## University Avenue Phase 1 Near Greenhill Road to Evergreen Avenue

### Corridor Enhancements/Descriptions

**Bus Stop:** These include all locations with bus bench (6) or bus shelters (2), and there are eight in Phase 1. The bus stops will be enhanced with Colored Textured or Colored Stamped Concrete, Bus Shelters or Bus Benches, Trash Receptacles and Bike Racks.

**Bus Bench:** There will be six of these in Phase 1 at the intersections of the Frontage Road (Casey's), Sager Avenue and Ansborough Avenue.

**Bus Shelter:** There will be two bus shelters in Phase 1 at the Falls Avenue Intersection.

**Colored Concrete:** On this project, we are using two different colors of concrete, including a brown and dark gray at the crosswalks, medians, sidewalk ramps and bus stops.

**Stamped Concrete:** The stamped concrete will have a surface finish, giving it the appearance of bricks.

**Textured Concrete:** The textured concrete will have a surface finish with lines running in a straight direction, as shown in the plans and on renderings.

**Crosswalks:** This is the area the pedestrians cross the street, and these will be enhanced with Colored Concrete. On this project, we are using two different finishes: Textured Concrete and Stamped Concrete.

**Median:** Area between the eastbound and westbound travel lanes. The areas near the intersections will be enhanced with Median Plantings, and Colored Concrete with Textured or Stamped Concrete.

**Median Plantings:** The plantings shown below will be planted in the median.

**Shared Use Path:** This is the recreational trail that will be constructed on the south side of University Avenue.

**Street Trees:** The corridor will include the planting of street trees along the corridor adjacent to the sidewalk and Shared Use Path.

**Street Lights:** The corridor will include continuous LED street lights adjacent to the corridor to provide lighting for the intersections and roadway.

**Street Signage:** Signage for the vehicular traffic.

## **Future Items**

The design team is reviewing the enhancements listed below for the corridor. These enhancements have not been included in the Phase 1 contract, but will be included in future phases.

**Intersection Markers:** Vertical elements at the intersections along the University Avenue Corridor. The elements include decorative vertical signage and plantings.

**Pedestrian Lighting:** The corridor will include pedestrian lighting in areas where the street lights are not adjacent to the Shared Use Path.

**Wayfinding Signage:** Signage for all users, including pedestrians, bicyclists and vehicular traffic.
