CITY OF WYANDOTTE, MICHIGAN

Department of Engineering & Building

Gregory J. Mayhew, P.E. City Engineer

Affidavit for Building, Sidewalk, Approaches, and Curb Cut Permits

LOCATION: _____

A bona fide owner may do his/her own work, providing he/she applies for and secures a permit, pay the fee, does the work himself/herself in accordance with the provisions of the codes and rules of the City of Wyandotte, applies for inspections and receives approval of his/her work by the appropriate inspection authority. Failure to comply with these requirements will subject the owners permit to cancellation.

In making the application, I realize I am assuming the responsibility of a licensed contractor for the construction and/or installation of the work mentioned in the permit. I further agree that I shall neither hire any other person for the purpose of constructing and/or installing, nor sub-contract to any other person, firm, or corporation any portion of the construction and/or installation of equipment at the above premises.

I agree to request inspection as required by City Ordinance and Department Rules and to keep all parts of the construction and/or installation exposed until the Department of Engineering and Building has accepted the construction and/or installation as being in compliance with the Code Requirements.

I certify that I will perform the work under the requirements of the above rules governing homeowner's permits.

I further agree to correct all violations and will provide access to the premises between the hours of 9:00 a.m. to 5:00 p.m., Monday through Friday for necessary inspections.

Specifications for City Sidewalks, Driveways and Approaches

A permit is required for the replacement of city sidewalks, driveways, and driveway approaches. A permit is also required for the lifting or "mud-jacking" of sidewalks or approaches. Permit fees are as follows:

- **City Sidewalk** – Minimum fee of \$40.00 for up to 50 lineal feet, then \$1.00 per additional lineal foot.
- **Approaches/Curb Cut** – Minimum fee of \$50.00 up to 12 lineal feet, then \$1.00 per additional lineal foot.
- **Driveway** – Flat fee of \$50.00.

The applicant must be homeowner or licensed contractor. Unlicensed contractors must submit a bond or insurance policy in the amount of \$1,000.00 minimum and subject to the City Attorney.

All sidewalk and driveway aprons removed or damaged during construction operations shall be replaced with concrete in accordance with these specifications.

Sidewalks shall be constructed on a level, compacted subgrade and shall be a minimum 4 inches thick, increasing at driveways to 6 inches for residential and 8 inches for commercial.

The sidewalk subgrade and surface shall slope 1 inch per 5 feet from property side of walk toward street.

Driveway aprons shall be a minimum 6 inches thick for residential and 8 inches thick for commercial.

Driveways must extend 20 feet past the front of the home, not the porch.

It is recommended that the curb be left at least 1½ inches above gutter grade when cut or replaced to allow for future resurfacing.

Residential curb cuts for driveway approaches are limited to a maximum length of 20 feet, all other subject to approval of the City Engineer.

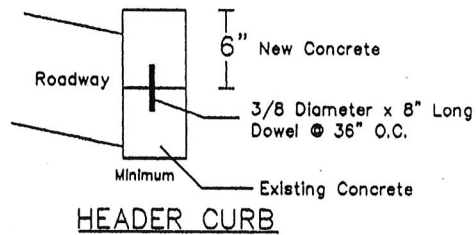

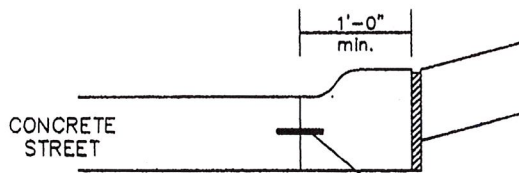

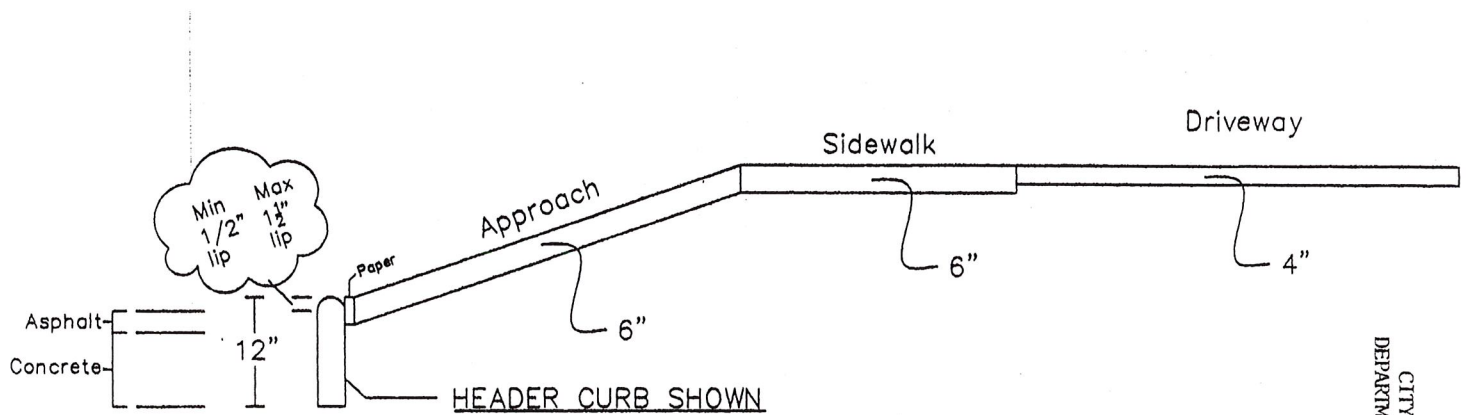

Asphalt approaches and sidewalks **ARE NOT** permitted, only asphalt over a concrete driveway, or an asphalt driveway is permitted.

Concrete shall be of 3500 PSI minimum compressive strength when cured in moist air at 70° F for 28 days.

All slabs shall be edged by a ¼ inch radius edger tool. ½ inch asphalt expansion joints shall be placed not more than 50 feet apart in a continuous length of new sidewalk and between all abutting service walks, drives, approaches, buildings, and curbs.

The Permit Holder shall notify the Department of Engineering and Building for subgrade inspection not less than 24 hours prior to placing concrete. A final inspection is required after all forms have been removed, edges backfilled, and site cleaned up, and upon completion of lifting and filling of any holes used for lifting purposes, with epoxy grout.

Sidewalk shall be lightly textured to create a non-skid finish. Example: Broom finish.

3/8 Diameter x 8" Long Dowel @ 36" O.C.
