

Wyandotte Community Alert Telephone System

The City of Wyandotte is in the process of initiating an emergency telephone notification system. The Community Alert Telephone System uses local telephone number databases for listed phone numbers. If your home phone number is already listed, no further action is necessary. If you have an unlisted telephone number or wish to designate an alternate telephone number the First Call Interactive registration form must be completed or call the below listed number and register the phone number you wish to be contacted in the event of a community emergency. The registration phone call is toll free for members of a community with unlisted phone numbers to call and register to be part of the program. The phone numbers are protected under the normal non-disclosure agreement between First-Call Interactive Network and the City of Wyandotte.
