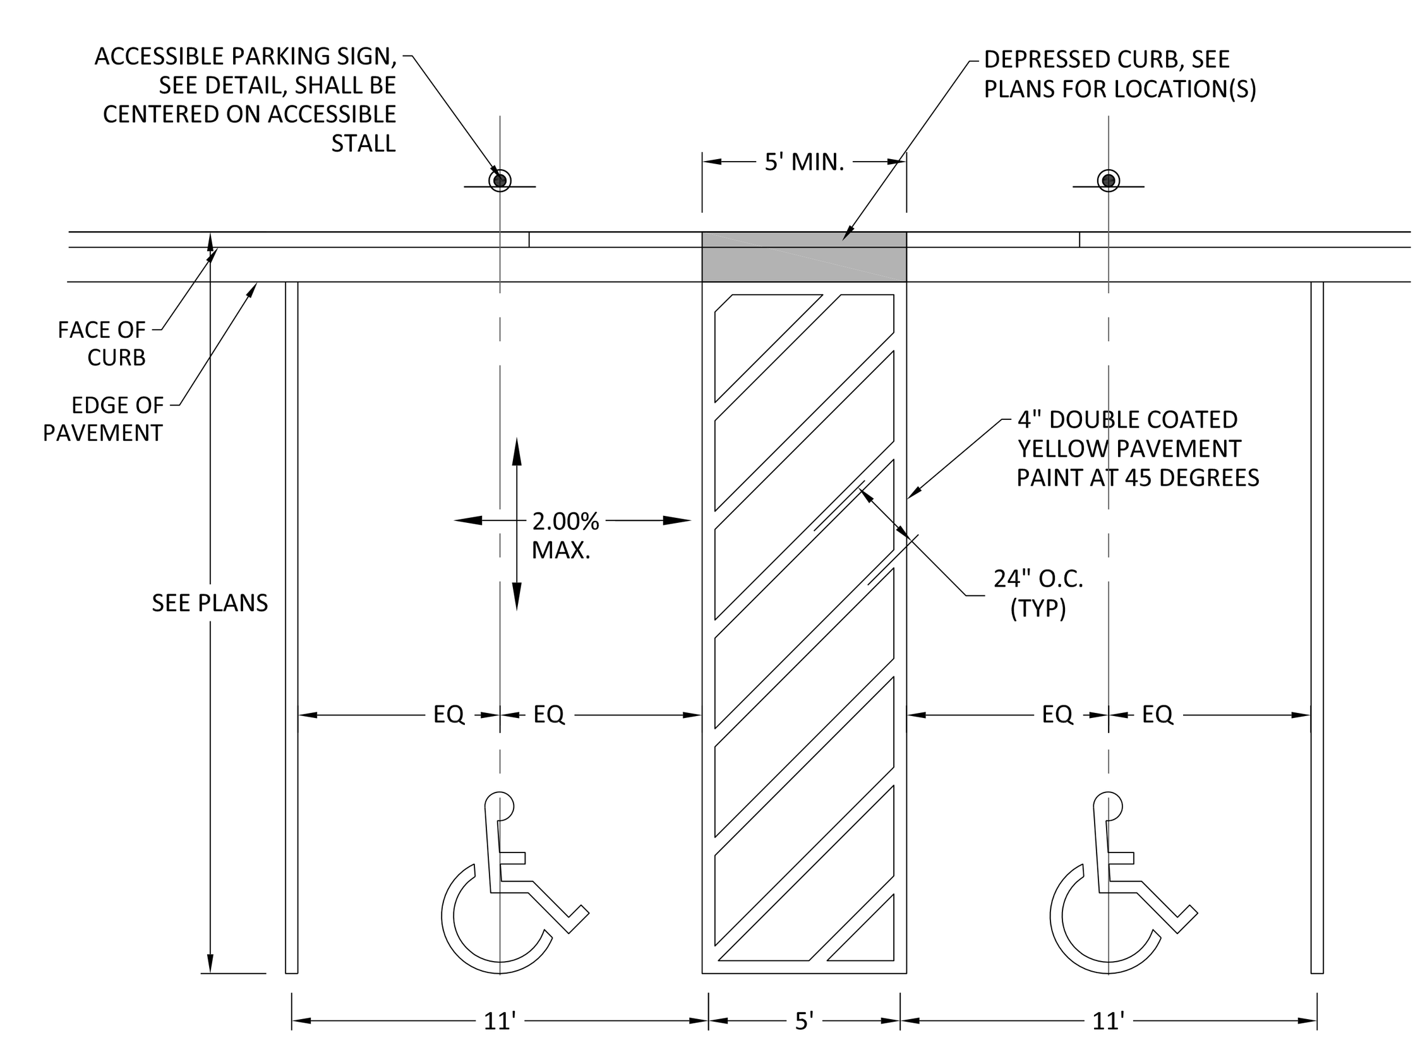
NOT TO SCALE



1. SEE PLAN FOR QUANTITIES AND LOCATIONS.
2. BOTTOM OF SYMBOL SHALL ALIGN WITH END OF STALL.

ACCESSIBLE PARKING STALL PAVEMENT SYMBOL

NOT TO SCALE



1. SIGNS SHALL BE VERTICALLY MOUNTED ON A POST OR WALL AT FRONT CENTER OF THE PARKING SPACE, NO MORE THAN 6 FEET HORIZONTALLY FROM THE FRONT OF THE PARKING SPACE.
2. ACCESSIBLE PARKING STALLS SLOPES NOT TO EXCEED 2.00% IN ANY DIRECTION.

ACCESSIBLE PARKING STALL - 90 DEG 11' x 5'

NOT TO SCALE

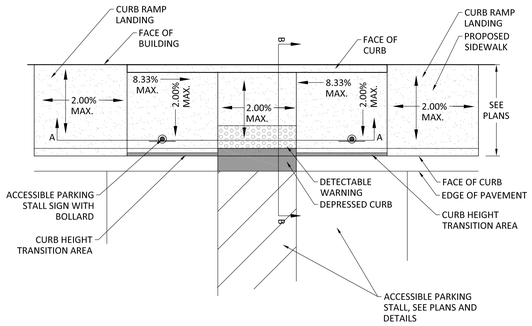
SIGN CONFIGURATION - PLAN VIEW

1. SIGNS SHALL BE VERTICALLY MOUNTED ON A POST OR WALL AT FRONT CENTER OF THE PARKING SPACE, NO MORE THAN 6 FEET HORIZONTALLY FROM THE FRONT OF THE PARKING SPACE.
2. FOR EVERY 6 ACCESSIBLE STALLS (OR FRACTION THEREOF) AT LEAST ONE STALL SHALL BE VAN ACCESSIBLE INCLUDING THE "VAN ACCESSIBLE" SIGN.

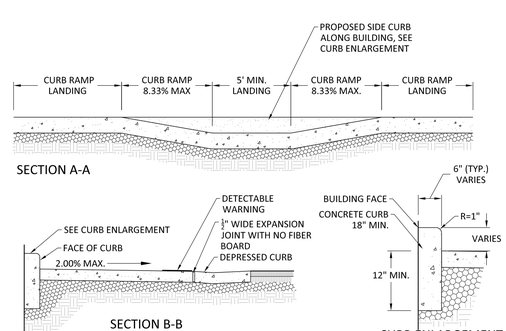
ACCESSIBLE PARKING SIGN AT STALL IN SIDEWALK

NOT TO SCALE

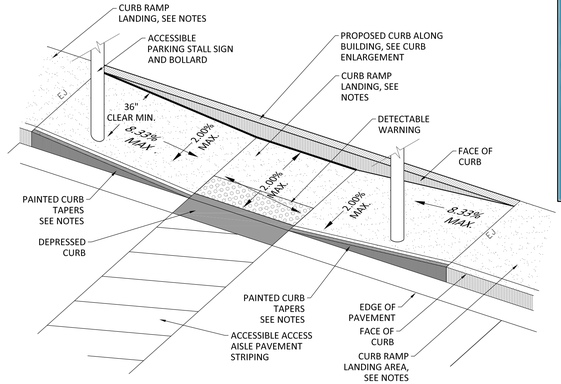


1. SEE PAVEMENT SECTIONS FOR DETAILS.
2. SEE PLANS FOR SIDEWALK WIDTHS.
3. IN NO CASE SHALL THE ACCESSIBLE PATH BE LESS THAN 36", ALL LANDING SHALL BE 60"x60" MIN.

ON-SITE PARALLEL CURB RAMP - PLAN VIEW



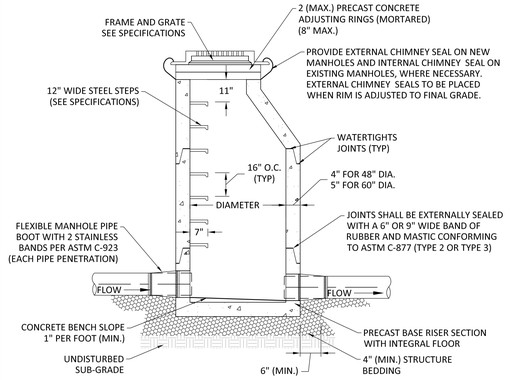
ON-SITE PARALLEL CURB RAMP SECTIONS



1. 60"X60" LANDINGS AREA SHALL BE PROVIDED AT THE TOP AND BOTTOM OF CURB RAMPS, LANDINGS SHALL NOT EXCEED 2.00% SLOPE IN ANY DIRECTIONS.
2. SIGN POST AND BOLLARD SHALL BE LOCATED PER PLAN BUT IN NO CASE SHALL SIGN OR BOLLARD ENCROACH THE 3' MIN. CLEARANCE ALONG AN ACCESSIBLE PATH.
3. CURB TAPERS SHALL BE PAINTED WITH YELLOW PAVEMENT PAINT ON FACE AND 2" ON TOP OF CURB.

ON-SITE PARALLEL CURB RAMP ISOMETRIC

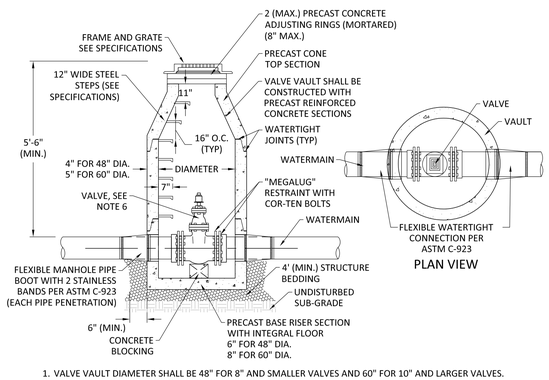
NOT TO SCALE



1. PRECAST STRUCTURES TO CONFORM TO ASTM C-478.
2. STRUCTURE SECTIONS TO BE TONGUE AND GROOVE.
3. BENCHES MUST BE PROVIDED IN ALL SANITARY SEWER MANHOLES.
4. NON-PRECAST OPENINGS SHALL BE CORED AND RUBBER BOOTED.
5. USE ECCENTRIC CONE ONLY
6. USE EXTERNAL LIFTING HOLES ONLY, BUT NOT FULL PENETRATION.

TYPE A SANITARY MANHOLE

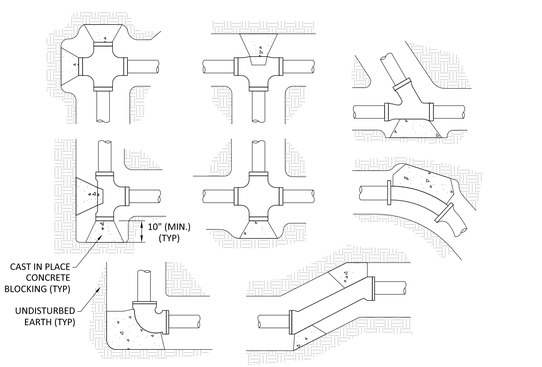
NOT TO SCALE



1. VALVE VAULT DIAMETER SHALL BE 48" FOR 8" AND SMALLER VALVES AND 60" FOR 10" AND LARGER VALVES.
2. VALVE VAULTS MUST CONFORM TO ASTM C-478
3. USE ECCENTRIC CONE ONLY.
4. VAULT SECTIONS TO BE TONGUE AND GROOVED.
5. MECHANICAL JOINT BOLTS AND NUTS SHALL BE COMPOSED OF CORE-TEN.
   5.1. ALL HEXAGONAL BOLTS AND NUTS TO BE STAINLESS STEEL.
6. ALL VALVES SHALL BE: RESILIENT WEDGE GATE VALVES WITH MECHANICAL JOINT ENDS TO COMPLY WITH ANSI/ AWWA C515-09 OR LATEST VERSION. VALVES TO BE CLOW, AMERICAN, WATEROUS, KENNEDY, OR APPROVED EQUAL.
7. AUXILIARY VALVE TO BE CLOW, AMERICAN, WATEROUS, KENNEDY, OR APPROVED EQUAL

VALVE VAULT

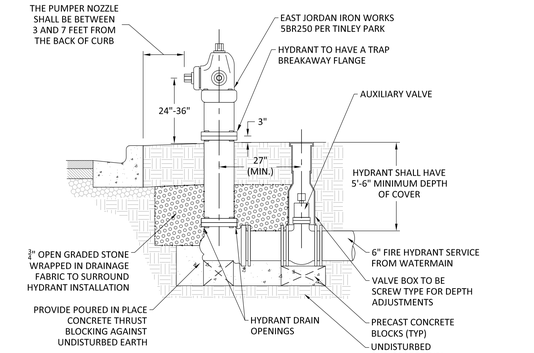
NOT TO SCALE



1. ALL BENDS OF 22½° AND LARGER SHALL BE BLOCKED WITH AT LEAST 10" THICK POURED IN PLACE CONCRETE BLOCKS AGAINST UNDISTURBED VERTICAL EARTH FACE.
2. ALL CONCRETE TO BE 3,500 PSI (MIN.)
3. IN ADDITION TO THE ABOVE THRUST BLOCKING, ALL MECHANICAL JOINTS, BENDS OVER 10 DEG, TEES, CROSSES, VALVES, AND FIRE HYDRANTS SHALL HAVE A "MEGALUG" RESTRAINT, OR AS APPROVED BY THE MUNICIPAL ENGINEERING DIVISION. BOLTS SHALL BE "COR-TEN".
4. PLACE THE BASE AND THRUST BEARING SIDES OF THRUST BLOCK DIRECTLY AGAINST UNDISTURBED EARTH.

THRUST BLOCKING

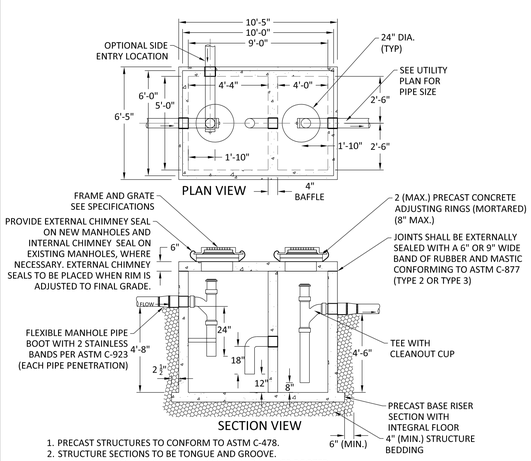
NOT TO SCALE



1. ALL VALVES SHALL BE: RESILIENT WEDGE GATE VALVES WITH MECHANICAL JOINT ENDS TO COMPLY WITH ANSI/ AWWA C515-09 OR LATEST VERSION. VALVES TO BE CLOW, AMERICAN, WATEROUS, KENNEDY, OR APPROVED EQUAL.
2. CONCRETE BASE AND BLOCKING MATERIAL SHALL NOT BLOCK NOR OBSTRUCT HYDRANT DRAIN.

FIRE HYDRANT

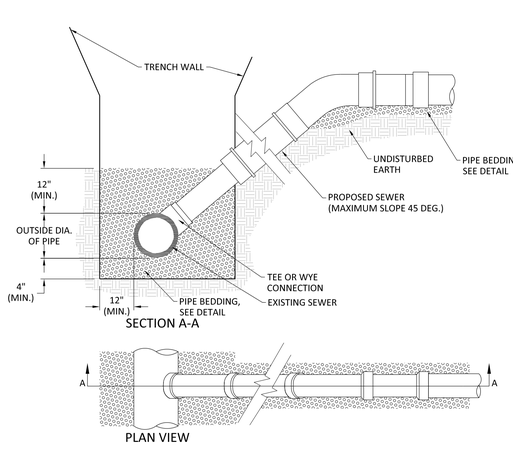
NOT TO SCALE



1. PRECAST STRUCTURES TO CONFORM TO ASTM C-478.
2. STRUCTURE SECTIONS TO BE TONGUE AND GROOVE.
3. NON-PRECAST OPENINGS SHALL BE CORED AND RUBBER BOOTED.
4. USE EXTERNAL LIFTING HOLES ONLY, BUT NOT FULL PENETRATION.

1500 GAL. RECTANGULAR GREASE TRAP

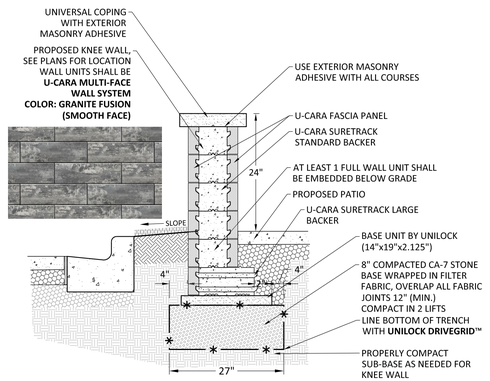
NOT TO SCALE



1. FOR PROPOSED STORM SEWER SERVICE LESS THAN OR EQUAL TO 6", CORE THE EXISTING PIPE AND USE AN "INSERTA TEE".

RISER CONNECTION

NOT TO SCALE



1. KNEE WALL SHALL BE INSTALLED PLUM IN ALL DIRECTIONS.
2. KNEE WALL SHALL BE INSTALLED BY A CERTIFIED COMPANY AND CREW, CREW SHALL FOLLOW ALL MANUFACTURE'S RECOMMENDATIONS.
3. CONTRACTOR IS RESPONSIBLE TO VERIFY SUB-BASE IS PROPERLY COMPACTED AND STRUCTURAL SOILS ARE ADEQUATE FOR SUPPORTING WALL.

KNEE WALL

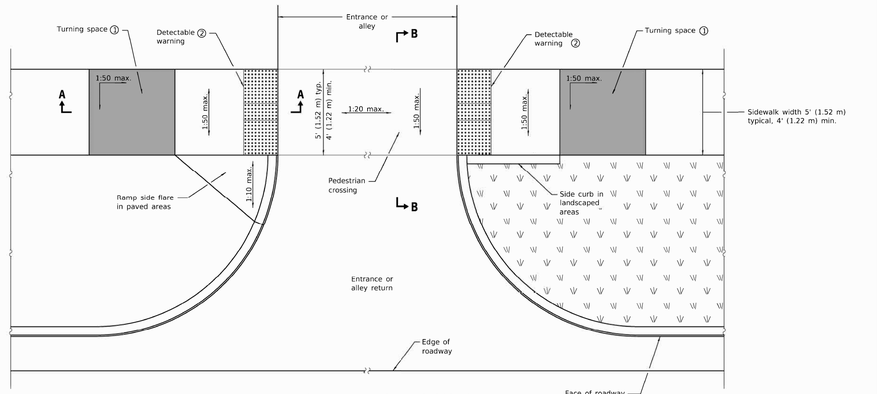
UTILITY TRENCH AND BEDDING DETAIL

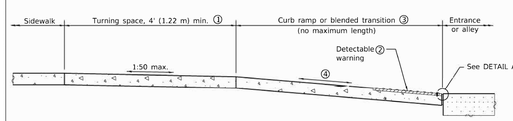
NOT TO SCALE

② Detectable warning shall only be installed at entrances/alleys with permanent traffic control devices (i.e. stop signs, signals).

③ Where possible, maintain the grade of the sidewalk across the entrance/alley to avoid the need for ramps and turning spaces.



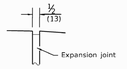
ENTRANCE / ALLEY PEDESTRIAN CROSSING



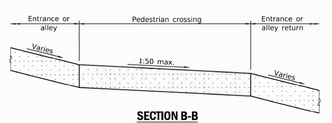
SECTION A-A

① Turning space not required for blended transitions.

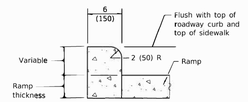
④ The running slope of a curb ramp shall be 1:20 min and 1:12 max. The running slope of a blended transition shall be 1:20 max.



DETAIL A



SECTION B-B



SIDE CURB DETAIL

GENERAL NOTES

All slope ratios are expressed as units of vertical displacement to units of horizontal displacement (V:H).

Where 1:50 maximum slope is shown, 1:64 is preferred.

Detectable warnings are shown in their ideal locations but the following placement tolerances are allowed.

Side Border - Detectable warnings should extend the full width of the walking surface (excluding flared sides) but a border along each side up to 2 in. (50 mm) in width is allowed.

Curb Set-Back - Detectable warnings located at the back of curb should closely align with the curb but a gap up to 6 in. (150 mm) behind the curb is allowed.

All dimensions are in inches (millimeters) unless otherwise shown.

Traffic Impact Study
Proposed Retail Development

Tinley Park, Illinois

Prepared For:

Vequity

Kenig, Lindgren, O'Hara, Aboona, Inc.

April 23, 2021

1. Introduction

This report summarizes the methodologies, results, and findings of a traffic impact study conducted by Kenig, Lindgren, O'Hara, Aboona, Inc. (KLOA, Inc.) for a proposed retail development to be located in Tinley Park, Illinois. The site, which is vacant, is located on the west side of Harlem Avenue (IL Route 43) 300 feet south of 171st Street. As proposed, the site will be developed with an approximately 7,421 square-foot multi-tenant building that will be anchored by an approximately 2,202 square-foot Starbucks coffee shop. Access to the development will be provided via a proposed right-in/right-out access drive on Harlem Avenue and via cross connection to the planned 7-Eleven fuel center development to be located north of the site.

The purpose of this study was to examine background traffic conditions, assess the impact that the proposed development will have on traffic conditions in the area, and determine if any roadway or access improvements are necessary to accommodate traffic generated by the proposed development.

Figure 1 shows the location of the site in relation to the area roadway system. **Figure 2** shows an aerial view of the site.

The sections of this report present the following:

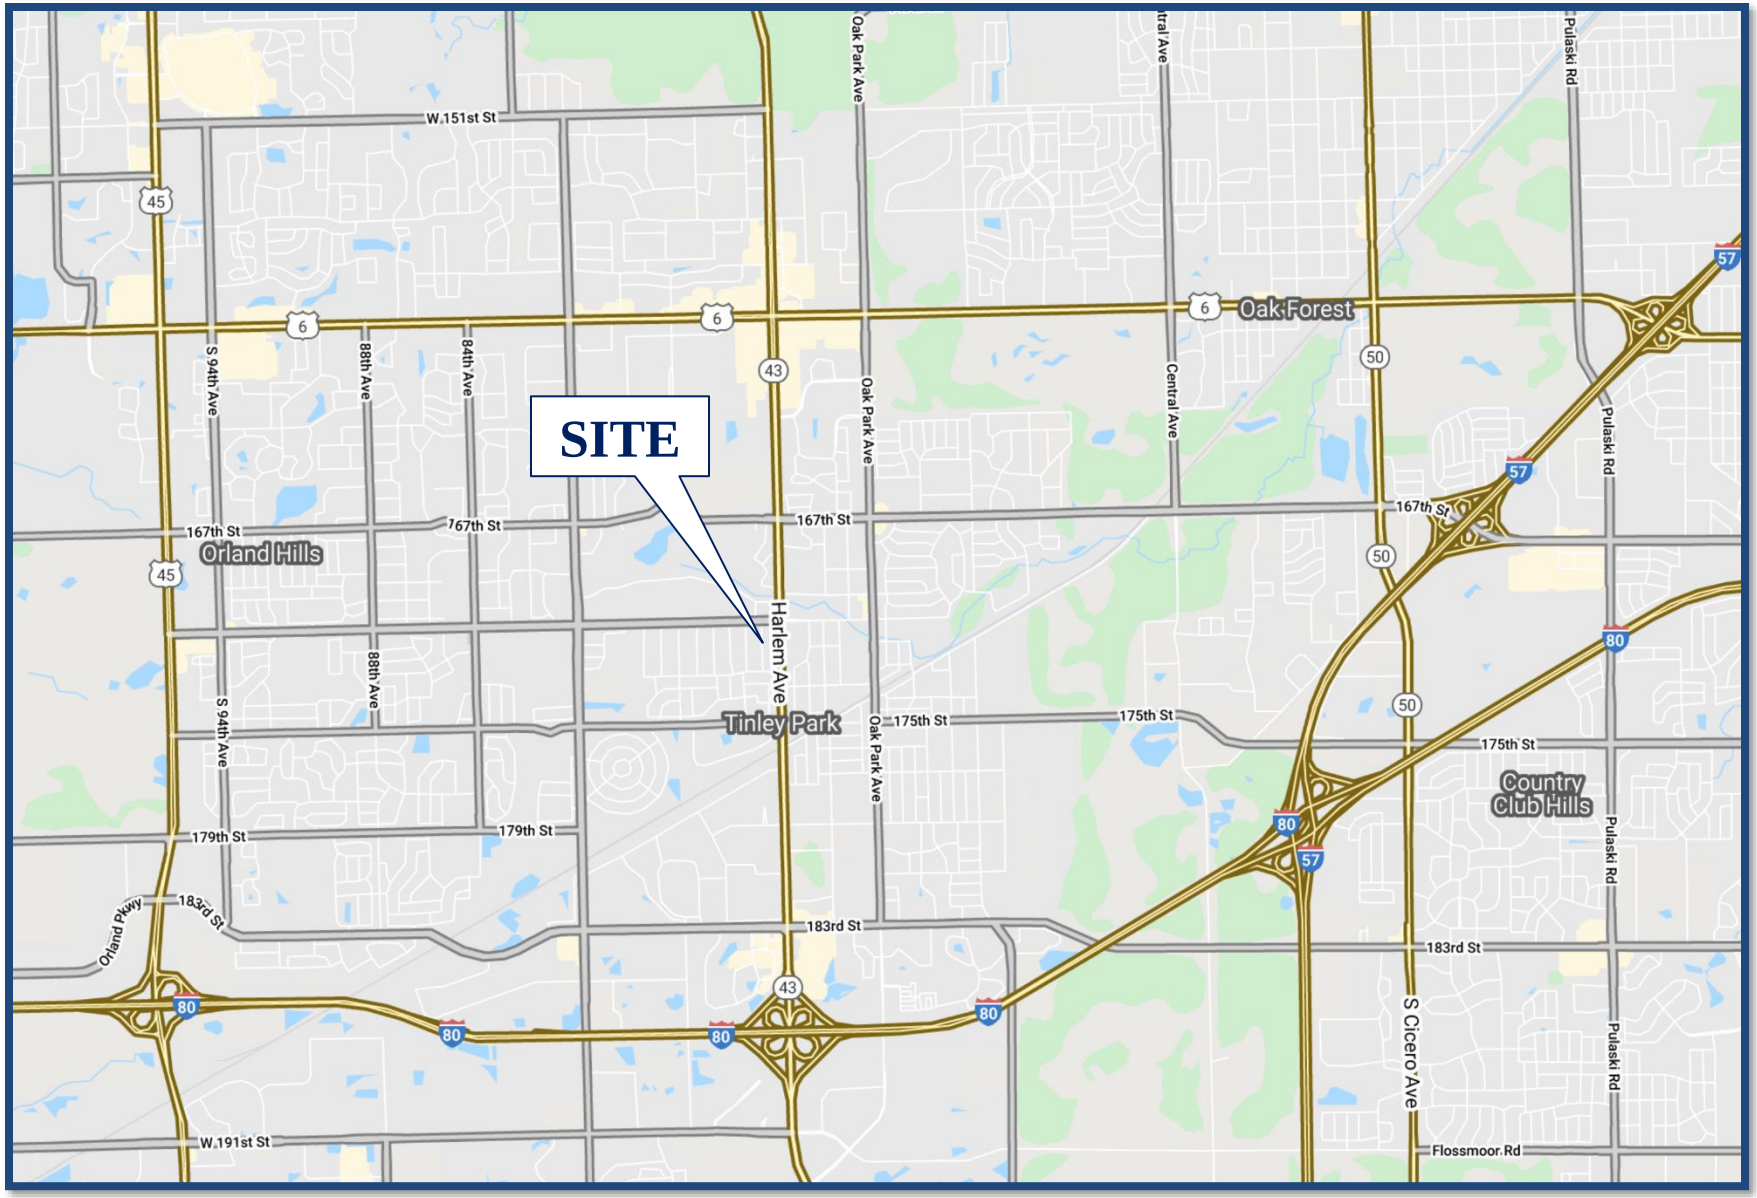
- Existing roadway conditions
- A description of the proposed development
- Directional distribution of the development traffic
- Vehicle trip generation for the development
- Future traffic conditions including access to the development
- Traffic analyses for the weekday morning and weekday evening peak hours
- Recommendations with respect to adequacy of the site access and adjacent roadway system
- Evaluation of the on-site circulation and provided parking supply

Traffic capacity analyses were conducted for the weekday morning and weekday evening peak hours for the following conditions:

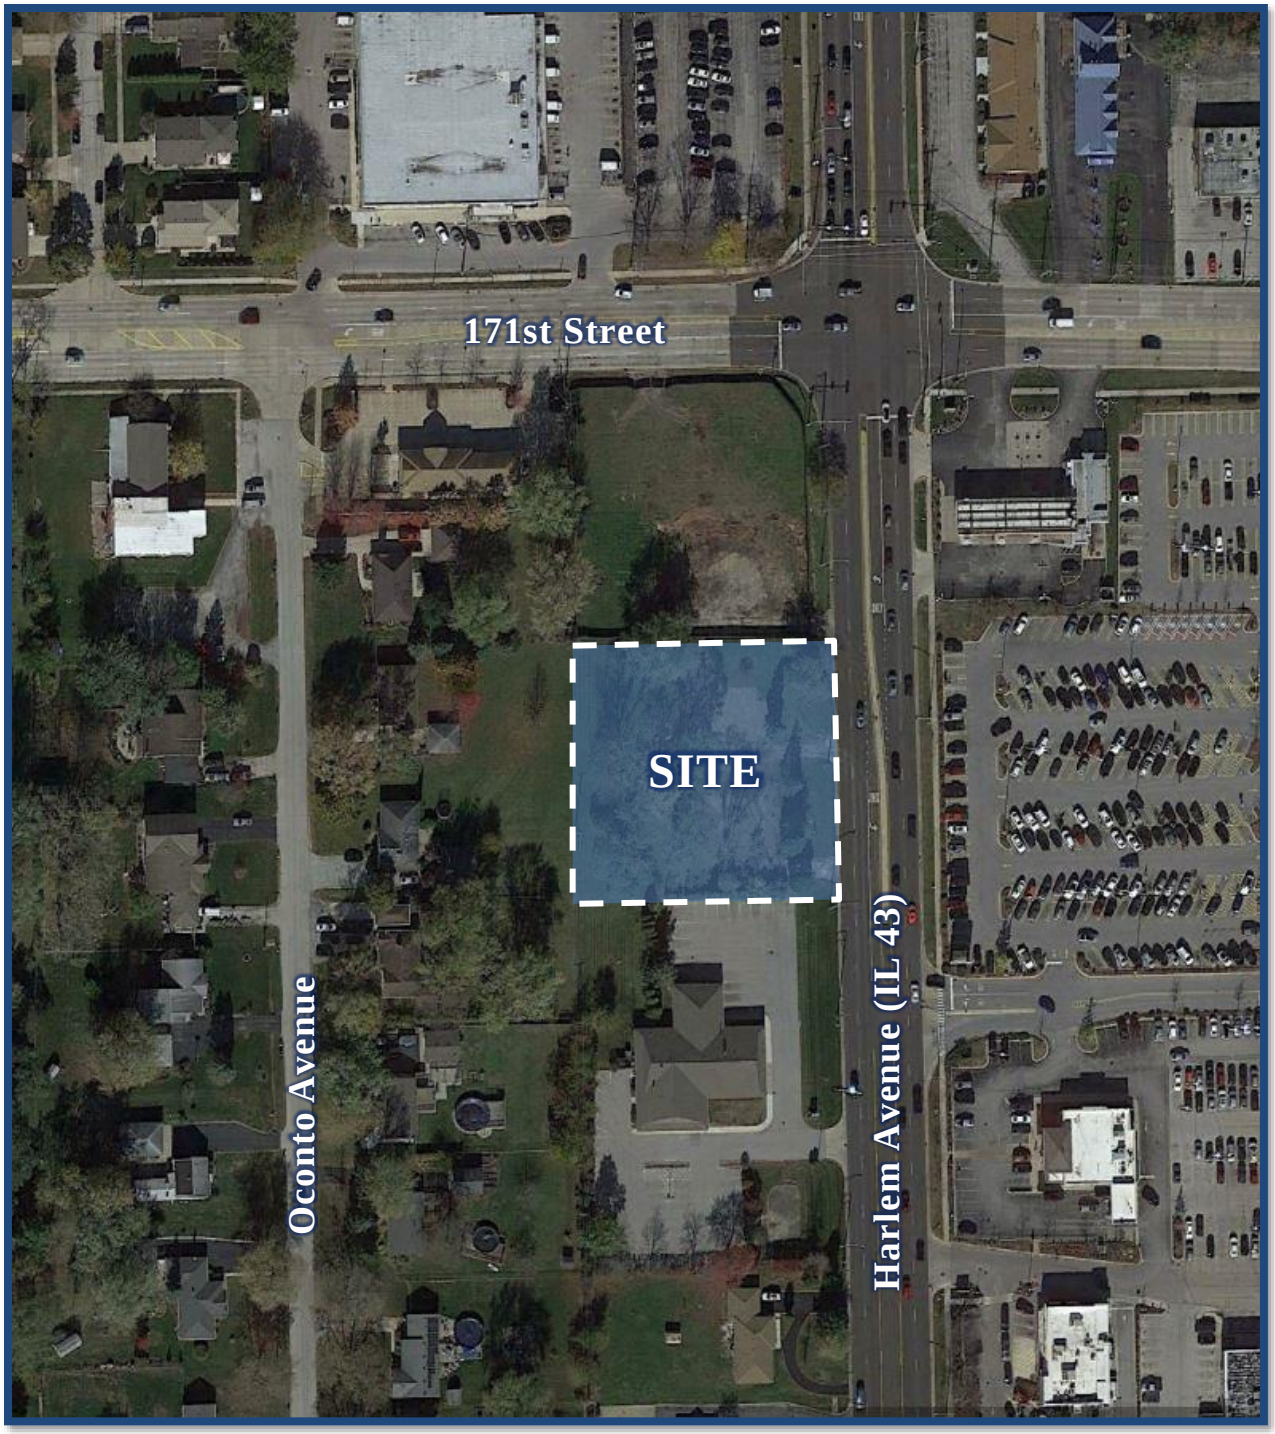
1. Year 2021 Base Conditions – Analyzes the capacity of the existing roadway system using peak hour traffic volumes conducted in 2019 increased to represent Year 2021 volumes.

2. Year 2027 No-Build Conditions – Analyzes the capacity of the existing roadway system using Year 2021 base traffic volumes increased by an ambient area growth factor not attributable to any particular development as well the traffic expected to be generated by the planned 7-Eleven development north of the site.

3. Year 2027 Total Projected Conditions – Analyzes the capacity of the future roadway system using the projected traffic volumes that include the Year 2027 no-build conditions and the traffic estimated to be generated by the proposed development.



Site Location **Figure 1**



Aerial View of Site **Figure 2**

2. Existing Conditions

Existing transportation conditions in the vicinity of the site were documented based on a field visit conducted by KLOA, Inc. in order to obtain a database for projecting future conditions. The following provides a description of the geographical location of the site, physical characteristics of the area roadway system including lane usage and traffic control devices, and existing peak hour traffic volumes.

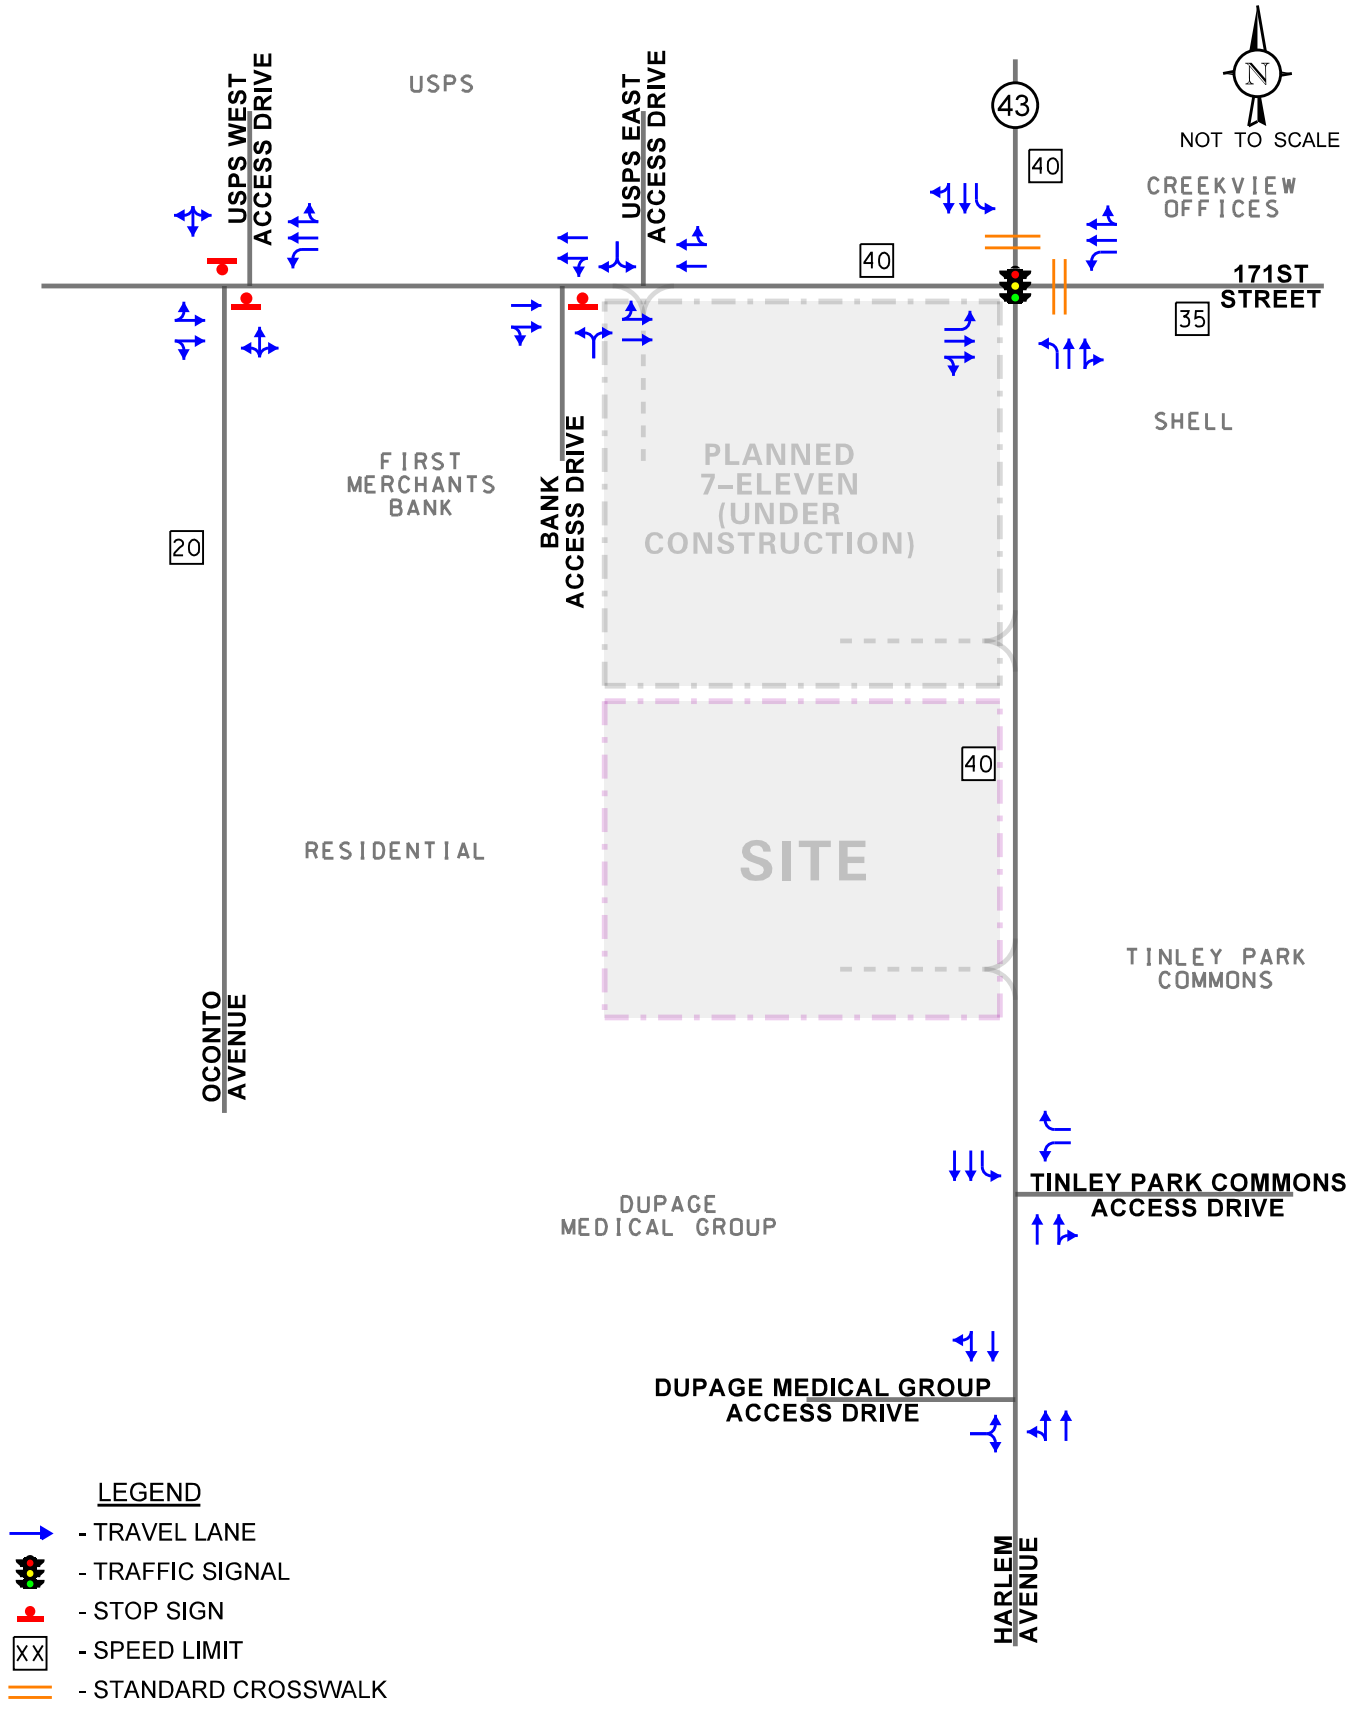
Site Location

The site, which is vacant, is bounded by the parcel that is to be developed with the planned 7-Eleven fuel center to the north, Harlem Avenue to the east, DuPage Medical Group to the south, and single-family homes to the west. Land uses in the area include the United States Postal Service (USPS) and the First Merchants Bank to the north, and Creekview Offices, a Shell fuel center, and Tinley Park Commons to the east

Existing Roadway System Characteristics

The characteristics of the existing roadways near the development are described below. **Figure 3** illustrates the existing roadway characteristics.

Harlem Avenue (IL Route 43) is a north-south arterial roadway that provides two through lanes in each direction separated by a raised barrier median along the site frontage. At its signalized intersection with 171st Street, Harlem Avenue provides an exclusive left-turn lane, a through lane, and a shared through/right-turn lane on the northbound and southbound approaches. The north leg of the intersection provides a standard style crosswalk and pedestrian countdown signals. At its unsignalized intersection with the Tinley Park Commons access drive, Harlem Avenue provides an exclusive southbound left-turn lane and the access drive provides two outbound lanes under stop sign control. At its unsignalized intersection with the DuPage Medical Group access drive, Harlem Avenue provides no exclusive turn lanes and the access drive provides one outbound lane under stop sign control. Harlem Avenue is under the jurisdiction of the Illinois Department of Transportation (IDOT), is classified as a Strategic Regional Arterial (SRA) route, carries an Annual Average Daily Traffic (AADT) volume of 33,800 vehicles north of 171st Street and 33,900 vehicles south of 171st Street (IDOT 2019), and has a posted speed limit of 40 miles per hour.



Proposed
Retail Development
Tinley Park, Illinois

Existing Roadway Characteristics

KLOA
Kenig,Lindgren,O'Hara,Aboona,Inc.

Job No: 21-073 Figure: 3

171st Street is an east-west collector roadway that in the vicinity of the site provides two through lanes in each direction separated by a mountable/striped median. At its signalized intersection with Harlem Avenue, 171st Street provides an exclusive left-turn lane, a through lane, and a shared through/right-turn lane on the eastbound and westbound approaches. The east leg provides a standard style crosswalk and pedestrian countdown signals. At its unsignalized intersection with Oconto Avenue, 171st Street provides a shared left-turn/through lane and a shared through/right-turn lane on the eastbound approach and an exclusive left-turn lane, a through lane, and a shared through/right-turn lane on the westbound approach. At its intersections with the USPS east access drive and the First Merchants Bank access drive, 171st Street provides no exclusive turn lanes and the access drives provide one outbound lane with outbound movements under stop sign control. West of Harlem Avenue, 171st Street is under the jurisdiction of the Cook County Department of Transportation and Highways, carries an AADT volume of 16,000 vehicles (IDOT 2018), and has a posted speed limit of 40 miles per hour. East of Harlem Avenue, 171st Street is under the jurisdiction of the Village of Tinley Park, carries an AADT volume of 11,800 vehicles (IDOT 2018), and has a posted speed limit of 35 miles per hour.

Oconto Avenue is a north-south local roadway that provides one through lane in each direction and extends from 171st Street to its terminus at 173rd Street approximately 1,300 feet to the south. At its unsignalized intersection with 171st Street, Oconto Avenue provides a shared left/right-turn lane under stop sign control. Oconto Avenue is under the jurisdiction of the Village of Tinley Park and has a posted speed limit of 20 miles per hour.

Traffic Signal Interconnect

The intersection of Harlem Avenue with 171st Street is part of a 16-signal interconnect system that extends along Harlem Avenue from 175th Street (located one-half mile to the south) to 151st Street (approximately 2.5 miles to the north) and also includes the traffic signals along US Route 6 (159th Street) between the Park Center/Home Depot signalized access drives and Laramie Avenue. These traffic signals are maintained by IDOT.

Planned 7-Eleven Development

The parcel in the southwest quadrant of the intersection of Harlem Avenue with 171st Street is to be developed with a 7-Eleven fuel center with 20 fueling positions, a convenience store, and an automated car wash. Access to the fuel center will be provided via a proposed right-in/right-out access drive off Harlem Avenue approximately 200 feet south of 171st Street, a right-in/right-out access drive off 171st Street aligned opposite the east USPS access drive, and cross connection to the existing First Merchants Bank which provides access to Oconto Avenue and Harlem Avenue.

Planned Harlem Avenue with 171st Pedestrian Improvements

The intersection of Harlem Avenue with 171st Street is planned to be improved with high visibility crosswalks with pedestrian countdown timers on the west and south legs. These improvements will be in addition to the existing standard style crosswalks and pedestrian countdown timers on the north and east legs of the intersection.

Year 2021 Base Traffic Volumes

In order to determine current traffic conditions in the vicinity of the site, peak period traffic counts conducted in 2019 by KLOA, Inc were used. The counts were conducted utilizing Miovision Scout Collection Units during the weekday morning (7:00 to 9:00 A.M.) and evening (4:00 to 6:00 P.M.) peak periods on Tuesday, August 6, 2019 at the following intersections:

- Harlem Avenue with 171st Street
- 171st Street with the First Merchants Bank access drive
- 171st Street with Oconto Avenue/USPS west access drive
- 171st Street with USPS east access drive

The results of the traffic counts indicated that the weekday morning peak hour of traffic occurs from 7:45 A.M. to 8:45 A.M. and the weekday evening peak hour of traffic occurs from 5:00 P.M. to 6:00 P.M. In order to represent Year 2021 conditions, these volumes were increased by 1.6 percent based on CMAP 2050 projections as discussed later in the report. These counts were supplemented with additional counts conducted on Friday March 26, 2021 and Monday March 29, 2021 at the following intersections:

- Harlem Avenue with the Tinley Park Commons access drive
- Harlem Avenue with the DuPage Medical Group access drive

A review of these counts indicated that through volumes on Harlem Avenue were lower than the increased 2019 volumes. As such, the through volumes were increased to balance with the intersections to the north on Harlem Avenue. The Year 2021 base traffic volumes are illustrated in **Figure 4**. Copies of the traffic count summary sheets are included in the Appendix.

Crash Analysis

KLOA, Inc. obtained crash data[1] for the most recent available past five years (2015 to 2019) for the intersection of Harlem Avenue with 171st Street as summarized in **Table 1.** A review of the crash data indicated that no fatalities were reported at the intersection during the review period.

Average/Year	**<1.0**	**<1.0**	**8.4**	**1.2**	**6.0**	**<1.0**	**17**

[1] IDOT DISCLAIMER: The motor vehicle crash data referenced herein was provided by the Illinois Department of Transportation. Any conclusions drawn from analysis of the aforementioned data are the sole responsibility of the data recipient(s). Additionally, for coding years 2015 to present, the Bureau of Data Collection uses the exact latitude/longitude supplied by the investigating law enforcement agency to locate crashes. Therefore, location data may vary in previous years since data prior to 2015 was physically located by bureau personnel.

3. Traffic Characteristics of the Proposed Development

In order to properly evaluate future traffic conditions in the surrounding area, it was necessary to determine the traffic characteristics of the proposed development, including the directional distribution and volumes of traffic that it will generate.

Proposed Site and Development Plan

As proposed, the site will be developed with an approximately 7,421 square-foot multi-tenant retail building that will be anchored by an approximately 2,202 square-foot Starbucks coffee shop. The remaining 5,219 square feet is to be occupied by three general retail tenants. Parking will be provided within a 44-space surface parking lot. Access to the development will be provided via the following:

- A right-in/right-out access drive on Harlem Avenue approximately 425 feet south of 171st Street. This access drive will provide one inbound lane and one outbound lane with outbound movements under stop sign control. Turning movements at this access drive will be restricted to right turns only via the existing raised median along Harlem Avenue and the proposed raised triangular "porkchop" island median and will be supplemented with appropriate striping and signage.

- A cross-access connection to the planned 7-Eleven fuel center that will border the site to the north. This development will provide access to the area roadway system as follows:

    - A right-in/right-out access drive off Harlem Avenue located approximately 200 feet south of 171st Street. This access drive will provide one inbound lane and one outbound lane with outbound movements under stop sign control. Turning movements at this access drive will be restricted to right turns only via the existing raised median along Harlem Avenue, a raised triangular "porkchop" island median, and appropriate striping and signage.

    - A right-in/right-out access drive off 171st Street located approximately 225 feet west of Harlem Avenue that will be aligned opposite the east USPS access drive. This access drive will provide one inbound lane and one outbound lane with outbound movements under stop sign control. Turning movements at this access drive will be physically restricted to right turns only via a raised triangular median, striping and signage.

    - Cross access to the existing First Merchants Bank site that borders the west side of the fuel center site. This connection will provide access to the existing full movement access drive off 171st Street approximately 275 feet west of Harlem Avenue and the existing three-quarters (right in, right out, left in) access drive off Oconto Avenue that is located approximately 110 feet south of 171st Street.

As part of the development, the existing driveways serving the single-family homes within the site will be removed. A copy of the site plan and drive-through stacking exhibit is included in the Appendix.

Directional Distribution

The directional distribution of future site-generated trips on the roadway system is a function of several variables, including the operational characteristics of the roadway system and the ease with which drivers can travel over various sections of the roadway system. It is important to note that there are five independent Starbucks developments within five miles of the site, indicating that site traffic will further consider ease of access to the site. Most importantly, there is a Starbucks development on the east side of Harlem Avenue approximately one- and one-half miles north of the site. This development is expected to service a large amount of the northbound traffic on Harlem Avenue that may otherwise access the proposed development. This is particularly true for pass-by traffic. The directions from which patrons and employees of the proposed development will approach and depart the site are illustrated in **Figure 5.**

Estimated Site Traffic Generation

The volume of traffic generated by a development is based on the type of land uses and the size of the development. The number of peak hour vehicle trips estimated to be generated by the proposed development is based on vehicle trip generation rates contained in *Trip Generation Manual*, 10th Edition, published by the Institute of Transportation Engineers (ITE). The "Coffee/Donut Shop with Drive-Through Window" (ITE Land-Use Code 937) rate was used for the coffee shop and the "Shopping Center" (ITE Land-Use Code 820) was used for the retail tenants.

It should be noted that surveys conducted by ITE have shown that a considerable number of trips made to coffee shops are diverted from the existing traffic on the area roadways. This is particularly true during the weekday morning and evening peak hours when traffic is diverted from the home-to-work and work-to-home trips. Such diverted trips are referred to as pass-by traffic. These surveys indicate that, on average, 89 percent of the peak hour trips generated by a coffee shop are diverted from existing traffic on the adjacent roads. However, in order to provide a conservative (worst-case) analysis, a pass-by reduction of only 70 percent was applied to the site-generated traffic volumes. **Table 2** shows the site-generated traffic volumes for the proposed development. Copies of the ITE trip generation sheets are included in the Appendix.

Table 2
ESTIMATED SITE-GENERATED TRAFFIC VOLUMES

ITE Land Use Code	Type/Size	Weekday Morning Peak Hour			Weekday Evening Peak Hour			Daily Two-Way Trips

4. Projected Traffic Conditions

The total projected traffic volumes include the existing traffic volumes, increase in background traffic due to growth, and the traffic estimated to be generated by the proposed subject development.

Development Traffic Assignment

The estimated weekday morning and evening peak hour traffic volumes that will be generated by the proposed development were assigned to the roadway system in accordance with the previously described directional distribution (Figure 5). The new site-generated traffic assignment for the proposed development is illustrated in **Figure 6** and the pass-by traffic assignment is illustrated in **Figure 7**.

Background Traffic Conditions

The Year 2021 base traffic volumes (Figure 4) were increased by a regional growth factor to account for the increase in existing traffic related to regional growth in the area (i.e., not attributable to any particular planned development). Based on ADT projections provided by the Chicago Metropolitan Agency for Planning (CMAP), an increase of approximately 0.8 percent per year for six years (buildout year plus five years) was applied to project Year 2027 conditions. A copy of the CMAP 2040 projections letter is included in the Appendix.

In addition, the traffic that is expected to be generated by the planned 7-Eleven fuel center was included in the no-build volumes. These volumes were based on the traffic impact study prepared for the fuel center by KLOA, Inc. in 2019. The Year 2027 no-build traffic volumes are illustrated in **Figure 8**.

Total Projected Traffic Volumes

The development-generated traffic (Figures 6 and 7) was added to the Year 2027 no-build traffic volumes (Figure 8) to determine the Year 2027 total projected traffic volumes, shown in **Figure 9**.

5. Traffic Analysis and Recommendations

The following provides an evaluation conducted for the weekday morning and weekday evening peak hours. The analysis includes conducting capacity analyses to determine how well the roadway system and access drives are projected to operate and whether any roadway improvements or modifications are required.

Traffic Analyses

Roadway and adjacent or nearby intersection analyses were performed for the weekday morning and weekday evening peak hours for the Year 2021 base, Year 2027 no-build, and Year 2027 total projected traffic volumes.

The traffic analyses were performed using the methodologies outlined in the Transportation Research Board's *Highway Capacity Manual (HCM),* 6th Edition and analyzed using Synchro/SimTraffic 10 software. The analysis for the traffic-signal controlled intersections were accomplished using actual cycle lengths and phasings to determine the average overall vehicle delay and levels of service.

The analyses for the unsignalized intersections determine the average control delay to vehicles at an intersection. Control delay is the elapsed time from a vehicle joining the queue at a stop sign (includes the time required to decelerate to a stop) until its departure from the stop sign and resumption of free flow speed. The methodology analyzes each intersection approach controlled by a stop sign and considers traffic volumes on all approaches and lane characteristics.

The ability of an intersection to accommodate traffic flow is expressed in terms of level of service, which is assigned a letter from A to F based on the average control delay experienced by vehicles passing through the intersection. The *Highway Capacity Manual* definitions for levels of service and the corresponding control delay for signalized intersections and unsignalized intersections are included in the Appendix of this report.

Summaries of the traffic analysis results showing the level of service and overall intersection delay (measured in seconds) for the projected Year 2021 base, Year 2027 no-build, and Year 2027 total projected conditions are presented in **Tables 3** through **6**. A discussion of each intersection follows. Summary sheets for the capacity analyses are included in the Appendix.

LOS = Level of Service
Delay is measured in seconds.

Discussion and Recommendations

The following summarizes how the intersections are projected to operate and identifies any roadway and traffic control improvements necessary to accommodate the development-generated traffic.

Harlem Avenue with 171st Street

The results of the capacity analysis indicate that this intersection currently operates at Level of Service (LOS) C during the weekday morning peak hour and at LOS E during the weekday evening peak hour. This level of service during the weekday evening peak hour is a result of the eastbound approach which operates at LOS F and the westbound approach which operates at LOS E. Harlem Avenue is the major roadway at this intersection, is designated as an SRA, and is the coordinated movement and, as such, receives a majority of the green time.

Under Year 2027 no-build conditions, this intersection is projected to continue to operate at LOS C during the weekday morning peak hour and at LOS E during the weekday evening peak hour with increases in delay of approximately two and approximately 10 seconds, respectively. The eastbound approach is projected to continue operating at LOS F and the westbound approach is projected to continue operating at LOS E during the weekday evening peak hour.

Under Year 2027 total projected conditions, the intersection overall is projected to continue operating at LOS C during the weekday morning peak hour and at LOS E during the weekday evening peak hour with increases in delay of approximately one second and three seconds, respectively, over no-build conditions. The development is projected to increase the volume of traffic traversing this intersection by only 44 vehicles during the weekday morning peak hour and only 66 vehicles during the weekday evening peak hour. Under total projected conditions, the intersection is projected to carry 3,182 vehicles during the weekday morning peak hour and 5,124 vehicles of which only approximately one percent will be site generated traffic. (44÷3,182=1.4%, 66÷5,124=1.3%). In addition, the development is projected to increase daily traffic on Harlem Avenue by only one to two percent ((0.45x1,348)÷33,800=1.8% north of the site, ((0.20x1,348)÷39,000=0.8% south of the site). As such, the proposed development traffic will have a limited impact on the operations of this intersection.

171st Street with Oconto Avenue/USPS West Access Drive

The results of the capacity analysis indicate that the northbound (Oconto Avenue) approach currently operates at LOS B during the weekday morning and weekday evening peak hours and the southbound (USPS) approach currently operates at LOS B during the weekday morning peak hour and at LOS C during the weekday evening peak hour. Further, the eastbound and westbound left-turn movements operate at LOS B or better.

Under Year 2027 no-build and total projected conditions, the northbound and southbound approaches are projected to continue operating at the same LOS during both peak hours. Further, the eastbound and westbound movements are projected to continue to operate at LOS B or better during both peak hours. As such, the traffic projected to be generated by the proposed development will have a limited impact on the operations of this intersection an no roadway or traffic control improvements will be required.

171st Street with First Merchants Bank Access Drive

The results of the capacity analysis indicate that outbound movements from the First Merchants Bank access drive onto 171st Street currently operate at LOS B during the weekday morning peak hour.

With the completion of the planned 7-Eleven fuel center, this access drive will carry fuel center traffic entering from the south and east and returning to the west. Under Year 2027 no-build conditions, outbound movements from the access drive onto 171st Street are projected to operate at LOS C during the weekday morning and weekday evening peak hours and westbound left-turn movements from 171st Street onto the access drive are projected to operate at LOS B or better during the peak hours with 95th percentile queues of one to two vehicles.

The proposed development will provide cross access to this access drive via the planned 7-Eleven fuel center and will carry development traffic entering from the south and east and returning to the west. Under Year 2027 total projected conditions, outbound movements from the access drive onto 171st Street are projected to continue to operate at LOS C during the weekday morning and weekday evening peak hours and westbound left-turn movements from 171st Street onto the access drive are projected to continue to operate at LOS B or better during the peak hours with 95th percentile queues of one to two vehicles. As such, this access drive will be adequate in accommodating the traffic estimated to be generated by the proposed development and will ensure efficient and flexible access is provided.

171st Street with USPS East Access Drive and the 7-Eleven Right-In/Right-Out Access Drive

The results of the capacity analysis indicate that outbound movements from the east USPS access drive currently operate at LOS B during the weekday morning and weekday evening peak hours. Under Year 2027 no-build conditions, outbound movements from the east USPS access drive are projected to continue operating at LOS B during the weekday morning and weekday evening peak hours with increases in delay of approximately one second or less.

With the completion of the planned 7-Eleven fuel center, this access drive will carry fuel center traffic entering from the west and returning to the north and east. Under Year 2027 no-build conditions, the southbound (USPS) approach and the northbound (7-Eleven) approach are projected to operate at LOS B during both peak hours.

The proposed development will provide cross access to this access drive via the planned 7-Eleven fuel center and will carry development traffic entering from the west and returning to the north and east. Under Year 2027 total projected conditions, the southbound (USPS) approach and the northbound (7-Eleven) approach are projected to operate at LOS B during both peak hours. As such, this access drive will be adequate in accommodating the traffic estimated to be generated by the proposed development and will ensure efficient and flexible access is provided.

Harlem Avenue with the Tinley Park Commons Access Drive

The results of the capacity analysis indicate that westbound left-turn movements onto Harlem Avenue currently operate at LOS D during the weekday morning peak hour and LOS F during the weekday evening peak hour. This delay is typical and expected at the unsignalized intersection of an access drive and a major roadway such as Harlem Avenue. While outbound vehicles may experience some delays, a volume-to-capacity ratio (v/c) of less than one and 95th percentile queues of approximately four vehicles or less indicate that they will be able to exit. Further, westbound right-turn movements onto Harlem Avenue and southbound left-turn movements onto the access drive are projected to operate at LOS C or better during both peak hours.

Under Year 2027 total projected conditions, westbound left-turn movements are projected to continue operating at the same LOS during both peak hours. While these vehicles will continue to experience some delays, the volume-to-capacity ratio is projected to remain less than one and 95th percentile queues are not projected to exceed five vehicles. Further, westbound right-turn movements and southbound left-turn movements are projected to operate at LOS D or better during both peak hours. As such, the traffic projected to be generated by the proposed development will have a limited impact on the operations of this intersection an no roadway or traffic control improvements will be required.

Harlem Avenue with the DuPage Medical Group Access Drive

The results of the capacity analysis indicate that the eastbound approach of this intersection currently operates at LOS C during the weekday morning and weekday evening peak hours. Further, northbound left-turn movements onto the access drive are projected to operate at LOS B or better during both peak hours.

Under Year 2027 no-build and total projected conditions, the eastbound approach and northbound left-turn movements are projected to continue operating at the same LOS during both peak hours. As such, the traffic projected to be generated by the proposed development will have a limited impact on the operations of this intersection an no roadway or traffic control improvements will be required.

Harlem Avenue with the 7-Eleven Right-In/Right-Out Access Drive

As part of the planned 7-Eleven fuel center, a right-in/right-out access drive is to be provided on the west side of Harlem Avenue approximately 200 feet south of 171st Street. Under Year 2027 no-build conditions, the eastbound approach is projected to operate at LOS B during the weekday morning peak hour and LOS C during the weekday evening peak hour.

The proposed development will provide cross access to this access drive via the planned 7-Eleven fuel center. However, it is not expected that site traffic will utilize this access drive, as a separate site access drive will be provided on Harlem Avenue. Under Year 2027 total projected conditions, the eastbound approach is projected to continue to operate at LOS B during the weekday morning peak hour and LOS C during the weekday evening peak hour. As such, the traffic projected to be generated by the proposed development will have a limited impact on the operations of this intersection and no roadway or traffic control improvements will be required.

Harlem Avenue with the Proposed Right-In/Right-Out Access Drive

As proposed, a right-in/right-out access drive will be provided on Harlem Avenue approximately 425 feet south of 171st Street serving the site. This access drive will provide one inbound lane and one outbound lane with outbound movements under stop sign control. Turning movements at this access drive will be restricted to right turns only via the existing raised median along Harlem Avenue, a raised triangular "porkchop" median, and appropriate striping and signage.

Under Year 2027 total projected conditions, the eastbound approach of this intersection is projected to operate at LOS B during the weekday morning peak hour and LOS C during the weekday evening peak hour. As such, this access drive will be adequate in accommodating the traffic projected to be generated by the proposed development and will ensure efficient access is provided.

On-Site Circulation and Design

As proposed, the pick-up window will be located on the south side of the building with the order board located on the west side of the building. Vehicles will enter the drive-through lane at the northwest corner of the building and travel around the west and south sides of the building. A review of the site plan and drive-through stacking exhibit indicates that approximately five vehicles can stack from the pick-up window and approximately five vehicles can stack from the order board within the drive-through lane. Further, additional vehicles can stack within the site before reaching the right-in/right-out access drive on Harlem Avenue.

In order to determine the average and peak stacking that can be expected at the drive-through serving the proposed Starbucks coffee shop, surveys were conducted at the Starbucks located at 1048 Maple Avenue in Lisle, Illinois. **Table A**, included in the Appendix, summarizes the drive-through queue surveys in five-minute intervals. The results of the drive-through surveys indicated the following:

- During the weekday morning peak period (6:00 A.M. to 9:00 A.M.), the Starbucks had an average queue of six vehicles and a maximum queue of 11 vehicles, occurring twice.
- During the weekday midday peak period (11:30 A.M. to 1:30 P.M.), the Starbucks had an average queue of three vehicles and a maximum queue of six vehicles, occurring once.
- During the weekday evening peak period (4:00 P.M. to 6:00 P.M.), the Starbucks had an average queue of one vehicle and a maximum queue of four vehicles, occurring once.

In addition, this data was compared to data provided by Starbucks, which indicated the following:

- Starbucks drive-throughs are designed to operate most efficiently with an average queue of seven vehicles.
- Starbucks peak drive-through queues range from 10 to 12 vehicles, typically occurring between 7:00 A.M. 9:00 A.M.
- Typical service time for vehicles in the drive-through is 45 seconds.
- Starbucks traffic is typically 60 percent drive-through traffic.

This data coincides with the survey data and further confirms the average queue of approximately six vehicles and maximum queue of 11 vehicles. As such, the proposed drive-through design can accommodate the peak demand of the drive-through operation without impacting traffic flow within the site main parking lot. Should additional stacking be required, excess vehicles can be accommodated within the parking lot. If this were to occur, it would only be during the morning peak hour when the other retail uses within the building are expected to generate minimal traffic, thus not impacting and/or conflicting with their operations.

In order to provide efficient and orderly internal traffic flow, the following is recommended:

- Wayfinding signs directing traffic to the drive-through lane should be provided within the site, primarily near the southeast and northwest corners of the building, directing traffic to the entrance of the drive-through lane.
- "Do Not Enter" signs facing east should be posted at the exit of the drive-through lane.
- A stop sign facing west should be posted at the exit of the drive-through lane.

Parking Evaluation

As previously mentioned, the site will be developed with a 44-space surface parking lot.

Village of Tinley Park Requirements

The Tinley Park Zoning Ordinance requires a parking ratio of 6.5 parking spaces per 1,000 square feet of gross leasable space. Based on the above and the total gross leasable space of 7,279 square-feet, 47 spaces should be provided. As such, the proposed number of parking spaces is three spaces less than the Village of Tinley Park parking requirements.

ITE Parking Generation Manual

In reviewing the survey data published in the Institute of Transportation Engineers' (ITE) 5th Edition of the *Parking Generation Manual*, the following average peak parking demands were determined:

- Drive-Through Starbucks Coffee Shop (Coffee/Donut Shop with Drive-Through Window)
  - Monday-Friday: 12 parking spaces (ratio of 5.22 spaces per 1,000 square feet)
  - Saturday: 19 parking spaces (ratio of 8.70 spaces per 1,000 square feet)

- Retail Space (Shopping Center – Land Use Code 820)
  - Monday-Thursday: 11 parking spaces (ratio of 1.95 spaces per 1,000 square feet)
  - Friday: 14 parking spaces (ratio of 2.61 spaces per 1,000 square feet)
  - Saturday: 16 parking spaces (ratio of 2.91 spaces per 1,000 square feet)

Based on ITE *Parking Generation Manual* rates, the proposed retail building should provide a total of 35 parking spaces to accommodate the peak parking demand (Saturday), which results in a surplus of nine parking spaces.

Based on the above, the proposed parking supply should be adequate given the following:

- The proposed supply meets the parking demand based on ITE rates.

- The proposed Starbucks coffee shop parking demands peaks in the morning while the remaining retail uses' peak parking demand typically occurs in the afternoon and evening. This offset in the peak demands will allow for sharing of parking spaces and a reduction in the overall parking demand.

- The Village of Tinley Park Zoning Ordinance parking ratios are not specific to coffee shops and do not take into consideration the usage of the drive-through. Approximately 60 percent of Starbucks traffic will be drive-through traffic during the peak hours. This will reduce the demand for parking significantly.

6. Conclusion

Based on the preceding analyses and recommendations, the following conclusions have been made:

- The development is well located with respect to the area roadway system.
- The traffic projected to be generated by the proposed development will be reduced due to the high volume of pass-by traffic.
- The development-generated traffic is only projected to increase the traffic traversing the intersection of Harlem Avenue with 171st Street by approximately one percent during the peak hours and, as such, will have a limited impact on the operations of the intersection.
- The proposed access system on Harlem Avenue with cross access to 171st Street will be adequate in accommodating the development-generated traffic and will ensure that efficient and flexible access is provided.
- The drive-through lane will provide stacking adequate in accommodating the projected peak demand of the drive-through operation without impacting through traffic on Harlem Avenue or 171st Street.
- The proposed parking supply of 44 parking spaces will be adequate in accommodating the projected peak parking demand of the proposed development.

9575 West Higgins Road
Suite 400
Rosemont, IL 60018

Subject: ***171st Street @ Harlem Avenue***
IDOT

Dear Mr. Bowen:

In response to a request made on your behalf and dated March 26, 2021, we have developed year 2050 average daily traffic (ADT) projections for the subject location.

ROAD SEGMENT	Current Volumes	Year 2050 ADT
Harlem Ave north of 171st St	33,800	44,300
Harlem Ave south of 171st St	33,900	41,800
171st St west of Harlem Ave	16,000	21,000
171st St east of Harlem Ave	11,800	14,200

Traffic projections are developed using existing ADT data provided in the request letter and the results from the June 2020 CMAP Travel Demand Analysis. The regional travel model uses CMAP 2050 socioeconomic projections and assumes the implementation of the ON TO 2050 Comprehensive Regional Plan for the Northeastern Illinois area. The provision of this data in support of your request does not constitute a CMAP endorsement of the proposed development or any subsequent developments.

If you have any questions, please call me at (312) 386-8806.

Sincerely,

Jose Rodriguez, PTP, AICP
Senior Planner, Research & Analysis

Level of Service Criteria

LEVEL OF SERVICE CRITERIA

Signalized Intersections		
Level of Service	Interpretation	Average Control Delay (seconds per vehicle)
A	Favorable progression. Most vehicles arrive during the green indication and travel through the intersection without stopping.	≤10
B	Good progression, with more vehicles stopping than for Level of Service A.	>10 - 20
C	Individual cycle failures (i.e., one or more queued vehicles are not able to depart as a result of insufficient capacity during the cycle) may begin to appear. Number of vehicles stopping is significant, although many vehicles still pass through the intersection without stopping.	>20 - 35
D	The volume-to-capacity ratio is high and either progression is ineffective or the cycle length is too long. Many vehicles stop and individual cycle failures are noticeable.	>35 - 55
E	Progression is unfavorable. The volume-to-capacity ratio is high and the cycle length is long. Individual cycle failures are frequent.	>55 - 80
F	The volume-to-capacity ratio is very high, progression is very poor, and the cycle length is long. Most cycles fail to clear the queue.	>80.0

Unsignalized Intersections	
Level of Service	Average Total Delay (SEC/VEH)
A	0 - 10
B	> 10 - 15
C	> 15 - 25
D	> 25 - 35
E	> 35 - 50
F	> 50

Intersection Summary

Area Type: Other
Cycle Length: 140
Actuated Cycle Length: 140
Offset: 0 (0%), Referenced to phase 2:NBTL and 6:SBTL, Start of Green
Natural Cycle: 100
Control Type: Actuated-Coordinated
Maximum v/c Ratio: 1.18
Intersection Signal Delay: 61.8 Intersection LOS: E
Intersection Capacity Utilization 102.1% ICU Level of Service G
Analysis Period (min) 15

~ Volume exceeds capacity, queue is theoretically infinite.
Queue shown is maximum after two cycles.

95th percentile volume exceeds capacity, queue may be longer.
Queue shown is maximum after two cycles.

Splits and Phases: 1: Harlem Avenue & 171st Street

Intersection Summary

Area Type: Other
Cycle Length: 140
Actuated Cycle Length: 140
Offset: 0 (0%), Referenced to phase 2:NBTL and 6:SBTL, Start of Green
Natural Cycle: 110
Control Type: Actuated-Coordinated
Maximum v/c Ratio: 1.24
Intersection Signal Delay: 72.7 Intersection LOS: E
Intersection Capacity Utilization 107.8% ICU Level of Service G
Analysis Period (min) 15
~ Volume exceeds capacity, queue is theoretically infinite.
Queue shown is maximum after two cycles.
95th percentile volume exceeds capacity, queue may be longer.
Queue shown is maximum after two cycles.

Splits and Phases: 1: Harlem Avenue & 171st Street

Intersection Summary

Area Type: Other
Cycle Length: 140
Actuated Cycle Length: 140
Offset: 0 (0%), Referenced to phase 2:NBTL and 6:SBTL, Start of Green
Natural Cycle: 110
Control Type: Actuated-Coordinated
Maximum v/c Ratio: 1.26
Intersection Signal Delay: 76.8 Intersection LOS: E
Intersection Capacity Utilization 109.5% ICU Level of Service H
Analysis Period (min) 15
~ Volume exceeds capacity, queue is theoretically infinite.
Queue shown is maximum after two cycles.
95th percentile volume exceeds capacity, queue may be longer.
Queue shown is maximum after two cycles.

Splits and Phases: 1: Harlem Avenue & 171st Street

CREE LIGHTING
A COMPANY OF IDEAL INDUSTRIES, INC.
9201 Washington Ave, Racine, WI 53406 https://creelighting.com - (800) 236-6800

Illumination results shown on this lighting design are based on project parameters provided to Cree Lighting used inconjunction with luminaire test procedures conducted under laboratory conditions. Actual project conditions differing from these design parameters may affect field results. The customer is responsible for verifying dimensional accuracy along with compliance with any applicable electrical, lighting,or energy code.

OSQ Series

OSQ™ LED Area/Flood Luminaire featuring Cree TrueWhite® Technology – Medium

Rev. Date: V27 10/21/2020

Product Description

The OSQ™ Area/Flood luminaire blends extreme optical control, advanced thermal management and modern, clean aesthetics. Built to last, the housing is rugged cast aluminum with an integral, weathertight LED driver compartment. Versatile mounting configurations offer simple installation. Its slim, low-profile design minimizes wind load requirements and blends seamlessly into the site providing even, quality illumination. The 'B' Input power designator is a suitable upgrade for HID applications up to 250 Watt, and the 'K' Input power designator is a suitable upgrade for HID applications up to 400 Watt.

Applications: Parking lots, walkways, campuses, car dealerships, office complexes, tunnels, underpasses, and internal roadways

Performance Summary

Utilizes Cree TrueWhite® Technology on 5000K Luminaires

NanoOptic® Precision Delivery Grid™ optic

Assembled in the U.S.A. of U.S. and imported parts

Initial Delivered Lumens: Up to 17,291

Efficacy: Up to 136 LPW

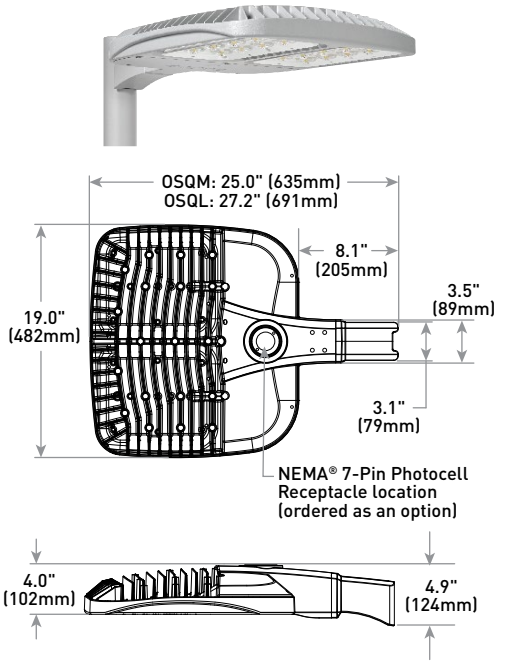
CRI: Minimum 70 CRI (3000K, 4000K & 5700K); 90 CRI (5000K)

CCT: 3000K, 4000K, 5000K, 5700K

Limited Warranty†: 10 years on luminaire; 10 years on Colorfast DeltaGuard® finish; up to 5 years for Synapse® accessories; 1 year on luminaire accessories

† See http://creelighting.com/warranty for warranty terms. For Synapse accessories, consult Synapse spec sheets for details on warranty terms.

DA Mount



Weight
28.9 lbs. (13.1kg)

Ordering Information

Fully assembled luminaire is composed of two components that must be ordered separately:
Example: **Mount:** OSQ-B-AASV + **Luminaire:** OSQ-A-NM-2ME-B-40K-UL-SV

Mount (Luminaire must be ordered separately)*	
OSQ-	
OSQ-B-AA Adjustable Arm **OSQ-DA** Direct Arm **OSQ-M-TSP** Transportation Mount (stainless steel; do not specify color) **OSQ-TM** Trunnion Mount	**Color Options:** **SV** Silver **BZ** Bronze **BK** Black **WH** White

* Reference EPA and pole configuration suitability data beginning on page 10

Luminaire (Mount must be ordered separately)

Product Specifications

CREE TRUEWHITE® TECHNOLOGY

A revolutionary way to generate high-quality white light, Cree TrueWhite® Technology is a patented approach that delivers an exclusive combination of 90+ CRI, beautiful light characteristics and lifelong color consistency, all while maintaining high luminous efficacy – a true no compromise solution.

CONSTRUCTION & MATERIALS

- Slim, low profile design minimizes wind load requirements
- Luminaire housing is rugged die cast aluminum with an integral, weathertight LED driver compartment and high-performance heat sink
- Convenient interlocking mounting method on direct arm mount. Mounting adaptor is rugged die cast aluminum and mounts to 3" (76mm) or larger square or round pole, secured by two 5/16-18 UNC bolts spaced on 2" (51mm) centers
- Mounting for the adjustable arm mount adaptor is rugged die cast aluminum and mounts to 2" (51mm) IP, 2.375" (60mm) O.D. tenon
- Adjustable arm mount can be adjusted 180˚ in 2.5˚ increments
- Transportation mount is constructed of 316 stainless steel and mounts to surface with (4) 3/8" fasteners by others
- Trunnion mount is constructed of A500 and A1011 steel and is adjustable from 0-180˚ in 15˚ degree increments. Trunnion mount secures to surface with (1) 3/4" bolt or (2) 1/2" or 3/8" bolts
- Includes 18" (340mm) 18/5 or 16/5 cord exiting the luminaire. When ordered with R option, 18" (340mm) 18/7 or 16/7 cord is provided
- Designed for uplight and downlight applications
- Exclusive Colorfast DeltaGuard® finish features an E-Coat epoxy primer with an ultra-durable powder topcoat, providing excellent resistance to corrosion, ultraviolet degradation and abrasion. Silver, bronze, black, and white are available
- **Weight:** OSQ-DA: 28.9 lbs. (13.1kg); OSQ-B-AA: 28.4 lbs. (12.9kg); OSQ-M-TSP: 42 lbs. (19.1kg); OSQ-TM: 32.6 lbs. (14.8kg)

ELECTRICAL SYSTEM

- **Input Voltage:** 120-277V or 347-480V, 50/60Hz, Class 1 drivers
- **Power Factor:** > 0.9 at full load
- **Total Harmonic Distortion:** < 20% at full load
- Integral 10kV surge suppression protection standard
- When code dictates fusing, a slow blow fuse or type C/D breaker should be used to address inrush current
- Designed with 0-10V dimming capabilities. Controls by others
- Refer to Dimming spec sheet for details
- **Maximum 10V Source Current:** 1.0mA
- **Operating Temperature Range:** -40˚C - +40˚C (-40˚F - +104˚F)

REGULATORY & VOLUNTARY QUALIFICATIONS

- cULus Listed
- Suitable for wet locations
- Enclosure rated IP66 per IEC 60529 when ordered without R option
- Consult factory for CE Certified products
- Certified to ANSI C136.31-2001, 3G bridge and overpass vibration standards with AA, DA, TM, and TSP mounts
- ANSI C136.2 10kV surge protection, tested in accordance with IEEE/ANSI C62.41.2
- Meets FCC Part 15, Subpart B, Class A limits for conducted and radiated emissions
- Luminaire and finish endurance tested to withstand 5,000 hours of elevated ambient salt fog conditions as defined in ASTM Standard B 117
- Meets Buy American requirements within ARRA
- DLC and DLC Premium qualified versions available. Some exceptions apply. Please refer to https://www.designlights.org/search/ for most current information
- RoHS compliant. Consult factory for additional details
- Dark Sky Friendly, IDA Approved when ordered with 30K CCT and direct or transportation mounts only. Please refer to https://www.darksky.org/our-work/lighting/lighting-for-industry/fsa/fsa-products/ for most current information
- ⚠ **CA RESIDENTS WARNING:** Cancer and Reproductive Harm – www.p65warnings.ca.gov

Product Specifications

SYNAPSE® SIMPLYSNAP INTELLIGENT CONTROL

The Synapse SimplySNAP platform is a highly intuitive connected lighting solution featuring zone dimming, motion sensing, and daylight harvesting with utility-grade power monitoring and support of up to 1000 nodes per gateway. The system features a reliable and robust self-healing mesh network with a browser-based interface that runs on smartphones, tablets, and PCs. The Twist-Lock Lighting Controller (TL7-B2) and Site Controller (SS450-002) take the OSQ Series to a new performance plateau, providing extreme energy productivity, code compliance and a better light experience.

Electrical Data*

	Symmetric	1.00	1.00	1.00	1.00[3]	1.00[3]

[1] Lumen maintenance values at 25˚C (77˚F) are calculated per IES TM-21 based on IES LM-80 report data for the LED package and in-situ luminaire testing. Luminaire ambient temperature factors (LATF) have been applied to all lumen maintenance factors. Please refer to the Temperature Zone Reference Document for outdoor average nighttime ambient conditions.
[2] In accordance with IES TM-21, Reported values represent interpolated values based on time durations that are up to 6x the tested duration in the IES LM-80 report for the LED.
[3] Estimated values are calculated and represent time durations that exceed the 6x test duration of the LED.

Accessories

Field-Installed

Backlight Shield
OSQ-BLSMF
– Front facing optics
OSQ-BLSMR
– Rotated optics

Hand-Held Remote
XA-SENSREM
- For successful implementation of the programmable multi-level option, a minimum of one hand-held remote is required

Bird Spikes
OSQ-MED-BRDSPK

Shorting Cap
XA-XSLSHRT

Synapse Wireless Control Accessories

Twist-Lock Lighting Controller
TL7-B2
- Suitable for 120-277V (UL) voltage only
- Requires NEMA/ANSI C136.41 7-Pin Dimming Receptacle
- Not for use with PML or Q options
- Provides On/Off switching, dimming, power metering, digital sensor input, and status monitoring of luminaires
- Refer to TL7-B2 spec sheet for details

SimplySNAP Central Base Station
CBSSW-450-002
- Includes On-Site Controller (SS450-002) and 5-button switch
- Indoor and Outdoor rated
- Refer to CBSSW-450-002 spec sheet for details

Synapse Wireless Sensor
WSN-DPM
- Motion and light sensor
- Control multiple zones
- Refer to WSN-DPM spec sheet for details

SimplySNAP On-Site Controller
SS450-002
- Verizon® LTE-enabled
- Designed for indoor applications
- Refer to SS450-002 spec sheet for details

Building Management System (BMS) Gateway
BMS-GW-002
- Required for BACnet integration
- Refer to BMS-GW-002 spec sheet for details

Outdoor Antennas
(Optional, for increased range, 8dB gain)
KIT-ANT420SM
- Kit includes antenna, 20' cable and bracket

KIT-ANT360
- Kit includes antenna, 30' cable and bracket

KIT-ANT600
- Kit includes antenna, 50' cable and bracket
- Refer to Outdoor antenna spec sheet for details

Photometry

All published luminaire photometric testing performed to IES LM-79-08 standards. To obtain an IES file specific to your project consult: https://creelighting.com/products/outdoor/area/osq-series

WM-DM	None

* Specify pole size: 3 (3"), 4 (4"), 5 (5"), or 6 (6") for single, double or triple luminaire orientation or 4 (4"), 5 (5"), or 6 (6") for quad luminaire orientation
** These EPA values must be multiplied by the following ratio: Fixture Mounting Height/Total Pole Height. Specify pole size: 3 (3"), 4 (4"), 5 (5"), or 6 (6")

Tenons and Brackets‡ (must specify color)

Square Internal Mount Vertical Tenons (Steel)
- Mounts to 3-6" (76-152mm) square aluminum or steel poles

PB-1A* – Single
PB-2A* – 180˚ Twin
PB-3A* – 180˚ Triple
PB-4A*(90) – 90˚ Quad
PB-4A*(180) – 180˚ Quad

Square Internal Mount Horizontal Tenons (Aluminum)
- Mounts to 4" (102mm) square aluminum or steel poles

PD-2A4(90) – 90˚ Twin
PD-2A4(180) – 180˚ Twin
PD-3A4(90) – 90˚ Triple
PD-4A4(90) – 90˚ Quad

Wall Mount Brackets
- Mounts to wall or roof

WM-2 – Horizontal for OSQ-B-AA mount
WM-4 – L-Shape for OSQ-B-AA mount
WM-DM – Plate for OSQ-DA mount

Round External Mount Vertical Tenons (Steel)
- Mounts to 2.375" (60mm) O.D. round aluminum or steel poles or tenons

PB-2R2.375 – Twin
PB-3R2.375 – Triple
PB-4R2.375 – Quad

Round External Mount Horizontal Tenons (Aluminum)
- Mounts to 2.375" (60mm) O.D. round aluminum or steel poles or tenons
- Mounts to square pole with PB-1A* tenon

PT-1 – Single (Vertical)
PT-2(90) – 90˚ Twin
PT-2(180) – 180˚ Twin
PT-3(90) – 90˚ Triple
PT-3(120) – 120˚ Triple
PT-4(90) – 90˚ Quad

Mid-Pole Bracket
- Mounts to square pole

PW-1A3** – Single
PW-2A3** – Double

Ground Mount Post
- For ground-mounted flood luminaires

PGM-1 - for OSQ-B-AA mount

‡ Refer to the Bracket and Tenons spec sheet for more details

Field Adjustable Output (Q9/Q6/Q5/Q4/Q3/Q2/Q1) Option Description:

The Field Adjustable Output option enables the OSQ area luminaires to be tuned to the exact needs of a particular application through multiple levels of adjustment. When ordered with the Q option, the luminaire will be shipped from the factory at the selected Q setting and will be fully adjustable between the nine settings.

Field Adjustable Output (Q9/Q6/Q5/Q4/Q3/Q2/Q1) Option Description:

The Field Adjustable Output option enables the OSQ area luminaires to be tuned to the exact needs of a particular application through multiple levels of adjustment. When ordered with the Q option, the luminaire will be shipped from the factory at the selected Q setting and will be fully adjustable between the nine settings.

XSP Series

XSPW™ LED Wall Mount Luminaire featuring Cree TrueWhite® Technology

Rev. Date: VersionB V4 02/25/2020

Product Description

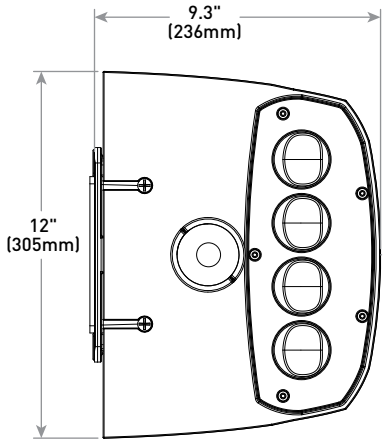
The XSPW™ LED wall mount luminaire has a slim, low profile design intended for outdoor wall mounted applications. The rugged lightweight aluminum housing and mounting box are designed for installation over standard single gang J-Boxes and mud ring single gang J-Boxes. The luminaire allows for through-wired or conduit entry from the top, bottom, sides and rear. The housing design is intended specifically for LED technology including a weathertight LED driver compartment and thermal management. Optic design features industry-leading NanoOptic® Precision Delivery Grid™ system in multiple distributions.

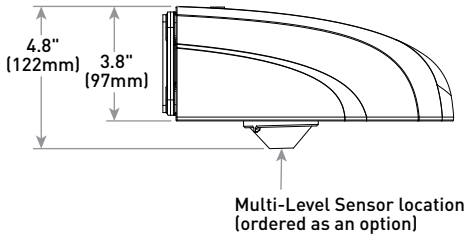
Applications: General area and security lighting

Performance Summary

- NanoOptic® Precision Delivery Grid™ optic
- Assembled in the U.S.A. of U.S. and imported parts
- **CRI:** Minimum 70 CRI (3000K, 4000K & 5700K); 90 CRI (5000K)
- **CCT:** 3000K, 4000K, 5000K, 5700K
- **Limited Warranty†:** 10 years on luminaire/10 years on Colorfast DeltaGuard® finish

† See http://creelighting.com/warranty for warranty terms





Multi-Level Sensor location (ordered as an option)

Accessories

Field-Installed	
Beauty Plate WM-PLT12** - 12" (305mm) Square WM-PLT14** - 14" (356mm) Square - Covers holes left by incumbent wall packs	**Hand-Held Remote** XA-SENSREM - For successful implementation of the programmable multi-level option, a minimum of one hand-held remote is required

** Must specify color

Lumen Package	Weight
2L, 4L, 6L	11.0 lbs. (5.0kg)
8L	11.8 lbs. (5.4kg)

Product Specifications

CREE TRUEWHITE® TECHNOLOGY

A revolutionary way to generate high-quality white light, Cree TrueWhite® Technology is a patented approach that delivers an exclusive combination of 90+ CRI, beautiful light characteristics and lifelong color consistency, all while maintaining high luminous efficacy – a true no compromise solution.

CONSTRUCTION & MATERIALS

- Slim, low profile design
- Luminaire housing specifically designed for LED applications with advanced LED thermal management and driver
- Luminaire mounting box designed for installation over standard single gang J-Boxes and mud ring single gang J-Boxes
- Luminaire can also be direct mounted to a wall and surface wired
- Secures to wall with four 3/16" (5mm) screws (by others)
- Conduit entry from top, bottom, sides, and rear
- Exclusive Colorfast DeltaGuard® finish features an E-coat epoxy primer with an ultra-durable powder topcoat, providing excellent resistance to corrosion, ultraviolet degradation and abrasion. Silver, black, white and bronze are available
- **Weight:** 2L, 4L, 6L - 11.0 lbs. (5.0kg); 8L - 11.8 lbs. (5.4kg)

ELECTRICAL SYSTEM

- **Input Voltage:** 120-277V or 347-480V, 50/60Hz
- **Power Factor:** > 0.9 at full load
- **Total Harmonic Distortion:** < 20% at full load
- Integral 10kV surge suppression protection standard
- When code dictates fusing, a slow blow fuse or type C/D breaker should be used to address inrush current
- Designed with 0-10V dimming capabilities. Controls by others
- **10V Source Current:** 0.15 mA
- Refer to Dimming spec sheet for details
- **Operating Temperature Range:** -40˚C - +50˚C (-40˚F - +122˚F)

REGULATORY & VOLUNTARY QUALIFICATIONS

- cULus Listed
- Suitable for wet locations
- Designed for downlight applications only
- Enclosure rated IP66 per IEC 60598
- ANSI C136.2 10kV surge protection, tested in accordance with IEEE/ANSI C62.41.2
- Meets FCC Part 15, Subpart B, Class A limits for conducted and radiated emissions
- Luminaire and finish endurance tested to withstand 5,000 hours of elevated ambient salt fog conditions as defined in ASTM Standard B 117
- Meets Buy American requirements within ARRA
- RoHS compliant. Consult factory for additional details
- Dark Sky Friendly, IDA Approved when ordered with 30K CCT. Please refer to https://www.darksky.org/our-work/lighting/lighting-for-industry/fsa/fsa-products/ for most current information
- DLC and DLC Premium qualified versions available. Please refer to https://www.designlights.org/search/ for most current information

40˚C (104˚F)	0.97	0.93	0.91	0.89	0.87

[1] Lumen maintenance values at 25˚C (77˚F) are calculated per IES TM-21 based on IES LM-80 report data for the LED package and in-situ luminaire testing. Luminaire ambient temperature factors (LATF) have been applied to all lumen maintenance factors. Please refer to the Temperature Zone Reference Document for outdoor average nighttime ambient conditions.
[2] In accordance with IES TM-21, Reported values represent interpolated values based on time durations that are up to 6x the tested duration in the IES LM-80 report for the LED.
[3] Estimated values are calculated and represent time durations that exceed the 6x test duration of the LED.

Photometry

All published luminaire photometric testing performed to IES LM-79-08 standards. To obtain an IES file specific to your project consult: http://creelighting.com/products/outdoor/wall-mount/xsp-series-wall

FEATURES & SPECIFICATIONS

INTENDED USE — The 4" Wafer-Thin LED recessed downlight with remote driver box combines high quality light output and efficiency while eliminating the pot light housing for competitive affordability. This innovative wafer-slim Type IC design allows easy installation for new construction or remodel from below the ceiling without the requirement of a pot light housing. The LED module maintains at least 70% light output for 36,000 hours. These LED Wafer downlights are intended for closets, attics, hallways, bathrooms, kitchens, basements, soffits, entry ways, porches, garages, stairwells, corridors, nursing/retirement homes, condos, elevators, apartments, and any other small areas.

CONSTRUCTION — Ideal for shallow ceiling plenum since a pot light housing is NOT required. IC rated driver and fixture - approved for direct contact with insulation. Aluminum die cast outer frame. Durable, powder coat paint to prevent rust. Round fixture with integral edge-lit LED's. Steel spring clip for easy installation. Plenum rated cable connector to connect from module to remote driver box. Isolated driver integrated inside steel remote box with four 7/8" knockouts with slots for pryout. Not suitable for pulling wires.

OPTICS — Wafer-Thin downlight edge-lit LED technology uses light guided plate to distribute light. Polycarbonate lens provides even illumination throughout the space. Utilized 3000K and 4000K color temperature LEDs.

ELECTRICAL — Connect directly to 120V power supply via provided UL recognized driver. High efficient driver with power factor > 0.9. Ambient operating temperature: -40°F (-40°C) to +104°F (+40°C). Dimming down to 10% (See page 2 for recommended dimmers). Standard input wattage is 9.6W, 70 lumens per watt.

LISTINGS — CSA certified to Canadian safety standards. ENERGY STAR® certified. Wet location. Air Tight certified in accordance with ASTM E283-2004.

WARRANTY — 5-year limited warranty. Complete warranty terms located at: www.acuitybrands.com/CustomerResources/Terms_and_conditions.aspx

Note: Actual performance may differ as a result of end-user environment and application.
All values are design or typical values, measured under laboratory conditions at 25 °C.

LED 3000K Outdoor Up & Down Lantern - BKT

11251BKT30 (Textured Black)

Project Name: _____
Location: _____
Type: _____
Qty: _____
Comments: _____

Dimensions

Height	12.00"
Length	6.50"
Width	5.00"

Ordering Information

Product ID	11251BKT30
Finish	Textured Black
Available Finishes	AZT, BKT

Dimensions

Extension	6.50"
Height from center of Wall opening	6.20"
Base Backplate	5.00 X 5.00
Weight	4.10 LBS

Photometrics

Kelvin Temperature	3000K
Color Rendering Index	90

Specifications

Material	Aluminum

Electrical

Voltage	120-277V
Input Voltage	Dual (120/140)

Qualifications

Safety Rated	Wet
Title 24	Yes
Class 2	Yes
Expected Life Span	40000 Hours
Warranty	www.kichler.com/warranty

Primary Lamping

Light Source	LED
Lamp Included	Integrated
# of Bulbs/LED Modules	1
Delivered Lumens	550
Delivered Efficacy	39
Max or Nominal Watt	15W
