

Flag Pole Guidelines

If a flag pole is to be installed and if the proposed flag pole is taller than 4', it will be considered an accessory structure subject to setback requirements of the Zoning Ordinance, and will require a building permit.

Guidelines:

1. May be located in front or rear yard.
2. Location shall meet all yard setback requirements.
3. The height of the flag pole shall not be greater than its distance to the nearest property line.
4. Foundation/Footing shall be required - 12"x42" minimum.
5. The flag must not extend into adjacent properties, right-a-ways or easements when fully extended.
6. 10' minimum clearance from all overhead wires shall be maintained.
7. Application must indicate pole diameter, height, composition and location on lot.
8. Rough inspection for lot location and foundation/footing required.
9. Final inspection is required.

The fee will be determined on the cost of the work being performed.
