

## **Village to develop community plan**

Posted: July 28, 2023

The Village has started developing a new Comprehensive Plan, a guiding document for a community's long-range development. It's an all-encompassing plan which determines the strengths and challenges of the community and makes recommendations on how the Village may achieve its established vision. It covers a variety of topics including land uses, transportation, economic development, housing and recreation.

The Village's current plan was adopted in 2000 and no longer represents existing community conditions nor encapsulates the current values, priorities or goals of Tinley Park. A new comprehensive plan will establish a framework for important future planning and policy implementation efforts.

Once a firm is selected by the Village Board, the process will include several phases including documenting the existing conditions of Tinley Park, public outreach to ensure the plan is aligned to the community's current residents and businesses, and drafting the different chapters of the plan itself.

There will be several opportunities throughout the course of the project for community participation. To stay aware of each step and how you can participate, watch for updates on the Village's social media and website.
