

Stations to switch to electronic parking

Posted: Oct. 13, 2023

The Village has contracted with Total Parking Solutions to transition from traditional honor-box pay stations to electronic parking meters at the Oak Park Avenue and 80th Avenue train station lots. The changeover is expected to be completed by the spring of 2024 and is a pivotal step toward enhanced efficiency and ease-of-use for residents and visitors.

“This move is really driven by the Village’s commitment to maximizing efficiency and convenience for everyone,” Tinley Park Village Manager Pat Carr said. “The transition will significantly streamline the parking experience, making it simpler and more user-friendly.”

The new meters will accept various payment methods such as coins, credit cards or mobile apps, offering unparalleled convenience to all parkers. The new electronic meters also will require less maintenance, minimizing downtime and ensuring reliability. Real-time data tracking also will allow for better management of parking spaces and resources.

As part of the transition, parking fees will increase from \$1.50 to \$2 starting in the spring.

Established in 2005, Total Parking Solutions, Inc. (TPS) has more than 50 years of experience in the parking industry. TPS has more than 65 municipal, campus and private parking operators utilizing more than 500 pay stations to collect parking and transit fees.
