The following items are necessary to process your application. If anything is missing, your application will be considered incomplete and will not be processed.

- Date of Application
- Project Address
- Description of Project
- Cost of Project
- Plat of Survey
(indicate location and necessary trenching for installation)
- A copy of the manufacturer's installation instructions submitted with the application for permit.
- One-line diagram of the electrical to include conduit size, type, and conductor information.
- Provide verification from Nicor Gas that current gas service is sufficient for the generator.
- Sign and Date Permit Application

Restrictions

Installation shall meet all the requirements of the 2017 NEC, specifically Art 702, NFPA 37, IRC 2021 and the manufacturer's installation instructions.

For natural gas emergency generators all gas piping (it's size and Type), pressure regulators, drip legs and shutoff valves must be installed in accordance with the International Fuel Gas Code. Shutoffs required within 6'-0" of an appliance and cannot be located inside an exterior wall.

Air exhaust and intake shall meet the requirements of the manufacturer's installation instructions in regards to the distance to building openings (i.e. windows and vents) and combustibles. Any trenching for gas or electric lines will require inspection prior to back fill.

The only times a residential generator may be run for the purpose of weekly exercise is Monday-Friday between the hours of 9:00 am to 4:00pm and when a loss of electricity is experienced due to grid failure. All exposed surface mounted gas piping must be painted to prevent rusting.

If you have any questions, call the building department at (708) 444-5100
