

What can you do to prevent pollution?

- Don't litter!
- Recycle bottles, cans, and cardboard.
- Keep outdoor trash and recycling bins closed when not in use.
- Pick up any trash in the street or neighboring areas.
- Do not overfill bins allowing trash or recycling to reach the storm drain.
- Do not dispose of hazardous waste in your trash or recycling bin. Contact your municipality for disposal options.

Everyone lives on waterfront property!

Only rain should enter storm drains because they discharge to local waterbodies. Pick up trash and don't dump anything down the storm drain.

Help prevent stormwater pollution, don't let any of these get into the storm drain!
