PRESS RELEASE FOR WEDNESDAY, MAY 31, 2023

ALL OF THE CITY OF RAYMOND

The Waterloo Water Works asks the cooperation of all water customers on Thursday, June 1, 2023, to continue the water main flushing program. On Thursday, June 1, 2023, the water mains will be flushed through the entire City of Raymond beginning on Lafayette Street and progressing east through the entire water distribution system.

The water may be a brownish color during and immediately after the flushing. Customers are urged not to plan washday on a Thursday. The discolored water is bacterially safe. The discoloration is caused by the accumulation of minerals on the inside of the water mains. A periodic flushing cleans the mains and helps avoid discolored water problems during normal operation.

Respectfully,

WATERLOO WATER WORKS

Ryan Manahl,
Distribution Department Manager
