

WATERBORO ROAD REVIEW COMMITTEE

Mission Statement

It is the intention of the Town, in creating the Waterboro Road Review Committee (WRRC), to establish an advisory group that can receive all requests and suggestions for traffic safety, as well as road maintenance and improvements in the Town of Waterboro, and evaluate and recommend to the Town Administrator and Selectmen various approaches that could be used to create safer and more livable neighborhoods through efforts to reduce speeding and unnecessary traffic on neighborhood roads while maintaining those roads.

All local traffic problems arouse emotions, as do their solutions. It will be the mission of this committee to provide a multi-departmental approach to systematically and logically study conditions and develop possible responses to propose to the Town Administrator and subsequently the Select Board. This Committee is advisory only and will not have responsibility for any operational activities.

Responsibilities and Functions

The WRRC will be responsible for promoting enhanced traffic safety and road maintenance in the town by creating a forum where the residents can voice concerns, suggestions, and requests, work with Town staff to examine alternatives to existing traffic and maintenance situations, and identify long and short term solutions to these issues.

While the Committee does not have the ultimate power to commit Town resources or approve projects, it is the Select Board's intention to support reasonable actions and recommendations of the Committee that are supported by the Town Administrator and department heads of the Town, to the extent that Town bylaws, Town Meeting action, and budgetary limits permit.

The Committee will work with the Town Administrator to develop a set of guidelines to follow for determining the plan of action with regards to these requests, suggestions, or complaints.
