

ComEd vegetation management

Posted: Feb. 8, 2022

ComEd is performing vegetation management activities on distribution circuits in Tinley Park throughout the next few months. These vegetation management activities are a key component of ComEd's maintenance program to ensure system electrical reliability, as vegetation contact with ComEd equipment is a leading cause of outages.

[See a map of the work area.](#)

Qualified line-clearance workers contracted by ComEd will be performing the tree pruning work. Supervisors and general foremen will be in close contact with the crews, ensuring that work is performed properly.

For more information about vegetation maintenance along power lines and ComEd's "Right Tree, Right Place" program, visit the ComEd website or call (800) 334-7661.
